PREFACE

ALL forty-five of the items in this volume are documentary, one only from the Ptolemaic period, the rest Roman and Byzantine. Just under half are official, illustrating the government and administration of Egypt (3777-97); the others are private documents, with a preponderance of letters (3806-21). Only a few of the most interesting ones can be mentioned here. Outstanding for its extent alone is the account roll of a part of the Apion estates; it is nearly three metres long in its not quite complete state. It was used first for the annual account of a steward for AD 565/6 (3804) and the back was used later in the estate office for various draft calculations (3805). Many of the individual entries are of interest and 3804 as a whole is the most complete specimen of its kind, instructive for monetary and metrological matters and for the rigid system of accounting. The letter of a prefect of Egypt announcing the accession of Hadrian is dated only fourteen days after his *dies imperii*, which graphically illustrates his hasty assumption of power without authorization from the Roman senate (3781). The orderly list of Egyptian month names as revised under Gaius brings a simple certainty to the calendar of his reign, hitherto much argued (3780). The eminent Persian with the name or title of Saralaneozan makes another appearance in 3797, a receipt for payments in gold for Oxyrhynchus and Cynopolis. A contract acknowledging the return of a loan illuminates the legalities affecting the families of auxiliary veterans (3798). Among the private letters 3812 stands out for its allusions to the celebration of the Roman New Year under the simplified name of the Calends, without naming the month.

About twenty of the texts were taken to Warsaw in summer 1975 and studied with the members of a seminar there. Dr Krzysztof Winnicki produced a typescript of 3799 and Dr Adam Łukaszewicz undertook four other items, 3778-9, 3782, and 3784. These have been revised to bring them up to date by Dr Rea, who has edited all the other documents in the volume and compiled the indexes.

It is a pleasure to acknowledge again the skill of the Oxford University Press, which has worked its usual miracle in giving this difficult material a clear and agreeable presentation.

NOTE ON THE METHOD OF PUBLICATION AND ABBREVIATIONS

THE method of publication follows that adopted in Part XLV. As there, the dots indicating letters unread and, within square brackets, the estimated number of letters lost are printed slightly below the line. The texts are printed in modern form, with accents and punctuation, the lectional signs occurring in the papyri being noted in the *apparatus criticus* where also faults of orthography, etc., are corrected. Iota adscript is printed where written, otherwise iota subscript is used. Square brackets [] indicate a lacuna, round brackets () the resolution of a symbol or abbreviation, angular brackets <> a mistaken omission in the original, braces {} a superfluous letter or letters, double square brackets [[]] a deletion, the signs ^ an insertion above the line. Dots within brackets represent the estimated number of letters lost or deleted, dots outside brackets mutilated or otherwise illegible letters. Dots under letters indicate that the reading is doubtful. Lastly, heavy arabic numerals refer to Oxyrhynchus papyri printed in this and preceding volumes, ordinary numerals to lines, small roman numerals to columns.

The use of arrows (→, ↓) to indicate the direction of the fibres in relation to the writing has been abandoned for reasons put forward by E. G. Turner, 'The Terms Recto and Verso' (*Actes du XV^e Congrès International de Papyrologie I: Papyrologica Bruxellensia* 16 (1978) 64-5), except when they serve to distinguish the two sides of a page in a papyrus codex. In this volume most texts appear to accord with normal practice in being written parallel with the fibres on sheets of papyrus cut from the manufacturer's roll. Any departures from this practice which have been detected are described in the introductions to the relevant items.

The abbreviations used are in the main identical with those in J. F. Oates *et al.*, *Checklist of Editions of Greek Papyri and Ostraca*, 3rd edn. (*BASP* Suppl. No. 4, 1985). It is hoped that any new ones will be self-explanatory.

3040 7. For τ[ρ]ιακοσίας read τ[ρ]ιακοσίας. LV 3789 introd., note (7) to Table.
3042 1. For ἐπικεφαλαίου read ἐπικεφαλίου. LV 3789 1 n.
3047. J. L. Rowlandson, *ZPE* 67 (1987) 283-92.
3054. M. Sartre, *Syria* 59 (1982) 77-91.
3057. G. R. Stanton, *ZPE* 54 (1984) 49-63.
3060 3. For Σπανήν read σπανήν, and in the translation for 'Spanish' read 'grey-black'.
- XLIII 3092 5 n. (p. 12 n. 1), cf. D. W. Rathbone, *ZPE* 62 (1986) 105 (note 2), on the dating of the end of the recognition of Caracalla in Egypt, and the anomaly of O. Deissm. 79, then not located. Most of the ostraca of the Deissmann collection are now at the Nicholson Museum, University of Sydney, New South Wales 2006, Australia, see S. R. Pickering, *Papyrus Editions: Supplement* (1985) p. 10 s.v. P. Meyer.
* O. Deissm. 79 (P. Meyer p. 200) now has the museum inventory number 36.74. Through the kindness of Mr Pickering and Mr Ted Robinson of the Nicholson Museum, who supplied a photograph, it has been possible to confirm the suggestion that the reign is that of Commodus, not Caracalla, i.e. in line 2 read Κομμόδου (instead of Μάρκου) Αντωνίνου Καίσαρος, cf. P. Bureth, *Les titulatures* 88. The date Φαῶφι θ' τοῦ κς (ἔτους) is therefore equivalent to 16(?) October 185 (not 217), and the anomaly is removed. (J. R. Rea.)
- 3109 23-4. H.-G. Pflaum, *Les Carrières, Suppl.* (1982) 97, No. 353A. (This item contradicts my note by assigning the activity of M. Antonius Vitellianus in S. Italy to a period before his epistrategiate, i.e. c.250. I had followed Pflaum iii p. 1041, where the Italian post is said to be centenarian, and p. 1090, where the epistrategiate of the Heptanomia is said to be sexagenarian. J. R. Rea.)
3112. M. Sordi, *Studi . . . A. Adriani* i 40 n. 9, 41 n. 16.
3116. P. Frisch, *Zehn Agonistische Papyri* No. 10.
3119. M. Sordi, *Studi . . . A. Adriani* i 40 n. 9, 42 n. 17.
3121. J. R. Rea, *ZPE* 62 (1986) 79-80.
3129. Dr J. D. Thomas has given reason to think that at the date of this papyrus, AD 335, the official term for the new style of strategus was *exactor* and that therefore the readings ετρ. [(1) and ε[τ]ρ[α]τηγῶ (11) in this letter should be revised, see *CR* 91 NS 27 (1977) 89 (BL VII 157).
He suggested that the official might be a syndic. A new examination has confirmed this in full, with the discovery that the name which I read on the back, *Κυνεσίω* (11), is a false reading of *κυνδίκω*! In line 1 read now, therefore, *επ[ι]δίκω*, which fully agrees with the traces, in place of ετρ. [.
- There is a minor residual problem in the reading of the address on the back, originally given in the form (11-12):

Κυνεσίω ε[τ]ρ[α]τηγῶ
Ὀξ[υ]ρρυχίτου.

After *κυνδίκω*, replacing *Κυνεσίω*, the traces on the same level can now be seen to suit 'Ὀξ[υ]ρρυχίτου. A point of ink low down on the right especially suits xi. Nothing more is needed, but there are still traces in line 12 to be explained. They are badly damaged feet of letters only, but they still look most like οξ[ι], although Dr Coles pointed out to me that 'Ὀξυρρυχίτου had been written again in full, we would expect to see further traces of at least the rho. He suggests that the abbreviated form οξ[ι]' may have been written here because this would have fallen opposite the proper address on the other side of the flat spill into which the letter was folded and might have helped to identify it more easily at some stage of its journey.

To sum up: read 1-2 as:

Φλάουιος Φιλάργιος επ[ι]δίκω
Ὀξυρρυχ[ε]ίτου χαίρ[ε]ω,

and 11-12 as: *κυνδίκω* 'Ὀξ[υ]ρρυχίτου

..[.

with the note: 'in 12 οξ[ι] = 'Ὀξ[υ]ρρυχίτου may have been written (R. A. Coles)'. (J. R. Rea.)

- 3138 2 n. Add M. Speidel, *Aegyptus* 66 (1986) 163-5.
3141 = C.P.Gr.II No. 81
3144 1-2 n. The note is mistaken because PSI IX 1038 = P. Sakaon 6 of 28 July is five days later than 3144 and still makes use of the name of Maximinus Daia.
- XLIV 3168 12. On *Τεχόμεω*(c)—not *Τεχόμεω*(c)—see W. Brashear, *ZPE* 60 (1985) 239.
3169 48, 58. For κλ(ηρονόμου) *Κεουήρου* read *Κλ(αυδίου) Κεουήρου*, cf. P. Köln III 143.11, 15. (J. L. Rowlandson).
3171. G. Messeri, *Anagennesis* 4 (1986) 59-62.
3189 5-6. For *Εὐτρυνίου* read *Εὐτονίου*. LIV p. 226.
3194 16. For τῶ δ[η]μ(οσίω) *τ[ρ]α(πεζίτη)* read e.g. *δ[η]μ(οσίω) χρ[η]μ(άτων) τ[ρ]α(πεζίτη)*. J. D. Thomas, *YCS* 28 (1985) 119. (I think τῶ δ[η]μ(οσίω) *χρ(ημάτων) τ[ρ]α(πεζίτη)* is consistent with the very faded remains: *χρ[η]μ* and *τ[ρ]μ* seem fairly recognizable, τῶ δ[η]μ[ς] (?) acceptable in the context. J. R. Rea.)
3204. J. Gascou, *Travaux et Mémoires* 9 (1985) 77-8.
XLV 3211. T. F. Brunner, *ZPE* 66 (1986) 296.
3245. P. Roesch, see above under III 475.

I. OFFICIAL DOCUMENTS

3777. SWORN CESSION OF CATOECIC LAND

38 3B.81/C(1-3)c

14 × 28.5 cm

2-31 August 57 BC

As its contribution to chronology this papyrus shows that by some date in the period 2-31 August 57 BC Berenice IV was reigning alone after the death of her colleague Cleopatra Tryphaena, see 1-3 n.

The text is a sworn undertaking by Straton son of Nicomachus to abide by the cession of five aruras of catoecic land from his allotment near Peenno to one Theon, whose patronymic is still unread. For the background to such transactions see XLIX 3482 introd. That document is also the best parallel, but there are differences which seem to indicate a different procedure or a different part of the same procedure. 3482 of 73 BC has a heading and date-clause of a similar type (1-3); there follows the cession-contract (3-27), which is not in 3777, and then, after a blank space, the oath (28-39), which is very similar to the body of 3777. Both documents have subscriptions, but they are of different types: 3482 40 is badly damaged, but is clearly an official docket of some kind; 3777 27-8, in a second hand, form the subscription of Straton himself declaring that he swore the preceding oath.

On the left-hand edge of 3777 near the foot there are small traces of the ends of lines, nowhere legible for certain. The last one, opposite the first line of the subscription, looks like]ε and looks as if it might be in the same darker ink and thicker pen as the subscription (27-8); it might be possible to recognize there προγ]ε[γραμμένον as in 27-8. The other traces are somewhat higher, opposite lines 21-5, and fainter. I have not been able to recognize any letter for certain, but it is a possibility that duplicate copies of the sworn undertaking were written side by side and that the division of the sheet was done carelessly so as to trim some letters off the left-hand copy. However, I have not succeeded in making the traces match the extant copy. One alternative might be to suppose that there was a copy of the cession-contract on the left of the oath. In spite of the differences, which remain inexplicable for the moment, it is clear that the transactions of 3777 and 3482 were very similar.

There is a sheet-join *c.* 5 cm from the left edge. The back is blank.

βασιλευούσης Βερε]νίκης θεᾶς Ἐπιφανούς ἔτους
 πρώτου, τὰ δ' ἄλλα τῶν] κοινῶν ὡς ἐν Ἀλεξανδρείᾳ γράφεται,
 μηνὸς Ὑπερβερεταίου]υ καὶ Μεσορῆ (vac.)

 βασιλικὸν καὶ ἐνοχον εἶναι τῶν ὄρκων.
 (vac.)
 (m. 2) Στράτων ὀμώμοκα τὸν προγε-
 γραμμένον ὄρκον.

'In the first year of the reign of Berenice, Goddess Manifest, and the rest of the customary formulas as written in Alexandria, month of Hyperberetaeus and Mesore (vac.), in the city of the Oxyrhynchi of the Thebaid.'

'I, Straton son of Nicomachus, . . ., one of the queen's first friends and chiliarchs of swordbearers, one of the settler cavalrymen, swear by queen Berenice, Goddess Manifest, and by her ancestors, and by all the other gods, to Theon son of . . ., Persian, one of the settler cavalrymen and successor to his father's allotment, both of the street of Cleopatra Aphrodite, that I will abide in all respects by the provisions of the contract of agreement which I have made with you through the record-office of the remembrancers in

the city of the Oxyrhynchi on the present day, according to which I have ceded to you from my allotment the five aruras by rectangular measurement of wheat-bearing sowable land which I hold from the allotment of Phaenippus near the village of Peenno, the boundaries of which are specified in the agreement, and that I, Straton, will practise no fraud in respect of the cession of the land or in respect of any other of the matters proclaimed in the agreement or in respect of this oath on any pretext. Otherwise(?) . . ., and whenever I am brought to account (by you or your representatives?), apart from the fact that the cession of the land shall remain valid for you, as indeed it is, I concede too that my allotment shall be forfeit to the royal treasury and that I shall be liable to (the penalty of) the oath.'

(2nd hand) 'I, Straton, have sworn the above-written oath.'

1-3 The chronology of this period has been best treated by T. C. Skeat, *The Reigns of the Ptolemies*, 37-40. Ptolemy Auletes left Egypt to seek help from Rome sometime in 58 BC. His daughter Berenice IV and another queen, Cleopatra Tryphaena, reigned together for a while, but the only allusion to them in the papyri is BGU VIII 1762.4-5, a mere undated reference to two queens. Tryphaena died and Berenice reigned alone for a time. It is to this stage that our papyrus belongs and the date of it must be Mesore of her first year, that is, in the period 2-31 August, 57 BC. BGU VIII 1757 and 1821, which have no titlature, are assigned by Skeat (pp. 38-9) to the period of Berenice's rule for good reasons relating to the succession of strategi in the Heracleopolite nome. The first, dated year 1, Gorpiaeus 9 = Epeiph 9 = 11 July, 57 BC, may, since there is no titlature, date from her joint rule with Tryphaena. The second, referring to year 2, Choac 27 = 31 December, 57 BC, dates from after 3777 and therefore must come from her sole rule. W. Chr. 70 and SB III 6156, comprising three inscriptions with the same text, contain a petition addressed to Berenice alone dated year 2, Phaophi 17 = 13 October, 57 BC, and an order to carry out Berenice's wishes in the matter dated year 2, Phamenoth 3 = 7 March, 56 BC, on which date she was evidently still ruling alone. Subsequently she married and ruled with one Archelaus, whose name does not appear in the papyri. However, three documents which are dated by 'year 2 which is also year 1' are assigned plausibly to this joint reign, namely P. Grenf. II 38, O. Tait I Petrie 52 (p. 84), and P. Tebt. I 202. These would then date from 16 April, 27 June, and 25 August respectively, all of 56 BC. Probably, therefore, the marriage to Archelaus will have taken place between 7 March and 16 April, 56 BC.¹ A demotic document, O. Berl. 6179 (G. Mattha, *Demotic Documents* (Publications de la Société Fouad I de Papyrologie: Textes et Documents VI), p. 193 No. 268A), dated year 2 and 1, Epeiph 11 = 13 July, 56 BC, fits into this series and shows Archelaus ruling with Berenice on this date. The restoration of Auletes took place in spring 55 BC, so that in Mesore of Berenice's second year she was still associated with Archelaus, see P. Tebt. I 202, and by what would have been Mesore of her third year she was already deposed and dead.

Mention should also be made of the other demotic document dating from the reign of Berenice cited by P. W. Pestman, *Chronologie égyptienne d'après les textes démotiques* (Pap. Lugd. Bat. XV), 80-1, namely P. Louvre 3452 (G. Legrain, *Livre des transformations*, Pl. XIV), containing a colophon which simply equates year 2 of an unnamed queen, evidently Berenice IV, with year 25 of an unnamed king, evidently Ptolemy Auletes, dating the composition of the manuscript to 57/6 BC. Dr Mark Smith, to whom I am grateful for advice on both demotic texts, informs me that it is not surprising that an Upper Egyptian scribe should take a comparatively detached view of the dynastic struggles in the north of the country. He gave Berenice the precedence, but included the regnal year of her father. He gave no sign of having heard of Archelaus and therefore may well have been writing before the date of Berenice's marriage, which, as we have seen, took place between 7 March and 16 April, 56 BC.

Unfortunately there is an erroneous figure in Skeat's table of regnal years on p. 17. In the last line of the entry relating to regnal year 24 of Auletes we should read 'before 9 Epeiph = 11 July 57' (not 58). The error is repeated in the first line of the entry for year 1 of Berenice just below, where read 'bcf. 9 Epeiph = 11 July 57' (not 58). This date derives from BGU VIII 1757, see above and Skeat, p. 39.

¹ There is some doubt about the date of this document, in which the month-name begins Φα-. This is followed by remains with a horizontal mark of abbreviation above them and then by the day number ιγ = 13, see P. Grenf. II Pl. IV (opp. p. 23). Therefore, although the editor's version Φαφ[μο]ῖ(θ)ι ιγ = 16 April is generally accepted and Phaophi 13 is quite excluded by W. Chr. 70 and SB III 6156, Phamenoth 13 = 17 March may still be a possibility. There are no others, so although the marriage might possibly have taken place between 7 and 17 March, we will still be quite safe in saying that it must have taken place by 16 April, 56 BC.

In view of the complications it may be best to conclude with a table of all the documents at present considered to refer to the reign of Berenice:

Document	Date clause	Julian date
BGU VIII 1757	Year 1, Gorpiaeus 9 = Epeiph 9 (Berenice alone or with Cleopatra Tryphaena)	11 July, 57 BC
3777	Year [1] Berenice alone, [Hyperberetaeus] = Mesore (no day)	2-31 August, 57 BC
W. Chr. 70.28 and SB III 6156.38	Year 2, Phaophi 17 (2 Berenice: addressed to her)	13 October, 57 BC
BGU VIII 1821	Year 2, Choac 27 (2 Berenice; a retrospective date)	31 December, 57 BC
W. Chr. 70.6 and SB III 6156.7	Year 2, Phamenoth 3 (2 Berenice)	7 March, 56 BC
P. Grenf. II 38	Year 2 which is also 1 (2 Berenice, 1 Archelaus), Pharmuthi(?) 13	(possibly 17 March, but probably) 16 April, 56 BC
O. Tait I Petrie 52 (p. 84)	Year 2 which is also 1 (2 Berenice, 1 Archelaus), Paymi 25	27 June, 56 BC
O. Berl. 6179 (G. Mattha, <i>Demotic Documents</i> , 268A)	Year 2 which is also 1 (2 Berenice, 1 Archelaus) Epeiph 11	13 July, 56 BC
P. Tebt. I 202	Year 2 which is also 1 (2 Berenice, 1 Archelaus), Mesore 24	25 August, 56 BC

A. Samuel, *Ptolemaic Chronology*, 155-6, has drawn attention to hieroglyphic inscriptions on the temple of Edfu dated by year 25 of Auletes and to two Greek inscriptions from Philae dated to a year 25 and sometimes assigned to the reign of Auletes. He adds, 'It may be that the reign of the children of Auletes was never known or recognized there'. The Louvre demotic papyrus shows that it was known and recognized in the south of the country to some extent. W. Dittenberger, *OGIS* i p. 271, followed by W. Peremans and E. Van't Dack, *Prosopographia Ptolemaica* i 6 (no. 35 Castor *πρὸς τῷ ἰδίῳ λόγῳ*), allows the possibility that the 25th year of the inscriptions from Philae (*OGIS* i 188-9) may be of the reign of Ptolemy X Alexander and the date therefore 5 (or 9) July, 89 BC. The earlier date is also favoured in the more recent literature, see E. Bernard, *Inscriptions Grecques d'Égypte et de Nubie* (Répertoire bibliographique des *OGIS*, 1982) 36 no. 188.

Two of the hieroglyphic inscriptions of Edfu are relevant, firstly one which records a dedication of doors on 1 Choac of a 25th year, where the king's cartouche is left blank (E. Chassinat, *Temple d'Edfu* v 304-5), secondly one which records the same event, it appears, in Choac of an unspecified year and mentions also Ptolemy Auletes and Cleopatra Tryphaena, see *ibid.* viii 58 continued in viii 30. On these inscriptions see most lately S. Cauville and D. Devauchelle, *Rev. d'Ég.* 35 (1984) 53-4, cf. J. Dümichen, *ZAS* 8 (1870) 11-13 (no. xvi), *id.*, *Altägypt. Tempelinschriften* i Taff. cxi, cxii. Combining the information we seem to have a date of 5 December, 57 BC given by regnal year 25 of Auletes and of his sister and wife Cleopatra Tryphaena, who figures regularly alongside Auletes for the ten years 79-69 BC and then disappears apart from this isolated allusion. A. Bouché-Leclercq, *Histoire des Lagides* ii 145-6 n. 1, has suggested that

the Cleopatra Tryphaena who ruled with Berenice IV according to the Syriac text of a fragment of Porphyry (fr. 2.(14), F. Jacoby, *FGH* IIB no. 260, p. 1202, cf. *ibid.* 854-9) was in fact her mother, emerged from some long-standing obscurity, and not her sister as Porphyry says.

What precisely the Edfu inscriptions imply about the history of the period is not yet clear. For the moment we cannot account for them easily. The temptation to regard them as eccentric is increased by the presence on the temple of an inscription which seems to give a precise date of 5 July, 28 BC by regnal year 53 of Auletes, thus ignoring the reigns of Augustus, in whose term it falls, and of the intervening rulers of the country, see S. Cauville and D. Devauchelle, *Rev. d'Ég.* 35 (1984) 54-5.

Again I am grateful to Dr Mark Smith for his guidance among the Edfu inscriptions.

(Addendum: Professor Jan Quaegebeur has now given a new and somewhat different account of these Edfu inscriptions and their associated reliefs in a paper entitled 'Une scène historique méconnue au grand temple d'Edfu', delivered to an international colloquium 'Egitto e Storia Antica' (Bologna 31 agosto-2 settembre 1987). It will be printed in the proceedings of the colloquium. He thinks that most probably the decoration with the anonymous queen dates from about 69/8 BC, just about the time when Cleopatra Tryphaena disappears from the protocols. On that view these inscriptions have no relevance to the reign of Berenice IV. The 25th year refers perhaps to the reign of Ptolemy X Alexander (90/89 BC).

He and Dr Mark Smith have drawn my attention to H. J. Thissen, *ZPE* 27 (1977) 182-4, according to which a demotic graffito from Medinet Habu gives a date of 4 January, 55 BC by reference to year 26 of a Ptolemy and year 3 of a Cleopatra (not Berenice). For the moment I see no way of reconciling this with the other evidence.)

Finally it should be mentioned that an attempt has been made to assign P. Grenf. II 38 and P. Tebt. I 202 to a joint reign of Cleopatra VII and Ptolemy XIV, see L. M. Ricketts, *BASP* 16 (1979) 213-17, esp. 215-16. This hypothesis rests on some very uncertain readings in P. Bon. 10, see G. Geraci, *La Genesi della Provincia Romana d'Égitto* 23-4.

3 The day number has not been entered.

7 An ethnic remains unread at the beginning of the line. Because of the damage at this point and the general irregularity of the hand I am unable to read any letter for certain, but a good guess could probably be verified and a bad one excluded. It is not *Μακεδών* for instance.

7-8 On the court titles see L. Mooren, *La Hiérarchie de cour*, 172-3, 214; *id.*, *Aulic Titulature in Egypt*, 17, 173-4.

8 There are substantial remains of the patronymic. It is the irregularity of the hand as much as the damage which makes it difficult to recognize the letters.

9 *Π[έ]ρση*. I believe that *Π[ρο]νσιεῖ* can be excluded. The ethnic 'Persian' is usually taken to be fictitious, although views differ about the detail, see the summary by J. Méléze-Modrzejewski, *REG* 96 (1983) 260-2.

9-10 It is not clear whether the phrase 'successor to his father's allotment' means that he had succeeded or was to succeed to it. Such succession was normal, see the succinct account in N. Lewis, *Greeks in Ptolemaic Egypt* 32-5.

10 *οἱ δῦο*. This is common form, in spite of the grammatical oddity. Cf. XLIX 3482 4 n. *ἀγνιάς Κλεοπάτρας Ἀφροδίτης*. Cf. 3482 4 n.

13 *μνημόνων*. Cf. 3482 32. This confirms the suggestion in the note there that *μνημόνων* is an alternative to the *ἀγορανόμων* of the restored text. Cf. H. J. Wolff, *Das Recht d. gr. Papyri Ägypten* ii 25-7.

22-3 The parallels 3482 and P. Fouad I 38 have different formulas, each beginning *ἐὰν δὲ μὴ ποιῶ κατὰ τὰ προγεγραμμένα*, which is already too long for this gap. Here the most likely line seems to be to restore *ἐὰν δ[ὲ] μὴ*, elliptically, cf. E. Mayser, *Grammatik* ii.3 pp. 7-8, followed immediately by the apodosis, *οὐδένα* (or *οὐδέν* or *οὐδεμίαν*) . . . *τρον ἔξω*, 'Otherwise, I shall have no . . .'. The missing noun would mean something like 'immunity' or 'means of escape', but I have not thought of a suitable one. The gap in 23 could be easily filled by *ὑπὸ τοῦ ἡ τῶν παρὰ τοῦ*, 'but when I am called to account by you or your representatives'.

3778-3779. REGISTRATIONS OF SHEEP AND GOATS

The most thorough study of such returns can be found in S. Avogadro, 'Le *ΑΠΟΓΡΑΦΑΙ* di proprietà nell'Égitto greco-romano', *Aegyptus* 15 (1935) 131-206.

Recently the subject has been discussed by D. Hagedorn, 'Zum Formular der Kleinviehdeklarationen', *ZPE* 21 (1976) 159-65. See also P. Phil. 8 introd. and S. L. Wallace, *Taxation in Egypt* 82-6. The latest list of registrations of sheep and goats appears in P. Heid. IV 302 introd., to which BGU XV 2489 (cf. 2490) can be added, as well as 3778-9. Compare too 3782, which has features unusual for the type. Of special relevance to these two is the study of the Oxyrhynchite examples from the reigns of Tiberius and Gaius by C. Balconi, *Aegyptus* 64 (1984) 35-60.

3778.

38 3B.81/B(12-13)a

7.5 × 37 cm

28 January 21

This is a collective return, closely parallel to P. Berl. Möller 7, where there are nine or more declarants, cf. Balconi, loc. cit. 43. The formula follows in the main the pattern of II 245.

The text does not include any indication that the declarants were a formal corporation of *προβατοκτηνοτρόφοι*, cf. *Aegyptus* 15 (1935) 164-5; 64 (1984) 43, P. Berl. Möller 7, commentary p. 61.

The back is blank.

(1st hand) 'Talao.'

(2nd hand) 'To Hierax strategus from Demetrius and Dorus both sons of Apion, and Ammonius son of Heraclius, and Ptolion son of Ptolion, and Ptolion son of Nechtatymis, and Apollonius son of Demetrius.

We register for the present 7th year of Tiberius Caesar Augustus the sheep which belong to us: thirteen sheep of Demetrius, ten sheep of Dorus, sixteen sheep and one goat of Ammonius, twenty-one sheep and one goat of Ptolion, twelve sheep and one goat of Ptolion son of Nechtatymis, six sheep of Apollonius, total 78 sheep, 3 goats, and the lambs and kids accompanying, (all) mixed together, which will graze in the neighbourhood of Talao in the Lower toparchy and throughout the entire nome, the shepherd being Apion son of Lycomedes, registered at (near?) the same village, and for which we will also pay the proper tax. Farewell.'

(3rd hand) 'I, Apollonius(?), toparch, have certified seventy-eight sheep and three goats, total 78 sheep, 3 goats. Year 7 of Tiberius Caesar Augustus, Mecheir 3.'

1 For this type of docket see Balconi, *Aegyptus* 64 (1984) 41-2. The place name is elsewhere followed by the totals of animals declared.

2 For Hierax see G. Bastianini, J. E. G. Whitehorne, *Strategi and Royal Scribes* (Pap. Flor. XV) 86, and **3779** 2. The new documents do not extend his known term of office. All the documents from which he is known are of this same type.

8-9 *Νεχτατύμιος*, cf. 21. Compare *Νεκταθύμιος* and *Νεχθαθύμιος* in P. Tebt. III 814.5, 12, 23, 32, 37, and perhaps in P. Tebt. III 770.5 (3rd cent. BC), *Νεχθατύμιος* in O. Bodl. II 1650.6; cf. 1249.6; 1253.6 (2nd cent AD).

24 For similar abbreviations (difficult to print) cf. *Aegyptus* 64 (1984) 50 n. 13; 53 n. 7, with the plates.

25-6 For the meaning of *επακολουθέω* see *Aegyptus* 15 (1935) 171, CPJ III 482 (= II **353**). 9-10 n., and Pap. Lugd. Bat. XIX 8.1-2 n.

26 *ἀρνας ἐρίφους*. This asyndeton is common form, cf. XXXVIII **2850** 10; P. Berl. Möller 7.14; CPJ III 482 (= II **353**). 10-11; P. IFAO I 5.9-10; Pap. Lugd. Bat. XIX 8.2-3.

26-7 *ἐπιμεμειγμένα ἀλλήλοις*. Animals of several owners are in the charge of one shepherd, see *Aegyptus* 64 (1984) 40.

32 *Λυκομήδου<ς>*. For uncertainty in this declension see F. T. Gignac, *Grammar* ii 69-70.

33 In this context *λαογραφομένου* is followed by *εἰς* or *περὶ*, cf. **3779** 19 n. I doubt if a distinction is intended.

35-6 *τὸ καθήκον τέλος*. For the tax on sheep see S. L. Wallace, *Taxation in Egypt* 86-8; S. Avogadro, *Aegyptus* 14 (1934) 293-7; cf. below **3779** 8 n.

36 *ἐντήχ(ει)*. This word is a standard part of the formula, see *Aegyptus* 64 (1984) 40. Here it is very rapidly written.

37 *Ἀπολ()*. Expand probably to *Ἀπολλώνιος*. In II **356** (AD 27), which is a similar return, we find the signature of a toparch called Apollonius, see *Aegyptus* 64 (1984) 54 and Tav. III. The toparchy is the same. The hand is not obviously the same, but the interval is six years. In II **350** 16 (*Aegyptus* 64 (1984) 52 and Tav. II) the name of the toparch of the same area for AD 23 or 25 has been read as *Ἀντω*, [*Ἀππολλω*, [is perhaps a possibility, although it would be very hastily written. The hand seems different again. No conclusion seems possible.

40 All declarations of this type and period fall in late Tybi or early Mecheir, see *Aegyptus* 64 (1984) 47.

...
(2nd hand) 'To Hierax strategus from Petosiris and . . . , both sons of Petosorapis, and Petsiris son of . . . from the village of Tychin . . . of the Lower toparchy. We register for the pasture tax of the present 7th year of Tiberius Caesar Augustus the sheep belonging to each: Petosiris (registers) fifty(-five or -nine) sheep, three goats; . . . twelve sheep, one goat; Petsiris eight sheep, of which the total is 75 (or 79) sheep, 4 goats, and the lambs and kids accompanying, which will graze . . . (3rd hand) and throughout the entire nome, the shepherd being Hergeus son of Paysiris (from the?) same village, registered for poll-tax, and for which we will also pay the proper pasture tax.'

(4th hand) 'I, Sarapion toparch, have certified seventy(-five or -nine) sheep and four goats, total 75 (or 79) sheep, 4 goats. Year 7 of Tiberius Caesar Augustus, . . .'

1 θ[: perhaps an item number, i.e. 9, cf. *Aegyptus* 64 (1984) 40-1. Another possibility is that it is a village name, cf. **3778** 1, although it is not the expected one, which was named in 6. It could be surmised that the one in 6 was a small place within the sphere of influence of the larger village of Tholthis (Lower), cf. P. Pruneti, *Centri abitati*, 58-9, but the name of the toparch suggests rather a connection with the Western toparchy, see 23 n. There is as yet no known village in it with a name beginning with theta, see Pruneti, op. cit. 236, but nevertheless this seems most likely to be the name of a village of the Western toparchy.

2 For the strategus see **3778** 2 n.

6 *Τυχιναφάγων* or *Τυχιναφάβω*, both in the Lower toparchy, would fit equally well, although the former is much better attested, see P. Pruneti, *Centri abitati*, 211.

8 For *ἐννόμιον*, cf. 22, mentioned in returns of livestock cf. P. IFAO I 5.2 (8-7 BC); P. Amh. II 73.7 (AD 129/30). The editor of P. Berl. Möller 7, commentary p. 61, identifies it with τὸ καθήκον τέλος; cf. P. Princ. II 24, commentary p. 14; Pap. Lugd. Bat. XIX 8, p. 68. The nature of it is discussed by S. Avogadro, *Aegyptus* 14 (1934) 293-7; S. L. Wallace, *Taxation in Egypt*, 79 n. 7 (p. 385) and 86-8; cf. also WO I pp. 191-2, A. C. Johnson, *Roman Egypt*, 561, 569, and O. Leid. 41 introd.

10 τὰ ὑπάρχοντα ἐκάστῳ. Cf. II 245 8-9, and the remark of Avogadro, *Aegyptus* 15 (1935) 165. Sigma appears to have been corrected. Perhaps the clerk began to write ἐκατέρῳ and then caught his mistake.

13 Πετρίρις. Cf. 5.

14 φν does not conform to the usual formulas. The remains here will not suit any form of γίνονται. This reading, however, remains doubtful.

15 The total of sheep is either οε or οθ; in 11 restore πενήκ[οντα πέντε or π. ἐννέα. The numbers of goats in 12, 13, and 25 seem to be satisfactory in spite of damage in two of these places.

17 At the end of the line space seems short for a mention of the village named in 6, [περὶ Τυχοφάγων or the like. Probably we need the name of a village of the Western toparchy, see 23 n., perhaps one beginning with theta, see 1 n.

18 In the margin at the level of 18 is a symbol or abbreviation of unknown meaning. The strokes are thicker than those in the main text and look as if they come from another hand. The reading τρ(παρχ-) is a possibility, in which case one might imagine that the name of the toparchy had been first omitted and then added, e.g. [περὶ (village) 'τῆς ἀπηλιώτου']¹⁸ τρ(παρχίας) κτλ., cf. 3778 28-9.

19 We would expect here either λαογραφουμένου εἰς τὴν αὐτὴν κώμην, cf. P. Berl. Möller 7.20; II 245, 350, or λ. περὶ τὴν κτλ., cf. P. Princ. II 24.18; II 353; XXXVIII 2850 17, 3778 33; SB XII 10795.16; P. IFAO III 43.19. It seems, however, that the genitive in 20 is certain, and the order of words shows that a different formulation was used here.

22 Since the *ἐννόμιον* is likely to be identical with the καθήκον τέλος, cf. 8 n., we would expect that the return was written in Tybi or Mecheir. Already the Revenue Law of Ptolemy Philadelphus (P. Rev. frag. 6c) mentions *ἐννόμιον* in Mecheir, cf. *Aegyptus* 15 (1935) 185 n. 2. On the other hand Avogadro, *Aegyptus* 14 (1934) 295, points out that in the Ptolemaic period special registration for the *ἐννόμιον* was prescribed by the dioecetes in the month of Mesore, cf. P. Tebt. III (1) 703.165 (III/II cent. BC). The editor of P. Berl. Möller 7, commentary pp. 61-2, concludes, 'Die Entrichtung des τέλος erfolgt wohl also erst nach dem Ende der Weidezeit (vgl. auch das Fut. ταξόμεθα). . . . lässt sich aber kein Schluss über die Dauer der Weide im oxyrhynchitischen Gau gewinnen', cf. M. Schnebel, *Landwirtschaft*, 342 ff.

23 A toparch called Sarapion is known to us from other documents, cf. P. Princ. II 24; II 245; SB XII 10795 (= P. Yale Inv. 42, *BASP* 8 (1971) 52); XXXVIII 2850. In P. Princ. II 24.23 he functions in this capacity in the seventh year of Tiberius. He seems, however, to be connected with the Western toparchy, which is mentioned in all these documents. Balconi, *Aegyptus* 64 (1984) 38, doubts that there was only one toparch called Sarapion, attributing P. Princ. 24 to the Lower and 2850 to the Upper toparchy. However, in both cases the grazing was to take place in the Western toparchy, which was the important point. The other toparchies are mentioned only as the tax districts of the shepherds concerned. Here there is a strong implication that we need to restore the name of a village of the Western toparchy in line 17, see n., possibly one beginning with theta, see 1 n.

3780. CALENDAR OF GAIUS

38 3B.85/L(1-2)a

9 × 8.5 cm

AD 40-2

This orderly list of the honorific names which were substituted for Egyptian month names during the reign of Gaius cuts through the doubt which remained about some of the equivalences, see the list in A. E. Samuel, *Greek and Roman Chronology* (Handbuch der Altertumswissenschaft i. 7), 177 n. 1, based on the detailed study of K. Scott, *JCLIS* 2 (1931) 245-63, and confirms recent deductions by C. Balconi and A. E. Hanson, see below.

The papyrus, which is blank on the back, appears to be broken on all sides. At the foot two month names are manifestly missing, but the first line, above which there is barely half a centimetre of broken papyrus, contains the first month of the Egyptian year. To left and right there are fairly wide blank margins, 3 cm and 1.5-3 cm respectively, with broken edges. It may be that we have lost at one side or other a corresponding column containing the Egyptian names, cf. SB VI 9529, but if so there are no remains.

Only two of the names here existed before the reign of Gaius, *Κεβακτός* = *Θώθ* in honour of Augustus, and *Νέος Κεβακτός* = *Αθύρ* in honour of Tiberius, which each appeared in the reign of the emperor concerned. The others were not created at the same time: *Κωτήρ* = *Φαώφι* was in use by 20 October, AD 38 (BGU IV 1078, illustrated in W. Schubart, *Papyri Graecae Berolinenses*, 15b); *Γαίειος* (if that is the correct spelling) = *Φαμενώθ* appears in two tax registers from Philadelphia for regnal year 2 = AD 37/8, although these were probably compiled just after the end of that year, see A. E. Hanson, *Proceedings of the XVI International Congress of Papyrology*, 347 n. 10, cf. ead., *Atti del XVII Congresso Internazionale di Papirologia* (Napoli 1983) iii 1110-13. A like register (P. Mich. Inv. 876 recto) for year 4 = AD 39/40, probably compiled shortly after 28 August, AD 40, certainly with dates as late as Mesore 13 = 6 August, that is, twenty-two days before the end of the year and only about six months before the murder of Gaius on 24 January, AD 41, adds only three more: *Δρουσίλλειος* = Payni, *Δρουσιεύς* = Epeiph, and *Καιάρειος* = Mesore. The extract from this register which was presented by Dr Hanson at the Naples Congress of Papyrology has the names of the last ten months of the year, that is, all except Thoth and Phaophi, which would have been called *Κεβακτός* and *Κωτήρ* if it had been necessary to refer to them. Hathyr is called *Νέος Κεβακτός*, as in the reign of Tiberius, while Choeac, Tybi, Mecheir, Pharmuthi, and Pachon retain their Egyptian names. It seems, therefore, that these five months received their new names in the last five or six months of the reign, not necessarily all at the same time. The earliest known date for each month is given in the commentary below. Possibly the new evidence for the stages in the renaming of the months may help to chart the course of the policy, or mania, of Gaius, but consideration of that and of the allusions to be recognized in some of the ambiguous honorific names must be left to the experts in the period.

Most of the names conferred by Gaius lasted only a short time into the reign of Claudius, although Germaniceus and Caesareus did not suffer permanently from the taint and eventually survived into the third century. This list as a whole, however, can only have been of immediate relevance for a period of about two years, from sometime in the last few months of AD 40 till near the end of AD 42. The first century script entirely suits the supposition that it was written then, probably as a memorandum in some office.

5 I. Θεογένιος 6 I. Νερόνιος 7 I. Γαίειος 8 I. Άγριππίνιος 9. I. Γερμανίκιος
 10 I. Δρουσίλλιος

1 Σεβαστός = Thoth: K. Scott, *YCIS* 2 (1931) 241-3; cf. O. Tait II 969.5 n., P. J. Sijpesteijn, *ZPE* 40 (1980) 130, C. Balconi, *ZPE* 42 (1981) 131-2.

2 Cωτήρ = Phaophi: K. Scott, *YCIS* 2 (1931) 247-9, 258; cf. O. Tait I Petrie 261.8 n. (p. 118), C. Balconi, *ZPE* 59 (1985) 87-8. This is one of the earliest changes by Gaius, see BGU IV 1078 (= W. Schubart, *Papyri Graecae Berolinenses* 15b) of 3 Gaius, Soter 23 = 20 October, AD 38. In year 2 of Gaius the name was still Phaophi, see P. Ryl. II 160b. 11, WO II 378.34. Cf. 7 n. The allusion in the name is not yet satisfactorily explained.

3 Νέος Σεβαστός = Hathyr: K. Scott, *YCIS* 2 (1931) 243-4; cf. P. J. Sijpesteijn, *ZPE* 40 (1980) 131.

4 Ίουλιεύς = Choeac: K. Scott, *YCIS* 2 (1931) 249. The other references are CPR I 242. 16, see BL I p. 123 (7-16 October, AD 40-5 Gaius), P. Mich. V 321.1 (1 December, AD 42-3 Claudius). In P. Mich. Inv. 876 recto, probably compiled shortly after 28 August, AD 40, see above introduction, Choeac retains its Egyptian name. It seems, therefore, that it was renamed within the short period 28 August-16 October, AD 40, and in advance of the recurrence of the month on 27 November.

Is the allusion to Julius Caesar or to Julia daughter of Augustus as maternal ancestress of Gaius, or is it more general? Although Gaius did not himself have *Iulius* in his titulature, all his sisters and his daughter had *Iulia* as one of their names.

5 Θεογένιος (I. Θεογένειος) = Tybi: K. Scott, *YCIS* 2 (1931) 255. This name occurs otherwise only in BGU III 713.3, in the spelling Θεογενάιον (not checked). That document can now be dated to 1 January, AD 42 (2 Claudius, Theogencius = Tybi, 6). The equivalence has been deduced by C. Balconi, *Aegyptus* 64 (1984) 58-60, with acknowledgements also to Ann Hanson, see *Atti . . . XVII . . . Congresso* iii 1112 n. 15, cf. n. 16.

The allusion is ambiguous: to Augustus as *divi filius*, or to Gaius himself as a god, cf. Suet., *Caligula* 22?

6 Νερόνιος (I. Νερόνιος) = Mecheir: K. Scott, *YCIS* 2 (1931) 255-8. The equivalence has been deduced by Balconi and Hanson, see above 5 n. Since Mecheir retains its Egyptian name in P. Mich. Inv. 876 recto, we can conclude that it was renamed after 28 August, AD 40, see introd., cf. 4 n., and before 24 January, AD 41, when Gaius was murdered.

The allusion is most likely to be to Nero brother of Gaius, eliminated under Tiberius, see Scott, op. cit., 257.

7 Γαίη'ος (I. Γαίειος) = Phamenoth: K. Scott, *YCIS* 2 (1931) 255, cf. A. E. Hanson, *Proceedings of the XVI International Congress of Papyrology* (New York 1980), 347 n. 10, ead., *Atti del XVII Congresso Internazionale*

de Papirologia (Napoli 1983) iii 1110-13. Γαίειος was conjectured to be Phamenoth by Tait, who pointed out that the *dies imperii* of the reign, 16 March (AD 37), falls in this month, see O. Tait II 469 n. Gaius was born on 31 August (AD 12), in the Egyptian month of Thoth, already irrevocably renamed Σεβαστός in honour of Augustus.

In passing we should note μη(νός) Γαίου Σεβαστοῦ in O. Tait II 469.4, 470.5, 472.4, corroborated by the demotic O. Mattha 65. (I am grateful to Dr Mark Smith for confirming that the ostrakon really does have 'month of Gaius who/which is august'.) There is a suspicious resemblance to Νέος Σεβαστός, but the demotic shows that this variant really existed. The readings of O. Tait II 469 and 470 are correct; 472 is too faded to check.

This month was one of the earliest to be renamed by Gaius. It appears in tax registers for regnal year 2, probably compiled after the last day of it, 28 August, AD 38, see introd. above, although two ostraca actually of year 2 are still dated by the Egyptian month, O. Strassb. 66.4 (Phamenoth 23 = 19 March, AD 38) and O. Deissmann 85 (P. Meyer, p. 204: Phamenoth 25 = 21 March, AD 38). Both these ostraca are from Thebes and it could be that in year 2 Phamenoth had already been renamed but the news had not reached Thebes. It is equally possible and perhaps more likely that the renaming was later, at the end of year 2 or the beginning of year 3. Γαίειος could, therefore, have been introduced about the same time as Cωτήρ = Phaophi, cf. 2 n. The registers might be slightly earlier than the first appearance of Soter, but no priority or simultaneity can be demonstrated.

The proper spelling is uncertain: Γαίη'ος appears in O. Tait II 474.5, O. Strassb. 68.5, and SB X 10430 (= O. Leid. 54).5; P. Mich. Inv. 904 + P. Lond. Inv. 2248 recto and P. Mich. Inv. 876 recto have Γαίου, which resembles the first version of 3780, and see above on Γαίου Σεβαστοῦ. Analogy recommends Γαίειος. Iotacism would explain Γαίη'ος and the contraction of adjacent /i/ vowels would explain Γαίιος (accent Γαίος?), see F. T. Gignac, *Grammar* i, 295-8.

8 Άγριππίνος (I. Άγριππίνιος) = Pharmuthi: K. Scott, *YCIS* 2 (1931) 278, see now P. Mich. II p. 23, καθ' ἑτος (I. καθ') ἐν μηνί Άγριππηνήου (I. -πινείω), written in 2 Claudius (AD 41/2). The name has appeared also in O. Tait II 1146.5, see n. That text can now be dated, provided that the dotted letters are correctly read, to 23 April, AD 41 (1 Claudius, μη(νός) Άγριπ(πινείου) κῆ). The form here is anomalous. Perhaps the clerk meant to write Άγριππίνιος, as his -ιος elsewhere represents -ειος (5, 6, 9).

The allusion is probably to the mother of Gaius, as Γερμανίκειος fairly clearly is to his father, but could also be to his sister the mother of Nero.

9 Γερμανίκιος (I. Γερμανίκειος) = Pachon: K. Scott, *YCIS* 2 (1931) 249-51, C. Balconi, *ZPE* 59 (1985) 84-7. The allusion to Germanicus, father of Gaius, but a popular figure, allowed this name to survive into the third century, although it is probably not irrelevant that Gaius had Germanicus in his titulature. This name did not appear till after 28 August, AD 40, that is, till the fifth regnal year, see introd. It cannot, therefore, be thought of as the missing month name in O. Tait II 1051.5-7, where ed. pr. converted (ἔτους) β Γαίου Καίσαρος Σεβαστοῦ Γερμανικοῦ ε̄ into 30 April, AD 37. This is clearly wrong, since it would fall into the first regnal year, but looks as if it takes Γερμανικοῦ as a month name equivalent to Γερμανίκειος = Pachon, since Pachon 5 is indeed 30 April. BL V 161 suggests supplying <Γερμανικέιου>, but this will not do for years 1-4, see P. Mich. V 318 introd., P. Ryl. II 148.12-15, 33-4, O. Tait I Petrie 256.5 (p. 117), WO II 383.4-5, O. Tait II 661.3-5, all from Pachon of 4 Gaius. The fact is that the month name has been accidentally omitted from O. Tait II 1051 and cannot be supplied on our present evidence.

10 Δρουσίλλιος (I. Δρουσίλλιος) = Payni: K. Scott, *YCIS* 2 (1931) 251-2, see now P. Mich. V 321.19 ἀεὶ ἐν μηνί Δρουσιλλέω, written on 1 December, AD 42 (3 Claudius). BGU VII 1660.12 has [Δ]ρουσιλλήω, written in 1 Claudius, therefore on 24 June, AD 41. Analogy again recommends Δρουσίλλιος as the academically correct form.

Again the allusion is not unambiguous: to his dead and consecrated sister, or to his only child?

This month forms a group with the two succeeding ones, which have been lost from this list, Δρουσιεύς = Epeiph, and Καϊάρειος = Mesore, in the sense that these three can be seen from the Philadelphia tax registers to have received their new names after Cωτήρ and Γαίειος and before the five remaining months, see introd. The tax registers relate to year 4, AD 39/40, but were probably compiled not long after the end of that year, that is, after 28 August, AD 40.

It is possible that all three of these new names were in use in year 4, but the evidence is good only for Δρουσιεύς = Epeiph. To take them in order: there is no evidence for Δρουσίλλιος = Payni in 4 Gaius and in fact O. Tait II 473 is dated Παύνι Cεβαστή (cf. W. F. Snyder, *Aegyptus* 44 (1964) 155). However,

this ostrakon is from Thebes and it may be that the news of the change was slow to penetrate so far south. Epeiph had certainly been renamed already: P. Lond. III 893 (descr. p. xliii), edited in full in P. Ryl. II p. 381, is dated in year 4 (evidently of Gaius), μη(νός) Δρουσιέ(ως) κη, i.e. 22 July, AD 40. WO II 384 was published with the month name unread, μη(νός) . . . ου . . . Σεβαστή (cf. Snyder, *ibid.*), but it was subsequently read by Viereck as Δρουσιέως (= Δρουσιέως), see BL II. i p. 58. For Καίσαρειος = Mesore I have found no evidence but P. Princ. II 65, which is supposed to be dated (ἔτους) δ . . . Μεσι[ο]ρ[η] 87. The readings are manifestly too doubtful to prove that Καίσαρειος was not in use in year 4.

3781. ANNOUNCEMENT OF THE ACCESSION OF HADRIAN

96/18(c)

6.5 × 16 cm

25 August 117

By this circular letter Rammius Martialis, prefect of Egypt, officially informed a number of district governors of the accession of Hadrian and instructed them to declare festivities in their areas. The greatest interest lies in the date. Hadrian's *dies imperii* was 11 August, AD 117 (HA Hadr. 4.7; ILS I 318; CIL VI 33885.17) and he was proclaimed in Antioch (HA Hadr. 5.9-10; Dio-Xiph. 69.2.1). The short interval of fourteen days well illustrates and confirms the fact that he assumed power without consulting the senate, see HA Hadr. 6.2 *cum ad senatum scriberet, ueniam petil, quod de imperio suo iudicium senatui non dedisset, salutatus scilicet praepropere a militibus imperator, quod esse res publica sine imperatore non posset*. Cf. Dio-Xiph. 69.2.2 ἔγραψε δὲ πρὸς τὴν βουλὴν ὁ Ἀδριανὸς ἀξιῶν βεβαιωθῆναι αὐτῷ τὴν ἡγεμονίαν καὶ παρ' ἐκείνης. Rammius Martialis followed Hadrian's orders without waiting for confirmation from Rome. It is interesting to contrast what seems to have happened in Egypt at the accession of Macrinus, also in Syria. The then prefect, Valerius Datus, hesitated to proclaim Macrinus without confirmation from Rome and was eventually hounded down and eliminated by him, cf. XLIII 3092 5 n. The proclamations of Vespasian and Avidius Cassius were also supported by prefects of Egypt without authority from Rome.

Another remnant of the celebrations for the accession of Hadrian is the famous P. Giss. 3 (= W. Chr. 491 = E. Heitsch, *Die gr. Dichterfragm. d. röm. Kaiserzeit* (1961) no. xii), which is a fragment of a dramatic performance beginning with a speech of Phoebus, who has taken Trajan to heaven in a chariot drawn by white horses and announces the new ruler Hadrian. That celebration seems to have been funded by the local governor: ὦν πάντων χορηγὸν τὸ . . . τοῦ στρατηγού . . . φιλότιμον . . . (11-13). The date of it will not have been many days later than this, allowing time for news to reach probably Apollonopolis Heptacomia (Kom Isfah) in the Thebaid.

It is debatable whether the omission of Hadrian's *dies imperii* from the Feriale Duranum should be connected with his unorthodox accession, cf. J. F. Gilliam, *Harvard Theol. Review* 47 (1954) 196 (= *Roman Military Papers* 136).

Other similar papyrus documents relating to accessions are:

VII 1021 (= W. Chr. 113), 17 November, AD 54, a draft proclamation for the accession of Nero.

SB XII 10991, s.d., a prefect's edict for the accession of Avidius Cassius (AD 175).

BGU II 646 (= W. Chr. 490), 6 March, AD 193, a prefect's letter to the strategi of Middle Egypt, subjoining a copy of his edict to Alexandria about the accession of Pertinax.

SB I 421, s.d., an official letter giving the order for a procession of images of goddesses for the proclamation of Maximus Caesar (AD 226).

LI 3607, s.d., a covering letter of a strategus for a prefect's edict for the accession of Gordians I and II (AD 238)?

SB VI 9528 (Vespasian) and X 10295 (Avidius Cassius?) are possibly to be regarded as imperial letters replying to congratulations on their accessions, cf. IGR IV 349 (Hadrian, 11 November, AD 117).

The date here is now the earliest one for the prefecture of Martialis, see 2 n. The early titlature of Hadrian is rare and interesting, see 7-10 n., and the appended list of nomes is useful evidence for the extent of the Heptanomia in AD 117, see 20-3 n.

The script is small and rapid and there are many abbreviations. The document has the air of an office memorandum. The writing runs along the fibres. There is no sheet join. The foot is lost but otherwise damage is fairly slight. The back is blank.

'Rammius Martialis (to the strategi of the underwritten districts?), greetings.'

'Be it known to you that for the salvation of the whole race of mankind the imperial rule has been taken over from the god his father by Imperator Caesar Traianus Hadrianus Optimus Augustus Germanicus Dacicus Parthicus. Therefore we shall pray to all the gods that his continuance may be preserved to us for ever and shall wear garlands for ten days. This you are to publish to the districts under your charge.'

'Year 1, Mesore, 2nd intercalary day.'

'Letopolite, Memphite, Arsinoite, Aphroditopolite, Heracleopolite, Oxyrhynchite, Oasis of the Heptanomia, Cynopolite, Hermopolite.'

1 The first letter could well be alpha, which may suggest some version of the word ἀντίγραφον, 'copy', a frequent heading in papyri. The alpha has been smeared and the following remains are very faint, giving the impression that either the whole of the line or at least the beginning of it has been imperfectly washed out. At the end a high horizontal looks like a mark of abbreviation. The remains in the third place after the alpha might be of the double curve which frequently marks abbreviation.

2 For documentary references to Rammius Martialis as prefect see G. Bastianini, *ZPE* 17 (1975) 283; cf. 38 (1980) 81. The date below (18-19), equivalent to 25 August, AD 117, is now the earliest fixed date in his prefecture, although it was known that he was in office before 29 August (VII 1023 6). The latest fixed date in his predecessor's term remains 5 January, AD 117, see *ZPE* 17 (1975) 282. However, I am tempted to speculate that M. Rutilius Lupus was actually in office when news of Hadrian's accession arrived, to be followed almost immediately by the appointment of Martialis. The shaky ground for this idea is a passage in a much damaged and puzzling section of the Acta Alexandrinorum, see H. Musurillo, *Acts of the Pagan Martyrs* no. ix pp. 49-50. Alexandrian and Jewish ambassadors dispute before Hadrian about violence in Alexandria at least in part in the governorship of Lupus. The embassy seems to fall in the governorship of Martialis, who is very probably addressed in a letter, p. 54 l. 178: Ῥάμμιε, θησον[; cf. BGU I 140 (a letter of Hadrian). 10 Ῥάμμιε μου.

Below in parallel are Musurillo's text on the left and on the right my restored version from a photograph kindly supplied by M. de Cenival of the Louvre.

- 10 (25) [Π]αῦλον καὶ τοὺς ἡμετέρους
[τ]αῦτα ἐν ταῖς τ[ο]ιαύταις πα-
[ρα]τάξεσ[ι] γίνεται ἐμοῖ . η
[. . .] ἐν τῷ Δακικῷ πολέμ[ω]ι [. . .]
[. . .] ατος[. . .] θυλι τις τῶν πε[. . .]

Παῦλον καὶ τοὺς ἡμετέρους,
τ]αῦτα ἐν ταῖς τ[ο]ιαύταις πα-
ρα]τάξεσ[ι] γίνεται. ἐμοῦ δὴ
καὶ ἐν τῷ Δακικῷ πολέμ[ω]ι
δ]γτος, [ἐ]θ<ρ>ύλει(?) τις τῶν κτλ.

'Paul explained about the "emperor", how they led him in procession and he proclaimed that the first year (sc. of Hadrian), and Theon read out the edict on this matter from Lupus, how he (or 'who'? *ως* for *ὅς*?) was giving them the order to process, while expressing disapproval of the representation of the emperor by an actor from the stage. Thus far ourselves; and the emperor spoke without deliberation to Paul and our representatives, 'These things happen in such confrontations. For instance, when I myself was in the Dacian war, one of the . . . began to make trouble(?) . . .'

The end begins to be speculative, but see CGL II 203.9, where *tumultuatur* is glossed, in rather garbled fashion, *θρυλλεῖ(ν)*, *θρομβεῖ(ν)*, cf. E. Sophocles, *Lexicon*, G. W. H. Lampe, *PGL* s.v. *θρυλλέω*, and perhaps PSI V 452.20 (c. AD 325), where in a damaged context *ἐθροῖλει* (= *ἐθρύλει*) seems to have this sense. One lambda is presumably correct, though the doubling seems to be frequent in later texts.

The crucial point is *ἔτος α* in line 2. The only even possible 'year 1' in the prefecture of Lupus is 1 Hadrian, which began on 11 August, AD 117 and could not be known in Alexandria till some days later. If Lupus was involved, he must have been prefect still for a period after news of Hadrian's accession had arrived in Alexandria. The only alternative interpretation on offer is *ἔτος ζ[αν]τ]ο*, supposedly a corruption of *ἐτωθάσαντο*, which is far fetched.

In my hypothesis the procession is part of the celebrations for the beginning of the new reign. The *ἀπὸ σκηνῆς καὶ ἐκ μίμου βασιλεύς* is an actor representing either the dead Trajan or the new ruler, Hadrian. P. Giss. 3 is evidence for dramatic representations on accessions. Official disapproval can be guessed to have arisen because of the offensive jokes which the Alexandrians were notoriously apt to make about their rulers, cf. Suet. *Vesp.* 19.2, with G. W. Mooney's commentary. The story which follows in Suetonius about an *archimimus* called Favor, who wore the mask of Vespasian at the emperor's funeral and made a joke about his meanness, seems to relate to Rome, although this is the only passage which alludes to an actor filling such a role at a Roman funeral.

This hypothesis remains to be tested by new evidence. As well as the question of interpretation of this passage, for alternatives see H. Musurillo, *Acts of the Pagan Martyrs* 181-7, there is also a question whether this sort of text would be reliable on such a point. I am inclined to think that it would.

στρ(ατηγοῖς) [. . .] . . . (. . .) 'νομ(ών) χαίρει(ν). The damage is too great for certainty, but I guess that this will have read στρ(ατηγοῖς) [ζ̄] τῶν [ύ]πρ[ο]γ[ρα]μ[μ]ένων 'νομ(ών) χαίρει(ν). The best parallel to 3781, W. Chr. 490, is addressed στρ(ατηγοῖς) ζ̄ νομ(ών) καὶ Ἄρσι(νοῦτου) χαίρειν, cf. I 58 1-2, XII 1408 11, 1409 7. For στρ(ατηγοῖς) τῶν ὑπογεγραμμένων νομῶν see e.g. P. Beatty Panop. 2.32 (cf. 35), 117 (cf. 126-7), 250 (cf. 255), 256 (cf. 258). Below here is a complete list of the nomes of the Heptanomia, see 20-3 n. The damage leaves open the possibility that others, those of the south of Egypt, followed. However, in P. Beatty Panop. the letters from the procurator of the Lower Thebaid addressed in the same way are followed by a list of the nomes of that area. In that case the letters could have been addressed simply στρ(ατηγοῖς) τῆς κατωτέρω Θηβαΐδος but the preferred form was στρ(ατηγοῖς) τῶν ὑπογεγραμμένων νομῶν with all the names specified below. So here τῶν ζ̄ νομῶν <καὶ Ἄρσι(νοῦτου)> and τῶν ὑπογεγραμμένων νομῶν may have been equivalents. I presume that the clerk, knowing who the addressees were, started to write the first and then found it necessary to correct himself after having written as far as ζ̄ νομ(ών).

In the case of W. Chr. 490 the prefect sent to Middle Egypt a copy of his edict directed to Alexandria along with a covering letter addressed to the local governors. In our case we do not know whether the Alexandrians received a letter or an edict or whether the same wording was used to them. It is also possible that the news reached the Alexandrians officially in an edict from the previous prefect, see above.

Again we do not know in what terms the news was conveyed to the Thebaid on either occasion. W. Chr. 490 specifies Middle Egypt only, but the wording of both letter and edict may have been the same to the Thebaid, the separation being made only to suit the machinery of the post.

3-4 ἐπὶ σωτηρία τοῦ σύνταγ(ος) ἀνθρώπων γένους. Cf. SB V 8444 ii 7 τοῦ ἐπιλάμβαντος ἡμῖν ἐπὶ σωτηρία τοῦ παντός ἀνθρώπων γένους εὐεργέτου Σεβαστοῦ Αὐτοκράτορος Γάλβα, and P. Coll. Youtie II p. 425, 1 n.

6 θεοῦ . . . πατρός. Cf. W. Chr. 491. 4-6 . . . Ἀδριανόν . . . , οἱ πάντα δούλα [δὲ] ἀρετῆν κ[αὶ] πατρός

τύχην θεοῦ. It is clear now that Trajan's title of θεός did not derive from any ceremony of apotheosis held in Rome, cf. W. den Boer, *Anc. Soc.* 6 (1975) 204, W. Kierdorf, *Tyche* 1 (1986) 147-56.

7-10 These titles, which are those of Trajan except for *Τραϊανός Ἀδριανός* in place of *Νέρονος Τραϊανός*, occur otherwise in the papyri only in P. Alex.-Giss. 25 (= P. Flor. III 326+P. Giss. inv. 92). 6-8 (oath formula), 24-6 (date clause), of 11 September, AD 117 (year 2, Thoth 14), see J. Schwartz's commentary. Shorter titulatures came into use soon afterwards, e.g. P. Giss. 6 ii 19-20, of 1 December. However, this form recalls coins with (*Obv.*) IMP CAES TRAIAN HADRIAN OPT AVG GER DAC (*Rev.*) PARTHIC DIVI TRAIAN AVG F PM TRP COS PP, cf. *ANRW* ii.2.440, and is evidently not 'aberrante' (Schwartz), or 'nicht autorisierte' (Kierdorf, *Tyche* 1 (1986) 154 n. 45), but thoroughly official.

15 ἐφ' ἡμ(έρασ) 7. For Nero no length of time was specified (VII 1021 14-18 διὸ πάντες ὀφειλομένω στεφανηφοροῦντας (l. -εσ) καὶ βουθυτοῦντας (l. -εσ) θεοὶ πάσι εἶδέναι χάριτας). For Pertinax the period was fifteen days (W. Chr. 490.24-5).

16 εἰαυτοῦσ = ἡμᾶσ αὐτοῦσ. Cf. F. T. Gignac, *Grammar* ii 169.

18-19 See introd. for the date. Of course this document is not the original but a copy taken some time later in Oxyrhynchus.

20-3 This was evidently a complete list of the districts of the Heptanomia and probably ended the document, although the damage allows the possibility that the list continued with the names of nomes further south, see 2 n. In principle it runs from north to south, beginning with the Letopolite, and so confirming the observation of J. D. Thomas, *Proc. XII . . . Congress of Papyrology* 467, *The Roman Epistrategos* 24, that although this nome is assigned to Lower Egypt by Ptolemy, in the documents it is always associated with the Heptanomia.

In 20 the name of the Arsinoite is indispensable and this excludes the Nilopolite, mentioned in XLVII 3362 18-19, cf. J. D. Thomas, *Akten XIII . . . Papyrologenkongresses* 400, pointing out that for Ptolemy Nilopolis was a village in the Heracleopolite nome, whereas it had an independent nome by at latest AD 261. This document provides a *terminus post quem* for the creation of the nome; 3362 is later than the foundation of Antinoopolis in AD 130 and is assigned to the second half of the second century.

The separate mention of the Small Oasis indicates that it was regarded as a separate nome. It has been suggested that it was sometimes administered by the same strategus as the Oxyrhynchite nome, see especially D. Hagedorn, *ZPE* 1 (1967) 134-7. Hagedorn argued that joint administration was the norm in the Roman period, but new evidence has turned up Heracleides, strategus of the Small Oasis on 29 August, AD 28 (*BIFAO* 73 (1973) 183), a date which falls within the term of Chaereas, strategus of the Oxyrhynchite, known from 2 February, AD 23 to 26 January, AD 29 (G. Bastianini, J. E. G. Whitehorne, *Papyrologica Florentina* XV 86-7), and has extended the term of Aelius Aphrodisius, strategus of the Oxyrhynchite nome from at least 28 August, AD 149 to 3 March, AD 154 (*ibid.* p. 92-3), so as to bracket the mention of Sarapion strategus of the Small Oasis in AD 150/1 (P. Harris I 62). P. Merton III 106.3 (see n.) shows that the Small Oasis was a separate nome at the time that document was drafted, which the sale price of the donkey suggests was in the last quarter of the third century, perhaps in the 280s, cf. J. D. Thomas, *ZPE* 6 (1970) 181. The whole question needs a new examination, but the passage which is claimed as the most reliable evidence for a shared strategus (in AD 171), SB VIII 9905.1, reads Πραιύλω στρατηγῶ Μ[ικρά]ς Ὠρά[ς] ἐφ[ε]ρ[ε] (cf. Bastianini, Whitehorne, *Pap. Flor.* XV 84). Since one of the parties comes from the Oxyrhynchite village of Seryphis, it is probable that Praeclus is here, as elsewhere, strategus of the Oxyrhynchite nome and that the doubtful reading is wrong. See now G. Wagner, *Les Oasis d'Égypte* 259-61.

22 ξ νομ(ών). For this form rather than (Ἑπτα)νομ(ίαισ) see J. D. Thomas, *Akten XIII . . . Papyrologenkongresses* 401-2.

23 Ἐρμ[ο]πολίτου). This is a certain restoration, given the nature and the geographical arrangement of the list. The document may have finished at this point, see 20-3 n.

3782. REGISTRATION OF SHEEP AND GOATS

38 3B.81/B(1-2)a

12.5 × 17 cm.

172-3

There are striking variations here from the usual form of this type of document, cf. 3778-3779 introd. The initial reference to orders of the prefect is not found in other

examples, although it very much resembles clauses in some census returns, declarations of unundated land, and general property returns. Such a clause does appear in SPP XXII 97, which is the registration of a single animal, probably a camel, datable to c. AD 179-80 (G. Bastianini, *ZPE* 17 (1975) 299 n. 3). Even more unusual is the reference to a previous declaration in the same terms before an epistrategus (16-18). The only surviving return of any kind to an epistrategus is still, it seems, the declaration of the possession of a boat W. Chr. 248, cf. W. Gdz. p. 205. However, the epistrategus had some duties connected with livestock; he appointed commissioners for the ἐξαριθμησις θρεμμάτων, see J. D. Thomas, *The Roman Epistrategos* (Pap. Colon. VI), 74-5, 171, and XIX 2228 may possibly attest a direct responsibility for the maintenance of the supply of livestock, see Thomas, *op. cit.*, 168.

The date range to which the document must be assigned, AD 172-3, see 16 n., 17-18 n., 21 n., raises the possibility of some connection with the circumstances of the revolt of the Βουκόλοι (*RE* III 1013), but this is a tentative guess from which it would be hard to go further.

The back is blank.

 Παρθικοῦ Γερμανικοῦ Μεγίστου, 2-7 letters], ἱ.

18 ἰ, ἱ; 1. ἦ, εἶην, ὄργω

'To . . . Heliodorus royal scribe administering also the office of the strategus, from Eudaemonis freedwoman of Hellen . . . with as guardian Chaeras freedman of Petosiris, both from the village of Palosis. I register according to the orders of C. Calvisius Statianus the most illustrious governor the (animals) acquired by me to date at the present day, 38 sheep, 12 lambs, 2 goats, which will graze unhindered in the neighbourhood of the village of Palosis and throughout the entire nome, the shepherd being . . . freedman of Dioscous from the city of the Oxyrhynchi, and I swear by Emperor Caesar Marcus Aurelius Antoninus Augustus Armeniacus Medicus Parthicus Germanicus Maximus in the same terms as are in the registration which I laid before Aquilius Capitolinus the excellent epistrategus or may I be liable to the consequences of the oath.'

'Year (13?) of Emperor Caesar Marcus Aurelius Antoninus Augustus Armeniacus Medicus Parthicus Germanicus Maximus, (Choeac?) 10th.'

1 Restore a *nomen* such as Ἰ[ουλίω] or Κ[λαυδίω] or Φ[λαουδίω]. Heliodorus is not in the list by G. Bastianini, J. E. G. Whitehorne, Papyrologica Florentina XV.

According to S. Avogadro's view (*Aegyptus* 15 (1935) 148-9) the livestock registrations of the later type in the Oxyrhynchite nome were always directed to more than one official if they were not copies to be filed in the archives, cf. II 357, attached to another similar return. Our document being addressed to one person, should it be considered a copy from the archives? Compare BGU I 358, which is directed to a royal scribe acting for the strategus and to the royal scribe.

For livestock registrations addressed to the royal scribe alone see Avogadro, op. cit., 146. None of the published 'singular' sheep registrations directed to the royal scribe comes from the Oxyrhynchite nome. (For the terms 'singular' and 'cumulative' applied to property returns see A. Calderini, *Rendiconti dell'Istituto Lombardo*, 1922, 533-41, cf. Avogadro, *Aegyptus* 15 (1935) 147.)

3 Restore perhaps Ἐλληνί[δος], cf. P. Harr. I 138 i 15, or Ἐλληνί[ωνος], cf. XLI 2954 30 and n.

6-7 For the prefect, in office AD 170-5, see G. Bastianini, *ZPE* 17 (1975) 298; 38 (1980) 83. Add P. Wash. Univ. I 3.10 (no date). Cf. J. Schwartz, *ZPE* 20 (1976) 101, J. D. Thomas, *Actes du XV^e Congrès International de Papyrologie* iv (Pap. Brux. 19), 136.

8 εἰς τὴν ἐνεστ(ῶσαν) ἡμέραν. See *Aegyptus* 15 (1935) 181.

16 Γ[ερμανικόν]. Cf. P. Bureth, *Les Titulatures*, 84. This victory title was taken by Marcus in AD 172, see A. Birley, *Marcus Aurelius*, 234, P. Kneissl, *Die Siegestitulatur der römischen Kaiser*, 106. (Note that in P. Grenf. II 57.23-4, which is accepted by Kneissl as an anomalously early appearance of *Germanicus*, the restoration Παρθικῶν Γερμανικῶν has been corrected to Παρθικῶν Μεγίστων, see BL VI 46.) Marcus does not yet have the title *Germanicus* in BGU II 514.1-4, of regnal year 12, Phamenoth 1 = 25 February, AD 172; he does have it in SB XII 10953 (= P. Tebt. II 617).1-3, of year 12, Pachon 16 = 11 May, AD 172, and in P. Cair. Preis. 27 (= P. Fay. 207).1-6, of year 12, Payni 7 = 1 June, AD 172, which is under the wrong rubric in P. Bureth, op. cit., 83. This date range for the appearance of the title in the papyri, between 25 February and 11 May, AD 172, might perhaps be narrowed by a more exhaustive search. However, even on this basis the present document must be later than 25 February, AD 172 and earlier than 27 May, AD 173, see 17-18 n. See also 21 n. for a possible reading of the month and day there.

It needs to be stressed that the papyri give evidence for the title *Germanicus* several months earlier than is suggested by modern authors, who attribute it to the second half of AD 172, see most recently M. L. Astarita, *Aviatio Cassio*, 67 n. 24. She, however, simplifies and distorts what her predecessors say.

17-18 For the epistrategus see J. D. Thomas, *The Roman Epistrategos* (Pap. Colon. VI), 189, 201. A dedication at Bostra, IGLS xiii.1 9035, may represent the same person at an earlier stage of his career:

L(ucius) Aquilius Capitolinus p(rimus) p(ilus) leg(ionis) III Cyr(enaicae). The *praenomen* of the epistrategus is unknown. He was known as epistrategus of the Heptanomia from 26 November, AD 169 to 13 March, AD 171, and this document shows him in office in AD 172-3, see 16 n., possibly on 6 December, AD 172, see 21 n. The earliest known date for his successor is 27 May, AD 173, see Thomas, *ibid.*, a date which gives a firm *terminus ante quem* for the present document.

21], ἱ. The traces are faint, so that it would be rash to insist on certainty in their interpretation. All the same, it is tempting to say that only Χοία]κ ἱ will suit them. The iota and its bar are nearly certain. The possible final letters of Egyptian months are only seven: eta (Mesore), theta (Thoth, Phamenoth), iota (Phaophi, Tybi, Pharmuthi, Payni), kappa (Choeac), nu (Pachon), rho (Hathyr, Mecheir), and phi (Epeiph). Of this restricted group, a cursive kappa is by far the best possibility. If this is right, the only possible date within the range set by other factors, see 16 n. and 17-18 n., is 6 December, AD 172.

Declarations of sheep and goats were normally submitted in Mecheir or Epeiph, see Avogadro, *Aegyptus* 15 (1935) 185-6, cf. 3778 40 n. A date in Choeac would be another anomaly in 3782.

3783. RECEIPT FOR Πρόοδοι

38 3B.79/J(1-3)c

7.5 × 11 cm

24 December 205-
January/February 206

This is a cumulative receipt for at least three instalments of πρόοδοι (γεννηματογραφουμένων υπαρχόντων), thought to be payments on lands belonging to persons who were in arrears with sums owed to the state. For the latest short summary of the state of knowledge on the subject, with a collection of parallels and literature, see P. Hamb. III 211 introd. This text gives the first definite evidence of such exactions outside the Arsinoite nome, where they were collected by ἐπιτηρηταί, that is, by way of compulsory service. Here the payment is made to tax-farmers (τελώναι ὠνῆς προσόδων νομοῦ Ὁξύρνηχίτου, a new title), by agency of the elders of the village of Toka. This can be added to the evidence for village elders as collectors of government dues, see A. Tomsin, *Bull. Acad. Belg.* 38 (1952) 486-97.

The papyrus appears to be broken at the foot only, but see 7 n. The back is blank.

 14 δραf? 15 /f/λς?

'Year 14 of the Imperatores Caesares Severus and Antoninus and Geta, Caesares the lords, month of Hadrianus, 28th. The same persons paid to Pausanias and Heraclius alias Apollonius, farmers of the concession for the revenues (on land distrained by the state) in the Oxyrhynchite nome, through the elders of the village of Toka, on account thirty-six drachmas, total 36 dr. I, Plutarchus, have signed.'

'And on the 8th of the month of Tybi the same persons (paid) on account thirty-six drachmas, total 36 dr. I, Plutarchus, have signed.'

(2nd hand) 'And on the . . . th of the (month of) Mecheir (the same persons paid?) thirty-six drachmas, total 36 dr. I, Par . . . (have signed?).'

4 Ἀδρι(ανού) κῆ = 24 December 205.

7 [οἱ α]ῦτ(οί). The top margin is preserved; the side edges, though damaged and frayed, look as if this piece was an independent document broken only at the foot, but [οἱ α]ῦτ(οί) suggests that it was a continuation of a receipt with earlier payments. It is possible, in spite of appearances, that the document is broken at the left, and that there may have been an earlier column, or even more than one.

(π)ρ(εε)β(ντέρων). For the abbreviation cf. XLIX 3496 9 n.

13 The day number could possibly be between ten and twenty, i.e. read ε., but the narrow space suggests rather a single letter with a straight back, perhaps eta or kappa. Mecheir covers 26 January to 24 February 206; the 8th = February 2, the 20th = February 14. Lines 1-12 are in the same hand, no doubt that of Plutarchus. There is no obvious difference between 1-9 and 10-12, though they are supposed to be about ten days apart in date. Lines 13-15 are written in a larger, clumsier hand and with a thicker pen, by a different clerk, Παρ . . ., acting for the tax-farmers.

At the end of 13 there seems hardly room to restore ἐπὶ λ(όγου) after οἱ [α(ῦτοι)]; it may have been crowded in, but the absence of μην(ός) also suggests that this clerk was using a different formula.

3784. APPLICATION FOR ANACRISIS

38 3B.83/D(3-4)a

9 × 11 cm

227/8 or 281/2

Anacrisis was an official interrogation of a slave at the prospect of his first sale in Egypt, designed only to establish a presumption of his legal status as a slave. On the subject see H. J. Wolff, *ZRG* 83 (1966) 340-9, I. Biezuńska-Malowist, *L'Esclavage* ii (période romaine), 54-62, where 3784 is also considered, see esp. 55 n. 43. There

are three chief parallels to this application: XII 1463 and XLIX 3477, both addressed to the nomarch of Antinoe, and PSI XII 1254, addressed to two *hypomnematographi*, location unspecified. All three of these were excavated at Oxyrhynchus. The fragmentary P. Ant. III 187 contains parts of two more, addressed to the Oxyrhynchite strategus, as shown by G. Messeri, *APF* 29 (1983) 33-6. It is likely that SPP XXII 60 is the beginning of a similar application addressed to the strategus of the Athribite nome, although the text breaks off too early to allow certainty. In P. Mich. IX 526 the application is lost except for the date and parts of a copy of a sale submitted in support. 3784 is addressed to Aurelius Hierax and an unnamed colleague 'in charge of the interrogation of slaves sold at Motis'. The seller is also from this place, which appears in only one other document, and is possibly to be sought in one of the oases, see 3 n. The new title casts a different light on Wolff's view that 'es überhaupt keine festen Kompetenzabgrenzungen in diesem Bereich gab' and that 'jede gerade greifbare Gau- oder Polisbehörde den Akt vornehmen könnte' (op. cit. 343). Evidently the process was managed differently in different localities and in this one there was a committee of two specially assigned to the task. If the place was indeed in an oasis, the appointment may have been made precisely because the administrative machinery was less developed there than in the nomes of the Nile valley. On the administration of the Small Oasis see 3781 20-3 n.

The other examples are submitted by the buyer only, 3784 by both seller and buyer.

The remains of the date clause show that the document was written in the seventh regnal year of an emperor with the names Marcus Aurelius. Since the named official and the buyer and seller all have the *nomen* Aurelius, evidently as a result of the *constitutio Antoniniana*, only two years are possible: AD 227/8 (Severus Alexander) and AD 281/2 (Probus), cf. P. Bureth, *Les titulatures impériales*, 105-26, esp. 108-10, 124-5. The palaeography does not offer a secure choice between these. The hand is a small rapid cursive with a propensity to loops and curves. It can be compared with W. Schubart, *Papyri Graecae Berolinenses*, nos. 36 (AD 236) and 37b (AD 274).

'To Aurelius Hierax and his colleague, in charge of the interrogation of slaves offered for sale at Motis, from Aurelia Senosiris daughter of Sarapion son of Horus from Motis, and from Aurelia Charmiti and however she may be styled.'

'We wish: I, Aurelia Senosiris, to sell my own female slave Isidora also called Lamprotyche, being this year 12 years old, home-bred, her mother being my slave Alexandra, white-skinned, with long straight hair, and I, Aurelia Charmiti, to buy the same and aforesaid slave on the aforesaid lawful conditions. Therefore we bring her before you, requesting that the necessary interrogation of her may be held in accordance with the orders on the subject.'

'Year 7 of Emperor Caesar Marcus Aurelius . . .'

1 Ἰέρακει = Ἰέρακι. Epsilon is by no means clearly written. It may be that in writing his rapid, looping style of script, the clerk unintentionally made an extra stroke at this point. He appears to have left out a letter in τοί<ς> later in this line and in Αὐρηλία<ς> in line 4, and in 10 to have left out a syllable in λευ<κό>χρου. Cf. 3 n.

1-3 For the title see introd.

3 Μώτεις. Cf. 4 ἀπὸ Μώτεις. In both places the writing of mu omega has one loop less than might have been expected, but one can see similar writings of the same syllable in many texts, e.g. W. Schubart, *Papyri Graecae Berolinenses*, No. 36 (= W. Chr. 276).1 *Εὐδαίμων*, 6 [Ἄγα]θὸς Δαίμων, No. 37b (= M. Chr. 198).9, 17 νόμων. It is only the rarity of the place name which causes hesitation. It appears in this form in one text only, PSI XII 1228.5, 9, 43 (cf. BL III 229), see P. Pruneti, *I centri abitati*, 112. That document is the sale of a slave, in which two persons are from Motis and another ἀπὸ Αἰθιοπείων τῆς Μεικρᾶς Ὁάσεως. This might tempt us to think that Motis too belonged to the Small Oasis and indeed this view has obviously influenced the entry under Μώθεις in A. Calderini, *Dizionario dei nomi geografici* iii, 308, where Μώτεις in PSI 1228 has been identified with Μώθεις in P. Lips. I 64 (= W. Chr. 281).20 and the place has been ascribed to the Small Oasis. However, the review of the evidence for Μώθεις by U. Wilcken, *APF* 4 (1908) 478-80, showed irrefutably that Μώθεις or Μωθιτῶν πόλις was a place in the Great Oasis; see now also S. Daris, *Aegyptus* 63 (1983) 147-50. It may well be right to take Μώτεις as a phonetic spelling of Μώθεις, cf. F. T. Gignac, *Grammar* I, 92, but in that case its location remains in the Great Oasis far to the south of Oxyrhynchus and in the Thebaid, whereas the Small Oasis was most easily reached from Oxyrhynchus and belonged to the Heptanomia. For commercial relations probably linking both these oases, as well as the oasis of Ammon, with Oxyrhynchus see XLI 2975 and 2983. See now G. Wagner, *Les Oasis d'Égypte* 189-90.

Ἐνοσίρις = Ἐνοσίριος. Cf. F. T. Gignac, *Grammar* ii 28-9. It is uncertain whether the last letter is sigma or omicron. In the latter case the name would read Ἐνοσίρις<ς>. The omission of final sigma occurs elsewhere in this document (1, 4).

5 Χάρμιτι. Cf. 10-11. This indeclinable form is not attested elsewhere; it seems to be related to Χάρμις, see BGU IX 1897.94 (Χάρμιν), P. Leit. 1.8 (Χάρμιτος), P. Giss. Univ. Bibl. 32.20 (Χάρμειν = -ων), and in fact it would be acceptable as a dative of that name, see F. T. Gignac, *Grammar* ii, 55-8. Here it is treated as an Egyptian name, see Gignac, op. cit., 103.

8 ἐγγετὸς. The writing is very compendious again, but this is the expected common form; not εἰσιόν or ἐπιόν.

8-9 οἰκογενῆ. For anacrisis of home-bred slaves see I. Biezuńska-Małowist, *L'Esclavage* ii (période romaine), 59-61.

10 τετανότριχα. Cf. A. Caldara, 'I connotati personali', *Studi della Scuola Papirologica* iv. 2 (Milan 1924) 58-63.

3785. LATIN MILITARY LIST

38 3B.79/G(1-2)b

14 × 16 cm

c.250

The soldiers' names are arranged by century and date of enlistment as usual. The centuries indicate that they are probably footsoldiers, and if horsemen, they must be legionary horsemen, cf. M. P. Speidel, *Aegyptus* 66 (1986) 166. Many of the names are specifically Egyptian, so that they do not belong to a unit from outside the province, but either to the *legio II Traiana*, the only legion in Egypt and stationed there since at least AD 127, cf. B. Isaac-I. Roll, *ZPE* 33 (1979) 149, 154, or to an auxiliary cohort. There are no marginal notations, so that this is probably either a partial roster or a list compiled for some special purpose, cf. R. O. Fink, *Roman Military Records*, 2-4, 9-10. The fact that men from the same century are separated, see 30 n., makes a special list more likely. It is not a list of *principales*, since there are at least eight men listed under one century and date (10-17).

The dates of enlistment range from AD 226 to AD 246. The later year is the earliest possible date for the papyrus, while the earlier one indicates that the soldier in question had already served for twenty years in AD 246. Terms of thirty-five (P. Rainer Cent. 165 ii 11 = *ZPE* 56 (1984) 84, col. iii 13), thirty-six, and even forty-five years (R. O. Fink, *Roman Military Records*, 83-4) are attested, so that the outside lower limit might be as late as AD 271, but a term in the region of twenty-five years is more normal and c. AD 250 is a reasonable approximation to the likely date.

The papyrus is broken at the foot and at each side, leaving parts of the top margin and ends of lines from one column followed by beginnings from the next. The writing, a good sloping cursive, runs along the fibres of the recto. There is a sheet-join running vertically about 3 cm from the right-hand edge. The back is blank.

1 ζ *Eu]daemon*s. The Greek ending is slightly unexpected, cf. e.g. CPL 168.8 *P]asionis*, 169.3 *Anubionis*, 170.8, 10 *Theonis*, 12 *Hatrimonis*, 172.2 *Sarapionis*. The nearest parallel I can cite is *Thebaidos* in CPL 262.8 and 265.5, cf. *Thebaidis* in CPL 222.19. Here *]daemon-* seems clear enough and *-os* suits, whereas *-is* does not. Space favours Eudaemon over Agathodaemon.

The symbol for *c(enturia)* is usually printed in a form resembling the arabic figure 7, which is based on such manuscript forms as we see in e.g. XLI 2953 6 (Pl. I), P. Mich. X 592 ii 3 (Pl. IV). Here (18, 20, 22, 27, 32), although the shape is very cursive and flowing, see Pl. IV, it can be more readily interpreted as a C (the initial letter of *centuria*) with an oblique mark of abbreviation which begins from the lower end of the arc of C and slopes steeply down to the left. Since the letter C is no doubt at the origin of all such symbols, however cursive, a printed form which reflects this is preferable, such as ζ , cf. P. Mich. VII 444.2 n., esp. fn. 3.

2 Cf. 9, 18. The date is AD 240. The suggested *nomen* *Sef]ius?* for *Venustus*, e.g. A. Degrassi, *Fasti*, 67, rests on a false reading, see J. Rea, *Proc. XII International Congress of Papyrology*, 427 n. 2. Fuller forms of their names, *Suetrius Sabinus* and *Ragonius Venustus*, have turned up in *AE* 1971 no. 431, pp. 141-2.

The writing of *Venusto* is clear and complete in 18. Here it seems certain that the crossbar of *t* runs straight to the *c* of *cos*, presumably as the result of haste rather than as a deliberate abbreviation. In 9 the damage obscures the end. In all three cases *Venust-* is certain, and in the first two *Sabi]no II* is entirely satisfactory.

3-5, 8, 10-17 Comparison with col. ii shows that many of these soldiers will have had the *nomen* *Aurelius*, but there is enough variation to make it impossible to restore in any particular case.

6 ζ *Cop]ret]i<s?* is palaeographically attractive, but see 22 n. for the difficulty.

7 *Lupo e]t Maximo* (AD 232) suits the space better than *Albino e]t Maximo* (AD 227), cf. 2 and 9, where *Sabi]no*, pretty much the same length as *Albino*, leaves substantial remains.

8 Cf. 3-5 n.

10-17 Cf. 3-5 n.

15 *Orion = Horion*. Cf. 17 *Arpocraton = Harpocraton*; contrast *Horigenes*, 3, 10, 12. Cf. P. Mich. VIII 468.14 n. on uncertainty about aspiration in Latin. It was widespread in Greek too, see F. T. Gignac, *Grammar* i 134-8.

18 *Venusto co(n)s(ule)*. Cf. 2, 9, and 2 n. This is a particularly clear example of the use of only one consul's name merely for the sake of brevity. The long form in 2 and 9 shows that there is no question of *damnatio memoriae* in the case of *Sabinus*. Cf. 33 n.

22 *Copret]i<s?*. The reading seems clear. We have *Copret]i* in 27, and *Cop]ret]i* is tempting for 6. We expect *Copret]is* as a Latin genitive of *Κοπρη̄ς*. The form *Κοπρη̄ρος* in BGU IX 1900.28 looks like a mere clerical error of genitive for nominative, although it appears uniquely as a nominative in D. Foraboschi, *Onomasticon*. However, if *Cop]ret]i* is wrong in 6, we should simply correct to *Copret]i<s>* here and restore *Copret]is* in 27. For the splitting of the century see 30 n.

25-6 These two lines interrupt the normal entries. They seem to refer to something 'written above', *s(upra)s(cript-)*. Since the men immediately above did not enlist till AD 240, it seems safe to restore the name of the junior consul as *Albino* (AD 246) rather than *Extricato* (AD 217), which would be the earliest date in the piece. After *s(upra)s(cript-)*, *iv ex xxi]* is a possibility. There are four soldiers listed above, which could suit *s(upra)s(cripti) iv*. That might be followed by a date, i.e. *ex xxi]* [(or a higher figure up to *xxi]iii*) *Kal(endis)* (month)] (consulship in 26), that is, 'The four men listed above (were promoted? seconded? discharged?) from the 16th(?) day before the Calends of . . . in the consulship of Praesens and Albinus'. Cf. R. O. Fink, *Roman Military Records* no. 31 (pp. 156-7), no. 66 (pp. 234-9). In no. 64 dates with *ex* are those of enlistment, but that seems to be unsuitable here.

27 There seems little doubt that this is the resumption of the same century as that in 22, see 22 n.

28 The year is AD 242.

30 The year is AD 246. *Extricato* (AD 217) is excluded as the name of the second consul, because the men are listed by seniority, see R. O. Fink, *Roman Military Records*, 10. In this connection it should be noted that it is rather odd that men of the same century are here separated, certainly in the case of the century of Annianus, see 20-1 where we have *Julius Castor*, who enlisted in AD 240, and 32-4 where we have *Petronius* . . ., who enlisted earlier, in AD 226. Probably the century of *Copres* was also split, see 6 and 22, although the apparent split in col. ii, see 22 and 27, is not a true split, since the century heading seems to be written a second time only by way of resumption after an abnormal entry which still refers to the same century.

33 *Aufidio M[arcello II co(n)s(ule)*. The year is AD 226, see R. O. Fink, *Roman Military Records*, no. 95 introd., P. Dura 69 introd. The senior consul was the emperor Severus Alexander. The Dura document is supposed to date between the death of Severus Alexander and sometime after the reign of Maximinus (AD 235-8), who inflicted *damnatio memoriae* on his predecessor, cf. XLV 3244 11 n., A. K. Bowman, *JRS* 66 (1976) 156. When Severus Alexander was later deified, his name is supposed to have been restored in the consular formulas. It certainly was sometimes, see R. O. Fink, *Roman Military Records*, no. 4b i 5, 10, 18, no. 20.14, no. 24.18. Here, however, the short formula is still used, no doubt for brevity, cf. 18 n., as late as AD 246, by which time Severus Alexander was certainly a *diuus*, cf. e.g. PSI XII 1238.8, in a document of AD 244.

3786. FRAGMENT OF REGISTER

67 6B.10/J(1-2)a

19.5 × 17 cm.

Third century

This item was cut from an obsolete register so that the back could be used for the letter published below as 3812, see introd. there. The register had sub-headings consisting of the names of Oxyrhynchite districts, see 16, *Βορρά* (or *Νότου*) *Κ]ρηπείδος*, cf. H. Rink, *Strassen- und Viertelnamen von Oxyrhynchus*, 38-9. Under these headings the names of persons were listed alphabetically by initial letter. This allows us to see that, although the tops of three columns are preserved, a fair amount must be missing at the foot, since col. ii breaks off among names beginning with delta and col. iii begins with names in eta. Names in epsilon are fairly frequent and one would expect a few in zeta as well. All the surviving names are masculine; the men are further identified either by a patronymic or an alias. Opposite each name is an amount of grain in artabas. Most entries have $\alpha = 1$; eight have $\beta = 2$, five have $\gamma = 3$. In each case the numeral is followed by a sinuous curve and an oblique stroke rising to the right. This frequently means one half, cf. H. C. Youtie, *Scriptiunculae* i, 267, 270; on the other hand it sometimes simply marks an ordinal number, cf. Youtie, op. cit., ii, 951-3, especially in dates. In this case it is on the one hand difficult to imagine that the clerk repeated these strokes after every number if they were virtually meaningless, and on the other to prefer the series $1\frac{1}{2}$, $2\frac{1}{2}$, $3\frac{1}{2}$ to 1, 2, 3. Perhaps we can accept that the strokes here accompany cardinal numbers.

If it is right to guess that most of these people gave or received one artaba of grain, while a few gave or received two or three artabas, it is tempting to connect this document with the Oxyrhynchite corn dole, for which the recipients were registered according to the districts in which they lived and probably received one artaba of wheat each month, see P. Oxy. XL pp. 6, 98. The evidence for this dole is at present confined to a short period c. AD 269-72, so there may be an implication that this register too is close in date. For the moment there is no way to confirm the connection or the implication about the date.

The register was written along the fibres of the recto of the roll, as is proved by a surviving sheet-join running vertically about 4.5 cm from the left edge.

5 Neither κλ(ηρονομ-) nor Κλ(αυδι-) seems very attractive in this place, but] . ιουκλ() as a name seems even less likely.

16 See introd. for this heading. The names of the principals just before it probably began with omega and just after it with alpha.

24 Καλπο]ύρνιος, the most likely possibility (see F. Dornseiff, B. Hansen, *Rückläufiges Wörterbuch der griechischen Eigennamen*, 239), would suit.

27 This blank or short line is puzzling. It does not seem likely that there was another heading here so soon after 16, but there may have been. It would have been short, e.g. Ἐρμαίου, Ἡρώου, Κρητικοῦ, Πλατείας. The difficulty is that there would have been only ten persons listed under the North Quay or South Quay district. In XL 2929 these districts have 280+ and 290+ respectively for the largest class of recipients of the corn dole, and in 2928 they have 103 and 31 for the next largest class, and 6 and 3 for the smallest class. It is clear from the alphabetization that all sixty persons in lines 31-90 belonged to the same district. The largest number in any district for the smallest class of dole recipients is 14 (2928 ii 7). None of these figures fits very well.

43-4 For Agathus Daemon son of Arcius cf. XL 2892 i 4-5, 19-20; for Hatres alias Didymus cf. XL 2936 ii 1. These names are so common that identity in either case is unlikely. No other identifications have yet been made.

3787. TAX LIST

28 4B.60/D(3)a

22 × 28.5 cm

c.301/2?

This text stands on the back of XLIV 3184, where a short excerpt and a description were given in the introduction. Because these have caused a misunderstanding about the nature of the tax list, see 3789 introduction, a full edition is given here.

There are two columns of writing, mostly consisting of names and amounts paid. The main heading Λουκίου συστάτου and the frequent occurrence of the sum of dr. 1,200 link the list with the tax called ἐπικεφάλαιον πόλεως, see 3184 introd. and 3789 introd. However, the sub-headings are names of villages of the Oxyrhynchite nome, although the systates is a city official, which indicates that the tax was payable in respect of some connection with the town. We could guess either that the persons were all resident in the town but registered in their separate villages, or on the contrary that they were registered in the town but had left to live in the villages. Occasional indications of a more precise location within the village sections favour the second view, cf. 3 n.

The date suggested is that of a receipt countersigned by the systates Lucius, PSI III 163, but the signatory's name is not a reliable indication of the precise year, see 3789 introduction, table note (1). A *terminus post quem* is given by 3184, two items which were glued together side by side as part of a roll-file and which date from October/November AD 296 and 9 January, AD 297. When they were no longer needed, they were detached in one piece from the roll-file and the blank back of this piece was used for the tax list. A *terminus ante quem* of some time in AD 303 can be argued, but with no certainty, see below.

A new point of interest has been revealed by closer study of the text. It includes mentions of a Christian deacon (*διάκων ἐκκλησίας*, 24-5) and of a reader (*ἀνα[γ]νώστης*, 57), who may well be the earliest yet known from documents. The earliest deacon previously known was of AD 324, see P. Coll. Youtie 77 = P. Col. VII 171 with the commentary of E. A. Judge, *Jahrb. f. Antike u. Christentum* 20 (1977) 72-89; the earliest reader was one of AD 304, see XXXIII 2673.

It is a great pity that we cannot localize for certain the activities of these men. We can see from 2673 that in the village of Chysis there was a church which was abolished in AD 304 during Diocletian's persecution and in which a reader served. Here the deacon is listed under the main sub-heading of the village of Thosbis (20), but the subsequent addition of the name of Mermertha in 22 may apply to the whole section 22-9 and so to the deacon. The reader is listed under Tampetei. Moreover, it does remain possible that they worked in Oxyrhynchus itself and were merely registered in these villages, although the reverse seems more likely, see above and 3 n.

The fact that the deacon and reader are mentioned without ceremony suggests that the document was written before Diocletian's persecution began early in AD 303. This is not certain. The tax was levied at least until AD 320, see 3789, so that this list could date from after the persecution. The systates Lucius is taken to be the same as the earliest attested systates, Lucius Septimius Serenus (PSI III 164, AD 286/7). If so, a date of AD 301/2 seems more suitable than one after the end of the persecution, say AD 311 at the earliest.

1 Lucius the systates is the signatory of a capitation receipt of AD 301/2 (PSI III 163), which is the date tentatively suggested for **3787**, see introd. In XXII **2338** introd. there appears *Λουκ[ί(ο)] συστάτο[υ] Δρό(μου) Θοή(ριδος)*—see BL IV 65; *ZPE* 18 (1975) 201. With the advantage of a microscope *Λουκίο[υ]* seems sure. The latest year referred to in **2338** (line 84) is 5 Diocletian = AD 288/9, in or after which **2338** must have been written. The main hand of **2338**, which is not that of the short annotation in which the systates appears, seems to be the same as that of **3787**; note also that the phonetic spelling *Πτολαμαίου* = *Πτολεμαίου* occurs in **2338** 25, 88 as well as in **3787** 6. Finally, in PSI III 164 of AD 287 there appears a Lucius Septimius Serenus systates, who is presumably the same. This cluster of dates, AD 287 to 301/2, has been used in argument for the dating of **3787**, see introd. above.

2 On the basis of line 3 (*Θεωνάτος*) perhaps restore *Θ[ε]ωνάτ*, which would fit if the theta were large.

3 *Τεργεάι*. This place-name is unknown and in view of the damage to the surface the reading is no more than a suggestion. It was presumably a small place in the neighbourhood of Dositheu. These more precise indications of locality inside the village sections rather suggest that the persons were actually to be found there, not merely registered as belonging to the village; cf. 39, 65; see introd.

4 . p. This may have been *ἐν*, i.e. the beginning of a note giving a more precise location, cf. 3, 39, 65. If so, it was abandoned. Palaeographically *απ* might be better, but that is incomprehensible.

6 The placing of the personal name suggests that a place-name occupied the beginning of the line.

/(δρ.) *Ac*. The oblique stroke here and frequently hereafter is not a check mark, since it is ligatured to the drachma sign and was obviously not written later. It might be expanded (*γίνονται*) = 'total', but no difference seems to be intended between entries with and without it.

7 If]*Çε*. . . [really is the beginning of the place-name, see P. Pruneti, *I centri abitati*, 162-77, for the many possibilities.

8 *Ὀλβανός Ὀλβανού*. For the son Albanus and Silvanus are less likely possibilities.

9 *Πουρώ*. This form, probably from nominative *Πουρώς*, is new, though several names beginning *Πουρ-* can be found in F. Preisigke, *Namenbuch*, and D. Foraboschi, *Onomasticon*.

11 The only known possibility is *Τριγῆου Νοτίου*, see P. Pruneti, *I centri abitati*, 208, but *Ν]οτίου* here would not be very satisfactory and this name itself is doubtfully read in its only occurrence.

12]. . . These confused traces are cramped for space between 11 and 13, but they do not seem to belong to either. Since there is no corresponding payment, they should be part of the place-name or some subsidiary annotation.

13 *λεγόμενος*. Cf. BGU I 277 ii 6 *Πετρυρίς ἐπικαλού(μενος) Τέκτων*; BGU IX 1900.78 *Σιδείος ἀπ(άτωρ) ἐπ(ικαλούμενος) Τέκτων*.

14 Read *Ἀν[δρ]έα*? Space is short for [δρ], but -*εα* looks convincing. For gen. *Ἀνδρέα* cf. F. T. Gignac, *Grammar* ii, 13.

15 *Σενήρεως* probably fits best, but *Σέννεως* is not excluded.

18 The low payment suggests that we might have only one person here with an alias, but there are no other examples of *ὁ καί* in this list and it would be easier to read e.g.] *μης καί*.

20 *Εὐτρόπις* (= -*πιος*). Cf. F. T. Gignac, *Grammar* ii, 25-6.

21 Read perhaps *Παπύριος*.

22 The village name was crowded into the margin after the main entry had been written. It may apply to Pinution only or to the whole of the section 22-9.

23 *Ἀνικήτης*. This unique form may be a mere mistake for the common *Ἀνίκητος*. It might be argued that it is an echo of the title *νικητής*, equivalent to Latin *uictor* or *triumphator*, taken by Constantine after his defeat of Licinius, see T. D. Barnes, *New Empire*, 24. However, this would tend to put the text in AD 324 or later, which is contrary to all the chronological indications mentioned in the introduction.

κελλός, 'crook-legged' or 'bandy-legged', may be a nickname rather than a description only. It is new in the papyri.

The drachma sign is omitted.

24-5 *διάκων ἐκκλησίας*. See introd. On the form of the title, *διάκων* and *διάκονος*, see J. D. Thomas, *ZPE* 6 (1970) 178. The papyrus discussed there has been fully edited by Z. Borkowski, *Une description topographique des immeubles à Panopolis*.

30 *Ἐποικ(ίου) Σαραπίου*. Cf. P. Pruneti, *I centri abitati*, 161. There is only one other text, see *ZPE* 25 (1977) 177, lines 12, 18. The place presumably takes its name from a shrine of Sarapis, i.e. *Σαραπίου* = *Σαραπιείου*.

35 The given sum of tal. 6 dr. 600 (= dr. 36,600) is dr. 5,600 short of the apparent total of dr. 42,200 (= tal. 7 dr. 200).

36 This line is written upside down in the lower margin, which means that it is the same way up as **3184(a)** and is most probably to be regarded as an endorsement on that document. However, the village referred to there is Muchintale, and the only obvious connection is that both this and Iseum Tryphonis were in the Lower toparchy, see P. Pruneti, *I centri abitati*, s.vv. The small cursive hand is not easily identifiable with any of the others on the sheet.

38 *Ἀτήρις* is probably a phonetically spelt variant of *Ἀτίρις*.

39 *ἐν ἐποικ(ίῳ) Ἰσιδά(ρου)*. This place is not in P. Pruneti, *I centri abitati*. It was presumably small and in the neighbourhood of Senecleu, cf. 3, 65 nn. On the nature of an *ἐποίκιον* see M. Lewuillon-Blume, *Actes du XV^e congrès international iv* (Pap. Brux. 19) pp. 177-85, esp. 178-9; 191 n. 7; M. Drew-Bear, *Le nome Hermopolite*, 41-2.

44 *Θε[δ]ωρος* would suit, but the remains are scanty. The last letter or sign is raised rather as in 13 *λεγο^λ* = *λεγόμενος*. The entry seems rather long for name and patronymic only. There may also be a note of a subsidiary location or some other description.

45 *Τα[.]*. The possibilities are many, see P. Pruneti, *I centri abitati*, 187-99.

46 See F. Dornseiff-B. Hansen, *Rückl. Wb. d. gr. Eigennamen*, 212-13 for many possible patronymics.

47 Πρ[ο]υπρ[ο]β[ο]ς. The more frequent spelling is Ποσομπ-, but Ποσονπ- occurs in P. Mich. X 602.9-10, as corrected in P. Oxy. XLVI p. xv (ad XXIV 2422).

55 Μαρίας. In view of the deacon and reader (24-5, 56-7) there seems good reason to suppose that the name here is that of a Christian, cf. H. C. Youtie, *ZPE* 22 (1976) 63.

56-7 Cf. introd.

58 παράδοξ[ο]ς. On this title of athletes and musicians see R. Merkelbach, *ZPE* 14 (1974) 94-5; note the reserve of L. Robert, *REG* 87 (1974) 286-7, No. 534. Another bearer of it appears in connection with the ἐπικεφάλαιον in P. Oxy. Hels. 28.3-4, διὰ Θεάνος παραδόξου (not 'son of Paradoxus!'). What exactly διά means in this context is not clear to me.

63 Θεανού seems to be a new genitive of Θεανώ, which was subject to some fluctuation, see F. T. Gignac, *Grammar* ii, 87.

65 The ἐποίκιον Διογένους is unknown to P. Pruneti, *I centri abitati*. The placing suggests that the note was added to refer back to 64, although it was written before 66. The place was presumably a small one in the vicinity of Tampetei, cf. 3, 39 nn.

68-9 The figures are damaged, but again they appear irreconcilable with the calculations, cf. 35 n. The total of col. ii (37-67) by calculation is dr. 39,200 (= tal. 6 dr. 3,200) and it is clear that this figure was not written in either 68 or 69.

Line 68 shows a sum of over ten talents, probably tal. 12 dr. 1,400, which is of the right order of magnitude to be a sum total of both columns, but is not correct. The correct total by calculation would be tal. 13 dr. 3,400 (tal. 7 dr. 200 + tal. 6 dr. 3,200). The given total in 68 is also not the sum of the incorrect figure given in 35, tal. 6 dr. 600, and the calculated total of 37-67, i.e. tal. 6 dr. 3,200, which would be tal. 12 dr. 3,800.

In 69 the figure for drachmas is 4,800, the figure for talents is damaged. The wide extent of the traces suggests a figure of two digits, but the left side is not obviously ι = 10, so that it is not clear whether this is a column total or another sum total. Tal. 6 (ς) is not an impossible reading, but this too does not give a coherent calculation, i.e. tal. 6 dr. 600 (35) plus tal. 6 dr. 4,800 (69?) does not give a total of tal. 12 dr. 1,400 (68), but one of tal. 12 dr. 5,400.

3788. OFFICIAL LETTER

41 5B.86/B(3)a

17 × 26 cm

17 April 309

This dated document was mentioned under its inventory number in XLVI 3307 introduction, as possibly affording a tenuous clue to the date of that item. It is a notice from a νομκάριος of the nome to the *praepositus* of the eighth *pagus* that he should make one of the villages in his *pagus* take its turn to supply a camel-driver for compulsory service with camels being dispatched to the imperial palace in Memphis. This interesting building was not known before, see 4 n. The addition of νομοῦ to the puzzling title of νομκάριος adds a little to what was known about it, see 2 n. For a recent short survey of the requisition of camels in the papyri see P. Petaus 85 introd.

The writing, which in the main text is a rapid, elegant, sloping cursive written with a thin nib, runs along the fibres of the recto. A sheet-join can be seen less than half a centimetre from the left edge. It is made in the way described in L 3624-6 introduction, p. 61, so as to have only three layers of fibres. The overlap is from the reader's right to left, which means that the clerk turned the sheet through 180° after

it had been cut from the roll, see LI 3591 introd. The lines begin a couple of centimetres to the right of the join. The back is blank.

 10 Δικ[ω]νίου Σεβαστρ[ῶ] καὶ Φλαυῖου Οὐαλερίου Κωνσταντίνου
 υἱ[ο]ῦ βασιλέ[ω]ν, πρὸς ἱε Καλ(ανδῶν) Μαζῶν.
 (vac.)
 (m. 2) Αὐρ(ήλιος) Δίδυμος νομικ(άριος) νομοῦ ἐπιδέδωκα.

1 πραι) 4 l. πόλει 6 l. στοίχον 8 l. ὑπατείας 10 φλαυῖου 11 καλ'
 12 αὐρ', νομικ

'To Aurelius Didymus son of Didymus, *praepositus* of the 8th *pagus*, Aurelius Didymus, *nomiarius* of the nome, greetings.'

'Since camel-drivers are needed for camels being dispatched to the imperial palace in the city of the Memphites, of necessity I write to you, my dearest colleague, so that you may make the inhabitants of the village of Tēis provide a camel-driver in their turn.'

'In the consulship of our masters Valerius Licinianus Licinius Augustus and Flavius Valerius Constantinus, son of emperors, on the 15th day before the Calends of May.'

(2nd hand) 'I, Aurelius Didymus, *nomiarius* of the nome, have submitted (this document).'

1 Διδύμῳ Διδύμου πραι(ποσίτω) η πάγου. This incumbent is unknown. On *pagi* and *praepositi* see J. Lallemand, *L'Administration*, 97-8, 131-4. The extent of the eighth *pagus* is best known from the lists of place-names in XLVI 3307 and XII 1448, conveniently arranged in P. Pruneti, *I centri abitati*, 237.

2 νομκάριος νομοῦ. This confirms the view of T. C. Skeat, P. Beatty Panop. 1.252 n., that the office relates to the nome, and supports his suggestion that the title is actually derived from *νόμος* rather than *νόμος*. The function is still obscure. Here he notifies a *praepositus pagi* to see to it that a village supplies a camel-driver for compulsory service. In P. Beatty Panop. 1.252-5 (AD 298) the strategus informs the *nomiarius* that two boats (*ἀλιάδες*) are to be supplied for postal service (*ὀδοπορίαν . . . γραμματηφόρον*), one at the expense of the sailors, another at the expense of the nome (*ἀπὸ τοῦ νομοῦ*) and of the rest of the sailors. (The text is full of difficulties, but that seems to be the gist.) Further on, in lines 385-8, the same strategus tells the same *nomiarius* that he is to estimate the cost to the nome of its two-thirds share of a levy of hides to be used in work on an army fort. The other third is to be at the cost of the city, cf. 379 n. A late third-century occurrence of the word in damaged council proceedings adds nothing more (XII 1416 21).

In XLVIII 3390 1 n. the editor entertains the possibility that the νομικ(οί) there are νομικ(άριοι). They instruct a correspondent whom they regard as a colleague (ἀδελφῶ) to disburse money to the pastrycook (βακτιλάτ(ι) = πακτιλλάτ(ι)) of a strategus (AD 358). A similar possibility exists for BGU XII 2165.3, 2166.[3?], 2169.4?, texts of the late fifth century concerned with grain transport, in which the νομικ() occurs in a passage which is damaged in all three. From the fifth, sixth, and seventh centuries there are several bare and unhelpful occurrences of the word in accounts and contracts (VIII 1131 [3], 17, I 136 10, 45, 52, P. Iand. 45.1, P. Rein. II 107.6 (νομικ()), XIX 2237 5, 20, 25, XVI 2032 9, 16, 25), but two others to νομικάριοι καὶ πακτάριοι τοῦ δέξεως δρόμου (I 154 10, XVI 2024 10) recall P. Beatty Panop. 1.252-5, where the ἀλιάδες and ὄρηγοριάν . . . γραμματηφόρον can be compared with the ἀλιάδες γραμματηφόροι τοῦ δέξεως δρόμου of, for example, XXXIII 2675 9-10 (AD 318), on which see LI 3623 introd. The connection with official transport is the most noticeable thread in this tangled skein.

The fact that his name and title are put in second place in the address suggests that the νομικάριος regarded himself as the inferior or at least not the superior official, although his message to the *praepositus* is tantamount to an order and although his sphere of action is the whole nome and not a *pagus*, of which there were ten in the Oxyrhynchite nome. We may also note that the subscription, 'I, Aurelius Didymus, *νομικάριος* of the nome, have submitted (this document)', is more appropriate to an application or a report than to the official instruction that the text appears to be.

The two letters in P. Beatty Panop. 1 addressed to Φιλοξένω νομικαρίῳ (252, 385) rather suggest that there was only one in the Panopolite nome in AD 298. Two late Byzantine documents refer to a college, see above.

4 τὸ ἐν τῇ Μεμφιτῶν πόλει (= -λει) ἱερὸν παλάτιον. The references to παλάτιον in the papyri have been collected by S. Daris, *Lessico Latino*, 87. Four are sixth-century, of which three are titular references to *notarii* of the θεῖον παλάτιον (P. Cair. Masp. III 67320.1, P. Erl. 55.1, P. Lond. V 1679.4), and the fourth is in an encomiastic poem by Dioscorus of Aphrodito describing Justin II as νέον ὑπὸ πολυκλήπτρου παλλατίου (P. Cair. Masp. II 67183 = E. Heitsch, *Die gr. Dichterfragm. d. röm. Kaiserzeit* No. xlii(1).7). However, the remaining three refer to buildings in provincial Egypt: P. Beatty Panop. 1.260 (Triphicum near Panopolis; AD 298), BGU IV 1087 i 12, iii 4 (Arsinoe; 3rd cent.), SPP XX 230.2, 4 (Hermopolis?; 4th cent.). For discussion of these and of the other evidence on the places where emperors stayed when away from their capitals see F. G. B. Millar, *The Emperor in the Roman World*, 41-3. A document published later, BGU XIII 2280(a) ii 16, alludes to the one at Arsinoe in AD 276, which is the earliest date for the word in the papyri, see A. Łukaszewicz, *Les édifices publics*, 177.

This *palatium* in Memphis has not appeared before. It is tempting to speculate about the need for camels there in April, AD 309. If the camels were for imperial use, cf. BGU I 266 (= W. Chr. 245).6-10, the likely user would be Maximinus, the Eastern emperor, whose exact whereabouts in AD 309 are unknown, see T. D. Barnes, *New Empire*, 66. Maximinus did pay a visit to Egypt, getting as far south as Apollonopolis Ano (Edfu), see Barnes, *ibid.* This was probably in AD 305 or 306, since the prescript of the imperial letter which attests it, C. Just. 3.12.1, in spite of some garbling pretty clearly refers to the 'Second Tetrarchy' (AD 305-6), while the consular date clause is much more garbled and its reconstruction as equivalent to 5 November, AD 305 much more open to doubt. The *palatium* at Memphis might have been built for that visit or more probably, in view of the touristic importance of the place, for a much earlier imperial visit. The camels might equally well have been used for transport, cf. A. H. M. Jones, *Later Roman Empire* ii, 768, 841, 842, 1353 n. 42, or for the haulage of heavy materials for use in building or repairing the *palatium*, cf. P. Lond. II 328 (p. 75), BGU III 762. If there had really been the prospect of an imperial visit here, we might expect the sort of explicit phrase which we find with the mention of the palace in P. Beatty Panop. 1.260 εἰς ἔκστρωσιν παλατίου . . . πρὸς τὴν ἐ[ὐ]τυχῶς ἐσομένην ἐπιδημίαν . . . Διοκλητιανοῦ . . . Σεβαστοῦ, 'for (superintendence of) accommodation in (?; 'bedding of' T. C. Skeat) the palace . . . for the auspiciously impending visit of . . . Diocletian . . . Augustus'. There are many parallels, see e.g. LI 3602-5. We should note too that the village supplies the camel-driver κατὰ στοῖχον, 'in turn', and this could imply that there were frequent occasions for the supply of camels to the same destination, but see 6 n.

5 φάλατρε. This is a standard address to an official colleague, see F. Preisigke, *WB* III p. 202.

6 Τῆσως. Cf. P. Pruneti, *I centri abitati*, 203-4.

κατὰ στοῖχον (= στοῖχον). For the phonetic spelling see F. T. Gignac, *Grammar* i, 197-8. The only other occurrence of στοῖχος in the papyri is in VIII 1119 12, which refers to an Antinoite who is deduced to be a resident of Oxyrhynchus but who was absent in Antinoopolis προσευκαίρουσα ταῖς λειτουργίαις εἰς ἀ[ε]

προεχειρίσθημεν τοῦ στοῖχου καταλαβόντος τὴν ἡμετέραν βουλήν, 'attending to public services to which we were appointed when the turn came round to our town council'. The editors' note observes that there seem to have been compulsory services at Antinoopolis which the nome capitals undertook in turn. So here the village has to take its turn to supply a camel-driver. This may mean that there were frequent dispatches of camels to the palace at Memphis, cf. 4 n., but perhaps it is more likely that the 'turn' applied to any occasion when camels had to be delivered to any destination.

8 [δεσποτ]ῶν. For this restoration see D. Hagedorn, K. A. Worp, *ZPE* 39 (1980) 165-77, esp. 168-9. 11 υἱ[ο]ῦ βασιλέ[ω]ν. The Latin title was *filii Augustorum* (e.g. ILS I 683). R. S. Bagnall and K. A. Worp, *Chronological Systems*, 106, collect the references to this consular formula in the papyri. They give the standard form of the title as υἱοῦ Ἀγούστων. This actually occurs in only one papyrus, P. Panop. 15.19 (Ἀγούστων; *ZPE* 8 (1971) 208), which is from Panopolis in Upper Egypt. The form most frequently found is υἱοῦ Σεβαστῶν (add *Archiv* 27 (1980) 55.24), and it is noticeable that all these papyri are from the Arsinoite nome. (Note that the Heracleopolite P. Hib. II 219.19 is restored with this formula, whether correctly or not it is impossible to say.) So far υἱοῦ (τῶν) βασιλέων is attested only from Oxyrhynchus: add XLVI 3270 3, cf. 28 (Maximinus and Constantine) υἱῶν τῶν βασι[λ]έων, to the earlier references, which are XXXIII 2667 16, P. Berl. Leihg. I 21.15-16, P. Oslo III 86.7 (not otherwise obviously from Oxyrhynchus). There remains M. Chr. 196, which is from Oxyrhynchus but damaged so that the end of the consular date is reported as . . . Κωνσταντίνου¹⁷ . . . ακ[.] πρὸ 5 Νωνῶν κτλ. It has already been suggested that we should read some version of υἱοῦ βασιλέων here (P. Berl. Leihg. I 21.13 ff. n., cf. BL III 118 from P. Oslo III 86.7 n.), but this has not yet been confirmed. See now also R. S. Bagnall *et al.*, *Consuls of the Later Roman Empire* 153, from which it emerges that Ἀγούστων also occurs in P. Giss. inv. 126 recto 23 (*JCS* 28 (1985) 121); this is also from Upper Egypt.

3789. RECEIPT FOR ἐπικεφάλαιον πόλεως

38 3B.79/G(3-4)a

8.5 × 8 cm

27 May or 14 June 320

This receipt for city poll-tax of AD 319/20 is the latest one of its kind and affords an occasion to review and discuss the evidence, which is presented below in a revised version of the table given in XLII 3036-45 introd.

The tax was introduced under the first tetrarchy, certainly by AD 296/7, possibly earlier, see table below, item (1) n. The rate was based on a figure of 1,200 drachmas, though part payments and irregular figures occur. This rate was raised, possibly in two stages, first to dr. 1,600 and then to dr. 2,400, cf. J. M. Carrié, *Proceedings of the XVI International Congress of Papyrology*, 443-5.

Dr Carrié has drawn attention to Cod. Theod. 13.10.2, an imperial letter of AD 313 directed to the governor of Lycia-Pamphylia, which confirms the exemption of the *plebs urbana* from capitation *sicut in Orientalibus quoque provinciis observatur* and says that it was so exempt under Diocletian. He suggested that the seeming contradiction could be resolved by taking this to refer to exemption from taxes on property held by metropolitans in villages. I would prefer a different explanation. I suggest that the term *plebs urbana*, so grandly reminiscent of Rome, refers not to all the inhabitants of provincial towns, but to those comparatively few persons with full citizen rights in their local metropolis. In Oxyrhynchus that means the ἐπικριθέντες, those whose qualifications for Oxyrhynchite citizenship had been officially scrutinized; compare the use of the term in connection with the corn dole, P. Oxy. XL pp. 2-3.

Several of the receipts which form the bulk of the evidence for the ἐπικεφάλαιον

πόλεως are issued to persons identified by only a single name (XXXI 2578-9, XXXIV 2716-17, XLII 3040-1). Trades are sometimes stated in the later receipts, 'rope-worker, donkey-driver, carpet-weaver', and so on. In all probability these are not full citizens but inhabitants of the city without the full rights and privileges of citizenship. The point is reinforced by 3787, where the persons are listed by village, see introd. In addition P. Oxy. Hels. 28 is a note without an address in which one unidentified person instructs another to issue a receipt in the name of a woman (ὀνόματος Διονυσίας Διονυσοθέωνος διὰ Θέωνος παραδόξου) for two unnamed men 'in your farmstead' (ὕπερ ἐπικεφαλίου ἀνδρῶν δύο ἐν τῷ ἐποικίῳ σου). This strongly suggests that the men were dependents, probably employees, of the woman, and that she paid their capitation. The evidence, in fact, favours the view that those liable were not the citizens of Oxyrhynchus but those non-citizens who were registered as living in the town, who were probably the majority of the population.

Dr Carrié was misled by the description and partial publication of 3787 given in XLIV 3184 introd. into thinking that it attested a flat rate for town-dwellers and variable rates for villagers. The full publication shows that this is not so.

The most frequent signatory to the receipts is the systates. The only certain exception is XXXI 2579, where Heracleides *μητιάρχης* is a guild officer. This probably indicates payment by the guild for its members. In PSI VII 780 new readings suggest that the official was called Morion, cf. XLII 3042, and that he was some sort of banker, see below (12) n. In several cases the signatory does not give his office, see below items (5), (8), (13), (16), (17), (19), (20). Of these, (13) has the same name as (12), where the title is probably *τρ(απεζίτης)*, see note, and (5), (8), (16) and (19) can be assigned to systatae by comparison with other items which have the title and the same name, leaving only the signatories of (17) and (20) without any title.

In this receipt the writing runs along the fibres. There is no sheet-join. The back is blank.

TABLE

(Items (8)a, (10)a, and (11)a are not receipts, but give relevant information.)

	date	payment for	amount	no. of persons	signatory
(1)	XXXIV 2717(a) 294/5?	294/5?	1,200	1	Chosion systates through Heron βοηθός
	(b) —	296/7	800	1	Chosion systates
(2)	XLII 3036 24.2.298	297/8?	1,200	1	Sarapion systates
(3)	3037(a) 4.3.298	297/8?	1,200	1	
	(b) 4.3.298	297/8	1,200	1	
(4)	3038 4.3.298	297/8	1,200	1	
(5)	XXXI 2578 30.3.298	296/7	2,400	2	Didymus
(6)	XLII 3039 29.5.298	296/7	1,200	1	Didymus systates
(7)	3040 17.12.298	296/7	1,300	1	Didymus systates through Epimachus

(8)	3041	14-23.6.299	297/8?	1,200	1	Sarapion
(8)a	XLIII 3141	Jan.-Aug. 300	299/300	—	1	Aurelius Sarapion systates
(9)	3142	26.7.301	300/1	1,200	1	unsigned
(10)	PSI III 163	—	301/2	1,200	1	Lucius systates
(10)a	3787	—	301/2?	various	—	Lucius systates
(11)	XXXIV 2716	—	302/3	1,200	1	name lost
(11)a	P. Oxy. Hels. 28	—	303/4	2,000?	2	—
(12)	PSI VII 780(a)	20.7.305	303/4	400	1	Morion banker(?)
	(b)	20.7.305	304/5	2,000	1	
(13)	XLII 3042	1.10.306	306/7	1,600	1	Morion
(14)	XXXI 2579	4.8.309	308/9	1,600	2	Heracleides <i>μητιάρχης</i>
(15)	PSI IV 302	308/9	308/9	illegible	1	lost or illegible
(16)	XLII 3043	3.9.311	311/12?	3,200	2	Aurelius Aphas and colleagues
(17)	3044(a)	—	312/13	2,400	1	Elias and colleagues
	(b)	—	313/14	lost	1?	lost
(18)	PSI V 462	20.8.314	314/15	2,400	1	Athenodorus systates through Severus βοηθός
(19)	PUG I 19	-5/6.315?	314/15?	1,600	1	Athenodorus through Severus
(20)	XLII 3045	314/15	315/16	2,400	1	Aurelius Politicus and colleagues
(21)	3789	27.5 or 14.6.320	319/20	2,400	1	Apphus systates through Horion (his) brother

Notes to Table

(1) In the introduction to 3036-45 Mr Parsons put forward the hypothesis that one member of the college of systatae was responsible for the collection of the tax for one year. This is attractive, because there is certainly some clustering of names around dates, but 2717 contradicts it. If the figure *α* presented in ed. pr. is correct, the first payment is for the earliest year yet attested (AD 294/5), and this year is not the one preceding AD 296/7, for which the second payment is made, but the one before that. Scepticism has been expressed about the doubtful figure by Dr A. K. Bowman, *JRS* 66 (1976) 168 n. 170. Admittedly it is damaged, but the remains have every appearance of being inconsistent with *αβ* and consistent with *α*. Drs R. S. Bagnall and K. A. Worp in *ZPE* 56 (1984) 132 have suggested *αγ* as the best reading, but this introduces an anomaly in the amount. The first payment is for dr. 1,200, the usual amount. The second payment, of dr. 800 for the same Ammon, is very unlikely to be for the same year. Therefore it seems that Chosion is concerned in the collection of this tax in two different years. Moreover, the second payment is for the same year as in items (5)-(7), where the signatory is not Chosion systates but Didymus systates.

The examination of 2717 revealed an error in the reading of line 2 which does not affect the issue. The line begins with *ὕ(πέρ)*, which was not noticed because it is severely abraded. The repetition of *ὕ(πέρ)* occurs also in 2716 1-2, 3044 10-11.

(2) The date-clause gives year 14, 13, and 6, but the payment is said to be for 'the past year' 14, 13, and 6. Mr Parsons preferred to think that the mistake lay in *διελθόντος* rather than in the figures, because the systates is attested for that year, see 3036 2f. n., cf. below (3) n.

(3) Exactly the same problem occurs as in (2). The sheet holds two receipts of the same date, each for a different person. The first payment is said to be for 'the past year' 14, 13, and 6, the following one is for 'the same year', and the date-clause again has the same figures.

(4) This receipt has the same regnal year figures and the same signatory as (2) and (3), but the payment is for 'the present year'.

(5)-(7) Cf. (1)b, concerning tax of the same year, and (1) n.

(7) The sum of dr. 1,300 is anomalous. It is confirmed by the figures (*δρ.*) *Ατ*, and by the words, for instead of *τρ]ακοσίας* as in ed. pr. we should read *τρ]μιακοσίας*, since the tail of the rho can be seen descending into the line below.

(8) The second digit of the day of the month is damaged, but the date is within Payni 21-9. The figures for the year for which payment is made are seriously damaged. The name of the signatory Sarapion suggests that it was for AD 297/8, cf. (2)-(4), but this is not certain, see (1) n.

(8)a This is a notice of death addressed to Aurelius Sarapion systates by the dead man's mother-in-law. She mentions the tax in line 17, saying that she should not be held responsible for payment on the man's behalf.

(10)a This is a list of taxpayers and sums of money, headed by the name of Lucius systates, see **3787**.

(11)a See introd. above. The sum is given in ed. pr. as (δραχμῶν) Βγ = 2,400, but with a note directing attention to the plate and to the writing of the figure as Β—. In view of the various sums that appear in **3787**, including dr. 2,000 for two persons, see line 16, and dr. 2,000 for one person, see lines 17, 19, 20, 33, it may be better to regard the horizontal as merely marking the numeral for 2,000.

(12) The signature was read by Professor V. Bartoletti as *αυρ̄ μαρ̄ ω. ντο σεε̄η*, see XXXI **2578-9**, introd. This recalls XLII **3042** 10, *Μωρίων σεεη(μείωμαι)*, dated in the next year, AD 306/7, see note (13) below. The plate now published by R. Pintaudi, *Pap. Flor. XII* (Supplemento: Papiri . . . a Firenze, Catalogo della Mostra, 1983), Tav. XXXIV, shows that we can read *Αδρ(ήλιος) Μωρίων* with no difficulty: *μω* is written with one arch too few, but this is a very common phenomenon in this combination, cf. **3784** 3 n. The gap between the second omega and the following nu results from a fold which the plate shows clearly. The fold was evidently closed when the text was written; it was probably opened only in modern times when the papyrus was damped out and flattened. Dr R. A. Coles has suggested to me that the following abbreviated title should be read as *τρρ* and expanded to *τρρ(απεζίτης)*. The rho, read as omicron by Professor Bartoletti, has a tiny loop and a tail which descends only a very little way before it curves back up to the top level. Compare the rho in *αυρ̄*. Although there is no parallel in the other receipts and although there is no way of telling what sort of banker Morion was, this seems a very satisfactory reading.

(13) The date of **3042** has been revised by R. S. Bagnall and K. A. Worp, *Bull. Egypt. Seminar* 1 (1979) 13.

(14) The date of **2579** has been revised by Bagnall and Worp; *ibid.*, 12.

(15) On the illegibility of PSI IV 302 see XLIII **3142** 12 n.

(16) The year for which payment is made is not stated. The Aurelius Aphus (Ἀφούς) here is presumably the same as the systates Apphus (Ἀπφούς) of **3789**, even though nearly nine years separate the documents, cf. note (1) above.

(19) For the revised date see XLV pp. xvii-xviii. A doubt is cast on the revision by the amount of dr. 1,600, which seems to relate it to (13) and (16) of AD 306 and AD 311, and this is not certainly counterbalanced by the fact that the signatory is the same as in (18), cf. notes (1) and (16) above. However, the plate in PUG I seems to favour the correction and this payment of dr. 1,600 may be regarded as a part payment on dr. 2,400 in the same ratio as dr. 800 on dr. 1,200, see (1) and cf. (14) of AD 308/9, where dr. 1,600 is for two persons. Compare too (12) where the payment of dr. 400 may well be the balance after a similar part payment. In fact, although (13) and (16) seem to support the suggestion that the rate was raised in two stages, first from 1,200 to 1,600 and then to 2,400, see introd., it could be that the rise was directly from 1,200 to 2,400 and that these were part payments too.

(20) This is the only receipt for a payment in advance. The reading *εἰσίοντος* = *εἰσιόντος* in line 2 has been checked and confirmed.

διεγρ(άφη) ὑ(πὲρ) ἐπικεφαλίου πόλεως

3. 1. κελευσθείσι
8 σεε

4 ονομς

5]αχ, /β'βυ

6 ιδς' ιβς δς'

'Payment has been made for city poll-tax of the eighth indiction, in accordance with the orders, in the name of Paul, in respect of two thousand four hundred drachmas of money, total dr. 2,400. Year 14, 12, 4, Payni 20(?).'

'I, Apphus systates, through me Horion (his) brother, have signed.'

1 διεγρ(άφη). The construction *διεγράφη . . . δραχμάς* is the usual one in these receipts.

ἐπικεφαλίου. The spelling is often -αίου (or the phonetic version -έου XLII **3043-4**), but -ίου also appears in XXXIV **2716** 1, PSI VII 780.1, XLII **3042** 1 (-αίου ed. pr.), **3045** 2, -έου in P. Oxy. Hels. 28.4, XXXI **2579** 2, PSI V 462.1, PUG I 19.2. There may be a phonetic reason, see XXXI **2579** 1 n., cf. F. T. Gignac, *Grammar* i, 249-62, esp. 261-2.

2 ὀγδόης ἰνδικτίονος. Cf. 6 n.

6 14 Constantine, 12 Licinius, 4 Crispus, Constantine Caesar, and Licinius Caesar, see R. S. Bagnall, K. A. Worp, *The Chronological Systems*, 72, for regnal years and indiction, which denote AD 319/20.

κ'. The figure is undamaged, but of the cursive form which is very much like beta. Payni 20 = 14 June, but Payni 2, which is possible, would be 27 May.

8 ἀδελφοῦ. An alternative reading might be *ἀδελφ'* = *ἀδελφ(οῦ)*. Perhaps we should translate it as 'colleague' rather than 'brother'. There was indeed a systates called Horion, see XLIII **3137** (294/5), P. Fuad I Univ. 13 (297/8), XLVI **3301** (300), XII **1551** (303/4), but his dates seem too remote from this.

3790. ACCOUNT OF MEAT

4 1B.76/(1)

18.5 × 12.5 cm

c.317/18

The fluent cursive hand and professional layout suggest that this is a fragment of an official document, a suggestion which is strengthened by the text on the back, a much more interesting account, which seems to record expenditure in money by the city, see **3791** and introduction. A sheet join is visible on this side and the writing runs along the fibres, indicating that **3790** was the first use of the papyrus, and that it would have been out of date before the back was used for **3791**. **3791**, relating to the year 317/18, was probably written sometime in AD 318. **3790** seems unlikely to be much earlier, possibly relating to the same year.

Part of the lower margin is preserved, with three entries nearly complete in col. i and beginnings of three entries, rather damaged, in col. ii. Each entry begins with a personal name, records an amount of meat in pounds, and closes with a village name followed by *αἰ* (*προκειμένοι*) sc. *λίτραι*, except that one entry continues with a breakdown of the total into three separate amounts contributed through intermediaries (9-13).

Requisitions of meat are usually connected with the *annona militaris*, see H. C. Youtie, *Scriptiunculae* ii 838; cf. P. Cair. Isid. pp. 11-12 on the activity of Isidorus as a collector of meat for Caranis, and P. Beatty Panop. 1. 276-331 n. on the appointment of collectors and distributors of supplies for the *annona*, including meat, on the special occasion of Diocletian's visit to Panopolis.

Unfortunately **3790** adds nothing to our information. The only peculiarity is the unexplained preponderance of women among the contributors, all three of the

principals in col. i being women. In col. ii one legible name is female, the other male. Among the intermediaries in i 10-12 one is female, one male, and the last name is unread.

 Through . . . lbs. 6½
 (Total): the aforesaid amount.'
 'Asclatarium(?) . . .
 For Sespthia (the aforesaid amount).'
 'Sarapas . . .
 Mutton: lbs. 190½ . . .
 For Sespthia (the aforesaid amount).'

1 γυ[ν(ῆ)]. Cf. 4 n.
 4 γυ(ῆ). In spite of the damage θυ^v = θυγατήρ is clearly not to be read. In 1 too theta is excluded and the feet of the letters suit γυ very well.
 4-5 Here it seems that meat assessed in mutton was actually paid in pork, or vice versa. There is no sign of writing after χοιρ(ε)ίου; either the amount was not entered or it was placed rather far to the right and so lost in the damage between the columns.
 7 Lolliane alias Plutiaena occurs again in P. Osl. II 44, a papyrus with rent receipts of AD 324 and 325 delivered by her agent (προνοσητής) to a tenant farmer.
 13 We might expect / = (γίνονται) before αἰ (προκείμεναι). I see no trace of it, but there is some damage which could possibly have obscured it entirely.
 16 We expect the nominative Ἀσκλητάριον, but the remains of the final letter look more suitable for upsilon, and the genitive for nominative in this context would not be very surprising. The next letter is clearly sigma and not gamma for γυ(ῆ).
 18 The writing after the name looks most like αποππ[, which is very intractable either as a patronymic or as an origin. There is no sign of abbreviation which would support an interpretation as ἀπό π(ραιποσίτων) or the like.

3791. OFFICIAL ACCOUNT

22 x 12.5 cm

318

Two brief and tantalizing glimpses into the machinery for the propagation of imperial portraits are offered here and in 3792. The whole subject of imperial images has been treated recently by T. Pekáry, *Das römische Kaiserbildnis in Staat, Kult und Gesellschaft*, see also S. R. F. Price, *Rituals and Power*, Ch. 7 'Images', and for an ample bibliography up to about 1975 see P. Herz, 'Bibliographie zum römischen Kaiserkult', in H. Temporini, W. Haase, *Aufstieg und Niedergang der römischen Welt* ii 16.2, 876-88 (§X. Die bildliche Darstellung des Kaisers), 888-92 (§XI. Kaiserkult und Kleinkunst). There is useful material also in G. Lahusen, *Schriftquellen zum römischen Bildnis* i (Textquellen. Von den Anfängen bis zum dritten Jahrhundert n.Chr.). The forthcoming second volume will be more strictly relevant.

Here we have an account recording one payment to a painter 'for the price of colours and painting of divine features by order of the most eminent prefects', as well as three payments for gold to a guild of goldsmiths and two other payments of which the details are lost.

The mention of an order of the praetorian prefects shows that the context is official, not private. The same thing is suggested by the payments to the goldsmiths' guild, which recall XLIII **3121**, an account of expenditure on gold for a crown to be presented to Licinius on the occasion of the birthday of his son. There the city's one-third share is emphasized and contrasted with the two-thirds share of the nome or city territory. The inventory number of **3121** is 3 1B.77/B(10)a, very similar to that of **3791**. The element '1B' refers to the first season of excavations at Oxyrhynchus, modern Bahnasa. It is no longer known what '76' and '77' indicate, but it seems reasonable to guess from them that these documents were not found very far apart. **3791** too looks like a municipal account, probably a draft or an office memorandum, since it is written in a practised official-looking cursive hand on the back of another account, this time of meat, and upside down in relation to it, see **3790**.

Here, then, we see the municipality commissioning an imperial portrait, probably from a local painter, and by this date probably based on a model distributed from imperial headquarters, according to a procedure laid down by the praetorian prefects.

Fronto tells us that there were painted portraits of Marcus Aurelius in many places, see below, and a third-century orator was entitled to praise an emperor by saying that the cities were 'full of (his) images . . . , some on painted panels, some, too, no doubt, of more precious material', see Menander Rhetor (ed. D. A. Russell, N. G. Wilson 1981) §377, p. 94: *πλήρεις εικόνων αἱ πόλεις, αἱ μὲν πινάκων γραπτῶν, αἱ δὲ πού καὶ τιμιωτέρας ὕλης*.

In Antioch in AD 387 rioters stoned panels bearing imperial portraits, see Pekáry, *op. cit.* 140, cf. esp. Libanius *Or.* 22.7, according to which there were many of them: *. . . βλέψαντες δὲ εἰς τὰς πολλὰς τὰς ἐν ταῖς κανίσιον εἰκόνας, βλασφημίας πρὸ λίθων ἐπ' αὐτὰς ἀφέντες, ἐπὶ μὲν ταῖς ῥηγνυμένας ἐγέλων, πρὸς δὲ τὰς ἀντεχούσας ἠγανάκτουν*. Further passages, mostly late, referring to painted imperial portraits are mentioned by H. Kruse, *Studien zur offiziellen Geltung des Kaiserbildes* 34-6, 49-50; see also R. Grigg, *JRS* 69 (1979) 107 n. 1.

Most of the many versions may well have been produced through private enterprise, but the private copies will have drawn their iconography mostly from the central source by way of official copies locally made, like the one mentioned in our document.

The wording, 'for the price of . . . painting of divine features' (*. . . ζωγραφίας θείων χαρακτήρων*) gives very little detail about the representation. Of course, very few painted portraits of imperial personages exist. The single surviving panel painting represents Septimius Severus, Julia Domna, Caracalla, and Geta, painted on a wooden disk 35 cm in diameter, see *ANRW* ii 16.2 942-3, K. Parlasca, *Ritratti di Mummie*

(A. Adriani, *Repertorio d'arte dell'Egitto*, Serie B Vol. ii) no. 390, tavv. 95-6; in colour in *id. et al., El-Fayyum* (ed. F. M. Ricci) 55, G. M. A. Hanfmann, *Roman Art*, Pl. XLVIII. According to the Berlin Museum (West) it comes from Egypt, which the state of preservation corroborates. H. von Hesberg, *ANRW* loc. cit., refers to Fronto, *Ep. ad M. Caes.* 4.12.6, for the widespread presence of imperial portraits in such private establishments as shops and inns. He suggests that the small size of this one may indicate such an origin, but it seems equally possible that it had a place in some municipal building, see now also A. Łukaszewicz, *ZPE* 67 (1987) 109-10. For the history of honorary painted portraits in public buildings see H. Blanck, *Bonner Jahrb.* 168 (1968) 1-12, cf. M. Nowicka, *Archeologia* 30 (1979) 23, citing SB III 7259. 13-15 for painted portraits of Ptolemaic kings in a village temple in the Fayum.

Our payment could equally well be for a mural painting; compare the murals of the imperial cult chamber at Luxor, representing the members of the first tetrarchy as part of a decorative scheme for the whole room, see I. Kalavrezou-Maxeiner, *Dumbarton Oaks Papers* 29 (1975) 225-51, J. G. Deckers, *Römische Quartalschrift für christliche Altertumskunde und Kirchengeschichte* 68 (1973) 1-34, although the wording of the text would hardly cover the whole of a scheme like that one.

Unfortunately the damage to the right edge has removed the amount of the payment. We can only see that it was in talents. Even if it did survive, it would be hard to draw any conclusions at present because of the dearth of comparative material, although the daily wages of a *pictor imaginarius* are set in the Price Edict at 150 denarii, with his food (7.9). Dr Helen Whitehouse has drawn my attention to PSI VII 784 = Sel. Pap. I 178, dated by the Oxyrhynchite eras to AD 362, which orders a delivery in kind to a painter for work on a picture (*ὑπὲρ μισθοῦ εἰκόνοσ*). He was to get one artaba of wheat and two Cnidian jars of wine. Because the order is addressed to a steward (*προνοητής*), this is probably a private transaction. One artaba is frequently the amount of a monthly grain allowance, cf. P. Oxy. XL p. 6, which could reflect the Price Edict entry about food (*pictori imaginario ut supra* (i.e. *pasto*), [*εἰκονο*]γράφω τρεφομένῳ) and so imply a long period of work on a single picture, but this and all other guesses are hazardous. The prices of statues are well attested from some areas, see Pekáry, *op. cit.* 13-21.

The date of the payment, in the period 27 December, AD 317 to 25 January, AD 318, suggests the guess that the painting was prompted by the elevation of Crispus, Constantine Junior, and Licinius Junior to Caesars in the Egyptian year AD 316/17, young Licinius specifically on 1 March, AD 317, see T. D. Barnes, *New Empire* 44-5. If so, we still do not know exactly what was painted. It might have been a group of the whole imperial college, or a series of paintings of individuals, or a group or groups including imperial wives and mothers, as Julia Domna appears in the surviving tondo, to mention a few of the possibilities.

The price of gold, though no surprise, is a useful detail to be compared again with **3121**, see 5 n.

The top of one column is preserved, the foot apparently lost, although a narrow strip projecting downwards for nearly 2 cm is blank where we might expect to see remains of the next line. On the other side, where the writing is upside down in relation to this, the foot survives and the top is clearly lost (3790). The ends of the lines, including the sums of money, are lost, although the surviving symbols for talents show that the right edge was not far away. The papyrus is also broken on the left close to the beginnings of the lines. Traces in the left margin opposite line 8 may have come from a check mark and more of these may have been lost elsewhere. Here the writing runs across the fibres, and a sheet join visible on the other side, where the writing runs parallel with the fibres, shows that that was the recto, probably used first, while 3791 was probably written as a draft or memorandum on its back.

 'Pachon, 11th year. By agency of Zoilus . . .'
 'Phamenoth. To the guild of . . .'

1 (ἔτους) ι]β' ι]β' βf'', i.e. year 12 of Constantine, 10 of Licinius, 2 of the Caesars Crispus, Constantine
 Junior and Licinius Junior = AD 317/18, see R. S. Bagnall and K. A. Worp, *Regnal Formulas in Byzantine
 Egypt* 39. The traces of the damaged figure match the following beta very well and do not match the curved
 strokes standing after the second and third figures. Nor do they suit κ; year 20,10,2 would be AD 325/6,
 see Bagnall and Worp, op. cit. 40. This is reinforced by the interlinear addition in line 10, which assigns
 Pachon to year 11. Year 11 makes sense as referring back to AD 316/17 using the regnal year of the senior
 emperor only, whereas it would make no sense to refer forward to AD 326/7 (year 21,11,3) by the middle
 figure only. Since this was a period of inflation, we can also use the price of gold as a check; the similar
 price in XLIII 3121 of c.AD 316-18 confirms the date here, see 5 n. The latest month mentioned is Phamenoth
 (11), i.e. 25.ii.-26.iii.318, but it may well be that the account when complete covered the whole of the
 Egyptian year. If so, it was probably compiled shortly after the end of it, that is, after 28 August, AD 318.
 2 T]ύβι, i.e. 27.xii.317 to 25.i.318. See introd. for the possible significance of the date for the imperial
 portraiture.

Artemidorus the painter remains unidentified. He is quite likely to have been a local man and unlikely
 to have seen the subject or subjects, cf. G. M. A. Hanfmann, *Roman Art*, Pl. XLVIII (commentary),
 especially if the subjects included the Caesars who were infants, Constantine Junior and Licinius Junior.

For the arrival of imperial likenesses in remote places see S. R. F. Price, *Rituals and Power* 173-6, T.
 Pekáry, op. cit. 112, referring especially to IGR III 481 = ILS ii.2 8870 (Termessus Minor) where a Roman
 official was honoured on the day of the arrival of an imperial image: τῇ πρὸ ε' εἰδ(ών) Νοεμβρίω[ν], ἐν ἡ
 [ῆ]μέρᾳ ἐκομίσθη [ε]ἰκὼν ἱερά τοῦ κυρίου ἡμῶν Οὐαλεριανοῦ νέου Σεβαστοῦ. Price (p. 175) and Pekáry translate
 'Valerian, new Sebastos' and 'Valerianus, des neuen Augustus', but Dessau's suggestion that this is the
 Caesar, Valerian Junior, seems likely to be right, so that we should translate 'Valerian Junior, Sebastos'.
 It also seems the most likely of the three possibilities that] Οὐαλεριανοῦ τοῦ πρεσβυτέρου in the fragmentary
 XLII 3029 does actually refer to Valerian Augustus as the elder of the two Valerians, although the other
 two possibilities suggested in Mr Parsons' note cannot be definitely excluded, i.e. Valerian the senior
 Augustus (compared with Gallienus) or Valerian Caesar as elder son of Gallienus (compared with Saloninus).
 The title νέος Σεβαστός was given to Tiberius alone, so far as I am aware, see P. Bureth, *Les titulatures* 28,
 and to take it as 'the new(est) Augustus' is not justified by any parallel known to me. Pekáry objects that
 Valerian Caesar did not have the title Augustus, but in the papyrus date clauses Σεβαστῶν always occurs at
 the end of the titulature, linking him in this respect with Valerian and Gallienus, see Bureth, op. cit. 118-19
 (where Valerian Caesar and Saloninus are confused), cf. C. Zaccaria, *Sodalitas. Scritti* . . . A. Guarini ii 701,
 704. The day, therefore, is probably 9 November, AD 256 (not 253), which is entirely consistent with the
 papyrus evidence for the date of his appearance in the titulatures, cf. J. R. Rea, *Atti XVII Congresso
 Internazionale di Papirologia*, Vol. iii 1125, in the month of Phaophi, i.e. 28.ix.-27.x.256. (Unfortunately I
 missed this inscription in that place.) It seems quite likely that news of Valerian Caesar's accession reached
 Egypt at least as soon as it reached Termessus Minor (Lycia), if we only had texts to prove it. It was not
 known at Oxyrhynchus by 29.viii.256 (XXXIV 2714). The accession itself will not be much later than
 mid-October and not much earlier than the end of July, if we assume that the news would take, very roughly,
 about a month to travel from Rome to either Termessus or Oxyrhynchus.

For references to painting in the papyri see M. Nowicka, 'La peinture dans les papyrus', *Archeologia*
 30 (1979) 21-8. For surviving panels from Egypt see K. Parlasca, *Mumienporträts und verwandte Denkmäler*,
 id. *Repertorio d'arte dell'Egitto greco-romano*, Serie B, Voll. i-iii.

3 *θείων χαρακτήρων*. Cf. *OGIS* ii 508 = *I. Ephesos* Ia 25.11-14 (Pius to an Ephesian notable about silver *εἰκόνας*) τὰς . . . εἰκόνας τῶν αὐτοκρατόρων . . . παλαιάς . . . πάσας δοκιμάζομεν φυλαχθῆναι τοῖς δνόμασι ἐφ' ὅ[τι] γέγονεν αὐτῶν ἐκάστη, εἰς δὲ ἡμετέρους χαρακτήρας μηδὲν τι τῆς ὕλης ἐκείνης [μ]εταφέρειν. This probably refers especially to the features of the face, see *LSJ* s.v. *χαρακτήρ* ii (3). In *IG* v (2) 268.24 *μέχρι τῶν Σεβαστείων εὐπλόησεν χαρακτήρων* appears to mean 'he made a prosperous voyage to the imperial presence'. The implication seems to be that as ambassador of his city the honorand encountered the emperor *κατ' ὄψιν*, 'face to face', so that this reference in *LSJ* s.v. ii (6) might be better placed under ii (3). The Latin glossaries twice equate *χαρακτήρ* with *uultus*, *CGL* ii 475.26; 543.18. Constantine Porphyrogenitus and other late writers (G. W. H. Lampe, *PGL* s.v. *χαρακτήρ*, 2) actually use the singular to mean a portrait: *Ἀνθemiῶν τὸν χαρακτήρα* and *τὸν αὐτὸν χαρακτήρα* (Const. Porph., *De caerimoniis*, pp. 395 f., quoted by P. Bruun, *Studia* . . . P. *Krarup* 130 n. 23). This refers to a portrait of Anthemius sent to Leo I in AD 467, but was written in the tenth century. Such a usage cannot be thought likely for a text as early as our papyrus, so that its wording gives no clue to the number of paintings or of persons represented, although the singular appears to be used to mean 'face' in P. Lond. VI 1927.48, of the middle of the fourth century AD. In the fragments of John Chrysostom quoted by H. Kruse, *Studien zur offiziellen Geltung des Kaiserbildes* 35 n. 2, 36 n. 1, imperial portraits are under discussion, but *χαρακτήρ*, in the singular, could mean either 'portrait' or 'face', and the latter seems more appropriate to the contexts: *οὐ κανίδα τιμώντες . . . ἀλλὰ τὸν χαρακτήρα τοῦ βασιλέως; οὐ πρὸς τὴν κανίδα* (or *πρὸς τὰς εἰκόνας*) *βλέποντες*, ἀλλὰ πρὸς τὸν χ. τοῦ β. In the clause *στὴν βασιλικὴν χαρακτήρες καὶ εἰκόνας εἰς πόλιν εἰσφέρωνται* (35 n. 2), obviously portraits are alluded to, but this does not authorize us to take *θείων χαρακτήρων* as certainly implying two or more individual portraits of members of the imperial family.

In the papyri the *θεῖοι χαρακτήρες* have appeared regularly in Byzantine deeds of surety, in which the guarantor promises, if required, to produce another person in a public place *ἐκτὸς ἁγίων περιβόλων καὶ θεῖων χαρακτήρων*, 'remote from holy precincts and imperial portraits', i.e. away from places where he might claim asylum, cf. Pekáry, *op. cit.* 130-1, Price, *op. cit.* 192-3. The references known to me are SB VI 9152 (17.vi.492).16, CPR V 17 (c.492?).13-14 (my translation was wrong, and in 13 restore *ἐκτὸς ἁγίων* (not *πάντων*) *περιβόλων*), PSI VIII 932 (518-27).12, P. Cair. Masp. III 67328 (5-14.vii.521) i 15, ii 14, iii 18, iv 19-20, v 18, vi 17, vii 16, viii 14, ix 19, x 18, xi 19, xii 18, 67334 (527-65).11, 67296-7 (both 23.vii.535).9-10, P. Flor. III 284 (28.ix.538).11, XIX 2238 (7.viii.551).16, P. Strassb. I 46.20; 47.22, 45; 48.17; 49.26; 50.4 (all probably 17.iii.566), BGU I 255 (15.v.599).8. The older commentaries take these images to be Christian icons, see especially F. Preisigke in P. Strassb. I 46 introd., so that the older references appear in WB III Abschn. 21 (Christlicher Kultus) s.v. *χαρακτήρ*. WB Suppl. does not follow its predecessor in this practice, but I have found no reference to a correction of the old view. It seems clear that *θεῖων* in these passages has its usual connotation: 'divine' = imperial.

The phrase also occurs in P. Cair. Masp. I 67089 (sixth cent.) recto D.1. This seems to be part of a writing exercise or other random jotting: *μηδέ[ν]α δὲ ἔλκ[ε]θαι τῶν θεῖων χαρ[α]κτῆρων βία κτλ.*, 'no-one is to be dragged off(?) in violation of the imperial portraits'. Again the right of asylum is under discussion.

The Greek words recall the Latin expression *sacri uultus* in C. Theod. 13.4.4, of AD 374, which orders that freeborn painters (*picturae professores, si modo ingenui sunt*) shall not be compelled to make imperial portraits (*ad efficiendos sacros uultus*) without pay. There are several other interesting provisions in this imperial letter, see A. Burford, *Craftsmen in Greek and Roman Society* 151. *Sacri uultus* occurs again in C. Just. 12.63.1 = C. Theod. 8.11.4; it obviously refers to imperial likenesses, but in a general way, not necessarily to painted portraits.

Note that *pictores* are among the craftsmen exempted from compulsory public services by C. Theod. 13.4.2 (AD 337). Compare the gravestone of Aurelius Felicianus, *pinctor Augustorum siue omnium bonorum [ui]torum*, set up by his daughter, who has the characteristically Egyptian name of *Origenia*, although the inscription is from Clusium (CIL XI 7126). The date is probably later than the *constitutio Antoniniana*, because of the *nomen*; it could easily be fourth century.

κατὰ κέλευσιν τῶν ἐξοχωτ(άτων) ἐπαρχῶν. The praetorian prefects at this date were, it seems, Petronius Annianus, who had been consul in AD 314 and was strictly speaking a *uir clarissimus* rather than *eminentissimus*, cf. *ILS* III (2).8938, *I. Ephesos* II 312, and Julius Julianus, see T. D. Barnes, *New Empire* 128-9. Annianus served Constantine and Julianus served Licinius.

It is interesting to see an order from such a high-ranking source for painted portraiture, which was cheaper and less well thought of than sculpture, see H. Blanck, *Bonner Jahrb.* 168 (1968) 8-9; add Menander

Rhetor, quoted above in introduction, and Libanius, *Or.* 22.8 *ἐπειθ' ἡγούμενοι τὰς ἐν τῷ χαλκῷ τιμωτέρας* . . . (sc. *τῶν ἐν ταῖς κανίαις*, cf. 22.7). The order indicates that this was an official commission and supports the guess that it arose out of the elevation of Crispus, Constantine Junior, and Licinius Junior to be Caesars in this year, see introduction. We can legitimately suppose that many towns like Oxyrhynchus were commissioning similar portraits at the same time, and the mention of a plurality of prefects suggests that the order applied to the whole of the empire, not just to the East under Licinius, although this might be a mere matter of diplomatic form.

The ink is confused at the beginning of *ἐπαρχῶν*. The likeliest explanation is that the clerk started to write *ἐξοχωτάτων* in full and then, because space was running short, pulled himself up while writing the alpha and corrected it to epsilon, adding an oblique stroke above to abbreviate to *ἐξοχωτ'*.

4 *Θώθ*. This introduces the problem of the order of the entries. Thoth is the first month of the Egyptian year, Tybi (2) the fifth, Phaophi (6) the second, Mecheir (8) the sixth, Pachon (10) the ninth, and Phamenoth (11) the seventh. If, therefore, the entries were in chronological order, at least three years would have to be represented, Tybi of AD 317/18, Thoth, Phaophi, Mecheir, Pachon of (e.g.) AD 318/19, and Phamenoth of (e.g.) AD 319/20. In fact, the interlinear addition in 10 tells us that Pachon belonged to AD 316/17, year 11 (of Constantine, see 1 n.), so that it seems best to assume that all others belong to the year specified in the heading, AD 317/18, the order being confused probably because the account was compiled from separate documents, such as receipts. This entry is for 29 August to 27 September, AD 317.

The names of the representatives of the guild have been added in a second hand here and in 6 and 8. There were probably no more than four, since the talent signs in 3, 5, and 7 indicate that the end of the line was not far away. The first three were the same in successive months, Thoth and Phaophi (29.viii.-27.ix. and 28.ix.-27.x.317). In Mecheir (26.i.-24.ii.318) the only legible name is not one of those recognizable in the earlier entries (8). A goldsmith called Sarapas, who could be the same man as here in 4 and 6, occurs in XLIII 3120 2, 14, of AD 310.

5 *έκ* (*ταλάντων*) *κς*. Cf. 7 (and 9?). Comparison with XLIII 3121 of c. AD 316-18, where the price of gold can be calculated at 1 tal. per gram = 24 tal. per oz. = 288 tal. per lb., indicates that the price here was 1½ tal. per gram = 26 tal. per oz. = 312 tal. per lb. The transactions appear to be comparable. In both cases it looks as if the municipality is buying gold from the guild of goldsmiths. Unfortunately we do not learn the reason here; in 3121 the gold was for a crown to be presented to Licinius. Since we have the weights and the rate, we ought to be able to calculate the figures which should be restored at the ends of lines 5 and 7, and perhaps of 9, if the rate remained the same. Unfortunately the calculations work out to odd fractions of a denarius and we cannot be quite sure how they were rounded out. The exact figures would be tal. 295 den. 583¼ in lines 5 and 7, and tal. 98 den. 1416¾ in line 9, if the rate remained the same. These figures involving thirds may indicate that the weights and sums again, as in 3121, represent the city's one-third share of a government levy that fell on the city and the nome in the proportion 1:2.

In this period of rapid inflation there is a great temptation to argue that the lower price of gold in 3121 indicates that it is earlier than AD 317/18. This tends to confirm the argument in 3121 introduction that the most likely occasions for the presentation of that crown are the first and second birthdays of Licinius Junior in AD 316 and 317.

6 *Φαώφι* = 28.ix.-27.x.317; cf. 4 n. At the end of the line a possible reading might be *ἰονλ*, e.g. *Ἰονλ[ίου]* or *Ἰονλ[ιανού]*.

8 *Μεχείρ* = 26.i.-24.ii.318; cf. 4 n. The traces in the margin are very slight and at the level of the feet of the letters. They could be part of a check mark. Check marks at a similar distance from the other month names could well have been lost.

It appears that *-χων* has been written heavily over fainter remains underneath, which do not seem exactly the same as the *χρυσοχ'* of lines 4 and 6, although they are not much more extensive and must have meant much the same.

A goldsmith called Dioscurides occurs in a private letter which could be of about this date, see XXXIV 2727 23-4.

After *Διοσκουρι[δου]* we expect next *καὶ*, which I cannot pick out.

9 Cf. 5 n. for a possible calculation of the figures.

10 *Παχῶν ἰα* (*ἔτους*)'''' = 26.iv.-25.v.317; cf. 4 n. See 1 n. for the significance of the 11th year.

The other entries have a dative after the date and it is unexpected to find an intermediary named first.

Zwölz. The diaeresis is in the form of a short horizontal line with a small downward serif on the right end, cf. F. T. Gignac, *Grammar* i 205 n. 1.

11 *Φαμενώθ* = 25.ii.-26.iii.318; cf. 4 n. Obviously this could be another entry for gold as in 4, 6, and 8. We would expect to see traces of line 12 below, cf. introduction last paragraph. It may have been more indented than 5, 7, and 9, but no conclusions can be drawn at present.

3792. ACCOUNT OF WAX

28 4B.60/E(8)a

18 × 23.5 cm

Fourth century

This is an account for a government levy of wax on a village in the south of the Oxyrhynchite nome. Since we know rather little about these levies, see 1 n., this is interesting in itself, but more eye-catching is the entry which records that forty-six minas of the wax were destined 'for images of the Augusti' (*καὶ εἰς ἰκόνια τῶν Σεβαστῶν* 19). For imperial portraiture in general cf. 3791 introduction. We can only speculate how precisely the wax was put to use, see 19 n. Of several known possibilities connected with modelling, painting, and sculpture, perhaps the likeliest guess is that it was for casting bronze statues by the lost wax process.

The origin and purpose of the account are not clear. It was found at Oxyrhynchus, not at the village of Chysis, to which it relates, and the hand looks professional, but the transport and other expenses connected with the wax were to be shared, and the writer was interested only in 'our' share, *τὸ καθ' ἡμᾶς μέρος* (24, 25-6). This suggests that the account did not originate from an office of the central government, such as the *λογιστήριον*. It may rather derive from someone who was employed on the collection of the wax, possibly from a town councillor who had been appointed to it as a compulsory public service or from a subordinate employed on the same business. We can compare XLVIII 3412, a letter from a *praepositus pagi*, who was appointed to that office compulsorily, to his assistant about the collection of wax.

The date can be judged from the handwriting, which is a competent but rapid cursive suggesting the early fourth century. If the *ἡγούμενος* of 25 is a *praeses*, this term would favour the period of the existence of the province of Herculia, AD 315-24, but there are other possible meanings, see 25 n.

The piece of papyrus was cut from a roll in the usual way, as shown by a sheet-join close to the left edge. The back is blank except for some blots. The edges are substantially complete, but there is some minor damage as well as two large holes particularly affecting lines 6-16 and the beginnings of 28-32.

	. . .	dr. 440
30	Total tal. 1 dr. 4,040, distributed(?) among minas 234, so that there attach to each mina	dr. 43.'

1 λ]όγ[ος] κηροῦ would hardly be legible without τοῦ α(ὑποῦ) κηροῦ below in 23-4, but seems fairly certain in the context.

Wax in antiquity had many more uses than we are apt to remember in this age of technology and artificial substances—*mille ad usus uitae*, says Pliny, *NH* xi. 11; for a recent summary see R. Büll, E. Moser, *RE* Suppl. xiii (1973) 1368-1416. Clearly this is an account of wax requisitioned as a levy by the government.

From LI 3635 9, compared with the other items in 3634-6, we can see how in the fifth century a total weight of wax was levied on the province of Arcadia—the figure is unfortunately illegible; this would have been divided among the nomes, cf. e.g. 3635 6-8 (which concern the wool levy), and in each nome it would have been further divided among the villages, as we see here for the village of Chysis and for an earlier period. We do not know how the nome capitals would have been treated. Presumably they would have been comparatively little affected, although it is quite likely that there were bee-hives in gardens within the towns. In AD 338 there was an Oxyrhynchite guild of beekeepers described as being 'of the same city' (I.85 119-20: text by R. A. Coles, *ZPE* 39 (1980) 120), but there is no such phrase in LIV 3747 of AD 319, see *ibid.* 6 n., where, however, μελ[ι]σσ[ο]υρ[γ]ών (5-6) is presented as a doubtful reading. The assessment would perhaps have depended on a census of hives, see R. D. Sullivan, *BASP* 10 (1973) 5-13. The papyrus published there refers to a registration of hives made by the petitioners in AD 15/16. The note on bee-keeping in the papyri is interesting and makes clear how sparse our evidence is.

In P. Turner 47, which I would prefer to assign to the fifth rather than fourth century, large amounts of wax occur in lines 2 and 7 among other substances, most with a medical application. The headings ἀπαίτ(ησις?) Διοσκοουρίδου and Ἄρεος were taken to refer to persons. In spite of P. Lips. 99, where ἀπαίτ(ησις) is regularly followed by a personal name, I am inclined to think that these are names of villages supplying respectively 221 and 285 pounds of wax, just as Chysis here is assessed for 286 minas (240 + 46: lines 18-19), cf. 18-22 n., 2 n. A village called Ἄρεος is known in the Hermopolite nome, see M. Drew-Bear, *Le nome Hermopolite* 69-71, and in P. Lond. III 1326b, fully edited in *CE* 59 (1984) 140, there is a Hermopolite ἐποίκιον Διοσκοουρίδου, which might be identical with Διοσκοουρίδου, although it is a small place in the territory of Δημητρίου κόμη. (The editor gives Διοσκοουρίδος, but Διοσκοουρίδης is not to be found in W. Pape, G. Benseler, *Wb. d. gr. Eigennamen*, F. Preisigke, *Namenbuch*, or D. Foraboschi, *Onomasticon*. The plate in P. Lond. Facsimiles III No. 91 favours Διοσκοουρίδου, and definitely discourages -ίδος.) See now also P. Van Minnen, *ZPE* 67 (1987) 120 for similar independent conclusions.

For the middle of the fourth century we have some evidence from the archive of Papnuthis and Dorotheus, see XLVIII 3410 11-12, 3412, 3428 16. The first is a mere passing reference in a letter, the third an account entry for commutation of the wax levy to money. In 3412 a *praepositus pagi* orders Dorotheus as his assistant to make the persons who are liable to the levy deliver wax to his agents, who are a soldier and a guard, see introd. and further below 19 n.

Χύσις. Cf. P. Pruneti, *I centri abitati* 219-20; M. Drew-Bear, *Le nome Hermopolite* 322-6, D. Kessler in *L'Égyptologie en 1979* i 239-45, fig. 61, P. Van Minnen, *ZPE* 67 (1987) 123 n. 10, citing more works by Kessler. There seems to be no possibility that χύσις, 'melting', was intended. With τό understand something like μέρος, 'for the share (or "section", or "portion") relating to Chysis'.

Pruneti and Drew-Bear accept that Chysis changed nomes at various times. Their chief evidence is that land in the vicinity is sometimes described as being in the Hermopolite nome, see XVII 2134 15 περὶ τὴν αὐτὴν Χύσις ἐν Ἑρμοπολίτῃ (c. AD 170), *BASP* 8 (1971) 7.5-7 π[ε]ρ[ι] τὴν κώμην Χύσις ἐν Ἑρμοπολιτικῇ ἐδάφει (AD 178), XIV 1724 7 [περὶ τ]ὴν π[ρο]κειμένην Χύσις κωμογρα(μματείας) Πα[ρ]κώ. This is not at all inconsistent with the many documents which place it definitely in the Upper toparchy of the Oxyrhynchite nome. The use there of a measure known chiefly from the Hermopolite documents (PSI IV 281.7-8 of AD 138/9, P. Berl. Leihg. I 20.28 of AD 149) is similarly explicable by simple proximity, as is the appearance of Chysis in a tax list referring otherwise only to Hermopolite villages (P. Lips. 99.21 of the fourth century). It is clear that there was Hermopolite land which was most easily described by reference to its proximity to this Oxyrhynchite village.

2 Ἰππέας is a rare name and rather doubtfully read, but it seems to suit the remains best. The only parallel I can offer is from P. Mich. Inv. 3822, a papyrus from Oxyrhynchus assigned to the late third or early fourth century, headed λόγος πρὸς κληρονόμους Ἰππέα (H. C. Youtie, *Scriptumculae Posteriores* i 484-5 = *ZPE* 31 (1978) 166-7). The trace after the short gap is a flat base strongly suggesting delta. Unless there is an untraced name long enough to include it, perhaps read δ[ι]ά, although there are no other intermediaries in the list, or [α]δ[ε]φ[ε] or [α]δ[ε]φ[ός]. We have ἀδελφός in full in 5, but at this point it would have made the line rather long and it is clear that the clerk wanted to keep a column just about the same width as the heading.

μν(αἰ) λ. Wax is usually reckoned at this date in λίτραι, i.e. Roman *librae*. The λίτρα had 96 drachmas, cf. XLIX 3455 22, the mina 100 drachmas, so that the difference is small. It is perhaps likely that they were treated as equivalent terms, cf. D. W. Rathbone, *ZPE* 53 (1983) 267-8.

3 *Μορφούς* may be genitive, cf. 15. If nominative, it is new, i.e. not in F. Preisigke, *Namenbuch*, or D. Foraboschi, *Onomasticon*. If this is a development from *Μορφώ*, see F. T. Gignac, *Grammar* ii 87, cf. 60. It is presumably feminine.

4 Perhaps correct to *Σαρμάτου*, but Sarmates may be an alias rather than a patronymic.

5 *Ευτόνιος*. Cf. Eutonium alias Uranius in P. Mich. inv. 411.4 (*ΖΠΕ* 37 (1980) 217-18 = H. C. Youtie, *Scriptunculae Posteriores* ii 581-2); the same man appears in XLIV 3189 5-6, where ed. pr. gave the name wrongly as Eutrygius, see LIV p. 226. There might be room here for something like *ο'ουρανιος* = *ο κ(αι) Ουράνιος*. Even with a rare name like Eutonium we cannot be quite sure of identity. Like this document, the two others are undated. All three seem to belong to the early fourth century, see LIV p. 226.

7 *Ουΐστυρία* is new in the papyri; cf. W. Schulze, *Zur Geschichte lat. Eigennamen* 254-5. There is a blank of at least 2 cm after the name, which makes it unlikely that this lady was identified further in the following gap.

12 The remains would be very suitable for *Αχ[ω]ρίτης*, '(inhabitant) of Acoris', cf. M. Drew-Bear, *Le nome Hermopolite* 293; add XLIX 3507 21. The village of Acoris or *Τήνις ή και Ακόρεως* was in the north of the Hermopolite nome, see op. cit. 291-6, and carte 1, which shows it not very far SE of Chysis and on the opposite, east, bank of the Nile. The variant with chi is fairly well attested for the Roman period, see *ibid.* 292.

18-22 It is hard to make complete sense of the information we are given here. The total general assessment for the village was evidently 240 minas, i.e. 234 collected, plus 6 outstanding. This seems to have been divided among the contributors according to some sort of means test, perhaps depending on their possession of hives, perhaps only on their holding in land or on their total wealth. The missing 6 minas may imply that a prospective contributor defaulted, since they, together with the 46 minas 'for representations of the Augusti', which have the appearance of being the complete assessment for this purpose, are to be collected in equal shares from the contributors already named, one excepted. It is not clear why Pecyllus is exempt. If he had died, his heirs would have been liable. He might perhaps have absconded leaving no possessions or had his property confiscated.

18 The oblique stroke for (*γίνονται*) is well known. The L-shaped symbol is familiar for (*ἔτος*) and for (*ὄν*) in accounts, preceding the analysis of a total. Here neither has any place, unless \perp could mean (*γίνονται*) (*τοῦ ἔτους*), which is perhaps just possible, although very unexpected and without any parallel known to me. At times (*γίνονται*) is followed by *ἐπὶ τὸ αὐτό* or *τὸ πᾶν* or *ὁμοῦ*, but this symbol is not known to represent any of these.

19 Cf. introd. No stress can be laid on the diminutive form of *ικονία* = *εἰκόνια*, see L. R. Palmer, *Grammar of the Post-Ptolemaic Papyri* 79-86, F. T. Gignac, *Grammar* ii 27-9. Palmer (p. 85) found two references to this word in the papyri, but I can find it cited only from W. Chr. 480.21, *ἐπεμψά σοι τὸ εἰκόνιον μου*, 'I sent you my picture', where the sublinear horizontal claims that the kappa is certain, though broken, see plate in W. Schubart, *Papyri Graecae Berolesenses* No. 28. Some doubt must attach to it there. In XII 1449 *εἰκονιδιον* repeatedly refers to representations of Caracalla with his parents Julia Domna and Septimius Severus. The size and material of them are unknown, however strongly they recall the Berlin tondo, see 3791 introd. The *ικονιδία* of St Colluthus and the Theotokos, partly and wholly gilded, in XVI 1925 6-8 (7th/8th cent.) sound like conventional Greek icons.

It may be that a similar sort of levy is meant in XLVIII 3412 of c. AD 360, where a *praepositus pagi* tells his assistant, 'I have sent you Gerontius, a soldier, and Demetrius, a guard of the strategus, so that you can make the responsible parties pay them *κηροῦ λί(τρας) εἴ' τοῦ κηρώνος καιηκονος Αλεξανδρίας*', which is partly translated '10 pounds of wax per bee-hive and (?) . . . of Alexandria'. The phonetic equivalent *καὶ εἰκόνος* now appears a less improbable interpretation than it did, although much uncertainty remains. If that is correct, *τοῦ κηρώνος* needs a new interpretation too. The word is otherwise known only from Sch. Ar., *Eccl.* 742, where *τὰ κηρία κόμιζε* is glossed *ἕως τοῦ κηρώνας λέγει*. The *κηρία* are honeycombs; the commentator is unlikely to have imagined that bee-hives were to be carried in this procession, as *LSJ* translates, but he may have thought of wax candles, on which see H. Blümner, *Technologie* ii 160-2, *RE* Suppl. xiii 1386-1407, 1410-13. A candle is sometimes *κηρίων*, cf. Plut., *Mor.* 2.263 F. (Qu. Rom. 2) *πέντε λαμπάδας ἄπτονεν ἐν τοῖς γάμοις, ἃς κηρίωνας ὀνομάζουσιν*, Gal. 17(2). 267 . . . *θερμαινόμενον ἐπὶ λυχνιαίας φλογός ἢ ἐπὶ τοῦ καλουμένου κηρίωνος*. The scholiast may have written *κηρίωνας*, or, since loss of accented iota before a back vowel is common in phonetic spelling, see F. T. Gignac, *Grammar* i 302-3, he may have meant the same thing when he wrote *κηρώνας*. In any case there is no plausible basis for translating 3412

6 as '10 pounds of wax per bee-hive', especially since *κηρώνος* looks as if it is linked by *καί* with *ηκονος* (= *εἰκόνος*?). The suffix *-ών* is productive in the Koine, see L. R. Palmer, *Grammar* 120-1; it usually indicates a location where things are grown or kept. Here, where *κηρ(ε)ωνος* does not seem to offer help, *κηρών* might mean a wax warehouse or even, perhaps, a wax levy, so translate, 'for the wax levy(?) and an image for(?) Alexandria'. An image 'of' Alexandria is conceivable, but a statue (of an emperor?) 'for' Alexandria seems more likely.

The present passage leaves us to speculate how the wax was used in connection with 'representations of the Augusti'. A general survey of the uses of wax is given by H. Blümner, *Technologie* ii 151-63. On p. 154 we find the artistic possibilities listed as encaustic painting, various forms of work on marble, and casting, especially in bronze, as well as modelling, which is treated at length, pp. 155-9. Small wax models of minor gods were made, *ibid.* 155, but this is unlikely for emperors, I guess, especially since they might be particularly open to magical abuse; for wax in magic see A. S. F. Gow on Theoc. 2. 28, cf. Hor. *ep.* 17.76, *sat.* i 8. 40-5. Wax effigies of emperors appeared at their funerals, see *RE* Suppl. xiii 1363-6, esp. 1364: Cassius Dio lvi 34 (Augustus), lxxiv 4-5 (Pertinax), Herodian 4.2.1-2.10 (apotheosis of Septimius Severus), cf. Appian, *BC* 2.147 = 612 (Caesar), but this custom does not seem likely to be relevant. Although the Romans made wax portraits particularly of aristocratic ancestors, see *RE* Suppl. xiii 1263-6, again no connection is likely here. Marble statues may have been polished or treated with wax or waxy mixtures, see *RE* Suppl. xiii 1381-2, T. Pekáry, *Das röm. Kaiserbildnis* 68 n. 20, but the article which Pekáry cites, C. Gnilka, *JAC* 7 (1964) 52-7, actually casts some doubt on this. It is certainly a possibility that this wax could have been used for encaustic paintings of emperors, cf. 3791 introd.

For a papyrus reference to wax in painting see P. Cair. Zen. IV 59767.6, and on the process see Blümner, op. cit. iv 442-64, *RE* Suppl. xiii 1372-85. But it is most likely that the wax here was to be used in making bronze statues by the lost wax technique, see Blümner, op. cit. iv 286-7; *RE* Suppl. xiii 1358-61; P. C. Bol, *Antike Bronzetechnik* 118-28. On Egyptian taxes for images of emperors see Pekáry, op. cit. 16. One is specifically bronze, see *APF* 6 (1920) 219 Nr. 4 (AD 117/18) = SB IV 7398, *συμφορὰς ἀνδ(ριάντος) χαλκ(οῦ) καὶ προτομ(ῆς) ἀργυρᾶς Ἀδριανοῦ τοῦ κυρίου*.

22 $52 \div 15 = 3.4\bar{6}$, which has been rounded up to $3\frac{1}{2}$, cf. 31-2 n.

23 *καταγωγῆς*. Probably this refers to the transport of the wax northwards, cf. H. C. Youtie, *Scriptunculae* i 493 n. 36, perhaps from Chysis to Oxyrhynchus, more likely from Chysis to Alexandria.

24 For the symbol for talent, which comes again in 30, cf. P. Cair. Isid., Plate V; for the shape of $\mathcal{A} = 1,000$, cf. *ibid.*, Plate III.

Tal. 1 dr. 1,200 represents a two-fifths share of tal. 3. It is not clear what this implies about the process of collecting the levy. There may have been a partnership arrangement.

25 *ἡγουμένω*. Possibly we should write *Ἡγουμένω* as a personal name, cf. P. Heid. IV 325.1 and n., and this would be an easy way out of much ambiguity over the title, see below, but the context rather suggests that an official received a fee or bribe for providing some essential piece of paperwork. As the designation of a *praeses* this seems to have come in with the earliest *praeses Thebaïdos* c. AD 295, see P. Beatty Panop. introduction pp. xviii-xix, cf. *ibid.* 1.78, 126 etc., 2.30, 58 (Julius Athenodorus, AD 298-300), CPR VII 21.2 (as read in *ΖΠΕ* 41 (1981) 281-2: Aur. Reginus, c. AD 300-5), XXXIII 2665 15 (Satrius Arrianus, AD 305-6). It is true that *ἡγεμών* was also used, see e.g. P. Grenf. II 78 (= M. Chr. 63).1 (Satrius Arrianus, AD 307), but there was a danger that this might cause confusion with the prefect of Egypt, who began to be called exclusively *ἐπαρχος* (*Αἰγύπτου*), cf. C. Vandersleyen, *Chronologie des préfets* 97-114. However, the Oxyrhynchite nome fell under a *praeses* with the title of *ἡγούμενος* only during the existence of the province of Hèreulia (c. AD 315-24), cf. e.g. L 3574 1, after which it returned under the jurisdiction of the prefect of Egypt, see LIV 3756 introd. When the province of Augustamnica was created in AD 341, the *praeses* seems to have been called exclusively *ἡγεμών*, and there was no longer any danger of confusion with the prefect, since by then *ἐπαρχος* was established usage for him.

Therefore, if a *praeses* is meant here, the date is likely to be in the period AD 315-24. However, *ἡγούμενος* does occur sporadically for much lower officers, e.g. representatives of societies: *ἡγούμενος συνόδου* P. Grenf. II 67 (= W. Chr. 497).3 (III), *ἡ γερδίων* P. Grenf. II 43.9 (I), *ἡ ἱερέων* P. Lond. II 281.2 (p. 66; I), *ἡ πενταφυλίας* P. Lond. II 335. 4-5 (p. 191; II), alone in P. Fay. 110.26 (I). There was a guild of *μελιουουργοί* at Oxyrhynchus in the early fourth century, see R. A. Coles, *ΖΠΕ* 39 (1980) 120, but I know of no guild *ἡγούμενοι* from Oxyrhynchus. Even more obscure is the *ἡ κώμης* P. RyI. II 125.3 (I). Slightly better known are the *ἡ τοῦ στρατηγού* II 294 19 (I), XVII 2120 5 (III), and *ἡ τοῦ βασιλικῆς* (sc. *γραμματέως*) BGU III

830.17 (I), cf. N. Hohlwein, *Le stratège* 60. They seem to have been the heads of the clerical staffs of their respective offices. The strategus is mentioned here below in 28, where it looks as if a payment was made to some subordinate of his. It is hard to know if this supports a recognition of this *ἡγούμενος* as his bureau chief or not. If it was e.g. [ὕ(πηρέτη) c]τρατηγοῦ in 28, we may ask why not ἡ. cτρατηγοῦ here. But such inconsistency is not at all unexpected or unparalleled. It is simply impossible to know. The reason for the payment, 'in respect of a letter', hardly gives a clue to the rank of the *ἡγούμενος*. A praesidial letter would have been the best insurance in many transactions, but we cannot be sure that that is what is referred to.

26 The abbreviation is not familiar. It looks like κε followed by a raised double curve with a crossbar through the middle. Some version of *κνίδιον* is conceivable, but I cannot recognize it. κε(ράμιον) seems likeliest. If the share in the jar of honey is the same, $\frac{2}{3}$, as in the transport charges in 23-4, the jar of honey was valued at dr. 3,000 or half a talent, see 24 n. The calculation is $\frac{1200}{3} \times \frac{2}{3} = 3,000$. So also in 27. Unfortunately I have not succeeded in finding useful comparative figures. Unspecified small quantities of honey used on a journey in AD 325 cost dr. 100 (P. Ryl. IV 627.148; 629.298). In Diocletian's price edict of AD 301 three qualities (§3.10-12) cost 40, 24, and 8 denarii (= dr. 160, 96, 32) per sextarius. This jar was probably a large container like an amphora, so that the price, broadly speaking, is low enough to suggest the earlier part of the fourth century.

27 Cf. XLVIII 3406 9-10 ἀπέτηγον . . . τὰ δύο κεράμια τοῦ μέλιτος διὰ τὴν ἰορτὴν (I. ἀπαύτησον, ἑορτὴν).

28-9 It looks as if this payment was made to a subordinate of the strategus, cf. 25 n. Restore perhaps something like ὕ(πηρέτη), 'assistant', or γρ(αμματεῖ), 'secretary'. The word εἰσαγωγή might mean 'tax-gathering', 'import', or 'introduction of a lawsuit', to give a few possibilities. The context is obscured by the fact that *μοσυλωνα*, which seems clear to read, is completely unknown. It could be a name. It appears to be in the accusative case. The preceding π' would be a possible abbreviation for π(αρά) but is unlikely to be π(ρός). Probably, therefore, it belongs to some longer word.

30 The total is correct: tal. 1 dr. 1,200 (24) + dr. 1,200 (26) + dr. 1,200 (27) + dr. 440 (29) = tal. 1 dr. 4,040.

31-2 Tal. 1 dr. 4,040 divided by 234 comes out at $42\frac{234}{234}$, which has been rounded up to 43, cf. 22 n.

The remains of the dotted letters in ἐπι[κ]λώμενα seem characteristic, but some doubt must attach to the reading because, if we exclude P. Cair. Zen. III 59509.4, where ἐπέκλα[εν] is unconvincingly restored in a much damaged context, the dictionaries record the verb in the papyri only from a very difficult passage at P. Philad. 1.47. *LSJ Suppl.* s.v. gives it the accolade 'dub. sens.'. The passage as a whole remains incomprehensible at the moment, but it looks as if ἐπικλάω is represented by ἐπιμερίζω in the judgement below. It is a question of distributing the responsibility for taxes or cultivation of state land among persons properly liable. The village scribe admits that he made the distribution (αὐτοῦ ταύτην ἐπικλάσαντος 47), but it emerges that he assigned responsibilities to weavers, who were exempt from such imposts. Therefore the presiding official in his judgement says that since the village scribe has begun to distribute public land to weavers (ἀρξάμενος γερδίοις ἐπιμερίζειν δημοσίας γῆς 52-3), he is to undertake it himself or assign it to others at his own risk in future. The land taxes in kind or money called ἐπιμερισμοί and ἐπικλαμοί are well attested, see S. L. Wallace, *Taxation* 26-7, 70-1, G. Poethke, *Epimerismos*, D. Hagedorn, *ZPE* 67 (1987) 103-4. It seems, therefore, that ἐπι[κ]λώμενα here gives the sense we need, 'broken up, distributed'.

The reading receives further confirmation from three undoubted occurrences of the verb in this sense in the inscription published by G. Wagner, *BIFAO* 71 (1972) 161-79, see esp. 171-2 (5-6 n.), and from the recently published correction of ἐπικλαύσω to ἐπικλάω in P. Amh. II 154.9, made first by R. Rémondon, see J. Gasco, *Travaux et Mémoires* 9 (1985) 46-7 and n. 268.

3793-3794. OFFICIAL CORRESPONDENCE

76/14a

46 × 25.5 cm

340

These two letters are joined side by side and came evidently from a file in roll form made up of letters addressed to the *curator* of the Oxyrhynchite nome. The beginnings of 3793 and the ends of 3794 are lost. Each has a manufacturer's join,

besides the join between them, which was made by pasting the right edge of 3793 over the left edge of 3794. The surviving width of 3793 is about 21 cm and that of 3794 about 28 cm, the overlap being about 3 cm.

The items have in common that they are about the supply of craftsmen for government works. The sender of 3793, whose name is damaged, had been ordered by Flavius Valacius, the *dux Aegypti*, to inspect all the military forts in the province and report back to him any repair or renovation that any of them might need. He had inspected the fort of Psobthis and, finding that the walls needed decorating (κονιάσαιως 10), but that there was no craftsman available at the place, he wrote to the Oxyrhynchite *curator* to send one to work there for a few days. His farewell is in Latin, which makes it probable that he was a military subordinate of the *dux*. Remains of the consular date in Latin follow below. The day and place of issue will have appeared in Latin in the lost left margin, as we see they did in 3794 17-19.

The sender of 3794 was Flavius Philagrius, prefect of Egypt, and the document is altogether more impressive. The script, in contrast with the fluent but unpretentious official cursive of 3793, is in good Chancery style, to be compared especially with L 3577 (Pl. XVII there) of AD 342, as also with other items considered in the introduction to 3577. In the left margin, partly overlapped by 3793, is a Latin annotation of the day and place of issue. At bottom right we have no doubt lost a consular date in Latin and, above that, the prefect's farewell formula, which, since he was a civil official, will have been in Greek, cf. especially XLIII 3129 g, by the same prefect.

It was addressed to the *curator* in the first place, but also to the syndic, *exactor*, overseer of the peace, and principal councillors of Oxyrhynchus. The subject is the supply of craftsmen to praetorian prefects, which is potentially of great interest, but the losses on the right deprive us of any clear understanding of the situation. What emerges is that an official, Silvanus *uir perfectissimus*, in examining the account of the assessment had discovered that too few craftsmen had been sent in each relay—whatever that may mean. In the lower part of the letter, where the estimates of missing letters range from 27 to 37, numbers are calculated, a question of money, which may represent a fine, arises, and at the end, it seems, the recipients are warned to behave properly in future, see the commentary for the details.

According to notations in the top margin of each, both letters were received in the month of Mesore, 25 July to 23 August, or to 28 August including the intercalary days. It is probably safe to assume that the year was the same for both. For 3793 the day was Mesore 12 = 5 August, if the traces of the numbers are correctly interpreted. The day is lost in 3794, although we learn from the note in the left margin (17-19) that it was issued at Alexandria in the period 16 July to 1 August.

The remains of the consular date clause in 3793 18 show that both consuls were *uiri clarissimi*, so that years with imperial consuls are excluded. Flavius Philagrius served two terms as prefect of Egypt, first in AD 335-7 and, after the short term of Flavius Antonius Theodorus in AD (337-?)338, again in AD 338-40 (or 341?). This makes it

clear that the latest possible year for **3793–3794** is AD 340, since by Easter AD 341 Philagrius had been replaced by his successor Longinus (PLRE I 514). Therefore the full range of available years with two senatorial consuls is AD 335–8 and 340. However, one can argue from the career of the *dux* Valacius that the later years are more likely, and indeed July–August AD 340 would be the earliest documentary reference to him. He is attested in documents of AD 342 and 344 and died in Egypt under the prefect Nestorius (AD 345–52). The beginning of his term is not well fixed, see CPR V 10.6 n., **3820** 14 n., so that theoretically he can offer no *terminus post quem* here, but there is a presumption that the earlier years of the range are less likely than the later ones, since he is unlikely to have served much longer than the five years which are certain, AD 340–5. It seems that AD 340 is much the most likely year for **3793–3794**.

(1st hand) '(...?) Mesore 12(?)'.

(2nd hand) 'Flavius . . . to the *curator* of the Oxyrhynchite nome, greetings. Whereas His Highness, my lord the most perfect *dux*, Flavius Valacius, ordered my Mediocrity that I should inspect all the forts which lie in this province and bring to his notice (without?) any . . . whatever repair or renewal I might find any fort(s?) to lack, and after inspecting also the fort of Psobthis under Heraclianus, prefect, I found that . . . the walls require limewashing, but they declared that they did not have a . . . craftsman, therefore I considered it necessary that a letter should be written to your Sagacity in order that you should send them . . . craftsman for a few days with . . . commissioner in accordance with the previous . . . so that no pretext may . . . may be able to . . . in this connection.'

(3rd hand) 'I pray for your good health for many years!'

(4th hand) '(Under . . . and . . .), *uir clarissimi*, consuls.'

1 This is a notation, made probably in the office of the *curator*, about the receipt of the letter, see **3794** 1 δι(ὰ) *Καραπίωνος* ὀφ(φικιαλίου) *Μεσορ*[ῆ] . . . The hands do not seem to be the same. In this case, although the fibres are damaged, it seems clear that there was no writing for a space of c.2 cm to the left of the date. There seem to be some traces further to the left on very twisted and broken fibres, but so little that they may be stray ink. The month and day may well have been enough.

Mesore 12 = 5 August. The letter was probably dispatched from the camp, which was inside the Oxyrhynchite nome, and would have arrived the same day or the day after.

2] . . . [.] . These remains might be interpreted, very doubtfully, as] . εἰσ[ό]ς. It seems clear, however, that they are not compatible with [Cι]λουανός, see **3794** 4. Since this official had received his orders from the *dux* and wrote his subscription in Latin (15–17), it is likely that he was a military subordinate of the *dux*, cf. introd. Therefore he will have had the *nomen* Flavius as a status indication, see J. G. Keenan, *ZPE* 11 (1978) 49–50, and it will have stood at the beginning of this line, cf. **3794** 2. Since *nomen* and *cognomen* were probably spaced, cf. again **3794** 2, we cannot guess the length of the *cognomen* very closely.

4 Φλ[(αουῖου) Οὐα]λακίου. This confirms that some version of the *nomen* Flavius must be read and restored in CPR V 10.6, see the note there reluctantly allowing Φ]λαγίου. So also in P. Abinn. 2.1 restore *Flau*]us. On Valacius see PLRE I 929; add CPR V 10.6 n., **3820** 14 n., T. D. Barnes, *Phoenix* 39 (Toronto 1985) 372–3. This must be the earliest documentary mention of him, see introd.

5 ἐξουσία]. Cf. P. Abinn. 3.4; 15.11, [17], 18.

6 τ]ῆδε τῆς ἐπαρχείου. Cf. XVII **2106** 4 (of c.AD 304–6, see *CE* 49 (1974) 165, cf. R. S. Bagnall, *Currency and Inflation in Fourth Century Egypt* 27–8), the only other instance of this usage in the papyri.

The *με* picking up τῆ ἑμῆ μετριότητι in 5 is comparable with the tendency to repeat pronouns, cf. H. C. Youtie, *Scriptumculae* ii 847, Blass-Debrunner-Rehkopf, *Grammatik d. neust. Gr.*¹⁵ 229 (§278).

7 λιπεῖν. In the sense 'to lack' we expect the middle, *λείπεσθαι τινός*; cf. Blass-Debrunner-Rehkopf, *Grammatik d. neust. Gr.*¹⁵ 145 (§180 n. 5). Perhaps this is simply a mistake.

8 We expect the meaning 'without any delay', but a suitable noun ending in *-ia* has not yet been thought of. (Mr Parsons offers *ὀκνηρία*, cf. P. Cair. Masp. II 67158.16 (AD 578) [δίχα πάσης βᾶδ]ιουργίας . . . καὶ οἰαζδῆποτε ὀκνηρία[ε].)

9 τὰ κάστρα Ψῶβθεωσ. This is the earliest certain mention of the fort, known from XVI **2004** 1 (5th cent.) and **1883** 2 (AD 504). Cf. CPR V 13.3 n., where I suggested that the Psoft(h)is there (AD 395) and the Oxyrhynchite κάστρον Ψῶβθεωσ may be the same as Sosteos, the station in the fifth century of the *ala secunda Assyriorum* (Not. Dig., Or. XXVIII 33). (Note that there were four, not three, villages of this name in the Oxyrhynchite nome, see P. Pruneti, *I centri abitati* 223–6.) Add *ZPE* 56 (1984) 79–88.

Some modification of this view is suggested by *ChLA* XVIII 660 (= J. Vezin, *BSAF* (1972) 143–6, Pl. X) i 1, where we find the] *ale tertia* (*sic*: case uncertain) *Assuriorum*, stationed somewhere in the area of Oxyrhynchus (i 4), which has allowed a connection to be made with PSI IV 300, dated to AD 324 (not AD 302: *BASP* 17 (1980) 16). We should probably read there] . ω ἴλης (ἴλης = εἴλης) τρίτης Α[ε]υρίων διακε[ι] [μῆνης . . . τοῦ 'Οξ]υρυγγίτου (-γ'χ-) νομοῦ (2–3). For this reading I rely in part on notes taken when I inspected the papyrus on two occasions in 1970. The details at the end of line 2 are uncertain.

Rather than suppose that there were two regiments of 'Assyrian' cavalry in this area, it seems better to acknowledge the likelihood that '*secunda*' in *Not. Dig.* is an error going back to a version which had Roman numerals. If this is right, we should restore something like διακε[ι] [μῆνης ἐν κάστρῳ Ψῶβθεωσ τοῦ 'Οξ]υρυγγίτου in PSI 300.2–3. Likewise we should reject the restoration of *degenti* s i[n] c[ivitate] *Oxy*[rhynchitarum] in *ChLA* 660 i 4–5. The plate shows many more traces than this punctuation implies,

although I have failed to find any suitable wording to fit them. The absurd spelling of this text makes it difficult to rely on scattered traces. We expect a mention of the same camp.

The date of *ChLA* XVIII 660 must be later than Constantine's defeat of Licinius in September AD 324, because all the soldiers have the name Flavius as a status indication; under Licinius Egyptian soldiers were Valerii, cf. *ZPE* 11 (1973) 35, 37, 49-50, L 3580 introduction. If the remains in i 2-3, . . . *Cons[tantinus] senper agustu* | [. . .] *nubilissimis Caisaris*, are from a consular date in spite of the disagreement of numbers and cases, then the possible years are AD 326 (Constantine VII, Constantius I) and AD 329 (Constantine VIII, Constantine Caesar IV). For early agreement of units and stations with *Not. Dig.* cf. A. K. Bowman, *BASP* 15 (1978) 30-1 nn. 36-7; add CPR VII 21.6 (*ala I Quadorum* in the Large Oasis c.AD 301; cf. D. Hagedorn in R. Pintaudi, *Miscellanea Papyrologica* (Pap. Flor. VII) 104-6, J. Rea, *ZPE* 41 (1981) 281-2), and P. Giss. inv. 126 recto 33, cf. 16 (*ala I Abasgorum* in the Large Oasis c.AD 309, see J. D. Thomas, *YCIS* 28 (1985) 117-18, 120-1).

Ἡρακλειανὸν ἔπαρχον. The prefect is new. He will be prefect of the camp, *ἔπαρχος κάστρων*, and/or of the unit, *ἔπαρχος εἰλης(?)*, cf. Abinnaeus, often addressed as *ἐπάρχω εἰλης στρατιωτῶν κάστρων Διονυσιάδος*, e.g. P. Abinn. 45, 47-9, 52-3.

10 At the beginning of the line we might possibly have the title of the prefect continued, e.g. *εἰλη εἶρον*, or we might have *εἶρον* followed by an adjective such as *πάντα*, or an adverb such as *πρώην*.

κοιμάζωμος (= *κοιμάεω*). This word seems to cover limewash, as applied with a brush, plaster, as applied with a special tool called a float, and stucco, which usually implies moulded decoration. In this case only one specialist craftsman is required for what looks like the whole or a substantial part of the walls of an auxiliary fort, although the damage makes this slightly uncertain; one might supply *ἀλλ[η]γα τ(ε)ίχη*, for example. However, the chances seem to be in favour of limewash, applied probably by workmen, cf. 12-13 n., or soldiers, under the supervision of the specialist. See also A. Badawy on the auxiliary cavalry camp of Dionysias in J. Schwartz *et al.*, *Qasr-Qāwīn/Dionysias 1950* (Fouilles Franco-Suisses Rapports II, Publications de l'Institut Français d'Archéologie Orientale du Caire. Le Caire, 1969) p. 46, 'Les murs de brique crue semblent avoir été enduits d'une mince couche de limon. D'autres parois du même matériau ont reçu une seconde couche d'enduit blanc à la chaux, ne dépassant 1 mm. d'épaisseur (salle à l'Est de l'abside) ou pouvant atteindre une couche d'environ 3-5 mm. d'épaisseur (abside, salle à l'Ouest du *béma*)'. The thinner layer seems to be limewash. It is not clear whether the thicker one is plaster or an accumulation of coats of limewash.

For gypsum and other plasters cf. A. J. Spencer, *Brick Architecture in Ancient Egypt*, 134. For stucco see N. Blanc, 'Les stucateurs romains', *MEFRA* 95 (1983) 859-907 and 'Gardes de corps ou stucateurs? Les *teectores* dans l'armée romaine', *ib.* 96 (1984) 727-37. In our case clearly the unit did not include a specialist in the required field.

11 At the beginning of the line we might guess *ἐπιτήδειον*, 'suitable, competent', but cf. 12-13 n. *ἀγχοῖα*. Unattested in the papyri until recently, see H. Zilliacus, *Unters. z. d. abstrakten Anredeformen* 49, 64, 105, L. Dinneen, *Titles of Address in Christian Greek Epistolography* 20, this has appeared in LIV 3758 63, again as an honorific address to the *curator* (AD 325).

11-12 For the stopgap *ἐρό-12[μια]*, cf. XL 2924 5. The more usual *ἀναγκαῖον ἡγησάμην* is excluded. 12-13 The restored *ἴνα* governs *ἀποστείλης* (13). It will depend on *γραφήναι* (11), cf. B. G. Mandilaras, *The Verb* pp. 262-3 (§586). Before *τεχνίτην* we expect something like *ἐμπειρον*, 'experienced', or *ἐπιτήδειον*, 'competent', cf. 11 n., but the traces will not suit these particular words. It could be that the craftsman was actually named, 'X τὸν τεχνίτην'. After *μετά* we might think of [*ἐργατῶν ἱκανῶν* (or *κοιὰς ἱκανῆς*) *καί*] *ἐπίκτου* (= *ἐπέκτου*), 'with sufficient workmen (or 'limewash') and a commissioner'. Cf. especially P. Beatty Panop. 1.335 *ἐπέκτου τὸν . . . τὴν τοῦ ἀρτοκοπέου ἐπιτεκνήν ποιησόμενον*, 374-5 *ἐ]πειξιν τῆς ἐπιτεκνῆς τοῦ . . . ἀρτοκοπέου*. For *ἐπέκται* as liturgists see N. Lewis, *The Compulsory Public Services* 26.

13-14 We might restore *συνήθειαν*, 'custom', but probably this is a reference to an earlier letter or other instruction, e.g. *ἐπιστολήν, πρόσταξιν, κέλευσιν*.

14-15 We need an infinitive e.g. *γενέσθαι*, governed by *πρὸς τό* (14), 'so that no pretext (for . . . ?) may arise'.

15-17 The Latin subscription, which will be the autograph of the sender, suggests that he was a soldier, cf. introd. and 2 n. For *opto*+subj. cf. R. O. Fink, *Roman Military Records* 98.2.3 *opto bene ualeatis*, A. K. Bowman, J. D. Thomas, *Vindolanda: The Latin Writing Tablets* 133 (No. 38.11) *opto felicissimus uiuas*.

18 On the consular date clause see introduction, suggesting that we probably need to restore the

formula for AD 340, which has not occurred in Latin on papyrus; cf. XLIII 3129 10 for AD 335 (in part), L 3577 9 for AD 342, and P. Abinn. 2.10 for AD 344. The Greek formulas do not reflect the Latin ones exactly, see R. S. Bagnall, K. A. Worp, *Chronological Systems* 111, but we might expect something like *Septimio Acindyno praef(ecto) praet(orio) et Populonio Proculo u](iris) c(larissimis) cons(ulibus)*. At forty-five letters the restoration seems long at first sight, but this Latin script is highly compressed.

The consular formula will have been written by a clerk, not by the sender, who wrote the Latin subscription in 15-17. It looks very different from the Greek in the body of the letter, probably written by a different person. See L 3577 introd. for the difficulty of assessing the exact steps in the diplomatic of such documents.

1 δι', ὀφ 3 l. Ὁξυρυχειτῶν 5 l. τεχνίτας; ελατ'τον 17-19 da]t[(?) ka]laug[al]ex
20 προπολ' 21 l. Ὁξυρυχειτού

(1st hand) 'Through Sarapion *officialis*, Mesore . . .'

(2nd hand) 'Flavius Philagrius to *curator* and syndic and *exactor* and overseer (of the peace) and principal councillors of the Oxyrhynchites, greetings.'

'Silvanus, *uir perfectissimus*, in examining the account of the assessment (found) that two(?) craftsmen too few had been sent in each relay . . . to the unsurpassed Highness of my lords the most glorious prefects, and reckoning together . . . sixty . . . he demonstrated (?) that each . . . ty-six, so as to total together . . . sixty, . . . this money to the unsurpassed Highness of my lords the most glorious prefects . . . this very matter to be declared. Take care . . . at each relay . . . seven hundred and sixty . . ., in the knowledge that if (you do) not (do) this, . . .'

(3rd hand) 'Given on the *n*th day before the Calends of August, at Alexandria.'

(2nd hand) 'To *curator* and syndic and *exactor* and overseer (of the peace) and principal councillors of the Oxyrhynchite nome.'

1 This notation of the receipt of the prefect's letter was probably made in the office of the *curator*, see 3793 1 n. Sarapion, if that is correct—*Carάμμωνος* does not look so suitable—was a member of the prefect's *officium* in Alexandria, cf. 17-19, who conveyed the letter from there to its destination.

2 On Flavius Philagrius see *PLRE* I 694; add XLIII 3129, 3820 10 n., P. Col. VII 175.

2-3 Cf. 20-1 for the restoration.

λογιστή. For the latest list see LIV App. I. This one could perhaps have been Flavius Eulogius, last known 26 November, AD 338, or Flavius Eusebius, first attested sometime in AD 341. Another, of course, may have intervened.

συνδίκω. Cf. LIV 3771 3 n.

ἐξάκτορι. Cf. J. D. Thomas, *JCLS* 28 (1985) 116 and n. 3.

ἐπόπτη sc. εἰρήνης. Cf. L 3575 3-4 n. Note, however, that my suggestion that the office was an innovation of AD 341 must be modified, since this document is from AD 340 at the latest, see introd. The person concerned is likely to be the Dioscorus who is the only known holder of the office.

Professor Hagedorn, in editing P. Monac. III 69, a fragment of a letter of the first *praeses Augustamnicae*, has very tentatively suggested that it is connected with the installation of an ἐπόπτης εἰρήνης in the Arsinoite nome.

προπολιτευομένοις. Cf. A. K. Bowman, *Town Councils* 155-8, with H. Geremek, *Anagennesis* 1 (1981) 231-47, LI 3627 1 n., on πολιτευόμενοι.

4 [Cι]λουανός. This *uir perfectissimus* is unknown and seems unlikely to be the same as any of the homonyms in *PLRE* I. He may have been a procurator of some kind or a special commissioner.

The end of this line seems the best place for the main verb. Ends of lines are often uneven, so that εἶδεν or εὔρηκεν may be enough in themselves. We might even envisage εἶδεν δεκα]δύο, hardly a higher number.

5-15 The praetorian prefects were responsible for public works and workers were compulsorily assigned to the jobs, see A. H. M. Jones, *Later Roman Empire* i 461-2. The words καθ'ἐκάστην διαδο[χὴν (5, cf. 13) imply that there was a regular dispatch of relays of craftsmen. It is very unfortunate that the figures seem irrecoverable. In 14 (. . .) ἑπτακοσίους (masculine) ἐξήκοντα [. . .] looks as if it refers to numbers of craftsmen, as in 5, (. . . ?) δύο τεχνητά[ς], but in 10 ἐξήκοντα, τοῦτο τὸ ἀργύριον κτλ. seems to show that some of the figures relate to money. We may guess that this was a fine imposed on the bodies and officials who failed to meet the assessment, probably calculated at so much per missing craftsman.

At the end of 15 we will have lost the farewell formula of the prefect, see introduction paragraph 3.

16 Here there remains only a vacant space at the foot of the letter, but further to the right there must have been a consular date clause in Latin to specify the year and complement the marginal note (17-19) giving day and place of dispatch, see introduction paragraph 3, cf. L 3577 introduction p. 192, XLIII 3129.

3795. LIST OF TAXPAYERS

19 2B.80/E(d)

23 × 26 cm

Fourth century

This list is concerned with ἀμειψις, the commutation of taxes payable in kind from one commodity into another. Not much is known about it, see D. Hagedorn, *ZPE* 7 (1971) 187, correcting XXXVI 2766 14; add C. Gallazzi, G. Wagner, *BIFAO* 83 (1983) 186-7. The heading is ἐπὶ δὲ τῷ ἀμύψ[εω]ς, 'for the third commutation', which may refer to the customary payment of taxes in three instalments over the year, see J. Karayannopoulos, *Finanzwesen* 189-91, E. R. Hardy, *Large Estates* 55-6. Twenty men are listed, unnamed except for three from the village of Seryphis (14-16). Ten fall under the sub-heading τῶν μὴ χειρογρ[αφηκά]πτων (2), the rest are described as χειρογραφῆσαντες καὶ [up to 15 letters] τήσαντες (17-18). We may perhaps guess that persons who wanted to supply a commodity other than the one prescribed by law had to make a separate contractual arrangement with the tax officials.

The listing of the numbers by pagus and place name contributes to our knowledge of Oxyrhynchite topography. The basic relationship between the toparchies and the pagi was elucidated in XII 1425 4 n. With the new evidence it can be summarized as follows. The six toparchies were called Upper, Western, Eastern, Middle, Thmoesepho, and Lower. Upper is equivalent to southern and Lower to northern. We know that in principle the ten pagi were numbered from south to north. All the known villages of the first and second pagi had belonged previously to the Upper toparchy. All the known villages of the third pagus had belonged to the Western toparchy. In the fourth pagus some had come from the Western toparchy and some from the Eastern, while all those of the fifth pagus so far known had come from the Eastern. This suggests again that the Western and Eastern toparchies were not separated by the Middle toparchy, as might have seemed possible, but that they adjoined one another, cf. L 3589 2-4 n., and that the bulk of them lay south of the Middle toparchy. Only one place in the sixth pagus, Plelo, has a known toparchy, which was the Middle, but see 13 n. for the puzzling case of Seryphis. In the seventh we know for certain only of one village from the Middle and one from the Thmoesepho, but it is probable, see below 12 n., that the list in VI 997 brings in six further villages from the Middle toparchy. In the eighth pagus, which is comparatively well documented, we have a mixture from the Thmoesepho and Lower toparchies, while for the ninth and tenth we know the toparchy of only one village in each, which was the Lower toparchy in both cases.

Below is a table based on P. Pruneti, *I centri abitati* 236-7, incorporating the information from 3795. Pagi nos. 2, 5, and 8-10 are omitted because 3795 gives no new details about them. An asterisk indicates that the pagus number is known from 3795 only.

<p>$\bar{\alpha}$ πάγος</p> <p>*ἐποίκιον Κατι. [*Μερμέρθα (Ἄνω) *Νεσμίμις (Ἄνω) Παγγύλις Πεκτύ (Ἄνω)</p> <p>$\bar{\gamma}$ πάγος</p> <p>*ἐποίκιον Καβαλλ[Λευκίου (Λιβός) Πανευί (Λιβός) Σερύφικ (Λιβός), cf. $\bar{\xi}$ πάγος</p> <p>$\bar{\delta}$ πάγος</p> <p>Ἀδαίου (Ἀπηλιώτου) *ἐποίκιον Ἀχιλά Ληνώνος (Λιβός) Τερύθικ (Ἀπηλιώτου) *Ὠφικ * (Ἀπηλιώτου)</p>	<p>$\bar{\xi}$ πάγος</p> <p>*ἐποίκιον Ἀμύντου *ἐποίκιον Πλαντιάδος *ἐποίκιον Πλελώ (Μέση) *Σερύφικ, cf. 13 n. (Μέση) Ταναίς? (Μέση) Τεξεί? (Μέση)</p>
---	---

The worst damage runs down the middle of the sheet. Two large fragments of it survive, touching or nearly touching only in the area of i 11-12. Missing entirely are two pieces, one *c.* 2.5 × 10 cm, affecting lines 1-10, and another larger one, *c.* 7 × 12 cm, affecting 13-17 and 20. The sides look like the original edges, only slightly worn, of the piece as it was cut from the roll in the usual way. The wear at the top and bottom has been more severe, but the head and foot of the document are reasonably well preserved. There is a sheet join running vertically near the middle of the piece. The back is blank.

The date of the document must be not earlier than AD 307-8, when the pagi were created, see J. Lallemand, *L'Administration civile* 98. The handwriting, which runs parallel with the fibres on the recto, suggests that it falls within the first half of the fourth century.

¹ In XLV 3260 3 the reading $\bar{\xi}$ was preferred to $\bar{\epsilon}$ or $\bar{\zeta}$, and a new check has confirmed that $\bar{\xi}$ is more suitable to the remains. The land which is the object of the lease was near Antipera Pela in the Western toparchy, so that $\bar{\gamma}$ might have been expected. However, it is the lessor, not the lessee, who comes from Chute, so that on the one hand there is no strong ground for supposing that the two places were very near, and equally there is no proof that the third pagus and the sixth were not close together. The confusion over Seryphis, cf. 13 n., might allow the suggestion that they were.

Nesmimis	1
2nd pagus	
Sadalu	1
4th pagus	
Epoecium Achila	1
7th pagus	
Nomu Epoecium	1
8th pagus	
Dositheu	3.
'(Total?) 20 men.'	

1-2 See introd. para. 1. There may be some more examples of 'commutation' in SPP XX 93.1, 5, 10, 15, as re-edited by R. S. Bagnall, *BASP* 20 (1983) 1-4. In that account it seems that four amounts first specified in barley are converted into wheat and added into the wheat total, see Bagnall, loc. cit., p. 3. What actually happened is not clear, but it may be that the taxpayer paid in a grain which was not the one prescribed. If the barley is overvalued, as Bagnall concludes, p. 3, this suggests that the tax was assessed in barley and that a penalty was exacted for paying in wheat. I suggest that the epsilon preceding the conversion into wheat is the phonetic equivalent of αἰ (sc. εἰσι), cf. WB s.v. εἰ, referring to P. Hib. I 14-15 κριθ(ών) ληγ', αἰ (πυρώων) κγ; ὄλυρ(ών) ξζ (ἡμισυ), αἰ (πυρώων) κζ. The ensuing total is in artabas of wheat.

P. Beatty Panop. 2. 281 should probably be corrected to φακῆς κατ'ἀμψιν (= ἀμψιν) πυροῦ (instead of ἀ[χ]ύρου), since in most cases wheat is the commodity originally prescribed, e.g. XXXVI 2766 14-15, SPP XX 93.1, 5, 10, 15, SB V 7261 (= P. Princ. Roll). 7, 43, 91, 148, P. Cair. Isid. 47.44.

4 Κατι. [. . . .]. New. The space would accommodate up to five letters in the gap, but the name may have been shorter, cf. 6 n. and line 7.

6 Καβαλλ[. . . .]. Again the name need not have filled the gap, cf. 4 n. and line 7.

7 It was not known before that Ophis fell in the fourth pagus, see P. Pruneti, *I centri abitati* 227-8.

9 Ὠνημέβ[. . .]. Clearly this is a participle, 'bought'. We should supply a genitive ending, the gender and number of which remain uncertain.

10 Πλαντιάδος. New.

11 Ἀμόντου. New.

12 ἐποίκ(ιον) Πλελώ. By AD 412 Plelo had been raised to the status of κόμη, see P. Mich. XI 611. In SB XII 10800, assigned to the third or fourth century, it has the feminine article (7), implying the word κόμη. That document is a letter with the initial formula ἐν θεῷ χαίρειν, which is certainly Christian, cf. M. Naldini, *Cristianesimo* pp. 12-13, and which therefore suggests a date after Constantine's recovery of Egypt in AD 324. The name Κυμεών (13-14), which is likely to allude to the New Testament (Luke 2: 25-35) rather than the Old Testament, suggests that the letter is not earlier than the second half of the fourth century, cf. R. S. Bagnall, P. J. Sijpesteijn, *ZPE* 24 (1977) 121.

It was not known that Plelo fell in the sixth pagus; it had been in the Middle toparchy. Tampetei went from the Middle toparchy into the seventh pagus (XIX 2233 3), and Sepho from the Thmoeseoph toparchy likewise (XLIV 3194 5). From this Dr Zbigniew Borkowski has made the suggestion (unpublished) that the villages listed in VI 997 may all be of the seventh pagus. They are Epoecium Nilu (toparchy unknown), Tanais, Petne, Tacolceilis, Texei (all Middle), Sepho (Thmoeseoph), Tampetei, Ieme (both Middle). Lines 25-6 below tell us that Nomu Epoecium, previously in the Middle toparchy, also went into the seventh pagus. So far, then, the evidence suggests that it was mainly the Middle toparchy which

provided the territory of the sixth and seventh pagi, with at least Sepho coming into the seventh pagus from the Thmoeseoph toparchy, although a minor difficulty for this theory arises immediately from the next line, see 13 n.

13 *Κερύφειω*. This place had been in the Western toparchy. There is little doubt that in VI 991 it is ascribed to the third pagus, not the sixth. The ed. pr. prints ' . . . Κερύφειω γ ο ' (sic, not π(άγου)) τοῦ αὐτοῦ νομοῦ'. A photograph of the papyrus, now in Princeton, shows that gamma is clear and that the supposed omicron is extremely tiny; in fact, it seems to be no more than a flourish or a hesitation at the foot of the rising oblique stroke marking out the numeral. Evidently π(άγου) should be supplied or understood. The third pagus seems to be more likely, since two other places from the Western toparchy entered the third pagus, see introduction, table. Cf. 12 n. above. If there is a mistake here, it may have arisen because our clerk or one of his colleagues read a gamma = 3 in place of digamma = 6, an understandable palaeographic error. There are other possibilities. An error might have arisen if the third pagus and the sixth were close together, or it might be that the boundary was reorganized and that Seryphis did in fact move from one to the other; compare the changes of pagus in the Hermopolite nome, see P. Charite p. 12 n. 3; cf. *JEA* 71 (1985) Reviews Supplement p. 70, s.vv. *Κεσόγχα*, *Κιναρχήβις*. The date of 991 is AD 341, but we do not know whether 3795 is earlier or later than that.

13-16 It is not certain what to supply at the ends of the lines. The total number is obviously 3, but it may have taken the form of a gamma at the end of line 13 or alphas in each of 14-16.

16 *Μάννιτος* (gen.) is not in F. Preisigke, *Namenbuch*, or D. Foraboschi, *Onomasticon*, but it may well be a phonetic variant of *Μάνης*, *Μάνεις*, cf. F. T. Gignac, *Grammar* ii 57.

17-18 Restore perhaps καὶ [μὴ ἀποκατα]τήσαντες, ' . . . and who have not delivered? But this is a very long shot when we know so little about the process of ἀμειψις.

19-20 It is new information that Mermertha and Nesmimis were in the first pagus. Both had been in the Upper toparchy.

20 The restored [α is certain from the arithmetic.

22 *Κα[δάλο]ν*. Cf. P. Pruneti, *I centri abitati* 160, 236.

24 *Ἀχιλά*. New; presumably the phonetic equivalent of the genitive of *Ἀχιλλᾶς*, cf. F. T. Gignac, *Grammar* ii 16-18.

25-6 *Νόμου ἐπ[οικ(ιον)]*. The pagus was not known; it is consistent with expectations, see 12 n.

28 *Δωσιθέου*. Cf. P. Pruneti, op. cit. 43, 237.

29 Before *ἀνδρες* we expect, if anything, *γ(ίνονται)*, 'total', but the ink looks more like a large botched alpha, perhaps a spoiled attempt at the initial of *ἀνδρες*.

3796. CONTRACT OF A SYSTATES

83/8(a)

13 × 17 cm

10 December 412

The consular date clause, which is discussed in 3803 1 n., provides the main interest of this fragment. In addition it seems necessary to restore the title of systates, so bringing the range of that official down from AD 396 to AD 412, see 3-4 n.

The contract concerns the year-long public service of a sailor on one of the Nile cutters of the *cursus uelox*, which carried official correspondence, cf. LI 3623 introduction. By comparison with other documents we can see that the official who had made the appointment acknowledges that he himself has now undertaken the responsibility for the public service and that he has received from his nominee the agreed sum of money, cf. LI 3622, with P. Flor. I 39 and P. Harr. I 64, both revised in CE 46 (1971) 146-53. By implication the official will find a deputy to do the service in person and pay him from the money received from the nominee.

What remains is the upper right corner, probably about a quarter of the whole document, showing part of the top margin and the ends of the first twelve lines, written along the fibres. No sheet join is visible. The back is blank, so far as it is preserved.

5 υἱῶ 8] λειτουργίαν

'In the consulship of our masters Honorius for the 9th time and Theodosius for the 5th time, Choeac
14.'

'Aurelius . . . from the city of the Oxyrhynchites, systates of the tribe now providing public service, (namely) of Gymnasium Street and of other districts, to Aurelius Demetrius son of Parion from the same city, of the same tribe, greetings. I acknowledge that I have contracted (with you upon the condition that I myself?) have undertaken the responsibility for the year-long public service entrusted to you by me in the place of a sailor on the cutters or letter-carrier of the *cursus uelox* from the first of Thoth(?) until Mesore, fifth intercalary day, including the same fifth, of the current year 89, 58, the present eleventh indiction . . . (and I acknowledge?) that I have received . . .'

1-2 See 3803 1 n. The beginning of 2 must have been blank, cf. e.g. L 3599, 3600.

3-4 No name can be restored, although it is probable that the status indication Ἀῦρηλίος will account for eight of the c.25 lost letters, leaving c.17 for the name with patronymic or alias. The latest known systates is Aurelius Hierax son of Horus of AD 396 (P. Flor. I 39 = W. Chr. 405, revised in CE 46 (1971) 146-9), see N. Lewis, *The Compulsory Services* 48. The comparison of 3796 with that document and with LI 3622 justifies restoring the title here in 4 and bringing the office of systates down to AD 412. On the systates in general see P. Mertens, *Les Services de l'état civil* 30-47, N. Lewis, loc. cit.

6-7 After συν[ηλλαχῆναι we might restore πρὸς σέ (W. Chr. 405.5-6) or σοι (LI 3622 8). Next we expect something like ἐπὶ τῷ ἐμῶν ἀναδεδέχθαι. The traces favour] . [.] ἐ[μ]αυτόν, but the unread trace looks like the top of sigma or epsilon again. Restore perhaps ἐπὶ τῷ μ]ε[ν] ἐ[μ]αυτόν, not necessarily implying a balancing δέ.

8 ἐνια]υσίαν. This adjective may be of three terminations or of two. In LI 3622 9 ἐ]νιαύ[σιο]ν was restored from PSI I 86.10, but we now see that ἐ]νιαύ[σία]ν is equally possible. Cf. F. T. Gignac, *Grammar* ii 112. Scanty though they are, the traces will not fit δημοσίαν.

9 τῶν. Cf. XXXIII 2675 10, XXXIV 2715 10.

10 The restoration of Θῶθ is arbitrary. However, XXXIII 2675, dated 15 January 318, is a nomination to the same service for the period 29 August 317 to 28 August 318. Here the date of the document is 10 December. It seems worth envisaging the possibility that in most cases the physical service on the boats was done by professional sailors and the persons nominated in the documents were residents of Oxyrhynchus who were obliged to pay the expenses, that is the salaries of the sailors. The late dates may suggest that the officials had difficulty in extracting the money from the citizens, or it may be equally likely that the connection between the physical service and these payments loosened until the payments became just another tax, so that the officials could allow time to elapse. However, the ideal date does appear in some of the nominations (PSI X 1108; 29 August 381) and substitution contracts (P. Flor. I 39; 29 August 396) for this service, cf. XXXIV 2715 (29 August 386) for service on boats of a different sort, the *πλοῖα πλατυπήγια*.

11 Oxyrhynchite era year 89 and 58 coincides with the eleventh indiction running from 29 August 412 to 28 August 413, see R. S. Bagnall, K. A. Worp, *Chronological Systems* 80, cf. 13 n. 10. Since the indiction is here described as 'present', the date clause in lines 1-2 converts to 10 December 412. For discussion see 3803 1 n.

12 Restore probably ὁμολο[γ]ῶ. Before that the high trace rather suggests κ[αί], although]ε[.] or]ς[.] might be better and καί would certainly have been much more cramped than it was in 10. For P. Flor. I 39.9 I suggested something like διὰ τὸ ἐντεῦθεν ἀπεσχηκέ[ναι] (CE 46 (1971) 149), but it now seems likely that it had whatever was here, perhaps καὶ ὁμολογῶ ἀπεσχηκέ[ναι]. In both places there remains a lacuna of 5 to 8 letters to be supplemented before καί(?).

3797. RECEIPT FOR TAXES IN GOLD COIN

53 1B.26(F)/D(10)c

15 × 21 cm

26 April-25 May 624

Another item from the period of the last Persian occupation of Egypt, like LI 3637, this too concerns Marinus the *scholasticus* and the highly placed Persian with the name or title of Saralaneozan. In 3637, of 19(?) October 623, the unnamed writer acknowledged receipt from Marinus of 3,962 gold solidi for the first instalment of the twelfth indiction. Instructions had been issued about this matter by (the?) Saralaneozan and the money was to be sent to the Persian 'king of kings'. Related to 3637 and in the same hand is XVI 1843 of 6 November, which acknowledged receipt of a further 2,016 solidi for the same instalment of the same indiction, divided into equal parts, 1,008 solidi for Oxyrhynchus and 1,008 for Cynopolis. The present document is a receipt for a payment by Marinus of 5,040 solidi for the third instalment of the same indiction, dated April/May 624. They are specified as being 'for a part of the state taxes in gold', ὑ(πὲρ) μέρου(ς) χρυσικ(ῶν) δημο(σίων), and divided into two parts, 4,032 solidi for Oxyrhynchus and 1,008 for Cynopolis. These are large sums, but again we cannot draw detailed conclusions from the figures, see 3637 introduction last paragraph (p. 102).

For a new article on papyri from the Persian occupation see L. S. B. MacCoull, *Studi classici e orientali* 36 (1986) 307-13.

The writing runs across the fibres of the recto of a piece cut from a roll, with a single sheet join c. 15 cm from the top running horizontally below line 6. The sheet

with lines 1-6 overlaps the one with 7-9, so that the right hand edge would have been the top if the roll had been used in the traditional way. The piece was rolled up from the foot, as can be seen from the pattern of damage and from nine horizontal folds dividing it into ten panels which diminish in height towards the foot. The top is torn; probably there was one more panel, which may well have been blank on both sides and will not have been taller than c. 2.5 cm. On the back of the topmost fold there is an endorsement of one line, apparently in a second hand. The bottom edge looks like the original cut except for wear. The wear is more severe at the sides but the losses to the text are not great. If we allow for the wear, it looks as if the roll from which this piece was cut may have had a format similar to those which supplied XVI 1843 and LI 3637, see introduction there. That is, it could have been about 18.5 cm tall, like 1843, which is well preserved.

*Marinus the most glorious and most wise *scholasticus* has delivered the sol. 5,040 (collected?) through Menas the admirable *chrysones* in respect of part of the state taxes in gold for Oxyrhynchus and Cynopolis

for the third instalment of the twelfth indiction; of which sol. 4,032 (are) in respect of Oxyrhynchus, and sol. 1,008 in respect of Cynopolis. Total: the same sol. 5,040 only: solidi five thousand and forty only. Written in the month of Pachon (day) of the same twelfth indiction, by the hand of me the all-praiseworthy Saralaneoan.'

Back. 2nd hand. 'In respect of part of the 3rd instalment of the 12th indiction, sol. 5,040 for Oxyrhynchus and Cynopolis.'

1 παρήχε(ν). For the anomalous augment see F. T. Gignac, *Grammar* ii 231(5), B. G. Mandilaras, *The Verb* 121 (§265.6), cf. 153 (§317.19), with references.

1-2 Μαρίνος ὁ ἔνδοξ(ότατος) (καὶ) σοφ[(ώτατος)] χολ(ακτικός). Cf. LI 3637 20 n., for other documents connected with Marinus. The Marinus of XVI 1864 was not described as a *scholasticus*, but only as Μαρίνω τῷ ἔνδοξ(ότατω), line 14. The same title here strengthens the case for the identification.

2 τὰ δ(ιὰ) Μηνᾶ. Without τὰ the meaning would clearly be that Marinus gave the money to Menas to deliver to the recipient. But τὰ suggests rather that the money came in first to Menas, passed from him to Marinus, who on this occasion sent it further on its journey to the 'king of kings'.

χρυσών[ου]. I doubt if we should accept the existence of a parallel nominative form χρυσών from the nominative plural χρυσόνες found only in Justinian Ed. XI ch. 2 init. In P. Lips. I 102.7 χρυσωνι is probably a phonetic writing of χρυσώνη.

This official seems to have been a subordinate of the *comes sacrarum largitionum*, receiving taxes in gold due to that department, see W. Gdz. 164-5; cf. A. C. Johnson, L. C. West, *Byzantine Egypt: Economic Studies* 174; in general A. H. M. Jones, *Later Roman Empire* i 427-37, esp. 432 on the 'provincial gold-buyer' (P. Lips. I 62). Presumably his function would continue under the Persians with as little disturbance as possible, with the proceeds going to the 'king of kings'.

3 χρυσικ(ών) δημο(σίων). This seems to be a general description which would have covered all state taxes payable in gold coin, cf. A. C. Johnson, L. C. West, *Byzantine Egypt: Economic Studies* 305, 320. The presence of the *chrysones* may limit it to those payable to the department of the *largitiones*, see 2 n.

For the association of the Oxyrhynchite and Cynopolite areas cf. XVI 1909 3, LI 3636 2 n. (p. 100).

[αη]. The surviving figures allow the calculation: 5,040 (4, 6-7) - 4,032 (5) = 1,008. In XVI 1843 the sum of 2,016 solidi is divided between the two areas equally, 1,008 each, but it is not clear what the recurrence of this figure indicates. That consignment was for the first of the three instalments of this same year, while this consignment is for the third.

7 Παχ(ών). Or possibly read Παχώ(ν); there is a very slight and faint trace above the chi, which probably comes from the chi of πεντακισχί[λ]ια above, but which could be from a raised omega. The day number will have followed.

8 τ[ῆς αὐ]τ[ῆς]. At the beginning is a trace of a long descender; after the gap is the end of a horizontal from a raised letter, cf. 6 αὐτ(ὰ).

χειρ(ί) ἐμ(ῆ) seems to be the usual expression, cf. *WB* col. 728 s.v. χείρ (2), but χ. ἐμ(οῦ) may be possible, see trans. For ἐμ(οῦ) we might have expected to have ου as a raised monogram, see app. crit. 3, 10.

8-9 . . μα[. . .] . . ο . . () . . We need the name of the writer, presumably not Marinus but the recipient or a notary or secretary, e.g. Θωμά (perhaps more acceptable than Πωμα[νοῦ]). After that what is expected is some sort of title, but it would be good to have it in the form of a participle to govern the following τὰ τοῦ . . . Σαραλανοζᾶ[ν], as for example διοικούντος, 'administering the affairs of . . . S.'. In 9 the first trace indicated may be illusory; it is very faint and very close to the next letter, which is either beta or kappa. Omicron is certain. The next is small and rather high, most likely alpha or upsilon, and the last trace is a long descender cut by the oblique rising to the right which marks some abbreviations. Iota looks best. It does not seem possible to read διο[]κοῦντ(ος).

I have tried to read Θωμά [κυμ-]βολαι(ογράφου), cf. XVI 1864 13 Θωμάς κύμ[μαχ(ο)ς]?, but the traces will not suit, and the following phrase would still hang in the air.

9 Σαραλανοζᾶ[ν]. Cf. LI 3637 14 n., which can now be greatly augmented thanks to the kindness of Dr K. A. Worp. He has drawn my attention by letter (11 March 1985) to *JJP* 15 (1965) 423-4, where I. F. Fikhman summarized in English a Russian publication of fourteen Pahlavi papyri by A. G. Perikhanian, *Vestnik Drevnej Istorii* 77 (1961) Part 3, pp. 78-93. One of the fragments of No. 13 contains a Persian expression which she viewed as a name and transliterated as Šahrālānyōzān (p. 89). She referred to other Pahlavi documents mentioning the same man and proposed seeing his name again in BGU II 377.1, correcting Σαραλακεοζαν to Σαραλανοζαν (p. 88). This correction has not appeared in BL. Dr Poethke

confirmed my suggestion, *Καραλανεοζάν*, from the original, see 3637 14 n., and this is corroborated by the other papyri (3637, 3797, SPP X 251, see below) and by the transliteration offered by Perikhanian.

Whether the expression is really a name, as she suggests, or a title, as Dr Ilya Gershevitch tentatively argued in 3637 14 n., remains in doubt. The Pahlavi and the Greek papyri evidently refer to the same important Persian official.

Dr Worp has also acutely seen that the expression occurs twice again in SPP X 251(a).9 and (b).10, where the first edition has *Καραπιωνφόζων* in both places. At his request Dr J. Gascou kindly inspected the papyrus in the Louvre and read (a).9 as *Καραλ[αν]εοζάν* and (b).10 as *Καραλανεοζάν*. In (a).2 he reads *Καραλαν() μη(νών) β Αθ(ύ)ρ (και) Χοιάκ* [. This papyrus, like BGU II 377, is said to come from the Arsinoite nome, suggesting again that this Persian official exercised power in both the Arsinoite and the Oxyrhynchite nomes.

Finally, Dr Worp recognized the same man in the *πανευφ(ήμου) Οραλαροζαν* of O. Petric 421.5 (J. G. Tait, *Greek Ostraca* i p. 147), and suggested that O. Petric 424 had a similar text. I am grateful to Mrs Barbara Adams of the Flinders Petric Museum for making these items available while the museum was closed for renovation and to Dr Walter Cockle of University College London for inspecting them on my behalf. Dr Cockle confirms that 421.4-5 may be read *γραμμ(ατεί) τῷ πανευφ(ήμου) Καραλανεοζάν*, as suggested by Dr Worp, although ζα- is oddly written. In 424.7 he can see the predicted *γραμμ(ατεί) τοῦ πανευφ(ήμου) Κα-*. At the beginning of line 8 the ink has disappeared completely, but the continuation [*ραλανεοζάν*] can be restored with virtual certainty. As a consequence of this identification the archive of Theopemptus and Zacharias, containing nearly sixty ostraca, see O. Bodl. II 2120 introd. (J. G. Tait, C. Préaux, *Greek Ostraca* ii p. 372), is assigned by Dr Worp to the Persian period. The provenance may be Hermonthis, see O. Ashm. 96 (J. G. Tait, *Greek Ostraca* i p. 79). Dr Helen Whitehouse kindly informs me that the whole of the group formed by O. Ashm. 96-101 was presented to the Ashmolean Museum by Greville Chester, in whose notes two items (O. Ashm. 96 and 100) can be identified as having been bought at Armant, ancient Hermonthis. There is therefore some presumption, though no certainty, that the archive came originally from the Thebaid. If it did, this shows a new and wider range for the influence of Saralancozan.

II. PRIVATE DOCUMENTS

3798. RETURN OF LOAN

74/60(a)

10 × 34.5

24-8 August 144

The main interest of this papyrus lies in its connection with the legalities affecting the families of auxiliary veterans. A loan of three hundred drachmas at annual interest of twelve per cent had been made in the period 28 September to 27 October 142, about twenty-two months before the date of the present document, by the wife of the veteran C. Veturius Gemellus, who is known from VII 1022 (= R. O. Fink, *Roman Military Records* 87) to have been enrolled into the *cohors III* (or *II*) *Ituraeorum* at the age of twenty-one early in AD 103. He subscribed here on behalf of his daughter in lines 43-9, so he was still alive at the age of about sixty-two. His wife, however, had died between 28 September 142 and 28 August 144, and the return of the loan was acknowledged by her two children, who were another C. Veturius Gemellus, already known from VII 1035 of February 143, and a daughter called Lucia Veturia alias Thermuthion. These two declared that their mother had died intestate and that they were her only children and heirs, *αὐτῆς μόνα τέκνα καὶ κληρονόμα* (26-7).

Some care has been taken to describe the civil status of the parents. The father on his first appearance is called 'a veteran whose name is engraved', *οὐετραν[οῦ] ἐνεκχαραγμένον*, see 4 n. The status of the mother is defined in a notable phrase, *περιούση εἰς τὴν ἐπὶ Ῥώμης χαλκῆν στήλην*, see 8-9 n. Since she is described immediately before as 'deceased', *μετηλλαχίη* (5), this appears to mean, 'who survives (i.e. whose name survives) on the bronze stele at Rome'. Evidently she had been named in the grant of citizenship and *conubium* made to her husband on his discharge. The wife in these cases did not receive citizenship; rather her veteran husband received with his citizenship the right of *conubium* with her as a peregrine, cf. M.-P. Arnaud-Lindet, *REL* 55 (1977) 288 and n. 5.

The status of the children is more doubtful. We know from 1035 that the father was a veteran by February 143 and that the son was then old enough to enter into a legal contract without a guardian. Knowing further from 1022 that the father had enlisted in 103 we would suppose that his discharge is hardly likely to have fallen so late as 140, when Pius deprived auxiliary veterans of their privilege of receiving citizenship for the children born during their service, see H. Nesselhauf, *Historia* 8 (1959) 434-42, H. Wolff, *Chiron* 4 (1974) 481, M. M. Roxan, *Roman Military Diplomas* (1954-77) 65 (No. 39 n. 6), M.-P. Arnaud-Lindet, *REL* 55 (1977) 287-9, S. Link, *ZPE* 63 (1986) 185-92, cf. Roxan, *Roman Military Diplomas* (1978-84) 157 (No. 94 n. 5), ead. in W. Eck, H. Wolff (edd.), *Heer und Integrationspolitik: Die röm. Militärdiplome als historische Quelle* 265-92, J. B. Campbell, *The Emperor and the Roman Army* 439-445. Pius brought in a similar, but less stringent, limitation of the privileges of veterans of

the fleet some years later, roughly between 152 and 158, see N. Hanel, *Bonn. Jahrb.* 185 (1985) 89-95, esp. 93. On the stages of the process of acquiring citizenship as a veteran see M. Absil, Y. Le Bohec, *Latomus* 44 (1985) 855-70.

There are exceptional terms of service as long as forty-five years on record, see 3785 introduction paragraph 2, so it is possible that long service by the father led to the unfortunate result that his children did not receive citizenship, being among the first to be affected by the change in the regulations. The son's *tria nomina* give no assurance that he was a citizen, see especially H. C. Youtie in *Le Monde Grec (Hommages . . . Préaux)* 737-8 (= id. *Scriptiunculae Posteriores* i 31-2). The same evidently applies to the Roman elements of the daughter's nomenclature.

It still seems more likely than not that the daughter and the son were Roman citizens. However, in Roman law children did not inherit from a mother who died intestate until after the *senatus consultum Orfitianum* of AD 178, see M. Kaser, *Das römische Privatrecht* i 702, J. F. Gardner, *Liverpool Classical Monthly* 12.4 (Apr. 1987) 52, cf. W. L. Westermann, A. A. Schiller, *Apokrimata* 71, whereas in Egyptian law this was the normal practice, see R. Taubenschlag, *Law*² 184, citing especially P. Yale inv. 222, 225 (*YCLS* 4 (1934) 136-40), cf. E. Seidl, *Rechtsgeschichte Ägyptens als römischer Provinz* 224-6. It is also Egyptian practice that the surviving spouse has no claim, see H.-A. Rupprecht, *BASP* 22 (1985) 291-5.

In fact, it is clear that these persons had inherited under Egyptian law. Either they were not citizens, because of the change of regulations in 140, or it was perfectly regular practice that the citizen children of a veteran should inherit from their peregrine mother under the provisions of peregrine law. Since the first alternative requires us to assume exceptionally long service, about thirty-seven years at least, for the father, I am inclined to argue for the second, which seems to accord well with the Roman habit of making no change in local customs without strong reasons of expediency.

The writing runs along the fibres in the usual way. No sheet-join is visible. On the back there is an isolated endorsement of one word, although it is possible that in the more damaged areas another endorsement could have been lost. Unusually the document seems to have been rolled up with the left edge inside, to judge from the discoloration and damage, which is more severe on the right.

Back, downwards along the fibres, near the foot:

Ἐπιμαχ()

34 L ζ 37 επαγ. ? 42 I. ἐγκαλῶ 55 επαγ. ? 56 τρα) 58 επιμα?

'C. Veturius Gemellus and Lucia Veturia alias Thermuthion, both children of C. Veturius Gemellus, veteran whose name is engraved, in association with their deceased mother Artemis, daughter of Eudaemon son of Eudaemon and of Thermuthion, who survives on the bronze stele at Rome, (Lucia Veturia alias Thermuthion having as guardian C. Veturius Gemellus the father both of herself and of Veturius Gemellus), to Epimachus son of Epimachus grandson of Epimachus, whose mother is Tateos(?), from the city of the Oxyrhynchi, greetings.'

'We acknowledge that we receive back from you through the bank of Agathus Daemon and partners at the Serapeum at the city of the Oxyrhynchi three hundred drachmas of money, being capital, and the interest on these of a drachma (per mina per month) from Hathyr of the past year up to the present day,

the capital having been lent to you by our mother Artemis—since she died intestate, we declare that we are her only children and heirs—in accordance with a chirograph through a bank (dated) in the month of Phaophi of the same past year, which we delivered to you for cancellation, and that we have no claim against you or your agents about anything whatsoever up to the present day. The receipt is normative. Year seven of Emperor Caesar Titus Aelius Hadrianus Antoninus Augustus Pius, Mesore intercalary day . . .'

(2nd hand) 'I, C. Veturius Gemellus, receive back, along with my sister, the three hundred drachmas and the interest and I have no claim, as aforesaid.'

(3rd hand) I, Lucia Veturia alias Thermuthion, daughter of C. Veturius Gemellus veteran, jointly received back, as aforesaid. I, C. Veturius Gemellus veteran, have been registered as guardian of my daughter and I wrote on her behalf because she does not know letters.'

(4th hand) I, Epimachus the younger, son of Epimachus grandson of Epimachus, give my assent. I, Eudaemon the elder, son of Pesuris(?), wrote on his behalf because he does not know letters.'

(5th hand) 'Seventh year of Emperor Caesar Titus Aelius Hadrianus Antoninus Augustus Pius, intercalary day . . . The draft (is) through Agathus Daemon . . .'

Back: ' . . Epimachus.'

1-4 See introd. for what is known of these persons. For the cohorts II and III *Ituraeorum*, in one of which the veteran served, see E. Dąbrowa, *ZPE* 63 (1986) 228-30.

4 οὐετραν[οῦ] ἐνκεχαράγμενον (I. ἐγκ-). This expression seems to be new, but cf. W. Chr. 463 iii 1-2 . . . u]eteranorum cum uxoris et liberis s[ub]ra) s[cri]ptis in aere incisi, 15 . . . natos . . . in aere incisos; P. Hamb. I 31 (S. Daris, *Documenti per la storia dell'esercito* No. 90). 8-11 ἐπέδειξε ὁ προγεγραμμένος Ἀντᾶς [δ]έλτον χαλκῆν ἥς τὸ ἀντίγραφον πρόκειται, δι' ἧς δηλοῦται ἐνκεχαράχθαι (I. ἐγκ-) σὺν τέκνοις καὶ γυναίκεϊ. Cf. 8-9 n.

5 μετηλλαχίη. Cf. 48 εἰδυίης; F. T. Gignac, *Grammar* ii 132-3.

6 Ἀρτέμειτι (I. -μιτι). Cf. 24-5 Ἄ[ρ]τέμειτος (I. -μιτος); F. T. Gignac, *Grammar* ii 55.

8-9 περιούση εἰς τὴν ἐπὶ Ῥώμης χαλκῆν στήλην. Cf. introd. on περιούση. The allusion to the veteran privilege of *conubium* with a 'wife' is clear. After AD 90 the formula of the auxiliary diplomas always states that they were copied 'ex tabula aenea quae fixa est Romae in Capitolio in muro post templum Diui Augusti ad Minervam', cf. S. Dušančić, 'Loca constitutionum fixarum', *Epigraphica* 46 (1984) 91-115.

14 Τραπέτης is far from certain.

15 ὁμολ[ογ]ῶ. We expect the plural, but space and the final trace both favour the singular form, which no doubt came more readily to the clerk's mind.

16-18 On the Serapeum bank see A. Calderini, *Aegyptus* 18 (1938) 260-1. The banker Agathus Daemon is not recorded there or in subsequent volumes of P. Oxy.

22 δραχμαί[ο]υς τόκοις. This is the usual rate in the Roman period, equal to twelve per cent per annum; for detail see H. E. Finckh, *Zinsrecht* (Diss. Erlangen 1962) 27-38.

25-7 Cf. P. Yale Inv. 222(A) 5-12; 225(B) 17-25 (*TCIS* 4 (1934) 136-9) μητρός . . . τετελευτηκῆς ἀδιαθέτου . . . ἐπ' ἐμοί (B ἐπὶ τε τῷ πατρὶ μου) . . . καὶ . . . τοῖς τέσσαρσι μόνοις τέκνοις καὶ κληρονόμοις, with introduction above paragraph 5.

37 The traces at the end are very faint, but seem to conform with the text of 55 below.

42 There may be further writing at the end of this line. Nothing more is expected.

48 εἰδυίης. Cf. 5 n.

51 Περ[σ]οῦριος is suitable but far from certain.

55 The day number must be from 1 to 5 = 24-8 August 144. Only gamma (= 3 = 26 August) seems excluded by the trace.

56 Read possibly τοῦ σὺν ἄ[λ]λοισι] τρα(πεζίτου), cf. 17-18 Ἄ.Δ. καὶ μετόχων, I 91 (AD 187) 8-10 διὰ Ἡλιοδώρου καὶ τῶν σὺν αὐτῷ ἐπιτηρητῶν τῆς ἐπὶ τοῦ πρὸς Ὀξ.πολ. Σαραπίου τραπέζης, LII 3690 20 τῶν σὺν ἄλλοις ἐπιτηρητοῦ . . . , ὁ σὺν ἄλλοις) ὑποχρό(μενος).

57 On the bank-draft (διαγραφῆ) see H. J. Wolff, *Das Recht der gr. Papyri Ägyptens* ii 95-105.

58 This notation is strangely isolated near the foot. The small sample of writing is not certainly identifiable with hands one to five. It looks nearest to m. 4, the subscription on behalf of Epimachus. Against this is our expectation that this document, like 1022 and 1035, will have belonged to the family of the veteran and not to the other party to the loan.

3799. ORACLE QUESTION

38 3B.85/D(1-3)a

7 × 7 cm

Second/third century

The latest short summary of the background of oracle questions, with a collection of references, is by G. Rosati in PSI XVII Congresso (= M. Manfredi, *Trenta testi greci . . . editi in occasione del XVII Congresso, 1983*) 14 introduction, cf. Nos. 20-1, similar Christian texts edited by L. Papini, who has also described some new Coptic examples in *Acts of the Second International Congress of Coptic Studies* (Rome 1985) 245-55. Add P. Mon. III 117, P. Heid. IV 335, and literature cited by their editor, D. Hagedorn, and eight more examples in A. S. Aly, *ZPE* 68 (1987) 99-104. For the latest survey of the demotic material see E. Bresciani (and others), *Egitto e vicino oriente* 2 (1979) 57-68, esp. 64-8.

This example is unusual in not mentioning the name of the god, who is addressed simply as 'lord'. The known possibilities at Oxyrhynchus are Zeus-Helios-Sarapis (VIII 1148, 1149, IX 1213, XXXI 2613, XLII 3078), and Thonis (P. Köln IV 202, L 3590). The minor gods Harpebecis and Harpocrates, who are associated with Thonis, and with the goddess Thoëris, in PSI XVII Congresso 14, are less likely candidates here.

The question is about the prospect of success in a bid to gain a government contract for collecting a 2½% tax. This is intriguing, but it does not add much to the little that is known about tax farming in Roman Egypt, on which see S. L. Wallace, *Taxation*, 288-9.

The script, which runs along the fibres, is small, neat, and fairly rapid. It probably belongs to the second or early third century. The back of the chit is blank. No sheet join is visible.

κύριε, εἰ συνφέρων
 ἐστὶ προσελθεῖν ἡμᾶς
 τῶι ἡγεμόνι μεθ' ὑ-
 περβολίου περὶ τῆς
 5 τεσσαρακοστῆς καὶ κυ-
 ρωθήσεται ἡμεῖν,
 τοῦτο τὸ πιττάκιν ἔνεγκ(ον).

1 l. *συνφέρων* 6 l. *ἡμῶν* 7 l. *πιττάκιον; ενεγκ**

'Lord, if it is expedient that we should apply to the governor with a higher tender for the 2½% tax and it will be settled on us, bring this chit (out).'

3 τῶι ἡγεμόνι. For the prefect's responsibility for assessment of taxes see S. L. Wallace, *Taxation*, 294-5. If the implication is that the tender had to be made directly to the prefect of Egypt in normal cases, this is interesting and new. However, we ought to be wary of drawing such a sweeping conclusion.

3-4 μεθ' ὑπερβολίου. The concession would normally be settled at the highest tender. Compare XIV

1633, where the body of the document begins βού[λομαι ὑπερ]βαλεῖν Αὐρήλιον Σερήν[ον . . .], 'I wish to outbid Aurelius Serenus . . .'. This, however, is a tender to purchase state land, not a tax concession.

5 τεσσαρακοστῆς. Cf. the notification of the death in prison of a *μικτωτῆς τεσσαρακοστῆς ἐρεῶν*, XLIII 3104 (AD 228). The only other occurrence of a *τεσσαρακοστή* in the papyri is in SB XIV 11905, a list of five men, headed *δνόματα ἐπιτηρητῶν τεσσαρακοστῆς*. Roman taxes called *quadragesimae* seem usually to have been surcharges on customs dues, see S. de Laet, *Portorium*, 508.

5-6 *κυρωθήσεται*. This verb is 'used consistently to mean the confirmation of a transaction with the Government' (P. Ryl. II 97 introd.).

7 *πιττάκιν* (l. -ιον). For the ending cf. F. T. Gignac, *Grammar* ii, 25-9. Here the word refers to the document itself. A negative form of the question (*εἰ οὐ συνφέρων ἐστὶ . . . καὶ οὐ κυρωθήσεται . . .*) would have been submitted at the same time. The god, by a mechanism unknown, perhaps varying with the particular oracle, returned one version to the questioner as his answer. Most of the surviving questions must be the returned versions, but at least five, and possibly all eight, of the examples from Socnopaeu Nesus recently published in *ZPE* 68 (1987) 99-104 were found together in a temple context. These may well be retained versions, counterparts of those which were returned to the questioners.

3800. LEASE OF LAND

38 3B.81/D(2-4)a

7 × 24 cm

September/October 219

This four-year lease of six aruras specifies a usual scheme of crop rotation, half in wheat, half in green crops each year, at rents of 8 artabas of wheat per arura on the wheat, and in money 44 drachmas per arura on the green crops. These are high rents for the period, cf. L 3591 19-20 n., 3592 14-16 n. For a list of Oxyrhynchite land leases from 30 BC to the end of the fourth century see L 3589 introduction. Add P. Harr. II 224, 3800, and 3802. The back is blank.

'Aurelius Syrion the elder, son of . . . , and Aurelius Heraclianus alias Sarapion both from the city of the Oxyrhynchi leased to Aurelius Ammonas son of . . . ras, mother Taysiris, from the village of Psobthis in the Eastern (toparchy) for four years from the present 3rd year the six aruras, or however many they may be, registered to Strati . . . son of . . . on, of royal land near the same Psobthis on condition that each year he sow and plant half with wheat and the other half with green crops at a rent in kind and money annually per arura on the half in wheat of eight artabas of wheat and on the half in green crops of forty-four drachmas free of every risk, the annual state taxes on the land being the responsibility of the lessors, who are to retain control of the crops until they recover the amounts owed to them each year. If any of the land, which heaven forbid, in the succeeding years remains unwatered, an allowance shall be made to the lessee, who shall also, if the lease is confirmed, measure the wheat each year into the public granary at his own expense and shall make a deposit for the lessors at the first measuring free of all charges and shall deliver the money rent annually in the month of Payni, with the right of exaction from him and all his possessions. The lease is normative. Year 3 of Emperor Caesar Marcus Aurelius Antoninus Pius Felix Augustus, Phaophi . . .'

(2nd hand) 'I, Aurelius Ammonas son of . . . , took the land on lease for the four years and I shall deliver the aforesaid (rents) as aforesaid. I, Aurelius . . . son of . . . ogenes, wrote on his behalf (because he does not know letters).'

5 E.g. Ἡ]ράτος or Κα]ράτος.

8-9 ἀ]αγροφόμενα εἰς Στρατι[.]ωνος. Two other leases have ἀναγραφομεν- εἰς αὐτόν/αὐτούς, i.e. PSI V 468.7-8 (AD 200), P. Ryl. IV 683.7-8 (AD 244), cf. J. Herrmann, *Bodenpacht*, 80 n. 5. In this case it seems that the registration to the previous owner had not yet been cancelled, cf. A. M. Harmon, *YCLS* 4 (1934) 214, 216-17.

40 Phaophi: 29 September-28 October, AD 219.

3801. ORDER TO SUPPLY

12 1B.141/F(a)

10.5 × 7 cm

13(?) September 295

This little chit is included here because it contains the rare name of Eunoios and there is a possibility that the person was the same as the sender of **3812**. This is no more than a possibility. The papyri were found in different seasons of excavation and there is no obvious coincidence of hands. If the identity were correct, this order would give a fixed date, although **3812** would need only to be reasonably close to that date.

Eunoios wrote to Asclas, a tenant-farmer, ordering him to supply a certain Melas with five artabas of grain, for which Melas was to pay. The main body of the text and the regnal year were written by one hand, probably that of a clerk. It was probably Eunoios himself who added the countersignature in line 4, and he may have added also the month name and day number in 5, which is clearly added at a different time, but may be in yet another hand.

The writing on the front is along the fibres. This has the appearance of being the recto, but there is no sheet joint to prove it. On the back is a short endorsement which looks as if it remained unfinished.

Εὐνόιος Ἀσκληᾶ γεωργῶ χ(αίρειν).

δὸς Μέλανι κύτου ἀρτάβας

πέντε, ὧν τιμὴν δώσει.

(m. 2) *κεσημ(είωμαι)*.

5 (ἔτους) ιβ καὶ ια καὶ δς, (m. 3?) Θῶθ ιε.

Back, upwards along the fibres:

(m. 4?) *πιττακ* (vac.)

1 *χς* 3 l. δώσει 4 *κεσημ* 5 L = (ἔτους)

'Eunoios to Asclas, tenant-farmer, greeting. Supply to Melas five artabas of wheat(?), for which he will give the price.'

(2nd hand) 'I have countersigned.'

(1st hand) 'Year 12 and 11 and 4, (3rd hand?) Thoth 15(?)'

Back. (4th hand?) Voucher . . .'

1 For Eunoios see introd.

2 *κύτου*. 'Grain' is unsuitably vague for a business transaction such as this. Almost certainly this is a comparatively early instance of the change in meaning to 'wheat', well documented for the fourth century and later, cf. H. Cadell, *Akten d. XIII Internat. Papyrologenkongresses*, 61-8, esp. 64-5.

4 The ink is much faded, in contrast with the solid blackness of 1-3 and the beginning of 5. The countersignature was probably written by Eunoios himself, see introduction. Cf. 5 n.

5 Year 12 of Diocletian, 11 of Maximian, and 4 of Constantius and Galerius = AD 295/6. Thoth 15, following an Egyptian year with six intercalary days, is 13 September.

The addition of Θῶθ ιε is in a smaller hand. The ink looks blacker than that of line 4 although it is damaged by abrasion. It may, therefore, not have been added by the writer of 4, who was probably Eunoios himself, cf. 4 n. and introduction, but by a clerk. It could be by the first hand, though in a smaller style, or by another clerk.

6 *πιττακ*. This endorsement is somewhat abraded, but it seems to break off without even a sign of abbreviation. One common meaning of the word *πιττάκιον* is that of 'voucher', a document recording or certifying expenditure or receipt, which is very appropriate to this document. The abrasion makes it impossible to be sure if the hand is one of those on the front, but I think not. It might have been put on by Asclas, for instance. We might have expected to find it completed by the name of Melas and the amount of grain, for example.

3802. LEASE OF LAND

38 3B.82/G(1)a

11 × 27 cm

31 October 296

This lease is an epidoche, a well known form which is especially associated with Oxyrhynchus, cf. J. Herrmann, *Bodenpacht*, 12 and 30, *ZPE* 9 (1972) 1 n. 1. The crop is to be *χόρτος* and the rent in money, as is usual for that crop, see L 3589 5-9 n.

For a list of Oxyrhynchite leases of land see L 3589 introduction. Add. P. Harr. II 224, 3800 and 3802. The back is blank.

23 L *ιγ*'' 27 l. Ακούϊς 29 προκ 30 αυρη? 31 υ)μη)γραμματα

'Under the consuls our lords Diocletian Augustus, for the 6th time, and Constantius most noble Caesar, for the 2nd time.'

'To Aurelius Plotinus son of Eudaemon(?), (former?) exegetes, councillor of the glorious and most glorious city of the Oxyrhynchites, from Aurelius Acuis son of Apis, mother Tsenthonis, from the same city resident in the hamlet of Pseneuar near Senepta. Of my own free will I undertake to lease for the present 13th and 12th and 5th year only from your property near Senepta . . . from (seven? nine? eleven?) aruras one arura and a half, so as to plant this with grass at a rent for the same one arura and a half of one thousand drachmas of money, total 1,000 dr., free from all risk, the public taxes on the land being at the charge of you the landowner, and you are to retain ownership of the crops until you recover the rent. If my undertaking to lease is confirmed, I shall of necessity deliver the rent in the month of Pachon without postponement, you having the right both from me, (and so on) as appropriate. The undertaking to lease is normative and on being asked the formal question by you I gave my assent. Year 13 and 12 of our lords Diocletian and Maximian, Augusti, and 5 of our lords Constantius and Galerius, the most noble Caesars, Hathyr 4.'

(2nd hand) 'I, Aurelius Acuis, undertook on lease one arura and a half and I shall deliver the rent as aforesaid, and on being asked the formal question I gave my assent. I, Aurelius Silvanus alias Thonius, wrote on his behalf because he does not know letters.'

4 *Ἐξῆται(μο)νος*. This seems the likely solution, cf. the repetition of *φόρον* in 13-14 and of *αὐτῆς* in 14. Perhaps 3811 6-7 is also relevant, see n.

ἐξηγη(τ-). Either *ἐξηγη(τῆ)* or *ἐξηγη(τεύσαντι)* is possible.

6-7 The name *Τσενθώνις* is not in F. Preisigke, *Namenbuch*, or D. Foraboschi, *Onomasticon*, but is equivalent to *Κωθώνις*, a common name at Oxyrhynchus.

8 *Ψενεῦαρ*. This place is not in P. Pruneti, *I centri abitati*.

11-12 At first sight *-βεν* suggests *ἐλαβεν* or a compound, but it might be the end of an unknown place name, i.e. restore something like *ἐν τ[ό]πω λεγομένῳ c.5 letters]βεν*.

12 *ἐπ[τά]*, *ἐν[νέα]*, and *ἐν[δέκα]* could suit, *εἴκοσι* and *ἕξ* do not.

13 *χόρω* {*φόρο[υ]*. Only the lower parts of the letters are preserved, but *χορταράκω* or *χορτάρακι* (SB VIII 9918.8-9) cannot be read.

14-15 The rent of 1,000 drachmas for 1½ aruras is lower than that in PSI IX 1071, also of AD 296, where 6 ar. bear a rent of 7,800 dr. It is 666⅔ dr. compared with 1,300 dr. per arura. There are no other directly comparable figures, see D. Hennig, *Badenbacher*, 295-6.

21 *τῆς πρώτης* . . . *ὡς καθήκει*. Cf. XXXI 2585 18-19 n., 19 n.

3803. LEASE OF LAND

66 6B.27/C(1-2)a

20 × 29.5 cm

16 August 411

The date clause adds something to our knowledge of the irregularities in the consular lists for AD 411 and 412, see 1 n., and this is the document's chief claim to attention.

Although it is essentially a lease of land, some or all of it under vines, the object of the lease is said to be 'one yoke from an irrigation machine' (*ἀπὸ μηχανῆς* . . . *ζηγῶν* (l. *ζυγόν*) *ἓνα* 6-7) and a vineyard with the associated eight aruras; in the subscription this is replaced by 'the half of the irrigation machine or a yoke', (*τῶ[υ]* *ἡμισυ* (l. *τὸ ἡμισυ*) *τῆς [μηχανῆς] ἢ ἐγκόν* (l. *ζυγόν*) 18). This terminology is new, see 7 n. for discussion, but there is some sort of parallel in four Oxyrhynchite leases where the object is said to be an irrigation machine with land: P. Mich. XI 611 (AD 412: *μηχανὴν ἐξηρτικμένην ἀρουρῶν τριάκοντα κτλ.*, 9-10), P. Flor. III 325 (AD 489: *μηχανὴν . . . μετὰ . . . ἀρουρῶν εἴκοσι μιᾶς*, 10-12), PSI I 77 (AD 551 or 566: *μηχανὴν . . . μετὰ . . . ἀρουρῶν*

. . . , 14-20), P. Berl. Zilliacus 7 (AD 574: *μηχανὴν . . . μετὰ . . . ἀρουρῶν δώδεκα*, 12-18). Moreover, *μηχανή* became a term for the unit of cultivation, as is particularly evident from the named *μηχαναί* in the Apion estate accounts, cf. e.g. XVI p. 305. It is claimed that this development began in the fourth century, see H. Cadell, *Akten d. XIII Papyrologenkongresses* 67-8 and n. 47, relying on A. Calderini, *Aegyptus* 1 (1920) 313 and n. 3. However, the earliest documents cited there, I 102 10 (AD 306) and VI 901 (= LIV 3771) 7 (AD 336), do not illustrate this usage, and XIV 1776 (*τοὺς γεωργοὺς τῶν τριῶν μηχανῶν*, 9-10), although its script was assigned to the late fourth century, could easily be of the early fifth. In some places *ὄργανον* was the preferred term in both senses, see M. Drew-Bear, *Le nome Hermopolite* 43, Calderini, *Aegyptus* 1 (1920) 311, P. Lond. V 1741.5 n.

Dr Cadell, loc. cit., associates the spread of the use of irrigation machines with the growth of the large estates, because of their greater capital expenditure. Here the rent is unspecified but is as laid down in previous rent-rolls and on the same terms as for other machines, which suggests that the lessor was a landowner on more than a small scale. Relevant too may be the fact that the land is leased in perpetuity, another very rare puzzling feature, see 10 n.

Contrary to the usual custom the writing runs across the fibres although the back is blank, at least as far as it survives. No sheet join has been detected, so that it cannot be proved which side was the recto of the manufacturer's roll. Nevertheless, the written surface appears less carefully made and gives the strong impression that it is the verso of the roll from which the piece was cut.

'After the consulship of Flavius Varanes, *uir clarissimus*, Mesore 23rd.'

'To Flavius Theodorus, *uir clarissimus*, landowner, Aurelius Elias son of Turbo from the village of Psobthis of the ninth *pagus* of the Oxyrhynchite nome, greetings. I willingly undertake to lease from your property in the lands of the same village of Psobthis from an irrigation machine fitted with all wooden fittings and ironwork one yoke (of oxen) formerly in the charge of Aeioux son of Aphas and a vineyard earlier in the charge of Anuthis, together with the associated eight aruras, or however many they may be, in conformity with previous rent-rolls (from the sowing) of the eleventh, new, indiction in perpetuity, (on condition that I?) take the lease and pay the previous rent and all the separate charges on the same basis as for the other irrigation machines in conformity with rent-rolls and provide irrigation every fourth day(?) for the aforesaid vineyard, and if my offer to lease is confirmed I shall necessarily pay the rent at the proper term without delay. The lease, written in two copies, is normative and in answer to the formal question I gave my assent.' (2nd hand) 'I, Aurelius Elias the aforesaid, have taken on lease the half of the irrigation machine or the yoke (of oxen) formerly of Anuthis and I shall pay the previous rent from the new, eleventh, indiction and I shall pay all the separate charges . . . as aforesaid. I, Flavius Castr, as requested, wrote for him in his presence because he does not know letters.'

¹ This is the first appearance of Varanes in the papyri. His consulship fell in AD 410, so that this postconsular date is equivalent to 16 August 411. The mention of the 'eleventh, new' indiction, i.e. AD 412/13 (10, cf. 20-1), is disconcerting at first sight, but the term must be used in its fiscal or agricultural sense with reference to the crop to be harvested in summer AD 412, which would provide taxes comprehended in the eleventh indiction, see R. A. Bagnall, K. A. Worp, *Chronological Systems* 9-16, cf. *Mnemosyne* 31 (1978) 289-90. The lease and the agricultural work were to begin in autumn 411, in order to produce a crop in summer 412.

Varanes was the Eastern consul. There was no Western consul in 410 because of the Gothic threat which culminated in the sack of Rome in August. Until recently it was accepted that the next year was similar, Theodosius holding a fourth consulship without a Western colleague in 411. In 412 the canonical consuls were Honorius IX and Theodosius V. Not long ago it was noticed that SPP XX 117 is dated 9 December 411 by the uncanonical consulship of Honorius IX(!) and Theodosius IV and that P. Mich. XI 611 is dated 27 September 412 by a postconsular formula for the same pair, see Bagnall, Worp, *Mnemosyne* 31 (1978) 287-93, cf. A. Cameron, *BASP* 16 (1979) 175-7; 18 (1981) 69-72. Since then we have had another example of the postconsular formula in LI 3639 of 11 September 412, and a new article elucidating the problem and bringing in more evidence, especially from unrevised date clauses in the Codex Theodosianus: R. W. Burgess, *ZPE* 65 (1986) 211-21. And now finally we have 3796, which produces at

last a dating from 10 December 412 by the canonical consuls, Honorius IX and Theodosius V. Burgess pointed out that there is no reliable evidence from the West for a consulship of Honorius in 411 and that C. Th. XV, 1.48 of 28 November 411 has escaped revision and is therefore still dated by the postconsulate of Varanes. The Eastern evidence he attributed to a misunderstanding of Western intentions by the Eastern authorities. At this point it seems best to tabulate the significant dates given by the papyri and what appear to be unrevised consular dates in the Codex Theodosianus:

1.	6-13 June 411 (C. Th. V. 16.33)	T. IV <i>et qui fuerit nuntiatius</i> (Cple.)
2.	16 August 411 (3803)	p. c. Varanae (Oxy.)
3.	17 August 411 (C. Th. VII. 4.32)	H. IX, T. IV (Cple.)
4.	28 November 411 (C. Th. XV. 1.48)	p. c. Varanae (Ravenna)
5.	9 December 411 (SPP XX 117.1)	H. IX, T. IV (Coba, Heracleopolite)
6.	28 January 412 (C. Th. VII. 17)	T. V. <i>et qui fuerit nuntiatius</i> (Cple.)
7.	11 September 412 (LI 3639)	p. c. H. IX, T. IV (Oxy.)
8.	27 September 412 (P. Mich. XI 611)	p. c. H. IX, T. IV (Oxy.)
9.	10 December 412 (3796)	H. IX, T. V (Oxy.)

From item (1) it appears that in Constantinople Theodosius had no colleague till at least 6 June 411.

Item (2) shows Oxyrhynchus still dating by the postconsulate of Varanes on 16 August 411, which Burgess would attribute to inefficient communication between Constantinople and Oxyrhynchus. Certainly if Theodosius' fourth consulship was announced in Constantinople by 13 June at latest, see item (1), then the news had failed to reach Oxyrhynchus over two months later, although the usual estimate for the arrival of news of accessions from Rome in the earlier period is c. 30 days, and the voyage from Constantinople to Alexandria could be made with a favourable wind in nine days, see L. Casson, *Travel in the Ancient World* 152, cf. id. *Ships and Seamanship* 270-99. If this consulship was taken on 1 January, as we might expect, the news had taken well over seven months to arrive in Oxyrhynchus. To me this remains a considerable puzzle, see below on items (7) and (8).

Item (3), till Burgess rescued it, had been routinely emended away to 17 August 412 (H. IX, T. V), but it indicates that the Eastern authorities believed that Honorius was taking a ninth consulship late in 411.

Item (4) is an obviously unrevised date from the Codex Theodosianus which indicates that the Western court, even as late as 28 November 411, had received no news of the fourth consulship of Theodosius and had not celebrated a ninth consulship for Honorius, although item (3) indicates that on 17 August his ninth consulship was used in Constantinople.

Item (5) shows the Constantinople formula of (3) in use in the Heracleopolite nome in December 411.

Item (6) is an unrevised formula for 412—contrast C. Th. XIV. 26.1 of the same day—which indicates that in Constantinople the fifth consulship of Theodosius was celebrated before any Western colleague was known.

Items (7) and (8) show, disconcertingly, that Oxyrhynchus continued to date by the consuls of 411 until at least 27 September 412. If, as we would normally suppose, Theodosius took his fifth consulship on 1 January 412—and (6) seems to show that he had taken it at least by 28 January—the spread of information was amazingly slow. It would be very interesting to know what conditions are indicated by such a slow spread of information. Had no ship arrived at Alexandria from Constantinople for over seven months, including the summer sailing season? Hardly; but clearly the former concern for the formal promulgation of consulships was lost, cf. LI 3639 introduction.

Item (9) shows that the canonical consuls of 412 were known at Oxyrhynchus at latest by 10 December, although on 27 September not even the consulship of Theodosius was known.

The recently published P. Heid. IV 306, which is the first dated papyrus from AD 413, shows that as late as 16 December 413 an Oxyrhynchite clerk was dating by the postconsular formula of the same consular pair. See now also R. S. Bagnall *et al.*, *Consuls of the Later Roman Empire* 356-9, 667-8.

² The landowner may have appeared again in P. Oslo II 35 (AD 426, see P. J. Sijpesteijn, K. A. Worp, *ZPE* 26 (1977) 276 n. 28; R. S. Bagnall, K. A. Worp, *Mnemosyne* 31 (1978) 289). 4: *Ἀρηλίους . . .*], *νίω κ[α]ὶ Θεοδώρῳ λαμπρο(τάτοις)*. The restoration of *Ἀρηλίους* is unjustified. Those persons leased out some land for one year. Theodorus might be identical also with Flavius Theodorus son of Theon, a landowner who submitted a petition to *riparii* in Pap. Lugd. Bat. XIII 8 (19 April 421). That man is not described as a *uir clarissimus* but as a *ναύαρχος*, cf. P. Haun. III 68.2 (402), P. Heid. IV 306.3 (413), PSI XVII Congr.

(= *Trenta Testi Greci . . . editi in occasione del XVII Congresso Internazionale di Papirologia*, Napoli 1983) 29.6 (31 August 432), PSI VI 708 (436), P. Heid. IV 313.10, 11 (V), P. Vindob. Tandem 19.1 (V/VI), P. Warren 3.10 (c.530), MPER XV No. 95.2, 10 (s.d.). This probably means the same as *naucularius*, a shipowner whose ships were engaged in transport for the state, cf. C. Theod. XIII. 5.20 (*nauarchiae . . . functioni*), XIII. 5.32 (*nauarchorum coetus* (= *nauculariorum concilium* below); . . . *per Orientales nauarchos*); the first is addressed to a *praefectus Augustalis* and the second is concerned with grain transport from Alexandrian granaries to Constantinople. Shipowners had equestrian rank, see C. Theod. XIII. 5.16 of AD 380, confirming a grant of Constantine, but persons of senatorial rank could act if they wished (C. Theod. XIII. 5.14.4; AD 371). The status indication Flavius implies service to the state, see J. G. Keenan, *ZPE* 11 (1973) 33-63; 13 (1974) 283-304, esp. 302.

If this identification is correct, it may help to explain why the lease is in perpetuity. The position of *naucularius* devolved on owners of land subject to the *naucularia functio*, see A. H. M. Jones, *Later Roman Empire* ii 827-9, and so tended to become hereditary. The land continued to be burdened with this duty to the state and so may have come to be treated to some extent like state land, which was more often let out on hereditary leases, see Jones, op. cit. 788-90, cf. 10 n.

The note to P. Heid. IV 306.3 connects these Egyptian *ναύαρχοι* with Nile traffic and dissociates them from seagoing ships. That may be right. We know very little about the organization of river traffic, see Jones, op. cit. 829-30. It may have been included in the same system, since it was in Egypt at least a vital link in the chain of supply to Constantinople. However we should note also the diminution in the size of ships and the shortage of them in just this period, see J. Rougé, *Recherches sur l'organisation du commerce maritime* 72-3, amplified by L. De Salvo in *Sodalitas: Scritti . . . A. Guarino* IV 1654-6.

3 Scanty traces of perhaps two letters surviving on twisted fibres at the beginning of the line have not been assigned to their proper letters; read perhaps *Αύρη*λυ[oc].

On the spelling *ἐνωτος* see F. T. Gignac, *Grammar* ii 201.

3-4 Psothis in the ninth *pagus* occurs also in P. Giss. 115 introduction, see P. Pruneti, *I centri abitati* 225, 226 n. 11. Since the Oxyrhynchite *pagi* were numbered from south to north and ten in all, it is probable that of the four places of the same name in the nome this should be identified with the one which had earlier been in the Lower, i.e. northernmost, toparchy, see XII 1425 4 n., cf. Pruneti, op. cit. 224.

6 *ἐξερτισμένης* (= *ἐξήρητ-*). This error may be merely phonetic, see F. T. Gignac, *Grammar* i 243 §iii (before or after a liquid), 248-9 (summary), or it may reflect some uncertainty over augment and reduplication, *ibid.* ii 233 (c), 1 and 2.

7 *καταρτία*. Cf. IX 1208 14 (AD 291), XXXIV 2723 10, P. Michael. 19.6, PSI IX 1072.10-11 (all three 3rd cent.). All these have *πάχη ξυλική καταρτία και ειδηρώσει*. Less likely is *ἐξαρτία*, cf. P. Flor. III 325.11 (AD 488), PSI I 77.16 (AD 551-65), P. Berl. Zilliacus 7.14 (AD 574). For the equipment of an irrigation machine cf. T. Reil, *Beiträge zur Kenntnis des Gewerbes* 82-4.

ζυγόν. This is probably the phonetic equivalent of *ζυγόν*, which *ἐνα* indicates to be the accusative of the masculine *ζυγός*, cf. F. T. Gignac, *Grammar* i 262-4 (*v > η*), 277 (*o > ω*), and the 'yoke' seems to relate to the animals which turned the machine, cf. P. Köln V 234.9 and n., K. Maresch, *Aegyptus* 66 (1986) 142, 144 (8 n.). The machine was the so-called *sakiyeh*, which by means of a pot-garland on a large vertical wheel geared to a horizontal wheel, driven usually by oxen, raised water from an underground brick-vaulted cistern, see L. Ménassa, P. Laferrrière, *La sāqia: technique et vocabulaire de la roue à eau égyptienne* (Cairo, I.F.A.O.), cf. J. P. Oleson, *Greek and Roman Mechanical Water-lifting Devices* (= *Phoenix* suppl. 16, 1984); T. Schiøler, *Roman and Islamic Water-lifting Wheels* (Odense, 1973). To make efficient use of the machine it would be necessary to have at least two pairs of animals working in shifts. Part of the much damaged subscription seems to run *μεμίεθωμα[ι τ]ώ[υ] ἡμικη τῆς [μηχανῆ]ς ἡ σηκόν* (18: 1. τὸ ἡμικη, *ζυγόν*), 'I have leased the half of the machine or a yoke'. In this case, therefore, it seems that the machine was served by two pairs of animals. The lessee rented the right to use one team, presumably for half the available time, and to cultivate half of the area irrigated by the machine. The area specified seems to be eight aruras (*ἀροῦρῶν* [δκτ]ώ, 9), but it is not quite clear whether this is the whole or the half. Other machines in cases of this kind serve areas of from twelve to thirty aruras.

Μείοξ is a new name.

7-8 It seems that responsibility for the vineyard had previously been separate from responsibility for the machine. Only Anuthis reappears in the subscription (19).

8 *ἀμπε*λογ. Cf. 14 ε[ί]ς τῆν [πρ]οκειμένην ἀμπελον.

Ἀνοῦθιν. Cf. 19 *Ἀγορθίου*. On the declension see F. T. Gignac, *Grammar* ii 25-6.

8-9 *ἐν τῶν ὑποτελλόντων* [*ἀροῦρῶν* [δκτ]ώ (1. ταῖς -ούσαις ἀρούραις)]. Cf. P. Berl. Zilliacus 7.12-18 *μηχανήν . . . μετὰ . . . τῶν . . . ὑποτελλουσῶν αὐτῆ μηχανῆ ἀρουρῶν δώδεκα*. The genitive here is probably due mostly to association with *μετὰ*, cf. LI 3636 5 n. The position of this phrase suggests that the vineyard fell within the specified area, but it is not clear whether it occupied the whole area or not, cf. 7 n.

9 *ῥα*. The accusative is wrongly recalled from the formula, *μισθώσασθαι ἀρούρας (τόσας) ἢ ὅσαι ἐὰν ὄσι προτέρους ἀπαιτησίμοις*. Cf. 12-13, and see introduction paragraph 3 for possible implications.

10 One word we might expect at the beginning is *εποράς*, as in P. Mich. XI 611.7, VI 913 8, P. Oslo II 35.10, on which see especially *Mnemosyne* 31 (1978) 287-90, where it is explained that at this period the taxes in kind ascribed to a particular indiction were due at the beginning of it. In this case the lease begins in autumn 411 and the first crop is expected in summer 412, at the beginning of the eleventh indiction in the fiscal sense, cf. R. S. Bagnall, K. A. Worp, *Chronological Systems* 9-16 (on the change in the beginning of the fiscal indiction), 30-5 (on *νέα* meaning 'coming, new'). Perhaps *ἀπὸ επορά*ς will do as a stop-gap, until a good parallel emerges.

εἰς τὸ διηνεκέε. Leases in perpetuity are extremely rare, especially from a private landlord, see A. H. M. Jones, *Later Roman Empire* ii 790, 1323-4, citing only P. Giss. 106, which is a sixth-century receipt in respect of an emphyteutic, i.e. hereditary, lease. The state and the churches more commonly made use of this type of tenure, see Jones, op. cit. 788-90. See 2 n. for a glimmer of an explanation of its use here.

The phrase *μισθώσασθαι εἰς τὸ διηνεκέε* turns up in the very fragmentary P. Ryl. II 427 fr. 27.6, cf. fr. 24.4 *εἰς τὸ διηνεκέε* εν[. This document looks as if it chiefly concerns state leases; it dates probably from c. AD 200, cf. fr. 46.13.

11 *ἐπὶ τῷ ἐμὲ μ]ισθώσασθαι*. No exact parallel has been found. Cf. VI 913 10 *ἐπὶ τῷ ἡμᾶς ταύτας [επειραί, κτλ., PSI IX 1078.13 ἐπὶ τῷ μὲ ἐπαντλήσαι εἰς ἄβροχ[ον, κτλ.* There are some meagre traces of ink on disturbed fibres near the beginning of the line, which I am unable to assign to letters. Perhaps *ἐπ]* τῷ[?

13 Read probably *ἀντλήσαι*, to parallel *μισθώσασθαι καὶ τελέε* (= *-σαι*) in 11. After that *τετ[α]ρτερε* seems to suit best, cf. IV 729 24 *ποτισμοῦ . . . πεμπταίου* of a vineyard, with M. Schebel, *Landwirtschaft* 273. Read perhaps *τεταρταίοι ὕδασι*, or even *τεταρταίαι ἀρδεύεσεν*, which might better explain the ending *-ε* and the odd form *ὑδασι*, although the intrusive rho may be simply left over from the nominative singular. I have also considered something like *τέσσαρσι* or *τετάρτοις ὕδασι*, cf. BGU I 33.3-4 *πλείω δύο ὑδάτων μὴ πότιζε τὴν ἀμπελον*, P. Fay. 110.14-15 *δεύτερον [ῥ]δω[ρ]*, 17 *δυσὶ ὕδασι*, but the traces will not conform.

17 The paragraphus begins with a double curve, cf. R. Pintaudi, *Pap. Flor. XII (Supplemento): Papii . . . a Firenze, Catalogo della Mostra . . . 1983*, Tav. LIII (PSI VIII 963). P. Wisc. II 65 (Pl. XXV) shows a less contorted, more understandable version.

18 Cf. 7 n. for the meaning. For the phonetic spelling see F. T. Gignac, *Grammar* i 277 (*o > ω*), 112-13 (intrusive final *v*), 123 (*ζ > c*), 262-4 (*v > η*), 78-9 (*γ > κ*).

21 The traces at the end are faint. Perhaps *πλή* [ρῆ], 'in full', will do as a stop-gap.

22-3 The writer of the subscription has not been identified. A name like Castricianus or Castre(n)sianus comes to mind, see I. Kajanto, *The Latin Cognomina* 144, 208, but]. . . *νός* is too far away to belong to either of these. Perhaps *-νός* is the end of an alias and *-]νᾶ* the end of a patronymic.

3804. ANNUAL ACCOUNT OF AN ESTATE STEWARD

No inv. no.

288 × 30 cm.

AD 566

This account was recently rediscovered, still rolled up, among the boxes of material belonging to the collection. It was unrolled by Dr Shelagh Jameson in 1981 and proved to be continuous and almost complete. Internal evidence shows that the first visible column on the recto, much damaged, was the original first column of the document, see 1-14 n. Twenty-one joins can be seen on the roll, which now consists of twenty-two individual sheets, each as a rule between 13 and 14 centimetres broad. The first sheet

is broken, so that the surviving piece is only c.4.5 cm broad. The last sheet, c.10.5 cm broad, is also incomplete, but it seems to have been cut rather than broken. This may have been caused by trimming of the original maker's roll or the section used for the account may have been cut from a longer roll. If the lost beginning was the beginning of the roll as it came from the paper-maker, it would have had a protocollon, cf. E. G. Turner, *Recto and Verso* (Pap. Brux. 16) 20-2, which at this date would have been occupied on this side by a large official docket, cf. **3805** 1-6 n.

There is no inventory number, but the recto account bears a very striking resemblance to XVI **1911**, which was retained by the Cairo Museum in 1897, see P. Oxy. XVI p. v, and was inventorized as P. Cair. 10154. This circumstance strongly implies that the roll was part of the large find of Byzantine papyri made by Grenfell and Hunt in their first season at Oxyrhynchus on 18 and 19 March 1897, vividly described in the Egypt Exploration Fund's *Archaeological Report* 6 (1896-7) 8-9. The less coherent accounts on the verso are published below as **3805**.

The rural estates of the Apion family in the Oxyrhynchite nome were divided into *προνοηαία*, that is, districts concentrated around a small group of hamlets, *ἐποίκια*, and under the control of stewards called *προνοηταί*, whose chief responsibility was to collect the revenues, see E. R. Hardy, *The Large Estates of Byzantine Egypt*, 88-93, A. C. Johnson, L. C. West, *Byzantine Egypt: Economic Studies* 63-5, J. Gascou, *Travaux et Mémoires* (Collège de France, Centre de Recherche d'histoire et civilisation de Byzance) 9 (1985) 16-19, cf. A. H. M. Jones, *Later Roman Empire* ii, 790-1. This is the summary annual account of one such steward, by name Theodorus (143, 225). His district consisted of seven hamlets, namely Apele, receipts from which are recorded in lines 1-34, Paciac (35-47), Cissonos (48-55), Trigyu (56-61), Luciu (62-101), Tarusebt (102-26), and Cotylëiu (127-40). None of these small places is very well located, but it is clear that they were close enough together to be managed conveniently by a single steward, and there is a clue from which it can be deduced that they lay in the far south of the Oxyrhynchite city territory. Each of the hamlets had a church which received a customary annual allowance in wheat and money from the steward's account and the section recording the expenditure on these allowances includes another to the church of Iseum Panga, a larger place, a *κώμη* rather than an *ἐποίκιον*, known to have lain during the Roman period in the Upper toparchy, see P. Pruneti, *I centri abitati dell'Ossirinichite*, 71-2. In Egyptian geography 'upper' means southern and this toparchy was the most southerly of the six into which the nome was divided. That Iseum Panga lay near the steward's district is confirmed by its appearance along with Cissonos in PSI III 165. Also mentioned in that document is Netnëu, which occurs here too (155, 236, 261), though it was under the authority of another steward. Finally Pecty, twice attested in company with Iseum Panga, see Pruneti, *op. cit.*, 141-2, is mentioned three times in this account (85, 86, 99). A less certain inference is that the district was close to the rising ground on the west. This is implied by the mention in

1911 166 of quarrymen from Trigyu. There can have been no convenient sources of stone in the low ground towards the Nile to the east. Quarrymen are also attested in I **134** for Nesu Leucadiu, which occurs here in a context that suggests it was not far away (156). In that document the stone is destined for Tarusebt, which confirms their proximity. The first edition has *Ταρουεθ*[(*ίνου*)], supposed to stand for *Ταρουθίνου*, with a note, 'The doubtful *θ* might be *ε*'. Pruneti, *op. cit.*, 198-9, thought Tarusebt was probably meant. A photograph of **134**, itself now in Cairo, shows *Ταρουέβ* in full with only very slight damage to the beta. In this roll the name is spelled with final *-βτ* everywhere, but in **1911** *Ταρουέβ* is a frequent alternative, e.g. 80, 84, 112-14.

The date is not stated, beyond the frequent references to the 14th indiction as the period covered by the account. That this is AD 565/6 emerges from the relationship with **1911**, which is for a fifth indiction further described at one point (148) as year 233 and 202, that is, AD 556/7, see R. S. Bagnall, K. A. Worp, *The Chronological Systems of Byzantine Egypt*, 89, cf. 36-42. That our roll is later can be deduced from many entries, but is clearest from comparison of **1911** 150-1 *κατὰ κέλευσιν τοῦ δεσπότητος ἡμῶν τοῦ κυροῦ πατρικίου στρατηγίου* with 186-7 here, which describe the same authority for the same concession in a different way, *ἐκ κελεύσεως τοῦ ἐν εὐαγγελίῳ τῆς μνήμης πατρικίου στρατηγίου*. Strategius 'in well-sanctified memory' evidently died in the interval between the accounts. The overall similarity of the entries, including the names of many tenants, indicates that our fourteenth indiction must have been only nine years later than the fifth indiction of **1911**, rather than twenty-four years later. In particular Anastasius the banker is known to have been replaced by another called John by early in the fourteenth indiction of AD 580/1 (I **144**), so that he could not have accepted payments as late as Mesore of that indiction, cf. 279. Only AD 565/6 will suit the conditions.

This raises another difficulty. If this Strategius was dead by AD 565/6, it is surprising to find him referred to in a document of AD 576/7 simply as *τοῦ μεγάλου κυροῦ* (= *κυρίου*) *στρατηγίου*, see XVIII **2195** 108, 122. Previously these have been taken as the latest references to him alive, see J. Gascou, *Travaux et Mémoires* 9 (1985) 68 n. 381. The calculated date of **2195** is unassailable, because the account is for a tenth indiction and the estate banker is John, firmly dated to AD 580 by I **144**. However, in **2195** 108 the order of Strategius is dated to an eleventh indiction. Although col. ix (lines 151-9) records arrears paid in the eleventh indiction for the tenth, i.e. in AD 577/8 for AD 576/7, Strategius' order for a concession here in the main body of the account ought to go back to a previous eleventh indiction, probably to AD 562/3 rather than as far back as AD 547/8. Consequently, in spite of some uncertainties it seems best to accept that the references to Strategius in **2195** 108 and 122 were simply copied out without making them reveal that Strategius was dead, and to observe that 108 probably informs us that he was still alive in AD 562/3. He died, if the argument is correct, in the period between AD 562/3 and AD 565/6.

Strategius on this view turns out to be even more 'evanescent' than Gascou found him, and there is yet another difficulty. The widow Flavia Praejecta, who appears in

AD 587 with her sons Apion and George, still minors at that date (XVIII 2196) and Apion still a minor in AD 591 (XVI 1990, cf. 1989, XIX 2243a 86), is presented in the family tree (Gascou p. 69) as the widow of this Strategius. If he died before AD 566, Apion III must have been born by then and AD 591 is practically the last moment at which he could have been considered a minor. The consular family of the Apions no doubt ceased to be minors at the Roman canonical age of twenty-five. The fit is tight, and made tighter by the implication of 2196 that Apion was not the younger son, since he is named before George.

In general the document strikingly confirms the rigid pattern of the administration of the Apion estates: the rent-roll theoretically remained precisely the same over the nine years between 1911 and 3804, see 141-2 n. The profit in the later year was smaller by about 4.6 per cent, see 273 n.

Ancient accounts are generally expected to be inaccurate. Here the accounting is good. Only three very small discrepancies have been detected or suspected, see 141-2 n., 168 n., 213-17 n.

There are several interesting details, such as the value of the solidus in terms of denarii deducible from 271 and 272, see nn., and the entries relating to boatbuilding, irrigation works, and machinery for making oil.

	Church of Luciu	art. 4; sol. $\frac{1}{2}$ less car. $\frac{1}{2}$

total as above.

To the heirs of Menas, sailor, from Coma, for *embole* from the crop of the 14th indiction, wheat, by cancellus, art. 192 $\frac{1}{2}$, choen. 7, and for freight charges to Alexandria, on the Alexandrian standard, sol. 1 $\frac{1}{4}$ $\frac{1}{8}$ $\frac{1}{6}$, which are on the private standard sol. 1 $\frac{1}{24}$ $\frac{1}{96}$, total wheat, by cancellus, art. 192 $\frac{1}{2}$ choen. 7; sol. 1 $\frac{1}{24}$ $\frac{1}{96}$

To the brickmakers making bricks in the holdings below for wages for 16 myriads of baked bricks, with wages of a builder wheat, by cancellus, art. 12; sol. 4 less car. 14, as follows: *

Apele myr. 4, Paciac myr. 1, Cotyleciu myr. 4, Cissonos myr. 1 $\frac{1}{2}$, Trigyu myr. 1 $\frac{1}{2}$, Luciu myr. 2, Tarusebt myr. 2, total as above.

To the *pronoetes* on account of salary according to the custom,

wheat, by cancellus, art. 24; sol. 2 less car. 5

155	To the taskmaster of the hamlets of Apele and Cissonos,	sol. 1 less car. 3 $\frac{1}{2}$,
	and to the taskmaster of Luciu,	sol. 1 less car. 3 $\frac{1}{2}$,
	and to the taskmaster of Netneu and Cotyleciu,	sol. 1 $\frac{3}{8}$ less car. 5 $\frac{1}{2}$ $\frac{1}{4}$,
	and to the taskmaster of the hamlets of Trigyu and Tarusebt and Anta and Nesu	
	Leucadiu	sol. 1 $\frac{1}{2}$ less car. 4 $\frac{1}{2}$ $\frac{1}{4}$,
	total	sol. 5 less car. 17 $\frac{1}{2}$

Conceded to the persons from Trigyu according to the custom

wheat, by cancellus, art. 10; sol. $\frac{2}{3}$ $\frac{1}{8}$

Conceded to the persons from Trigyu for rent of date-palms and poll-tax according to the custom

sol. 3

Conceded to the persons from Trigyu for rent of the field of Phanchoch according to the custom

sol. 1

160 Conceded to Isaac son of Sirius from Apele according to the custom sol. 1

Conceded to the persons from Apele for sanded land and the pond on the ground of Neloc for ar. 5 $\frac{1}{4}$ $\frac{1}{8}$, at sol. $\frac{1}{2}$ $\frac{1}{4}$ for 1 ar., sol 4 $\frac{1}{48}$ $\frac{1}{96}$; total: sol. 4 $\frac{1}{48}$ $\frac{1}{96}$

(Right hand margin)

It is necessary to inquire after sol. 8 $\frac{1}{24}$ $\frac{1}{48}$ in respect of the 13th and 14th indictions and not to remit anything to them.

To the tenant farmers of the holding of Cotyleciu for vineland under grass, out of ar. 13, ar. 12 $\frac{1}{4}$ at sol. $\frac{3}{8}$ for 1 ar. sol. 8 $\frac{1}{8}$

To the martyrion of St Serenus according to a grant of Apollos son of the bishop in the holding

165 of Taruthinu, in right of the holding of Cotyleciu according to the custom, wheat by cancellus art. 26, sol. 1 $\frac{1}{2}$, and according to a grant of Phoebammon son of the bishop in the holding of Cotyleciu from the ground of Eros and Amatus and of the vinedressers sol. 2: total: wheat, by cancellus, art. 26; sol. 3 $\frac{1}{2}$

(vac.)

Total: art. 291 $\frac{1}{4}$, choen. 1, and sol. 38 $\frac{1}{12}$ $\frac{1}{48}$ $\frac{1}{96}$ less car. 41 $\frac{1}{4}$.'

col. viii

'Conceded to the tenant farmers of the irrigator of the new cistern in the hamlet of Cotyleciu sown previously

170 on behalf of Smaragdus, *notarius*, but now through Paul son of Cueiechus in accordance with an authority granted to him, out of wheat, by measure, art. 42 and sol. 10, from which (are deducted) for diminution of ground and for land carried away by the river as a result of the breach of a dyke sol. 3 $\frac{1}{8}$,

the remaining art. 42 and sol. 6 $\frac{1}{2}$ $\frac{1}{8}$, from which are deducted likewise because this is rushy and reedy in a ratio of one third to Nile-watered land wheat, by measure, art. 14, which are by cancellus, after the addition of 15 per cent., art. 16, choen. 4, and sol. 2 $\frac{1}{2}$. Total of the reduction wheat, by cancellus, art. 16, choen. 4, sol. 5 $\frac{1}{12}$.

Total: wheat, by cancellus, art. 16, choen. 4; sol. 5 $\frac{1}{12}$

175 To the persons from Tarusebt for arrears on ar. 2 of land under grass according to the custom sol. 1 $\frac{1}{2}$

To the tenant farmers of the holding of Cotyleciu for the 5 aruras planted with vines on the west of the holding of

Cotyleciu in the 8th indiction, for crops of the 9th, also for the 14th indiction wheat, by measure, art. 14 $\frac{1}{2}$ and sol. 1 $\frac{3}{8}$, which are:

wheat, by cancellus, art. 16 $\frac{1}{2}$, choen. 7; sol. 1 $\frac{3}{8}$

Conceded to the tenant farmers of the holding of Luciu in respect of land carried away by the river—

180 by the waters from the breach of a dyke on the south of the holding of Luciu wheat art. 7 $\frac{1}{2}$, choen. 2 and sol. 1 $\frac{1}{12}$ $\frac{1}{48}$ $\frac{1}{96}$, which are, by cancellus, art. 8 $\frac{1}{2}$, choen. 7

Total: wheat, by cancellus, art. 8 $\frac{1}{2}$, choen. 7; sol. 1 $\frac{1}{12}$ $\frac{1}{48}$ $\frac{1}{96}$

To the tenant farmers from the holding of Cotyleciu named here below in respect of their land scoured away wheat art. 37, which are, by cancellus, art. 42 $\frac{1}{2}$, choen. 2; sol. 3 $\frac{1}{2}$ $\frac{1}{48}$ as follows:

To Peter and Isaiah and Job art. 12, sol. . . .; to Isaiah and Philcas and partners art. 12, sol. . . .

To Joseph and Phib and partners art. 9, sol. . . . $\frac{1}{24}$ $\frac{1}{48}$; to Peter, tenant farmer of the irrigator of the Estate(?), art. 4, sol. . . . Total as aforesaid.

To the monastery of Abba Andrew according to the custom in respect of sol. 50 less car. 200 also for the 14th indiction wheat, by cancellus, art. 1,000, and

185 on the day of the great man art. 12. Total: wheat, by cancellus, art. 1012.

To the monastery of Abba Andrew likewise, as the result of a letter, by order of the patrician Strategius, of well-sanctified memory, from the fifth indiction, also for the 14th indiction, according to the custom, wheat, by cancellus, art. 100.

Conceded to John and Heraclius from the holding of Luciu in respect of their land in right of

the irrigator of Nauate belonging to the same holding of Luciu destroyed through the breach of the dykes,

for the 13th indiction in respect of 3 aruras, sol. 2 $\frac{1}{2}$, and for the 14th indiction, sol. 2 $\frac{1}{4}$. Total: sol. 4 $\frac{1}{2}$

	Conceded to Noah and Peter from Cotyleciu, vinedressers of the same holding of Cotyleciu, in respect of their land destroyed and scoured away through the waters of the breach of a dyke, for 4 aruras	sol. 2
	Conceded to Phileas, tenant farmer, and partners from Cotyleciu in respect of ground of Athanasius	sol. 1 $\frac{1}{2}$
	(vac.)	
	Total: art. 1,196 and sol. 17 $\frac{1}{2}$ $\frac{1}{24}$ $\frac{1}{48}$, (plus) another sol. 3 $\frac{1}{2}$ $\frac{1}{24}$ $\frac{1}{48}$. Total: sol. 21 $\frac{2}{3}$ $\frac{1}{24}$ $\frac{1}{96}$.	
	col. ix	
195	Conceded to Abraham from Luciu in respect of his destroyed land	sol. 1 $\frac{1}{2}$ $\frac{1}{12}$ $\frac{1}{48}$ $\frac{1}{96}$
	(vac.)	
	And in <i>auturgia</i> of right of the holding of Tarusebt, as follows:	
	Ground of Papar in the name of Phoebammon son of Peter through Pecysius son of Psacias ar. $\frac{1}{2}$ $\frac{1}{24}$	sol. $\frac{1}{4}$
	Ground of Schorda cultivated through the persons from the hamlet of Luciu of right of Tarusebt ar. . . .	sol. $\frac{1}{2}$
	Ground of Pheltanbel cultivated on behalf of Phileas son of Psacias from Luciu of right of Tarusebt from ar. 7 $\frac{1}{2}$, ar. 4 $\frac{1}{2}$	sol. 3 $\frac{1}{2}$ $\frac{1}{4}$
200	Ground of Concon cultivated previously on behalf of Colluthus in the name of Peter son of Phoebammon	sol. 1 $\frac{1}{2}$
	from Tarusebt from ar. 7 $\frac{1}{2}$, ar. 3	sol. 1 $\frac{1}{2}$
	Ground of Ptychon in the names of Serenus and Paul from Tarusebt ar. 1 $\frac{1}{2}$	sol. 1 $\frac{1}{8}$ $\frac{1}{48}$
	Ground (called?) Northern of right of Diogenes in the names of Paul and a second Paul ar. 6	sol. 5 Total: sol. 12 $\frac{1}{8}$ $\frac{1}{48}$
	And in <i>auturgia</i> of right of the holding of Luciu, as follows:	
205	In the names of Anuthius son of Aciar and Pecysius son of Paul, ground of Sarapodorus, from ar. 12, ar. 6	sol. 4
	In the names of Isaac son of Ammonius and partners and of the right of the irrigators of ground of Seuthes ar. 9 $\frac{1}{4}$	sol. 6 $\frac{1}{2}$ $\frac{1}{12}$ $\frac{1}{48}$
	In the names of Surus son of Phoebammon and partners, of the right of the Large Estate ar. 3	sol. 2 $\frac{1}{4}$
	In the name of Hatres son of Phoebammon, ground of Pagenes ar. 2	sol. 1 $\frac{1}{2}$
	In the name of Pecysius son of Paul, ground of Came ar. 2	sol. 1 $\frac{1}{2}$
210	And in respect of the right of the irrigators of ground of Thatres to the south of the holding of Cotyleciu ar. 2 $\frac{1}{2}$	sol. 1 $\frac{1}{2}$ $\frac{1}{24}$
	In the name of Jacob son of Ammonius, ground of the martyrrium of Acacius ar. 1 $\frac{1}{2}$ $\frac{1}{4}$	sol. 1 $\frac{1}{12}$ $\frac{1}{96}$
	In the name of Phoebammon son of Jacob through Horsentius, deacon, and partners, ground of Crescentius ar. 3 $\frac{1}{2}$	sol. 2 $\frac{1}{2}$ $\frac{1}{48}$
	Total: ar. 30	sol. 21 $\frac{2}{3}$ $\frac{1}{8}$ $\frac{1}{96}$
	To the rivermen who dug out a new cistern in the holding of Paciac in the irrigator called 'of the Holding' in the charge of Jacob and of the community of tenant farmers during the 14th indiction, for the water supply and crops of the 15th, on account of wages sol. 1 less car. 4 $\frac{1}{2}$, and on account of expenditure	
215	wheat, by cancellus, art. 1, and in respect of the price of salt fish and oil and mutton, in money, den. myr. 600, and to the builder and carpenter and overseer on account of expenses wheat, by cancellus, art. 4, and, in money, den. myr. 1,200, and in respect of the price of stones bought for building the same cistern sol. 2 less car. 9, the wheat being carried (forward) to the account of the 15th indiction, the gold having been entered into this account	sol. 3 less car. 13 $\frac{1}{2}$ and den. myr. 1,200

	In respect of the price of 1,100 old wine jars bought and delivered to the vinedressers of Cotyleciu and Tarusebt for containing wine of the produce of the 14th indiction, on Mesore 20 of the indiction	sol. 1 less car. 4 $\frac{1}{2}$
	(vac.)	
220	Total: sol. 39 $\frac{1}{2}$ $\frac{1}{24}$ $\frac{1}{48}$ less car. 18 and den. myr. 1,200.	
	col. x	
	'To Apanacius riverman working on the vault of the cistern of the irrigator (called Riverside of the holding of	
	Trigyu South on account of wages to date on Pachon 13 of the 14th indiction	sol. 1 less car. 4 $\frac{1}{2}$
	To Apollos riverman and his companions who embanked(?) the one arura of vines destroyed by the waters	
	in the hamlet of Tarusebt in the 14th indiction for the wine production of the 15th on account of wages in three assignments, for Phamenoth and Pharmuthi and Epeiph	sol. 4 less car. 18
225	For the price of 1 beast bought by Theodorus <i>pronoëtes</i> of Apele for use in the riding stable	sol. 4 $\frac{1}{2}$ less car. 20 $\frac{1}{4}$
	For the price of ar. . . . of green fodder bought from Apollos son of Losis from Paciac for feeding the beasts of the riding stable in the 14th indiction for the green fodder consumption of the 15th, on Phamenoth 4 of the 14th indiction	sol. 1 less car. 4 $\frac{1}{2}$
	For 132 pounds of nails bought for use in the repair of the landlord's tender sol. 4 less car. 18; likewise for the price of another 132 pounds of nails bought on the 25th of the month of Payni sol. 4 less car. 18, and for the price of oil bought for use on the same	
230	tender sol. 2 less car. 9; and to John, <i>notarius</i> and overseer of the work on the same tender on account of expenses for the 64 days from the 28th of the month of Pharmuthi till Epeiph 1, at car. $\frac{1}{2}$ daily, car. 32 . . . sol. 1 $\frac{1}{2}$ less car. 6	Total: sol. 11 $\frac{1}{2}$ less car. 51
	For the price of scales of cladding likewise bought for use on the landlord's tender on Epeiph 30 of the 14th indiction	sol. 1 less car. 4 $\frac{1}{2}$
	For the price of 4 cypress timbers bought by agency of Anup, sailor, of unknown origin(?), for repair of the same tender of the landlord on the 14th of the month of Pachon of the 14th indiction	sol. 12 less car. 54
235	To the sawyers who sawed cypress timbers for use on the tender of the ship formerly belonging to the late Scholasticus	
	in addition to the sol. 1 given to them through Philoxenus <i>pronoëtes</i> of Netneü now also, through you, on the 15th of the month of Payni of the 14th indiction	sol. 1 less car. 4 $\frac{1}{2}$
	For the price of straps(?) and ropes bought for use on the landlord's camels on Hathyr 18 of the 14th indiction	sol. 2 less car. 9
	To the 3 camel drivers on account of salary for the 14th indiction on Mecheir 21(?) of the 14th indiction wheat, by cancellus, art. 48; sol. 4 $\frac{1}{2}$ less car. 11 $\frac{1}{4}$	
	For the price of papyrus rolls bought for use on the records(?) and the accounts and other (papers) of the landlord's secretary according to the custom also for the 14th indiction on Hathyr 13 of the 14th indiction	sol. 3 less car. 10 $\frac{1}{2}$
240	To the field-guards of the hamlet of Lithines guarding the hay for the landlord's <i>auturgia</i> of the Southern Boundary	
	in respect of ground of the Large Field of Diogenes ar. 40, and in respect of ground of Oxidas ar. 24, total ar. 64, on account of wages in place of hay in the 13th indiction for the crops of the 14th, in a lump sum on Choeac 10 of the 14th indiction	sol. 1 $\frac{1}{2}$ less car. 6 $\frac{1}{4}$
	For the price of hayseed bought in the village of Areos through Philoxenus receiver of hay for use on	

- 245 the landlord's *auturgia* of Path Tampemu and Southern Boundary in the 14th indiction for the sowing of the 15th sol. $4 \frac{1}{2}$ less car. $16 \frac{1}{2}$
 For the price of hayseed likewise bought from Cosmas and Phib from Sincart through Onnophrius receiver of hay for use on the landlord's *auturgia* both of Path Tampemu and Southern Boundary in addition to what was already bought recently in the village of Areos now also on the 12th of the month of Tybi of the 14th indiction for the sowing of the 15th sol. 3 less car. $13 \frac{1}{2}$
 For the price of one discharge trough bought and fitted to the irrigator (called 'of the Lands' of the hamlet of Tarusebt in the 14th (indiction) for the sowing of the 15th sol. $\frac{1}{8}$ less car. $\frac{1}{4}$
 (vac.)
 250 Total: art. 48 and sol. $54 \frac{1}{2}$ less car. $229 \frac{1}{2}$.
- col. xi
 'For the price of aracus art. 32(?) bought for the sowing of the landlord's aruras in Ptychon which were watered for a second time and of Apa Apollos' aruras and of the aruras . . . of the Southern Boundary in the 13th indiction for the sowing of the 14th, not entered for the 13th sol. $3 \frac{1}{2} \frac{1}{24} \frac{1}{48}$ less car. $15 \frac{1}{2} \frac{1}{4}$
 For the transport of wheat art. 1,012 given to the monastery of Abba Andrew according to the custom sol. $1 \frac{1}{2}$ less car. $5 \frac{1}{4}$
 255 To John *notarius* and overseer of the work on the landlord's tender on account of expenses likewise for the 39 days from the 2nd of the month of Epeiph till Mesore 10 of the 14th indiction sol. $\frac{2}{3}$ less car. 3
 For the price of scales of cladding likewise bought for use on the landlord's tender on Epeiph 30 of the 14th indiction sol. 1 less car. $4 \frac{1}{2}$
 To the carpenters caulking the tender which is being renovated on account of wages according to inspection by Apollos shipwright of Cynopolis sol. 18, from which are deducted in respect of the sawyers as a quarter share
 260 sol. $4 \frac{1}{2}$, and for the shipwrights sol. 4: remainder sol. $9 \frac{1}{2}$, of which there were delivered to them lately through Philoxenus *pronoetes* of Netneü sol. 3: remainder which was due to be delivered to them in respect of the full payment of the wages of the carpenters caulking sol. $6 \frac{1}{2}$ less car. $29 \frac{1}{4}$ (paid) on Mesore 5 of the 14th indiction. Total: sol. $6 \frac{1}{2}$ less car. $29 \frac{1}{4}$
 For the price of millstone-cutters' stones bought from Serenus and Megas millstone-cutters for construction of the new *calathus* of the mill of the landlord's oil factory of the holding of Apele under
 265 Samuel oil-worker and partners in the 14th indiction for crops of the 15th sol. $1 \frac{1}{8}$, from which was saved from the old stones sol. $\frac{1}{8}$: remainder sol. 1 less car. $4 \frac{1}{2}$ (paid) on Epeiph 21 of the 14th indiction. Total: sol. 1 less car. $4 \frac{1}{2}$
 For the price of 2 oxen and 2 bulls and 2 heifers and 1 she-ass bought from Heraclius son of Pabaris from Luciu for use in watering the landlord's *auturgia* (called) Outside the Gate sol. 12 less car. 54.
 (vac.)
 270 'Total of expenses of the 14th indiction: wheat, by cancellus, art. 1,535 $\frac{1}{4}$ choen. 1, and sol. $179 \frac{1}{2} \frac{1}{2} \frac{1}{2}$ less car. 405, (the carats being converted) to sol. $16 \frac{1}{2} \frac{1}{24}$, the total clear being sol. $163 \frac{1}{2}$, and from the surplus of the account of the 13th indiction sol. $4 \frac{1}{2} \frac{1}{24}$; total: sol. $167 \frac{1}{2} \frac{1}{24}$ and den. myr. 1,200, (the denarii being converted) to sol. $\frac{1}{2}$; total: sol. $167 \frac{1}{2} \frac{1}{24}$
 Against which for receipts of the same 14th indiction wheat, by cancellus, art. 1,535 $\frac{1}{4}$ choen. 1, and in money sol. $647 \frac{1}{8}$ and den. myr. 2,800, (the denarii being converted) to sol. $\frac{1}{2} \frac{1}{24} \frac{1}{48}$; total: sol. $647 \frac{1}{8} \frac{1}{48}$.

Wheat is balanced, and the remainder in money is sol. $480 \frac{1}{8}$.
 (vac.)

'Total (i.e. of col. xi): sol. $26 \frac{1}{24} \frac{1}{48}$ less car. $116 \frac{1}{4}$.'

col. xii

- 275 'Of which payments were made to the most glorious Anastasius, cashier, in different instalments, as follows:
 On Tybi 25 of the 14th indiction with *rhope* sol. 200 less car. 1,012; on Pharmuthi 25 of the 14th indiction with *rhope* sol. 200 less car. 1,200
 Total paid to the most glorious Anastasius, cashier, in accordance with assignments which are in the possession of the *pronoetes*:
 sol. 400 less car. 2,212, (the carats being converted) to sol. $92 \frac{1}{8}$, the total clear being $307 \frac{1}{2} \frac{1}{8}$, remainder sol. $172 \frac{3}{8}$.
 280 Of which were paid to the same Anastasius, cashier, on the 30th of the month of Mesore of the 14th indiction with *rhope* sol. 230 less car. 1,375 $\frac{1}{2} \frac{1}{4}$, (the carats being converted) to sol. $57 \frac{1}{24} \frac{1}{48} \frac{1}{96}$, the total clear being sol. $172 \frac{3}{8}$.
 The account is balanced.'
 'There were booked to Apollos and Isaiah and partners from 'Tarusebt after the completion of the account because of their leaving the holding and going . . . to the Great Desert in respect of the sol. 4 conceded to them out of sol. 6 (payable) in respect of grounds(?) of Eros for the 10th indiction, (because?) these were no longer conceded for the 11th and 12th indictions, but in the 13th and subsequent indictions, sol. 8 as follows: in respect first of the 13th indiction sol. 4, and in respect of the 14th indiction sol. 4; total: the aforesaid sol. 8, which are being carried over in respect of surplus of the accounts of the 2 *epinemeseis* into the account of the 15th indiction.'

1-14 From the list of holdings making bricks (151-3) we can see which settlements were concerned in this roll. Only the first, Apele, is not fully represented in the first half of the roll, the part relating to receipts. It is therefore clear that col. i and the greater part of col. ii, lines 1-34, record receipts from that place. Each column of receipts has its own total and the sum total of receipts is given at the foot of col. vi, lines 141-2, so that we can calculate, see below, that nothing is likely to have preceded the surviving col. i. It appears therefore that the first five or six lines of col. i were occupied by a general heading in lines which were too short to have left any remains, which will have been on the pattern of VI 999, the beginning of a detailed account for AD 616/17 addressed to Flavius Apion III by the *pronoetes* of an area including four named settlements and ἀλλ(ων) ἐξωτικ(ων) τόπων, see also XVI 2019 and XVIII 2204. To judge from these, which seem to be of exactly the same type as 3804, there will not have been a separate subheading for Apele like those for the other settlements comprised in the steward's area, cf. 35, 56, 62 etc. Similar headings to more summary versions of stewards' accounts are XIX 2243(a) 86-8 and XVIII 2196 1-6. There is an additional interest in 2196 because it was submitted to members of the Apion family by the same steward whose work contract for AD 583/4 has survived as I 136, see J. Gascou, *CE* 47 (1972) 245 and n. 1, which implies that in 2196 4 we should read διακ(όνου) in place of διο[ι]κ(ητοῦ), cf. LII p. xvii. This must be correct and the remains permit this interpretation, though they are too damaged to allow it to be printed without dots.

The calculation which enables us to conclude that this was the first column can be made roughly, ignoring the fractions for convenience. We can easily add up the whole numbers of solidi surviving in i 1-12 to a total of 63. The grand total of receipts, ignoring fractions again, is 647 (line 142); the totals of the complete columns ii-vi, less fractions, are 130 (line 40), 131 (line 67), 108 (line 94), 72 (line 121), and, by calculation for col. vi, which does not have an individual total expressed, 104 (lines 122-40). Together these column totals reach 545, short of the grand total of 647 by 102. Since the surviving ends of twelve lines of col. i show 63 of them, the remaining lines of col. i, probably about six, would have been enough to complete the total of 102 without postulating a yet earlier column. The average of cols. ii-vi is c.111.

We may add that the blank papyrus above the surviving ends of col. i shows that the nature of the

text was different there and suits the hypothesis that it contained a general heading in the same form as VI 999.

23 Ψαλεπήβε (or Ψυλ-?) is not known from elsewhere. Cf. Παπηήβε BGU IV 1082.3.

28 Θέωνος. Cf. 17, but αὐτῶν suggests that Theon is a mistake for Theodorus, as in 27.

30 συντέλ(είας) κεφαλ(ῆς). Cf. Hardy, 52, but I can find no satisfactory treatment of its nature. Greek-Latin glossaries twice equate συντέλεια with tributum (CGL iii 465.57, 481.52), so that the phrase may be a translation of tributum capitis. Cf. perhaps L 3584 6-7 (τέλεσμα ὑπὲρ . . . κεφαλῆς) and 7 n. The main question is whether it was a true poll-tax or a property tax like the fourth century capitatio, cf. P. Lond. V 1793 introd. Some Western legal constitutions appear to use tributarius 'to denote a colonus for whose taxes the landlord is liable' (A. H. M. Jones, *Later Roman Empire* ii 799, cf. 1329). Compare the view of J. Gascou, *Travaux et Mémoires* 9 (1985) 1-89, that large proprietors were essentially agents of the state.

31 φόρ(ου) περιστεραιῶνος (= -εῶνος). Cf. Hardy, 118. The construction of a dovecote needed capital, which was invested by the landlord and brought its income in the form of rent.

34 ἀμπελοურ(γών). On vineyards and the production of wine on the estate see Hardy, 118-22.

ἀποτάκ(του) χωρ(ίων). The nature of this 'fixed rent on lands' is unknown to me. The term χωρίον is highly ambiguous, see M. Drew-Bear, *Le Nome Hermopolite*, 42. Here χωρία ἀμπελικά, 'vineyards', cf. M. Schnebel, *Landwirtschaft* 242, must be included, if not exclusively meant. See too XVI 1915 6, where vines are mentioned again.

35 ἐποικ(ίου) Πακιάκ. Cf. 36, 145, 152, 213, 226. The place-name is new, though it occurred in 1911 79, where the damaged remains were misread as Παρ[.]ακ.

On the nature of an epocium, a gated enclosure with farm buildings and dwellings, see M. Lewuillon-Blume, *Actes XV^e Congrès* iv (Pap. Brux. 19) 177-85, esp. 178-9, cf. P. Turner 44 (a duplicate of the text discussed there, P. Thead. 17); M. Drew-Bear, *Le Nome Hermopolite*, 41-2.

40 The total cannot be checked because of damage to figures in lines 19, 24, and 25.

46 φόρ(ου) φοινίκ(ων). Cf. Hardy, 116.

48 ἐποικ(ίου) Κτε[ε]ῶνος. Cf. P. Pruneti, *I centri abitati*, 85, where, however, the reading Κτεῶνος is accepted for PSI III 165.4, originally read Κτεῶνος, in deference to a remark in XVI 1911 72-5 n. In this roll the readings are clear (48, 146, 152, 155, cf. 3805 16) and the photographs of 1911 74, 79, 82 give no strong reason to doubt Κτεῶνος in those places too. Presumably an ivy thicket (κτεῶνος) was a feature of the place when it got its name, cf. places called Ἀκανθῶνος (134 n.), named after acacia groves, and the ἐποίκιον Κναμῶνος (Pruneti, op. cit., 92), named after a bean patch; cf. L. R. Palmer, *Grammar of the Post Ptolemaic Papyri*, 120-1.

56 ἐποικ(ίου) Τριγῆου. Cf. P. Pruneti, *I centri abitati*, 208. In XIX 2243(a) the spelling is consistently the phonetically equivalent Τριγῆου (76, 80, 82, 83, 85). This allows the guess that the name means the place of the three γύαι. The meaning of γύης is still in doubt, but it indicates some drainage feature such as an embankment or ditch, see LI 3638 12 n.

It should be noted that there remains some doubt whether Τριγῆου and Τριγῆου are the same, because 2243(a) is the account of a stewardship comprising four localities, Trigyu, Notinu, Polemonis, and Pesta, see e.g. lines 76-8, 80. That roll covers the ninth indiction of AD 590/1. Consequently, it is not clear whether by that year Trigyu had been moved from one stewardship to another or whether there were two places with phonetically identical names. I have taken them provisionally to be the same, on the argument that three other places, Notines Paroriu, Sophrosynes, and Lithines, occur in both 2243(a) and 3804.

57 φρ(οντιστοῦ). Cf. Hardy, 133, where it is concluded that the title was applied to inhabitants of εφοεῖα with some position of authority or seniority.

62 ἐποικ(ίου) Λουκίου. Cf. P. Pruneti, *I centri abitati*, 98. It is probably to be distinguished from Λευκίου, first a κόμη, later perhaps a χωρίον (Pruneti, op. cit., 95), which was in the Western toparchy and later in the third pagus, since Λουκίου is likely to have been near Iseum Panga in the Upper toparchy, see introd. The reading ξ[π]οικ(ίου) Α[ε]υκ[ε]ῖ[ο]υ in XVIII 2197 86 is obviously unreliable, even though Λευκίου is mentioned in lines 76 and 81. If ξ[π]οικ(ίου) is correct, Α[ε]υκ[ε]ῖ[ο]υ is more likely, but the reading is highly uncertain.

65 Κονκόν. Cf. 200 = 1911 113 ἐδάφ(ου) Κονκόν.

66 'The same holding' probably means Luciu (63) rather than Concon (65).

67 The column total is correct.

72 Ἀβρααμίου Ἰωσήφ Πανῆτος. It is not clear how we should interpret the succession of three names,

cf. 82. For the translation I have taken them as son, father, and grandfather, but Joseph may be an alias, in which case it is not clear whether it is an alias of the son Abraham or of the father Paues, cf. P. Rainer Cent. 123, where Ἀνοῦπ Παμουθίου Ἀμμωνιανού (8) reappears as Ἀνοῦπ Ἀμμωνιανού (22).

76 The name Οὐερῆτε is new even if the doubtful tau is wrong.

77 φόρ(ου) ἐλαιουργί(ου). Cf. Hardy, 130-1. However, ἐλαιουργεῖον probably refers to an oil-factory with all the fittings rather than simply to an oil-press, see 264 where the μυλαῖον is the machinery to produce the oil and belongs to the ἐλαιουργεῖον, cf. LI 3639 10 n.

79 . . . ρε. Probably a name, producing another succession of three names, cf. 72 and n., 82, 90.

81 Ὀρκεντίου, cf. 212. So far this name has been found only in P. Wash. Univ. 20.3 (IV) and LII 3689 2, 24 (AD 226), but see 212 n. I have given it a rough breathing, because it may be a theophoric name referring to Horus. The deacon is probably Pamuthius, but see 212 n.

82 Cf. 90, 72 n., 79 and n.

84 Ἀπελή. The spelling throughout this roll is consistently with one lambda. It also appears with two, see P. Pruneti, *I centri abitati*, 32.

85-6 Pecty, once in the Upper toparchy and later in the first pagus, is known to have been close to Iseum Panga, see introd., P. Pruneti, *I centri abitati*, 141-2. In X 1312 Πεκτυεύτου should be divided Πεκτύ εὔτου (= αὐτοῦ), see XLIX p. xvii.

90 Cf. 82, 72 n., 79 and n.

92 ἰδία γῆς. Cf. VI 999 (descr.), XVI 1912 87, 2037 10, 30, 32 and introduction. Why these persons should pay the Apions in respect of their own land is not known. It is rare, of course, to find references in the Apion papers to lands other than theirs; add 1913 4 ἰδίων κτημάτων. It may be relevant to mention again the view of J. Gascou, *Travaux et Mémoires* 9 (1985) 1-89, that these landowners were representatives of the state, particularly in the matter of tax collecting.

93 φόρ(ου) προβάτων. This seems to be new for the Apion estate, cf. Hardy 117, 119, A. C. Johnson, L. C. West, *Byzantine Egypt* 207. The term was first applied to the rent on flocks leased out by the state, but it is also used in connexion with flocks belonging to Antonius Philoxenus, owner of estates in the Arsinoite nome, and to his successors, c.A.D. 255-305, see J. Schwartz, *Rech. Pap.* 3 (1964) 49-96, esp. 52, S. L. Wallace, *Taxation* 79-81. The Apion family may have used the same system.

94 The column total is correct.

96 ἐκτάκ(των) τρύγης. Cf. 104. A good idea of the nature of these supplementary rents in kind, figs, dates, etc., is given by XIV 1631 22-5. They were due on the fruit trees and other plants that were cultivated in association with the vines, see M. Schnebel, *Landwirtschaft*, 253-4. In 1911 33 ὑπὲρ ἐκτάκ(της) τρύγης should be corrected to ὑπὲρ ἐκτάκ(των) τρύγης.

98 Ζωφροσύνης. See P. Pruneti, *I centri abitati*, 187. It occurs in XIX 2243(a) 32 under the heading ἐν τῇ Νοτίῃ Παρορίῳ (read -ω), along with Λιθίνης, see 241 n., Πεκτύ, see 85-6 n., and Παγγύλεως, known to have been in the first pagus, like Pecty, see Pruneti, op. cit., 129.

100 δικαίου Θεοδούλου. Similar combinations of δικαίου with a personal name occur also in 102, 127, 128, 129, 139, 140, 203. Hardy, 101, takes it that the persons were former owners whose property was still kept distinct inside the Apion accounts, cf. 127 n.

102 = 1911 31, except that 1911 31 does not have δικαίου Διογένους.

ἐποικ(ίου) Ταρουέβτ. Cf. P. Pruneti, *I centri abitati*, 199.

103 = 1911 32.

Ἀλεκά, cf. 110. It is a new name in this form, but cf. perhaps Ἀλέκα (fcm.), SB I 5962 = III 6841.

καὶ Παμουθίου is confirmed by the photographs of 1911.

104 = 1911 33.

109 = 1911 38.

113 = 1911 42, from which point the text of 1911 runs continuously.

114 = 1911 43, where ἀπ[ὸ] Α[ρ]γκίου can now be restored.

118 = 1911 47, where too δι(ὰ) is to be read in place of the second καί.

120 = 1911 49.

Φηλαγβέλ. Cf. 199 (same reading), 1911 49 (Φυλτααβέλ), 109 (Φηλαγβέλ). The letter before -βέλ is doubtful in every case, but nu seems best. Upsilon is the phonetic equivalent of eta. It is not clear from the photo whether the tau is really omitted in 1911 109.

The amount in 1911 49 should be corrected from γ L to γ L d.

121 The column total is correct.

126 = 1911 53-4, where there is a slightly different phrasing, ς μὲν [κα]λουμέ(νων) ν[ο]τ(ώνων), τῶ]γ δὲ ς (ἀρουρῶν) καλουμέ(νων) βορ(ώνων). This has been confirmed from the photographs.

127 = 1911 55, which can now be restored as ἐποικ(ίου) Κ[ο]στ[υ]λέξ[ου] δικαίου τῶν νιῶ]γ τοῦ ἐπικρόπ(ου). Two sons of the bishop are named in 164 and 166 (= 1911 92, 94) as Apollon and Phoebammon, and these are evidently the same persons as those in 128-9 (δικαίου Ἀπολλῶ, δικαίου Φοιβάμμωνος). According to Hardy, 141-2, these are previous owners of the property, who left it burdened with the obligations to the shrine of the martyr St Serenus (164-7). The unnamed bishop need not necessarily be a former bishop of Oxyrhynchus, see the plethora of bishops in P. Landlisten, with the commentary of G. H. R. Horsley, *New Documents Illustrating Early Christianity* No. 3 (for 1978) 156-7.

128-34 = 1911 56-62, not transcribed but simply noted as '7 incomplete lines'. The photographs of 1911 show that the lines, though badly damaged, were substantially in the same terms, although there is one difference in the order of the entries: 1911 60 = 3804 133, 1911 61 = 3804 132.

129 φρ(οντιστοῦ). Cf. 57 n.

132 Μεγάλου Γρηδίου. Cf. XVIII 2195 37, 174 (where also capital letters are needed).

133 Σμαράγδου νοταρ(ίου). Cf. 170 = 1911 97. Presumably 1911 60 has the same text, but the photographs of the damaged remains are not clear enough to confirm it.

134 ἐδάφ(ου) Ἀκανθώνος. There was a place of this name with a port in the Oxyrhynchite nome, see P. Pruneti, *I centri abitati*, 25, but probably there is no allusion to it here. More likely to be the same is the μηχανή καλουμένη Ἀκανθώνος of I 202 (descr.). Other places with similar names are referred to in A. Calderini, *Dizionario dei nomi geografici* I i, 41-2. M. Drew-Bear, *Le Nome Hermopolite*, 54, rejects it from Hermopolite toponymy. Cf. 48 n.

135 = 1911 63, where we can now restore ὑπὲρ ἐδάφ(ου) τῶν ἀμπελουρ(γῶν). Only the oblique mark of abbreviation remains.

136 = 1911 64, where now restore Ἐρωτος καὶ Ἀμάτου. The photographs suggest that there was further damage after the editors read the line.

139-40 There is no heading equivalent to 139 in 1911, but 140 = 1911 67.

141-2 = 1911 68-9. For the significance of the close resemblance between the figures, here for a fourteenth indiction, there for a fifth indiction, see introduction.

No column total is given either here or at this point in 1911, but instead we have a sum total of receipts, virtually identical in each case. One small difference is that 1911 68 adds ἀλλ(αι), having καὶ ἀλλ(αι) κ(αγκέλλω) (ἀρτ.) κς where 142 has simply καὶ κ(αγκέλλω) κτλ. The only other difference is also small, but puzzling, namely that in 141-2 the sums of cancellus artabas clearly have χο(ν.) α in both places, where 1911 68-9 have been reported as having χο(ν.) ζ and χο(ν.) ζ. The note there says that the figure is doubtful in 68 but confirmed by 69. The photographs are not clear enough to check. Since alpha is clear in both places here, it seems likely that the editors misread 1911. This is even more strongly suggested by the fact that where the sum total should appear again in 1911 207 χο(ν.) α is the reading offered. Again the photographs of 1911 are not clear enough to check satisfactorily.

The calculations should allow us to reach a conclusion, but they do not produce an easy result:

	art. 1312	$\frac{1}{4}$		choen. 5	
+ 10%	131	$\frac{1}{5}$	$\frac{1}{10}$	$\frac{1}{2}$	
+ 5%	65	$\frac{1}{2}$	$\frac{1}{10}$	$\frac{1}{80}$	$\frac{1}{4}$
	canc. art. 1508	$\frac{1}{2}$	$\frac{1}{4}$	$\frac{1}{5}$	$\frac{1}{10}$
		$\frac{1}{10}$	$\frac{1}{40}$	$\frac{1}{80}$	choen. 5 $\frac{3}{4}$

The fractions added:

$$\frac{40 + 20 + 16 + 8 + 2 + 1}{80} = \frac{87}{80} = 1 \frac{7}{80}$$

Total canc. art. 1509 $\frac{7}{80}$ choen. 5 $\frac{3}{4}$

From other passages, see below, we know that in this context there were the usual forty choenices to the cancellus artaba, so that canc. art. $\frac{7}{80}$ = choen. 3 $\frac{1}{2}$, the correct full total being canc. art. 1509 choen. 9 $\frac{1}{2}$. It would be understandable if this had been rounded up to art. 1509 choen. 10, i.e. canc. art. 1509 $\frac{1}{2}$, but the extra single choenix is a surprise. However, χο(ν.) α is closer to the true total than χο(ν.) ζ, as well as being certainly read.

The passages which show clearly that in this account the cancellus artaba had forty choenices are 173, 177, and 181, viz.

- (1) In 173 art. 14 + 15% = canc. art. 16 choen. 4, i.e. canc. art. 14 + 1.4 (10%) + .7 (5%) = canc. art. 16.1; therefore art. .1 = choen. 4, and art. 1 = choen. 40.
- (2) In 177 art. 14 $\frac{1}{2}$ + 15% = canc. art. 16 $\frac{1}{2}$ choen. 7, i.e. art. 14.5 + 1.45 (10%) + .725 (5%) = canc. art. 16.675; therefore canc. art. .175 = choen. 7, and canc. art. 1 = choen. 40.
- (3) In 181 art. 37 = canc. art. 42 $\frac{1}{2}$ choen. 2, i.e. art. 37 + 3.7 (10%) + 1.85 (5%) = canc. art. 42.55; therefore canc. art. .05 = choen. 2, and canc. art. 1 = choen. 40.

In 180 there is a slightly more complicated case. Art. 7 $\frac{1}{2}$ choen. 2 is converted into, by cancellus measure, art. 8 $\frac{1}{2}$ choen. 7. The calculation in decimal terms would have been art. 7.5 + .75 (10%) + .375 (5%), choen. 2 + .2 (10%) + .1 (5%) = canc. art. 8.625 choen. 2.3 = canc. art. 8 $\frac{1}{2}$ $\frac{1}{8}$ choen. 2.3 = canc. art. 8 $\frac{1}{2}$ choen. 7 $\frac{3}{8}$. The rounding down to choen. 7 is what we might expect.

For this last calculation a superficially more satisfactory result could be achieved if we adopted one element of the theory that the choenix was a unit of fixed size from which artabas of various sizes and nomenclatures could be made up, see esp. R. P. Duncan-Jones, *Chiron* 9 (1979) 347-75. According to pp. 354-5 the 'metron artaba' had 46 choenices, the 'cancellus artaba' the usual 40 choenices. Applying this formula to the conversion of art. 7 $\frac{1}{2}$ choen. 2 into canc. art. 8 $\frac{1}{2}$ choen. 7 we produce the following calculation:

$$\text{choen. } 345 \left(7 \frac{1}{2} \times 46\right) + 2 = 347 \div 40 = \text{canc. art. } 8 \text{ choen. } 27, \text{ i.e. } \text{canc. art. } 8 \frac{1}{2} \text{ choen. } 7.$$

In spite of this I remain, like J. C. Shelton, reluctant to accept the theory. I cannot follow Shelton when he says (*ZPE* 24 (1977) 59; 42 (1981) 104) that the conversion in 1911 101-2 (= 3804 173, see above) proves that both artabas had 40 choenices. One may reach a perfectly satisfactory calculation on the hypothesis of artabas of 46 and 40 choenices:

$$\text{choen. } 644 \left(14 \times 46\right) \div 40 = \text{canc. art. } 16 \text{ choen. } 4.$$

Nevertheless, our present problem is not helped by that hypothesis:

$$\begin{array}{r} \text{art. } 1312 \times 46 = \text{choen. } 60352 \\ \text{art. } \frac{1}{4} \times 46 = \text{choen. } 11 \frac{1}{2} \\ \hline \qquad \qquad \qquad + \text{choen. } 5 \end{array}$$

$$\begin{array}{r} \text{total} \qquad \qquad \text{choen. } 60368 \frac{1}{2} \div 40 \\ \qquad \qquad \qquad = \text{canc. art. } 1509 \text{ choen. } 8 \frac{1}{2}. \end{array}$$

This answer falls even further short of the given total of canc. art. 1509 $\frac{1}{4}$ choen. 1.

The glimmerings of an explanation seem to emerge from consideration of the mathematical methods of the clerks in reckoning percentages (ἐκατοστῶν) of artabas. G. Rosenberger, *APF* 12 (1937) 70-3 shows by examples that they used normal methods for whole hundreds and 50, i.e. 1 per cent of 100 is 1, 1 per cent of 50 is $\frac{1}{2}$, but that for numbers below 50 they used $\frac{1}{100}$ as an approximation for $\frac{1}{100}$ wherever it was more convenient. This is more natural than it may seem at first sight, because $\frac{1}{100}$ is the lowest fraction of those normally used for the division of the artaba ($\frac{1}{2}$, $\frac{1}{3}$, $\frac{1}{4}$, $\frac{1}{5}$, $\frac{1}{6}$, $\frac{1}{7}$, $\frac{1}{8}$, $\frac{1}{9}$, $\frac{1}{10}$, $\frac{1}{12}$, $\frac{1}{15}$, $\frac{1}{16}$, $\frac{1}{18}$, $\frac{1}{20}$, cf. *W. Gdz.* p. lxix). They also rounded out or neglected small fractions when convenient. This means, unfortunately, that we cannot always say what exactly their procedure was, although no doubt they had conventions and habits, if not rules.

In our case, if we use $\frac{1}{100}$ instead of $\frac{1}{100}$ for the element consisting of 12 artabas, we find ourselves in the right area, although the full calculation then brings us up to a still higher total of canc. art. 1509 $\frac{1}{4}$ choen. 2 $\frac{1}{4}$, see below. I have assumed that the clerk, if he had decided to carry through his calculation in full, would have used the ordinary $\frac{1}{100}$ for the elements of art. $\frac{1}{4}$ and choen. 5, because it is more convenient than $\frac{1}{80}$:

$$\begin{array}{r} \text{art. } 1312 \frac{1}{4} = 1300 + 12 + \frac{1}{4} \text{ choen. } 5 \\ + 15\% \quad \left[= \left(\frac{15}{100} \times \frac{1300}{1}\right) + \left(\frac{15}{100} \times \frac{12}{1}\right) + \left(\frac{15}{100} \times \frac{1}{4}\right) \right] \quad \left(\frac{15}{100} \times \frac{1}{4}\right) \\ = 195 + 1 \frac{7}{8} + \frac{3}{80} \quad \frac{3}{4} \\ \hline \left[\begin{array}{r} 1495 + 13 \frac{7}{8} + \frac{23}{80} \\ = 1509 \frac{13}{80} \end{array} \right] \quad \begin{array}{r} 5 \frac{3}{4} \\ 5 \frac{3}{4} \end{array} \end{array}$$

Since we know that the 'cancellus artaba' has 40 choenices, see above, we can continue:

$$\begin{aligned} &= \text{canc. art. } 1509 \text{ choen. } 6 \frac{1}{4} + \text{choen. } 5 \frac{3}{4} \\ &= \text{canc. art. } 1509 \frac{1}{4} \text{ choen. } 2 \frac{3}{4} \end{aligned}$$

This seems near enough to the given total to allow us to accept provisionally that the clerk may have used this basic procedure with some neglect or rounding out of small fractions. For example, being aware that he had used too large a fraction for the element of 12 artabas, he might have avoided exact calculations of percentages for art. $\frac{1}{4}$ and choen. 5, but simply taken 115 per cent as being 'somewhat over' art. $\frac{1}{4}$ and 'somewhat over' choen. 5. He might then have reached art. $1495 + 13 \frac{3}{8} + \frac{1}{4}(+) \text{ choen. } 5(+)$ = art. 1509 $\frac{3}{8}(+) \text{ choen. } 5(+)$ = art. 1509 $\frac{1}{4}(+) \text{ choen. } 0(+)$ and gone on to reckon the plus values roughly at one additional choenix.

If this is somewhere near the truth, it may help to explain what is meant by the conversion of the wheat total. It is clear now, for example, that it is not the result of a new measurement of one particular quantity of grain by a different measure, cf. Shelton, *ZPE* 24 (1977) 59, if the figures in **1911** and **3804** are the same, as I argue above. Where *ἐκατοστὰί* appear in the papyri they are usually connected with taxes or levies, as surcharges on grain paid to the state, for instance, cf. P. Cair. Isid. 47 introd. (p. 214), or as deductions from payments made by the state for requisitioned goods, such as military clothing, cf. R. Rémondon, *Rev. phil.* 32 (1958) 244-60. In this case the grain is part of what J. Gascou has seen as a combined rent and tax, a 'rente-impôt', see *Travaux et Mémoires* 9 (1985) 60 for a summary, paid to the Apion household as the agent of the state. In that sense these percentages are to be compared with the earlier percentages on grain taxes to the state. It also seems to me very possible that they are to be connected with a clause of the surviving work contract of a steward with the Apion estate, I **136** 27-9, *προσομολογῶ δὲ λημματίαι τῇ ὑμῶν ὑπερφύειᾳ ὑπὲρ παραμυθείας τοῦ παραλημπτικοῦ μέτρον τῶν ἀρταβῶν ἑκατὸν ἀρτάβας δεκαπέντε*, 'I further agree to credit to Your Excellency's account by way of premium fifteen artabas for every hundred artabas of the measure used for receipts'. This connection was first considered in A. C. Johnson, L. C. West, *Byzantine Egypt: Econ. Studies* 60-1, but rejected for reasons which I cannot understand well enough to discuss. To me the analogy with the earlier period seems close. Then the grain taxes were expressed as a theoretical amount, but at the point of delivery the taxpayer had to pay surcharges. So on the Apion estate the schedule (*ἀπαιτήσιμον* I **136** 17), according to which the steward made his collection from the tenant farmers and which must have been similar in all essentials to the receipts section of this roll, had one amount, but the steward exacted a higher amount and delivered an extra fifteen per cent to the estate account. If this is right, the artaba remains the same throughout, while *μέτρον* and *καγκέλλω* are accounting terms only, the former implying 'exclusive of surcharges', the latter 'inclusive of surcharges'. This interpretation also offers the possibility of explaining the different proportions which seem to be attested between the 'metron artaba' and the 'cancellus artaba' (*Chiron* 9 (1979) 355) as reflecting different rates of surcharge, as in the earlier period, cf. P. Cair. Isid. p. 214.

However, this is advanced as an explanation valid for this sort of context only. It is clear from the latest reference to a cancellus measure and from the earliest that the name was based upon physical facts. The latest reference is in an early eighth century Arab governor's order to a local official in which it is laid down that the collectors of grain taxes are not to use the (*μέτρον*) *δημόσιον*—the German translation uses the Greek word—but the 'Qanqalmass', and that the official should have a 'Normal-Qanqalmass', a regulation cancellus measure, by which to check the grain delivered by the collectors, see P. Heid. III (Veröffentlichungen aus d. Heidelberger Papyrus-Sammlung III: Papyri Schott-Reinhardt I ed. C. H. Becker 1906) No. III 40-8 (p. 73). The German spelling 'Qanqalmass' depends on the theory put forward in P. Heid. III pp. 31-2 that the term is of Persian origin, which still receives lip service (*Chiron* 9 (1979) 354) in spite of the fact that the first undoubted occurrence is of AD 44, a date remote from any likely Persian influence, see XII **1447** 4. Grenfell and Hunt in their note there convincingly suggested a similar interpretation of a document of AD 15, P. Lond. II 256a (p. 99; Facsimiles ii 9) = W. Chr. 443 = S. Daris, *Documenti per la storia dell'esercito* No. 67. This is a receipt for a cargo of wheat to be shipped from the Arsinoite nome to Alexandria. Kenyon's reading of a term applied to the measure, correct in my opinion, was (*μέτρον*) *καγκερλοτω*. Wilcken eventually (1912: *Chr.* 443) printed *χαλκειλοτω*, attributing the interpretation of it as *χαλκηλάτω*, 'of beaten bronze', to Grenfell and Hunt. Their later (1916) note to **1447** 4 avoided giving a reading, but suggested that the word was *καγκέλλω* and that the following two letters, *τω*, should be bracketed as being superfluous. My variant of this would be to interpret *καγκερλοτω* as a phonetic spelling of *καγκέλλωτω*. For the various phonetic factors see F. T. Gignac, *Grammar* i 168

(unassimilated nasal), 102-7 (interchange of liquids), 276-7 (omicron for omega). This adjective has appeared once in the papyri, P. Ryl. II 233.3-5 *ἡ διαβάθρα καγγελλωτή καὶ τὰ προσκήνια γενήσεται ἅμα [καὶ] τῶι καγγέλλωι τοῦ μεικροῦ συμποσίου*. The meaning is by no means perfectly clear, cf. G. Husson, *OIKIA* 313, but we might imagine rails or balustrades or lattices. In P. Lond. II 256a it would mean 'fitted with a grid', see below. The passage runs:

10 πυροῦ πρώτου Συρι-
 ακοῦ] καθαλοῦ (= καθαροῦ) ἀδρόλου ἀκρίθου κεκοσκ[ι]νευμένου μέ-
 τρω δ]ημοσίω καγκερλοτῶ (= καγκέλλωτῶ) τῶ ἀνενηνεγμένω ὑπ[ι]ε-
 μοῦ ἀ]πὸ Ἀλεξανδρέας {πρώτου Συριακοῦ} ἀρτάβα[ς κτλ.

'... (so many) artabas of first quality(?) Syrian wheat, pure, unadulterated, free from barley, sieved, by the public measure fitted with a grid which has been brought up by me(?) from Alexandria'.

Whatever doubt or dispute there may be about the details it is fairly clear that a cancellus measure was in use by AD 15 and was an officially designated measure. Note that it was *δημόσιον*, whereas 'public' and 'cancellus' are contrasted in the Arabic text of the eighth century AD.

It remains to suggest that the Latin name of the measure is descriptive of extant Roman grain measures with internal fittings, see F. Haverfield, *Archaeologia Aeliana* 13 (1916) 84-102, esp. 91 figs. 4-5, 96 fig. 9, 102 fig. 12. These bronze measures, of which there are three clear examples of different sizes, are either cylinders or truncated cones open at the narrower end. From the centre of the circular base rises a perpendicular rod or pillar. Attached to the top of the rod and to three equidistant points on the circular rim is a horizontal bronze frame of three arms radiating from the centre to the rim. The top of the container, therefore, is a grid resembling a wheel with three spokes. It is suggested that the grid helped to define a consistent level measure and to prevent the grain being packed down unfairly, while the vertical rod helped to maintain the correct relationship between the top and the bottom of the measure, cf. F. G. Skinner, *Weights and Measures* 69-72.

A similar gridded mouth is found on an earthenware grain measure from the Athenian Agora, see O. Broneer, *Hesperia* 7 (1938) 222-4, esp. 222 fig. 57, cf. Skinner, op. cit. 61. This measure lacks the vertical bar, presumably because earthenware cannot be distorted like bronze. It dates from the fifth century BC, before c.425 BC, see Broneer, op. cit. 212, 224. The grid, therefore, is not a Roman device, a fact which may tell against the identification suggested here. I would argue that it may have been introduced to Egypt by Roman officials. I know of nothing similar from Egypt at any period. I suggest that it was encountered particularly (not exclusively, cf. e.g. P. Sorb. I 60.14, I **133** 17) in official contexts in connection with grain taxes and levies which attracted surcharges, and that in that way its name came to be used as an accounting term meaning 'inclusive of surcharges'.

143 = **1911** 70. Unfortunately the photographs of **1911** col. iv are too faint to check the damaged remains satisfactorily, but it probably had some version of *ἀνηλώθη* where *ἀναλ(ωμάτων)* was read.

Θεοδώρου. Since **3804** is later, probably nine years later, than **1911**, the name need not have been the same there, but it may have been. He was the *pronoetes* of this area of the Apion estate, as we can see by comparison with VI **999** and XVI **2019**, which contain the headings of accounts similar to this one and are addressed to members of the Apion family by *pronoetae*, and this is confirmed by 225 *Θεοδώρου προ(νοητοῦ) Ἀπελή*. Apele stood first in this account, see 1-14 n. There are several references to persons with the title of *pronoetes* and the same name in the indexes to P. Oxy. XVI p. 290 (add **1916** 33), but there is no indication that any of them is the same as this one.

144 = **1911** 71. Instead of *καὶ ἀπρῶε* 25-30 letters', we should presumably read *κατὰ τὸ ἔθος* (vac.), see **1911** 71 n., cf. below 154 n. The photographs are faint. At the end of the line there the papyrus is broken fairly close to *νο(μ.) δ*. There may be slight remains of the beginning of what should have followed, namely *δ π(αρὰ κεράτια) δ λ οὔτως*.

145-8 = **1911** 72-5, but the order of the items is quite different, and it is clear that two of the names, with all the letters dotted, are wrongly read, while a third was left unread. In addition, the account here is correct, while the figures in **1911** are not satisfactory. Unfortunately the photographs again provide no help. Since these are customary annual donations, we may assume that **1911** had the same items and figures in a different order. For *Ἐρρονθήρον* (72), *Ἄντῆ* (73), and *...ον* (74), we must substitute *Ἰκίου Παγγῶ*, *Πακιάκ*, and *Λουκίου*.

The expenses section of all known accounts of this kind begins with customary donations to churches, see Hardy, 140 and n. 9; add XVIII **2195** 84-8, XIX **2243**(a) 75-8.

148 All the churches except that of Iseum Panga were attached to places concerned in this account. Probably it was the chief church of the area, see introduction. We may compare the payments to the church of St Michael the Archangel in three similar accounts concerned with different areas, XVI 1912 119, XVIII 2195 88, XIX 2243(a) 77. That church was probably the one with the same dedication in Oxyrhynchus, see XVIII 2195 84 n., referring to XI 1357 8.

149-50 At the corresponding point, 1911 76-7, we find the note '2 much effaced lines beginning Κυριακῶ'. Hardy, 53 n. 1, has pointed out that this is the boatman mentioned in XVI 1913 61, so that 1911 76-7 will have contained an entry of the same type as 1912 120, 1913 61-2, and 149-50 here.

149 τοῖς κληρονόμοις Μηνά ναύτου ἀπὸ Κόμα. Cf. Hardy, 78-9. Hardy plausibly links Asclas ναύτης from Coma (I 142 1, 11, 13; AD 534), Menas son of Asclas ναύτης (XVI 1916 39; sixth cent.), Menas ναύκληρος ἀπὸ Κόμα (= Κόμα; XVI 1998 2, 5, 8; sixth cent.), and heirs of Menas son of Asclas ναύκληρος (I 133 15-16; AD 550; Ὁσκαλάτος ed. pr.). See also J. Gascou, CE 47 (1972) 244 n. 2, who adds references to Asclas in VII 1071, XVI 1929, 2032 72.

The place is probably the well-attested Heracleopolite village, see A. Calderini, *Dizionario dei nomi geografici* III ii, 137, cf. P. Pruneti, *I centri abitati*, 88. There seems to be no good reason to think that there was a place of the same name in the Oxyrhynchite nome. Coma is mentioned frequently along with Heracleopolis in the Apion wine account XXVII 2480.

150 ναύλ(ου) Ἀλεξ(ανδρείας). Cf. A. C. Johnson, L. C. West, *Byzantine Egypt*, 159.

On the conversion from the Alexandrian standard to the private standard see L. C. West, A. C. Johnson, *Currency*, 140-56, esp. 144. The complications are still to be satisfactorily explained, cf. 3805 7-8 n.

151-3 = 1911 78-80. The order is the same and the figures which are read without dots in 1911 are also the same, so that it is likely that the numbers of bricks and the payment for them were fixed over the period of the two accounts. Again the photographs do not allow me to correct the readings for certain, but it seems obvious that we should read a version of πλινθευταῖς πλινθεύουσιν (cf. XVIII 2195 91; or πλινθεύασι, cf. below 213 ποταμ(ίταις) ἀνορύξαι, 235 πρίσταις πρίσαι) in 78, Πακιάκ for Παγ[.]ακ, and Κισσώνος for Κισσώνου in 79.

On brickmaking by estates see Hardy, 122-3; add XVIII 2195 91-4, 190-1, 2206 8, 10, and especially 2197 1-22; also XIX 2243(a) 79.

151 οἰκοδόμ(ου). Cf. 215 τῷ οἰκοδόμ(ω). Read οἰκοδόμ(ου) also, instead of οἰκοδομ(ῆς) or οἰκοδόμ(ων), in XVIII 2195 92, 191, XIX 2243(a) 79.

154 = 1911 81. No doubt 'καὶ ἄπο and some letters much effaced' will represent κατὰ τὸ ἔθος κτλ. as here, see 1911 81 n., cf. above 144 n.

This ὀψώνιον of 24 art. wheat and 2 sol. less 5 carats (cf. XVI 1910 7, 1912 130, XIX 2243(a) 81) compares strangely with a steward's contract with the Apion estate, I 136 (AD 583). For a year's contract he pays the estate 12 solidi, as well as wheat at the rate of 15 per cent of what he manages to collect (27-31), and receives the customary ὀψώνιον (καὶ δέξασθαι με τὸ ἐμὸν ὀψώνιον κατὰ μίμησιν τοῦ πρὸ ἐμοῦ προνοητοῦ, 31-2). Nothing more is specified. The disparity is large. Probably the real emoluments of the office were the perquisites which the steward could extract from the tenant-farmers, cf. XIX 2239 18-20, where customary payments from tenants are mentioned in the contract of an ἐπικείμενος. See also J. Gascou, *Travaux et Mémoires* 9 (1985) 17-18 and n. 93.

155-6 = 1911 82-4. Since the accounting here is correct, no doubt the figures in 1911 should be corrected to agree. The same total probably stood there. The only credible difference is the reversal of the names of Trigu and Tarusbt in 1911 84.

It is interesting that the areas subject to the *ergodiocatae* were not necessarily limited to one settlement and that they even crossed the boundaries of the area subject to our *pronoetes*, as appears from the fact that Netnēu, Anta, and Nesu Leucadiu do not have sections in this account. Obviously these places were not far away. For Netnēu see 236 n.

157-62 = 1911 85-90. There are various small differences, such as the reversal of grain and money payments in 85 and the addition of αὐτ(οῖς) in 86-7. The photographs are too faint to check thoroughly, but we must presume that the figures were the same. In addition we must accept *Ἐπίου* for *Ἀρίου* in 88. However, the photographs do show that 1911 89 has *Νεκὸλ* where 161 has *Νελόκ*. One must be a clerical error. No reference to either has been located elsewhere.

158 = 1911 86. This concession is for the full amount of the assessment, see 60 above.

159 ὑπὲρ φόρ(ου) γηδίου Φανχόχ. In 1911 87 we seem to have something slightly different, ὁ. φ. ζῆτι[κ]οῦ ἐδάφ(ου) Φ. The ἐδάφος Φανχόχ of XIX 2244 82, 84 is associated with Tampeti in the Middle toparchy and is presumably not connected; cf. 197 n.

161 It is not clear to me exactly what λῆμνη means here. Possibly it was a reservoir needed to irrigate the land which had been spoiled by an accumulation of sand, cf. P. Coll. Youtic II 68.17-22.

162 The marginal entry is in a paler ink and on a smaller scale while the hand is probably the same. It seems that this concession was now to be withdrawn, but the instruction does not affect the total in 168.

163 = 1911 91. For αἰ there read d. The total, νο(μ.) η σ', probably stood in 1911, but it is either faded or broken away.

164-7 = 1911 92-5. Again the photographs of 1911 are too dim to check thoroughly. It seems safe to assume that its figures were the same as are now clear here, and that ἐκ Τοῦ δ(ιδά) in 94 is misread for ἐκ τοῦ ἐδ(άφου).

Hardy, 141-2, took it that the shrine of the martyr St Serenus was in Taruthinu, but now that we have a clear text in which ἐν . . . Ταρουθίνου is paralleled by ἐν . . . Κοτυλαίου it seems that the grain and money were to come from the revenues of these two holdings. There was a church or shrine of St Serenus in Oxyrhynchus, see XI 1357 4 and n., which is perhaps the one meant here.

165 δικαίου . . . Κοτυλαίου. I guess that the lands of Taruthinu and Cotylceiu adjoined and that an area once belonging to the latter had been transferred to the former, retaining the obligations with which it was encumbered, cf. Hardy, 141-2.

168 The total of wheat is correct. The money total is less than what it should be according to my calculation by sol. $\frac{1}{6}$. The calculation is as follows:

(144)	sol. 4 $\frac{1}{2}$	less car.	4 $\frac{1}{2}$ $\frac{1}{4}$
(150)	1 $\frac{1}{2}$ $\frac{1}{24}$ $\frac{1}{96}$		
(151)	4		14
(154)	2		5
(156)	5		17 $\frac{1}{2}$
(157)	$\frac{2}{3}$ $\frac{1}{3}$		
(158)	3		
(159)	1		
(160)	1		
(161)	4 $\frac{1}{48}$ $\frac{1}{96}$		
(163)	8 $\frac{1}{4}$		
(167)	3 $\frac{1}{2}$		

The deducted carats total 41 $\frac{1}{4}$, as specified. Solidi in whole numbers total 36. The fractions can be calculated as follows:

$$\begin{aligned} & \frac{1}{4} + \frac{1}{2} + \frac{1}{24} + \frac{1}{96} + \frac{2}{3} + \frac{1}{3} + \frac{1}{48} + \frac{1}{96} + \frac{1}{6} + \frac{1}{2} \\ = & \frac{24 + 32 + 4 + 1 + 64 + 12 + 2 + 1 + 16 + 48}{96} = \frac{204}{96} \\ = & \text{sol. } 2 \frac{2}{3} (= \frac{1}{3}) \end{aligned}$$

This added to sol. 36 makes the calculated total sol. 38 $\frac{1}{3}$ (= $\frac{1}{3}$). The specified total is 38 $\frac{1}{12}$ $\frac{1}{48}$ $\frac{1}{96}$, i.e. 38 $\frac{11}{96}$, less than the calculated total by $\frac{1}{96}$.

In 1911 99 the total, after the same number of entries, most of them very similar, is wheat art. 173 choen. 4, sol. 37 $\frac{1}{2}$ $\frac{1}{96}$, less car. 41 $\frac{1}{4}$, compared with our wheat art. 291 $\frac{1}{4}$ choen. 1, sol. 38 $\frac{1}{12}$ $\frac{1}{48}$ $\frac{1}{96}$ less car. 41 $\frac{1}{4}$. The wheat total in 1911 is therefore in round numbers art. 118 less than that here. It seems likely that this is entirely due to a difference in the largest wheat subtotal, which is lost in 1911 76-7 and stands here in 150 at art. 192 $\frac{1}{2}$ choen. 7; there it must have stood at c. art. 74. This grain was for shipment to Alexandria and was delivered to the shippers along with a sum for freight charges, which will of course also have been less in 1911 than here, so that probably the difference in the money total will also derive entirely from this entry. The money figures suit this hypothesis fairly well. The difference in wheat is c. art. 118, the difference in money (sol. 38 $\frac{1}{12}$ $\frac{1}{48}$ $\frac{1}{96}$ less car. 41 $\frac{1}{4}$ minus sol. 37 $\frac{1}{2}$ $\frac{1}{96}$ less car. 41 $\frac{1}{4}$) is sol. $\frac{1}{96}$ or car. 18 $\frac{1}{2}$.

This works out at a rate of c. car. 15.67 per art. 100. The rates calculated by A. C. Johnson, L. C. West, *Byzantine Egypt* 159 are in the range car. 16-18 per art. 100.

The difference in the sizes of these grain shipments is surprising. They are said to be *ὑπὲρ ἐμβολῆς* (149), that is, for taxes in grain destined eventually for shipment to Constantinople, cf. A. H. M. Jones, *Later Roman Empire* i 698, ii 1287 n. 23. We might have expected the contribution of any single stewardship to this important tax to have a fixed assessment and to remain roughly the same, especially when we contemplate how standardized most of the other elements of these accounts were. This case seems to indicate rather that the Apions left themselves free to make up their quota of grain tax in whatever way best suited the particular current circumstances.

169-74 = **1911** 96-8, 100-2. In **1911** this long entry is shared between cols. iv and v and is broken up by the column total in **1911** 99.

170 *π(αρά)*: so also **1911** 97, where (*ὑπὲρ*) was read. Since it seems unlikely that the notary personally cultivated the ground, I have translated *π(αρά)* here as 'on behalf of' and retained this in similar contexts below, in some of which 'by' may possibly be more appropriate, see also 225 n.

ἡνὶ δέ: so also **1911** 97, where *Νημιδ()* was read.

Κουειέχος. Cf. *Κουειέχος* **1911** 97, *Κουειεχοῦ* 197, *Κουειέτος* 199. The photographs of **1911** suggest that we should read *Κουειέχος* (97), *Κουειέχος* [(ἀρτ.)] (197), and *Κουειέχος* (199). This is presumably an indeclinable personal name and is not known from elsewhere. The variations are probably due to phonetic uncertainties, see F. T. Gignac, *Grammar* i 116-19, for omission and insertion of medial nu, 96, for interchange of gamma and chi. On Coptic *Kou-*names see L. S. B. MacCoull, *Tyche* 2 (1987) 101.

171 *διακόπου*. Cf. P. Petrus 18.24-5 n. The text of **1911** 98-100 shows that it refers here to an accidental breach of irrigation channels: *ἕ(πὸ) — ἐκ edd. — τῆς διακοπ(ῆς) τῶν χωμ(άτων)*.

We expect *διάκοπος* to be masculine, though *διακοπή* means the same thing, but we have *τῆς διακόπου* clearly written in 171 and 179, and equally clearly *τῆς διακοπῆς* in 189, with *τῆς διακοπ()* abbreviated in 192.

172 *θρνώδη{c} καὶ καλαμοκεντρίτιδος*. This is the way the text is presented in **1911** too. Both terms should be in the same case, but perhaps it should be the genitive, i.e. correct to *θρνώδου* rather than to *θρνώδη καὶ καλαμοκεντρίτιδα*. If so, these words describing the condition of the land are used as if they denoted a category of land, which would not be very surprising. It may even be that the form *θρνώδης* is intended as a genitive and that the adjective had been transferred out of the dying third declension, cf. F. T. Gignac, *Grammar* ii 138.

175 = **1911** 103.

176-7 There is a somewhat similar entry in **1911** 104-6, but the figures are quite different. The photographs are again not clear enough to check thoroughly, but it is certain that **1911** was substantially different.

From this entry alone we might have supposed that these five aruras were planted with vines in AD 559/60, which is the nearest eighth indiction preceding the date of **3804**, and that the concession was granted because the vines were still not fully bearing in AD 565/6. In **1911** 104-6 the location is described in the same way, west of the holding of Cotylēciu, but the area is only two aruras. The indiction is again an eighth (the dotted eta = 8 is confirmed by the following expression, 'crops of the ninth'), but this one must be before the date of **1911**, AD 556/7. The nearest preceding eighth indiction is therefore AD 544/5, and vines planted then must have been in full bearing by AD 556/7. We might guess, therefore, that the land had been assessed higher, probably as grain land, before the vines were planted and that the rent concession was made on that account. That the land was west of the settlement might suggest that the desert was encroaching and spoiling good grain land. On the other hand we note that Cotylēciu had also lost land by flood damage (169-74, 181-3, 191). A location between the Bahr Yusuf and the Western Desert might satisfy the indications.

It is still odd that the area has grown from two aruras to five while the indiction number remains the same. It could be that the extra three aruras were indeed planted in AD 559/60, the later of the two eighth indications considered, but even so this Greek would hardly convey that sense. More probably the trouble arose in AD 544/5 and grew worse, but the clerks did not think it worth while to indicate the stages of its progress.

178-80 = **1911** 142-4. The amounts are the same but the concession is there *ὑπὲρ τῆς ἀφανισθ(είσης) αὐτῶν γῆς ὑπὸ τῆς διακ(οπή)ς τῶν χωμ(άτων)*, which evidently means the same as the wording here. There is also a note in **1911** 144-5 that the crops of the 6th indiction are to be inspected and an authoritative

formula (*τύπος*) given for the concession. Evidently the concession was confirmed and continued up to the time of our account. It looks as if the land was permanently lost.

Note that the order of this roll begins here to diverge from that of **1911**.

181-3 This entry seems to be related to **1911** 193-205, where the concessions are made *τοῖς ἐξῆς ἐγγεγραμμ(ένοις) γεωρ(γοῖς) ἐποικ(ίου) Κοτυλῆciu καὶ ἀλλ(ων) ὑπὲρ ξυεθίσης καὶ ἀφανισθ(είσης) αὐτῶν γῆς ὑπὸ (ἀπό edd: the photographs show ὑπο) τῆς διακοπ(ῆς) τῶν ὑδάτων*. Many more names are mentioned there, some of which are probably comprised here among the 'partners'. They do not include *Υῶβ*, see 182 here, and there are probably at least two persons called Phib there (195, 196, 204). The concession in wheat there is, by cancellus measure, art. 34 $\frac{1}{2}$ choen. 1, and so less than that here, art. 42 $\frac{1}{2}$ choen. 2, while the money concession is greater, sol. 7 $\frac{1}{2}$ $\frac{1}{2}$ instead of 3 $\frac{1}{2}$ $\frac{1}{4}$. A solidus would probably buy 10 or 11 artabas of wheat, cf. e.g. **3805** 46, so that the overall concession has decreased by the date of our document. This is what we might expect as the flood damage was gradually repaired by cultivation, although in the previous entry the damage seems to have been more severe.

The figures for the solidi are very faded. Probably they were added later in a different ink, cf. 194 n.

183 Possibly restore *μηχ(ων) Τῆς [Οδ]εί(ας)*, cf. 207 μ.τ. *Μεγάλης Οὐεί(ας)*. If so, the irrigator is unknown. Its name is transferred to the land served by it, see WB s.v., A. Calderini, *Aegyptus* 1 (1920) 309-13.

184-5 This entry is related to the much more detailed one in **1911** 147-9. There is no doubt that the number of carats deducted is 200, written here in an elaborate form with a double curve as the base of the sigma. According to the new reading the monastery gets 1,000 artabas for a notional sol. 41 car. 16, i.e. sol. 50 less car. 200 or sol. 8 car. 8, and the solidus is exactly equivalent to 24 artabas instead of between 10 and 13, cf. **3805** 46, LI **3628** 11, 25, 29. This only intensifies the force of the note to **1911** 147 on the high value here of the solidus. Possibly the reason is that it is a charitable and not a commercial transaction, cf. Hardy, 139-45, esp. 142. If we include the extra art. 12, the value is even higher, but this destroys the symmetry of the figures. I have assumed that the art. 12 are not equated with money, see 258-62 n.

For the monastery see P. Barison, *Aegyptus* 18 (1938) 75-7, P. J. Sijpesteijn, *ZPE* 70 (1987) 54-6.

According to the wording of **1911** the 1,000 artabas of wheat are *ενχωρηθ(είσαι) αὐτοῖς ἐκ κελύεως ἀπὸ γραμμ(άτων) τοῦ δεσπότη τοῦ ὑπάτου ἀπὸ ε ἡδ(ικ.) (ἔτους) ελγ καὶ εβ*, 'conceded to them by order in virtue of a letter of the master the consul dating from the fifth indiction, year 233 and 202', that is, by written order of Flavius Strategius Apion Strategius Apion, the consul of AD 539, dating from AD 556/7. See introduction.

185 *ἐν τῇ ἡμέρ(α) τοῦ μεγάλου ἀνθρώπου*. In **1911** 149 n. it was suggested that this might refer to the birthday of Flavius Apion the consul of AD 539. It is more likely that *μέγας ἄνθρωπος* is the equivalent of the Coptic term *nos ἡρωμε* 'great man', according to Crum 'often equivalent to abbot or archimandrite', see H. E. Winlock, W. E. Crum, *The Monastery of Epiphanius* Part I, 131; cf. R. Engelbach, *Annales du Service* 39 (1939) 315, note c. In that case it may refer to an anniversary connected with the founder of the monastery, possibly its titular Apa Andrew. The term may be traced back into the pre-Christian period in the demotic *β: rmt c:*, see J. Quaegebeur, *Proc. XVI Int. Congr. Pap.*, 529, *Orientalia Lovanensia Periodica* 8 (1977) 142, L. Kákosy, *ZAS* 97 (1971) 98. I am grateful to Dr Mark Smith for valuable help and advice on this subject.

186-7 Cf. **1911** 150-1, where the same concession is made *κατὰ κέλεις τοῦ δεσπότη ἡμῶν τοῦ κυροῦ (= κυρίου, cf. F. T. Gignac, Grammar i 302, ii 26-7) πατρικίου στρατηγίου*. Clearly this Strategius died in the interval between **1911** and this account, see introduction.

188-90 Cf. **1911** 139-40. Evidently the concession went back at least to the date of **1911**, AD 556/7. It ought to have been made in the year preceding the period of this account, but was not, so that it had to be deducted twice here.

191-2 Not in **1911**.

193 Not in **1911**. It is not clear whether there is any real connection between *ἐδάφ(ου) Ἀθανασίου* and *δικαίου Ἀθανασίου*, 139-40.

194 The totals are correct, but the total of solidi was made up first without the figures from 181, which were then introduced with *ἀλλ(α)* and added to the first total. The implication is that the figures for solidi in 181 and 182-3 were added after the whole of the column had been written as far as the first total of solidi in 194. Then the figures in 181-3 were added and the corresponding changes made at the end of 194.

195 Not in **1911**.

196-203 = **1911** 107-15. The real differences are minor except for the different order of entries. The better state of this text allows several corrections in the readings of the names.

196 = **1911** 107, but the figures are here reserved for the total in 203. The same figures are repeated at the right of **1911** 107, cf. 116, and here 204 n., but do not appear in the edition. The photographs do not show any certain ink immediately after *Ταρουσέβτ* where the edition has . . . (?), but the original may have something there.

On *αὐτουργία* see Hardy, 117, but it remains a shadowy phenomenon. The word seems to imply cultivation by estate employees instead of the usual tenant farmers.

197 = **1911** 108. The readings of the names here are certain and the photographs of **1911** show no reason why we should not read *Παπάρ* and *Ψαειά*, cf. 199 n., there too. The *μηχ(ανής) καλουμ(ένης) Παπάρ* in XIX **2244** 32 has no obvious connection with this *ἔδαφος Παπάρ*; cf. 159 n.

Here after (*ἀρ.*) L d there is something which looks most like $\lambda\beta = \frac{1}{32}$; the photographs of **1911** show nothing and do not even have space available.

198 = **1911** 112. *Χχορδᾶ* rather than *Χχορδο[v]* is confirmed by the photographs of **1911**. The figures for the aruras here are completely uncertain, but it does seem clear that the solidi were no more than *νο(μ.)* L, whereas **1911** 112 is supposed to have (*ἀρ.*) α *νο(μ.)* L d. The photographs are very black at this point. The figures of solidi here give the correct total, which is also given in **1911** 107, so that we expect no divergences.

199-201 The figures for the aruras in these two entries seem significantly related, i.e. 'from ar. $7\frac{1}{2}$ ar. $4\frac{1}{2}$ ' (199), and 'from ar. $7\frac{1}{2}$ ar. 3' (201), but it is not clear what conclusions we should draw. The fact that the concessions also add up to $7\frac{1}{2}$ aruras may be accidental. The rates of the concessions are different, sol. $\frac{1}{8}$ per ar. in 199 and sol. $\frac{1}{2}$ per ar. in 201. The two entries are separated in **1911** 109-10, 113-14, and the second one does not have there the information that the three aruras are part of a unit of $7\frac{1}{2}$ aruras.

199 = **1911** 109. The photographs favour reading there *Φηλταμβέλ* for *Φηλαμβέλ*, π(*αρά*) for δ(*ιά*), and *Ψαειά*, cf. 197 n., for *Ψαειού*. It seems that π(*αρά*) introduces the name of a former tenant, δι(*ά*) that of a current one, see 170 = **1911** 97 *σπειρομένης ποτέ π(αρά) Cμαράδου*, **1911** 109 *γεωργουμέ(νου) ποτέ π(αρά) Φιλέου*, while our entry in 199 omits *ποτε*, 200 = **1911** 113 where both have *γεωργουμέ(νου) ποτέ π(αρά) Κολλούθου*. The point may be that it was necessary to record the name of the original beneficiary of the concession.

200-1 = **1911** 113-14, where read π(*αρά*) for δ(*ιά*), see 199 n., and where ἀπό (*ἀρ.*) ζ L is omitted.

202 = **1911** 111, where read *Πτυχών* for *Παχόν* and *Σερήνου και Παύλου* for *Θέωνος Κεγκύλου*.

203 = **1911** 115, which has *ἔδαφ(ου) βορινού* in full. Probably *βορινού* has become a place-name parallel to the other *ἔδαφος* names in this passage.

δικαίου Διογένους. δικαίου ποτέ Διογένους **1911** 115.

έτέρου Παύλου. Παύλου έτέρου **1911** 115.

The total of solidi is correct.

204 Cf. **1911** 116, where, however, instead of *οὐτως* we have a total of aruras and a total of solidi (repeated) which are clearly related to the totals given in this account at the end of the section, in 212. In both accounts the aruras total 30; here the sum in solidi is $21\frac{3}{8}\frac{1}{16}$, while in **1911** 116 we have sol. $21\frac{1}{4}\frac{1}{64}$. The photographs of **1911** show that these figures are correct. It is clear that the whole section in lines 204-12 is the overall equivalent of **1911** 116-38, though there are many more entries in **1911**. In each case it is presumably the same thirty aruras which are favoured with concessions, but the names of the beneficiaries have changed in a complicated way which has not yet been understood.

205 = **1911** 134-5, where the photographs confirm that the papyrus actually has *Πεκυσιόν και Παύλου*. We should delete *και* to agree with 205, 209, and **1911** 119 (*Πεκυσιόν Παύλου ἀμπελ(ουργού)*), 128; see also XVI p. 296 (index s.v. *Πεκύσιος*).

Anuthius son of Aciar may be the son of Aciar son of Anuthius (80, 87) and named after his grandfather according to the widespread custom.

206 There is no exact counterpart to this in **1911**, where there are four entries for the *ἔδαφος Cεύθου*, lines 118-21, each recording a concession of sol. $\frac{1}{8}$ on 1 arura to a separate person, none of them Isaac son of Ammonius. The rate of the concession is the same here.

207 = **1911** 122-3, where the photographs favour *Φοιβάμμωνος* in place of *και Μαξίμωνος*. Here *Couroucs* is treated as indeclinable, but the genitive *Courouctos* is found there. **1911** 122 has *έκ* before *του δικαίου* and 123 has, before the figures also occurring here, *ἀπό (ἀρ.) ιγ φόρ(ου) νο(μ.) ια*. This last seems to mean that Surus and company cultivated 13 ar. assessed at sol. 11, which is surprising since the concession is expressed

as sol. $2\frac{1}{4}$ on ar. 3, i.e. sol. $\frac{1}{3}$ per ar. rather than sol. $\frac{1}{8}$ per ar. This shows that we should not attempt to calculate the rent on the total areas given in, for example, 199 and 200-1 from the rates of the concessions on parts of them.

208 The position and certain other similarities invite comparison with **1911** 124 which runs:

*ὑπέρ ὀνόμα(τος) Φοιβάμμωνος Ἀτρήτος ἀπό δικαίου τῆς μηχ(ανής)
Ναυατέ ἔδαφ(ου) Πατερίου (ἀρ.) β νο(μ.) α L.*

The figures are the same and Hatres son of Phoebammon could well be the son of Phoebammon son of Hatres. However, the photographs of **1911**, though dull, do not suggest that we should alter *ἔδαφ(ου) Πατερίου* (also in 126) to *έ. Παγένι*, which is probably a short genitive of the common name *Παγένης*, cf. XLIII **3102** 5 n., XLIV **3169** 181 n. There may be a clerical error in one text or the other, or there may have been two names for the same area.

209 Cf. **1911** 128-31, where for *Καμηρο, Καμ[ρο(), Καμηρο()* and . . . η read *Καμη, Καμ[ή, Καμη and Καμηή*; see P. Pruneti, *I centri abitati*, 77 for a *κτῆμα Καμη*, only in XVI **1972** 10.

210 = **1911** 136-7.

211 = **1911** 138. The *μαρτύριον Ἀκακίου* is linked by P. Pruneti, *I centri abitati*, 25, with a little-known place called *Ἀκακίου*, cf. XVI **1910** 4 *ές τὸ μαρτύρι(ον) τοῦ αὐτοῦ κτῆμ(ατος) Λεωνίδου*. However, in PSI III 246.8 the place is a *κώμη, [Α]κ[α]κίου*, and in PSI I 60.12 it is an *ἐποίκιον, Ἀκακίον*. Both look doubtful. No martyr called Acacius is listed in H. Delehayce, *Les Martyrs d'Egypte*. There was a martyrdom of Acacius in Constantinople, dedicated by Constantine I, see A. Grabar, *Martyrium* 1 231, cf. 71 n. 8, 318, J. Ebersolt, *Sanctuaires de Byzance*, 76-8, cf. 32 n. 3. It seems not too unlikely that land near Oxyrhynchus might belong or have belonged to such an institution, which might either have collected its rent by agency of the Apions or simply have sold the property to them because of the inconvenience of collecting the rent. For the moment the idea remains speculative. I cannot cite any other example of a church in the capital owning property in Egypt. The martyrdom of St Serenus may have been in Oxyrhynchus, see 164 n.; it has no namesake in the indexes to Grabar and Ebersolt opp. cit.

212 Cf. **1911** 125-6, 132-3, which look as if they contain the equivalent of 212, but do not fit exactly as they stand in the edition:

125 *και ὑπέρ ὀνόμα(τος) Φοιβάμμωνος διακ(όνου) δι(ά) Παμουθίου Ὀρσενίου
διακ(όνου) ἀπό (ἀρου.) γ L*
126 *ἔδαφ(ου) Πατερίου (ἀρου.) α νο(μ.) L δ'*
132 *ὑπέρ ὀνόμα(τος) Ἀβρααμίου Ἰακώβ Πατάτος ὑπέρ ις κεσοίου
(ἀρου.) α νο(μ.) L δ' και*
133 *ὑπέρ ὀνόμα(τος) Φοιβάμμωνος Ἰακώβ διακ(όνου) (ἀρου.) α L δ' / (ἀρου.)
β L, νο(μ.) α L γ κ[δ']*

The photographs, though dull, favour *Ὀρσενίου*, as here, cf. 81 n. It is possible that our Horsentius was the son of the Pamuthius in **1911** 125 and had the same name as his grandfather.

The ar. $3\frac{1}{2}$ in **1911** 125 look as if they are the same as those here in 212.

In **1911** 132 the photographs allow us to accept *ὑπέρ ἔδαφ(ου)*—hardly visible at all—*Κρησκεντίου*, much as in 212 here. This is the phonetic equivalent of *Κρησκεντίου*, i.e. a Greek version of Crescentius. The *ἔδαφος Πατερίου* does not appear here, however.

We may perhaps guess that *Ἰακώβ* (alias?) *Πατάς*, father of Abraham in **1911** 132, is the same Jacob who is the father of Phoebammon the deacon in 133, cf. 125, and that that is why these two parcels of land are linked. Our Phoebammon son of Jacob is presumably the same deacon.

The photographs are unfortunately very black at important points in **1911**. If we tabulate the figures we find certain similarities, but also some surprises, especially the internal inconsistencies in **1911** 132-3:

3804	212	ar. $3\frac{1}{2}$	sol. $2\frac{1}{8}\frac{1}{16}$
1911	126	ar. 1	sol. $\frac{1}{2}\frac{1}{4}$
	132	ar. 1	sol. $\frac{1}{2}\frac{1}{4}$
	133	ar. $1\frac{1}{2}\frac{1}{4}$ (!)	sol. nil (!?)
	(total 132 + 133)	ar. $2\frac{1}{2}$	sol. $1\frac{1}{2}\frac{1}{24}$ (!?).

If we add the figures in **1911** 126 to the figures given at the end of 133 for the total of the other two parcels we reach ar. $3\frac{1}{2}$, sol. $2\frac{1}{8}\frac{1}{16}$, which agrees with the figure for aruras here in 212 and is short by $\frac{1}{16}$ in the solidi. The restoration of κ[δ μ η] instead of κ[δ] in **1911** 133 at the end would make the agreement perfect.

196-203 = 1911 107-15. The real differences are minor except for the different order of entries. The better state of this text allows several corrections in the readings of the names.

196 = 1911 107, but the figures are here reserved for the total in 203. The same figures are repeated at the right of 1911 107, cf. 116, and here 204 n., but do not appear in the edition. The photographs do not show any certain ink immediately after *Ταρουέβτ* where the edition has . . . (?), but the original may have something there.

On *αδτουργία* see Hardy, 117, but it remains a shadowy phenomenon. The word seems to imply cultivation by estate employees instead of the usual tenant farmers.

197 = 1911 108. The readings of the names here are certain and the photographs of 1911 show no reason why we should not read *Παπάρ* and *Ψαιεά*, cf. 199 n., there too. The *μηχ(ανής) καλουμ(ένης) Παπάρ* in XIX 2244 32 has no obvious connection with this *ἔδαφος Παπάρ*; cf. 159 n.

Here after (*ἀρ.*) L d there is something which looks most like $\lambda\beta = \frac{3}{2}$; the photographs of 1911 show nothing and do not even have space available.

198 = 1911 112. *Χορδᾶ* rather than *Χόρδο[υ]* is confirmed by the photographs of 1911. The figures for the aruras here are completely uncertain, but it does seem clear that the solidi were no more than *νο(μ.)* L, whereas 1911 112 is supposed to have (*ἀρ.*) *α νο(μ.)* L d. The photographs are very black at this point. The figures of solidi here give the correct total, which is also given in 1911 107, so that we expect no divergences.

199-201 The figures for the aruras in these two entries seem significantly related, i.e. 'from ar. $7\frac{1}{2}$ ar. $4\frac{1}{2}$ ' (199), and 'from ar. $7\frac{1}{2}$ ar. 3' (201), but it is not clear what conclusions we should draw. The fact that the concessions also add up to $7\frac{1}{2}$ aruras may be accidental. The rates of the concessions are different, sol. $\frac{3}{8}$ per ar. in 199 and sol. $\frac{1}{2}$ per ar. in 201. The two entries are separated in 1911 109-10, 113-14, and the second one does not have the information that the three aruras are part of a unit of $7\frac{1}{2}$ aruras.

199 = 1911 109. The photographs favour reading there *Φηλαγβέλ* for *Φηλαγβέλ*, *π(αρά)* for *δ(ιά)*, and *Ψαιεά*, cf. 197 n., for *Ψαιέου*. It seems that *π(αρά)* introduces the name of a former tenant, *δ(ιά)* that of a current one, see 170 = 1911 97 *σπειρομένης ποτέ π(αρά) Σμαράγδου*, 1911 109 *γεωργουμέ(νου) ποτέ π(αρά) Φιλέου*, while our entry in 199 omits *ποτε*, 200 = 1911 113 where both have *γεωργουμέ(νου) ποτέ π(αρά) Κολλούθου*. The point may be that it was necessary to record the name of the original beneficiary of the concession.

200-1 = 1911 113-14, where read *π(αρά)* for *δ(ιά)*, see 199 n., and where *ἀπό (ἀρ.) ζ* L is omitted.

202 = 1911 111, where read *Πτηχών* for *Παχών* and *Σερήνου καὶ Παύλου* for *Θέωνος Κεκύλου*.

203 = 1911 115, which has *ἔδαφος(ου) βορινοῦ* in full. Probably *Βορινοῦ* has become a place-name parallel to the other *ἔδαφος* names in this passage.

δικαίου Διογένους. δικαίου ποτέ Διογένους 1911 115.

ἔτερου Παύλου. Παύλου ἔτερου 1911 115.

The total of solidi is correct.

204 Cf. 1911 116, where, however, instead of *οὔτως* we have a total of aruras and a total of solidi (repeated) which are clearly related to the totals given in this account at the end of the section, in 212. In both accounts the aruras total 30; here the sum in solidi is $21\frac{1}{2} \frac{1}{8}$, while in 1911 116 we have sol. $21\frac{1}{2}$. The photographs of 1911 show that these figures are correct. It is clear that the whole section in lines 204-12 is the overall equivalent of 1911 116-38, though there are many more entries in 1911. In each case it is presumably the same thirty aruras which are favoured with concessions, but the names of the beneficiaries have changed in a complicated way which has not yet been understood.

205 = 1911 134-5, where the photographs confirm that the papyrus actually has *Πεκυσίου καὶ Παύλου*. We should delete *καὶ* to agree with 205, 209, and 1911 119 (*Πεκυσίου Παύλου ἀμπελ(ουργοῦ)*), 128; see also XVI p. 296 (index s.v. *Πεκύσιος*).

Anuthius son of Aciar may be the son of Aciar son of Anuthius (80, 87) and named after his grandfather according to the widespread custom.

206 There is no exact counterpart to this in 1911, where there are four entries for the *ἔδαφος Σεύθου*, lines 118-21, each recording a concession of sol. $\frac{3}{4}$ on 1 arura to a separate person, none of them Isaac son of Ammonius. The rate of the concession is the same here.

207 = 1911 122-3, where the photographs favour *Φοιβάμμωνος* in place of *καὶ Μαξίμμωνος*. Here *Κουρούς* is treated as indeclinable, but the genitive *Κουρούτος* is found there. 1911 122 has *ἐκ* before *τοῦ δικαίου* and 123 has, before the figures also occurring here, *ἀπό (ἀρ.) γ φάρ(ου) νο(μ.) ια*. This last seems to mean that Surus and company cultivated 13 ar. assessed at sol. 11, which is surprising since the concession is expressed

as sol. $2\frac{1}{4}$ on ar. 3, i.e. sol. $\frac{3}{4}$ per ar. rather than sol. $\frac{3}{8}$ per ar. This shows that we should not attempt to calculate the rent on the total areas given in, for example, 199 and 200-1 from the rates of the concessions on parts of them.

208 The position and certain other similarities invite comparison with 1911 124 which runs:

ὑπὲρ ὄνομα(τος) Φοιβάμμωνος Ἀτρήτος ἀπὸ δικαίου τῆς μηχ(ανής)
Ναυατέ ἔδαφος(ου) Πατερίου (ἀρ.) β νο(μ.) α L.

The figures are the same and Hatres son of Phoebammon could well be the son of Phoebammon son of Hatres. However, the photographs of 1911, though dull, do not suggest that we should alter *ἔδαφος(ου) Πατερίου* (also in 126) to *ἔ. Παγένι*, which is probably a short genitive of the common name *Παγένης*, cf. XLIII 3102 5 n., XLIV 3169 181 n. There may be a clerical error in one text or the other, or there may have been two names for the same area.

209 Cf. 1911 128-31, where for *Καμηρ*, *Καμ[ηρ()]*, *Καμηρ()* and . . . η read *Καμηῆ*, *Καμ[ῆ]*, *Καμηῆ* and *Καμηῆ*; see P. Pruneti, *I centri abitati*, 77 for a κτήμα *Καμηῆ*, only in XVI 1972 10.

210 = 1911 136-7.

211 = 1911 138. The *μαρτύριον Ἀκακίου* is linked by P. Pruneti, *I centri abitati*, 25, with a little-known place called *Ἀκακίου*, cf. XVI 1910 4 *εἰς τὸ μαρτύριον τοῦ αὐτοῦ κτήματος Λεωνίδου*. However, in PSI III 246.8 the place is a *κώμη*, [A]κ[α]κίου, and in PSI I 60.12 it is an *ἐποίκιον*, *Ἀκακίον*. Both look doubtful. No martyr called Acacius is listed in H. Delehaye, *Les Martyrs d'Egypte*. There was a martyrdom of Acacius in Constantinople, dedicated by Constantine I, see A. Grabar, *Martyrium* i 231, cf. 71 n. 8, 318, J. Ebersolt, *Sanctuaires de Byzance*, 76-8, cf. 32 n. 3. It seems not too unlikely that land near Oxyrhynchus might belong or have belonged to such an institution, which might either have collected its rent by agency of the Apions or simply have sold the property to them because of the inconvenience of collecting the rent. For the moment the idea remains speculative. I cannot cite any other example of a church in the capital owning property in Egypt. The martyrdom of St Serenus may have been in Oxyrhynchus, see 164 n.; it has no namesake in the indexes to Grabar and Ebersolt opp. citt.

212 Cf. 1911 125-6, 132-3, which look as if they contain the equivalent of 212, but do not fit exactly as they stand in the edition:

125 *καὶ ὑπὲρ ὄνομα(τος) Φοιβάμμωνος διακ(όνου) δι(ὰ) Παμουθίου Ὀρσέντου*
διακ(όνου) ἀπὸ (ἀρου.) γ L

126 *ἔδαφος(ου) Πατερίου* (ἀρου.) *α νο(μ.) L δ'*,

132 *ὑπὲρ ὄνομα(τος) Ἀβρααμίου Ἰακώβ Πατάτος ὑπὲρ ἰσκειοῦ*
(ἀρου.) *α νο(μ.) L δ' καὶ*

133 *ὑπὲρ ὄνομα(τος) Φοιβάμμωνος Ἰακώβ διακ(όνου) (ἀρου.) αL δ' / (ἀρου.)*
β L, νο(μ.) αL γ κ[δ']

The photographs, though dull, favour *Ὀρσέντιου*, as here, cf. 81 n. It is possible that our Horsentius was the son of the Pamuthius in 1911 125 and had the same name as his grandfather.

The ar. $3\frac{1}{2}$ in 1911 125 look as if they are the same as those here in 212.

In 1911 132 the photographs allow us to accept *ὑπὲρ ἔδαφος(ου)*—hardly visible at all—*Κρισκεντίου*, much as in 212 here. This is the phonetic equivalent of *Κρησκεντίου*, i.e. a Greek version of Crescentius. The *ἔδαφος Πατερίου* does not appear here, however.

We may perhaps guess that *Ἰακώβ* (alias?) *Πατάς*, father of Abraham in 1911 132, is the same Jacob who is the father of Phoebammon the deacon in 133, cf. 125, and that that is why these two parcels of land are linked. Our Phoebammon son of Jacob is presumably the same deacon.

The photographs are unfortunately very black at important points in 1911. If we tabulate the figures we find certain similarities, but also some surprises, especially the internal inconsistencies in 1911 132-3:

3804	212	ar. $3\frac{1}{2}$	sol. $2\frac{1}{2} \frac{1}{8}$
1911	126	ar. 1	sol. $\frac{1}{2} \frac{1}{4}$
	132	ar. 1	sol. $\frac{1}{2} \frac{1}{4}$
	133	ar. $1\frac{1}{2} \frac{1}{4}$ (!)	sol. nil (!?)
	(total 132 + 133)	ar. $2\frac{1}{2}$	sol. $1\frac{1}{2} \frac{1}{4}$ (!?).

If we add the figures in 1911 126 to the figures given at the end of 133 for the total of the other two parcels we reach ar. $3\frac{1}{2}$, sol. $2\frac{1}{2} \frac{1}{8}$, which agrees with the figure for aruras here in 212 and is short by $\frac{1}{8}$ in the solidi. The restoration of *κ[δ μ η]* instead of *κ[δ]* in 1911 133 at the end would make the agreement perfect.

The middle of **1911** 133, where the photographs show nothing but blackness, is suspicious because we lack the value in solidi of the concession on the stated number of aruras and because the stated number of aruras is too high by $\frac{1}{4}$ to agree with the total at the end of 133. Regularity would be achieved by assuming that instead of (ἀρ.) α λ δ' the account really had (ἀρ.) α λ νο(μ.) α η μη, i.e. ar. $1\frac{1}{2}$ sol. $1\frac{1}{8}\frac{1}{8}$. The photographs at least confirm that there was space for this.

The table would then stand:

3804	212	ar. 3 $\frac{1}{2}$	sol. 2 $\frac{1}{2}\frac{1}{8}\frac{1}{8}$
1911	126	ar. 1	sol. $\frac{1}{2}\frac{1}{4}$
	132	ar. 1	sol. $\frac{1}{2}\frac{1}{4}$
	133	ar. 1 $\frac{1}{2}$	sol. 1 $\frac{1}{8}\frac{1}{8}$
(total 132 + 133)	ar. 2 $\frac{1}{2}$	sol. 1 $\frac{1}{2}\frac{1}{8}\frac{1}{8}$	

The sectional total of aruras and solidi for lines 204-12 is correct.

213 On ποταμίται see D. Bonneau, *Proc. XII Intern. Congress of Papyrology* 52-3. They were canal-workers, 'navvies'.

213-17 It appears at first sight that the total in 217 fails to include the money, den. myr. 600, recorded in 215 and should therefore have 1,800 instead of 1,200. If so, the error continued into the column total in 220 and into the grand total of expenses in 271. It might have occurred because the special form of sigma which stands for 200 looks very like an omega (= 800) with a horizontal stroke across the top. However, we might guess alternatively that it is the figure in 216 which is wrong, the clerk writing 1,200 by anticipation of the total, when he ought to have given the payment to the overseer as 600, the same sum as the expenditure on food. In that case the subtotal (217), and the column total (220), and the grand total (271), would all be correct and the error confined to 216. This seems more likely.

The process that this entry refers to is probably that of digging an underground brick-lined cistern (λάκκος), from which water would be drawn by a wooden sakiyeh (μηχανή), driven by animals. Probably it was very similar to the modern method described by L. Ménassa, P. Laferrière, *La Sāqia* (Bibliothèque d'Etude 67, 1974).

The expenses on foodstuffs (214-15) are interesting. From **LI 3628-33** (p. 74) we can see that meat would probably have cost 24-30 den. myr. per lb., radish oil 80-105 den. myr. per sextarius in the fifth century. There was probably some rise in prices in the sixth, so that it would not take any vast amount of salt-fish, oil, and mutton to amount to 600 den. myr. One artaba of wheat represents a monthly allowance for one man, probably intended to maintain his family also, see **XL** p. 6, but it would obviously disappear rather more quickly down the throats of a gang of navvies. I speculate, therefore, that these foodstuffs represent one or two specially good dinners eaten by the workmen and local farmers to celebrate the completion of the job or of various important stages of it, as described in L. Ménassa, P. Laferrière, op. cit., 3, 5; note especially 'un mouton aura été égorgé pour la circonstance', p. 3. We may compare the distribution of wine to mark the completion of a new cistern in **PSI III 165.2-3**, cf. D. Bonneau, *Proc. XII Intern. Congress of Papyrology* 50 n. 45, 51 n. 49.

218-19 Cf. **1911** 181-92, esp. 191-2, where 1,200 were bought, but they were probably new, since they cost sol. 3 less car. $13\frac{1}{2}$. Many more jars were needed for that vintage.

218 κατ'αγγισμον. Possibly the clerk meant to write καταγγισμον, cf. e.g. 148 παγ'γα for Παγγά.

220 The total of solidi is correct. See 213-17 n. for doubts about the total of denarii.

221 Απανακίω. This name is usually presented as ἄπα Νάκιος, but since I can find no instance of Νάκιος, I believe that the religious title ἄπα is not involved; cf. D. Foraboschi, *Onomasticon*, 38, where there is a list of ordinary names often appearing with ἄπα, and esp. J. Keenan, *ZPE* 34 (1979) 136 n. line 7. Cf. P. Hamb. III 228.13 n. on Απακίριος/ἄπα Σίριος.

ψαλ(λ)ίδα τοῦ λάκκου τῆς μηχ(αν)ῆς, 'vault of the cistern of the sakiyeh', cf. LSJ s.v. ψαλίς II, L. Ménassa, P. Laferrière, *La Sāqia*, 1-7, esp. p. 6 fig. 4. The underground cistern of the sakiyeh was walled with brick or stone and vaulted over except for a comparatively narrow aperture where the vertical wheel with its chain of pots entered it. This explanation also applies probably to **XLVIII 3409** 25-6 ἡ γὰρ ψελλίς (= ψαλίς) τοῦ λάκκου μου ἔπεσεν, cf. P. Ross-Georg. II 19.33-4, where we might guess at the sense by restoring ἀν δὲ χρεία γένηται ἐ[πι]σκευῆς λάκ[κου] ἢ ψελλίδος (= ψαλίδος), ἔσται π[ρὸς τὸν Π]ρεμμίωνα, 'If there is need for repair of cistern or vault, it will be at the expense of Primion', who was the owner of the vineyard concerned.

The wording here suggests and the photographs allow that we should now read **1911** 157-8 as

ἐργαζομέ(νοι) εἰς τὴν ψαλ(λ)ίδα τοῦ λάκκου τῆς μηχ(αν)ῆς τῶν χωρ(ίων) . . . οἰοῦν καὶ Ταρουεβ. Delete *ψαλίδωαι, suggested in **1911** 157 n., from S. Daris, *Sproglio Lessicale*. The photographs are too dark to confirm . . . οἰοῦν.

221-2 μηχ(αν)ῆς Παρὰ Ποταμὸν τοῦ κτήμα(τος) Τριγύου. It is likely that Παρὰ Ποταμὸν was a common designation for a sakiyeh and this one is probably not identical with the one in **XVI 1985** 10, which is associated with the ἐποίκιον Μικράς Θώλθωαι; cf. **XIX 2244** 65 τῆς μεγάλ(ης) μηχ(αν)ῆς Π.Π. In **1911** 166-7 stones were bought from quarrymen of Trigyru for the cistern of τῆς μηχ(αν)ῆς παρὰ ποταμὸν (read Π.Π.) τῆς οὐκῆς ἐπάνω τοῦ προμούλου τοῦ κτήμα(τος) Ἀντά. The rare word πρόμουλον (cf. πρόμωλον) may be related to προμολή and mean 'approach, outskirts', see LSJ and esp. Suppl., s.v. προμολή. If so, and if Anta adjoined Trigyru, as may be implied (cf. 156 here), there remains the possibility that that irrigator is the same as the one named here. The ποταμός is not necessarily the Nile, since the word often means 'canal' in the papyri. The presence of quarrymen suggests that this hamlet lay nearer the Western Desert than the Nile, cf. intro.

223 προσχώσαντι . . . τὴν . . . ἀρουρ(αν) . . . τὴν ἀφανισθ(είσαν). It is not clear what the work was. Possibly he embanked the place where the waters had broken through and swept away the vines. Or alternatively he may have replaced topsoil that had been swept away. The noun πρόσχωσις appears in unhelpful contexts in **BGU II 656.7(?)**, P. Reim. I 52 bis 26. The verb appears in P. Ryl. IV 653.8 (προσχώνουσιν τὸ ῥέθρον = προσχωννύουσιν τὸ ῥέθρον), 10 (προσχώσαντας τὸ στόμιον (= στόμιον) τῆς διάρυχος), cf. 15 ἀποφράξ[co]υσιν τὸ ῥέθρον. The Rylands papyrus favours the view that the work of embankment was meant here.

223-4 For vines in Tarusebt see **1911** 182, 191, and for grapes and wine on the Apion estates see Hardy, 118-22.

224 πιττακ(ίσις). Cf. Hardy, 98, **XXVII 2480** 34 n.

225 π(α)ρὰ Θεοδώρου προ(νοσητοῦ) Ἀπελή. This is the person whose accounts this roll represents, see 143 n. In this case it seems unlikely that π(α)ρὰ should be translated as 'from'; more likely is 'by', cf. Kühner-Gerth i p. 510 (§ 440).δ. If so, one might suppose that it was here not much different from διά, 'by agency of', but in 246 hayseed is bought παρὰ two men, διά another. In other similar entries π(α)ρὰ does seem more likely to mean 'from', e.g. **1911** 191, where pots were bought from, presumably, the potters of Taruthinu. See also 170 and n., where I have translated it, very doubtfully, by 'on behalf of'.

225-7 For the βαδιστικὸν στάβλον see Hardy, 106-8, corrected as regards its connection with the *cursus uelox* by J. Gascou, *Travaux et Mémoires* 9 (1985) 57.

226 Ἀοί. This version is not in F. Preisigke, *Namenbuch*, or D. Foraboschi, *Onomasticon*, but cf. *Λόγ.* The iota here is a tall vertical which seems hard to interpret in any other way. The form may be a short genitive, cf. **XLIII 3102** 5 n., F. T. Gignac, *Grammar* ii, 56, 78-9.

228 κατωτίου. Cf. 230, 232-3, 235. See P. Lond. III 1164(h).10 (p. 164), where it appears as a two-oared boat serving as a tender (cf. 235 n.) to a grain-carrying boat of 400 artabas burden; cf. M. Merzagora, *Aegyptus* 10 (1929) 143. For boats connected with the Apion estates see Hardy, 109-10; add **XXVII 2480** 2, 15, 24, 26, 34, 36, all relating to a new *καρίς*.

229 ἐλαίου. This oil was evidently for lubrication, but its exact use is not clear. Cf. perhaps L. Casson, *Ships and Seamanship*, 205-6, 'there is some evidence that the tenons were greased to make them fit their slots'; also R. O. Fink, *Roman Military Records* No. 82.3, *olei in lib(urnam) Luci*, 'oil for the *liburna* of Lucius'.

230 A notary called John, cf. 255, appears in **XVI 1913** 27 (AD 555/6?), but need not be identical.

231 The counting of the days is inclusive: Pharmuthi 28-30 (3 days), Pachon 1-30 (30 days), Payni 1-30 (30 days), Epeiph 1 (1 day) = 64 days.

232 If *λεπιδίων* is rightly read, this entry duplicates 257 exactly and should not have appeared in the account twice. Cf. **XVIII 2195** 141 (*λεπιδίων*), **XXVII 2480** 2 (*λεπίδας*), **BGU II 544.8** (*λεπίδος ειδηράς κίςτας οκτώ*: so F. Preisigke, *Wörterbuch*, s.v. *λεπίς*; *λεπίδας* ed. pr., but cf. 9-10 ἦλου [χαλ]κοῦ κίςτας τρεῖς, 11 ἦλου ειδηροῦ κίςτας ἔνδεκα, 12-13 κέν[τρ]ογγ ειδηροῦ κίςτην μίαν). L. Casson, *Ships and Seamanship*, refers to lead sheathing, see especially the table pp. 214-16, but not to iron sheathing. However, the new reading by R. O. Fink, *Roman Military Records* No. 82, of P. Ryl. II 223.13-14 may be presented as *lamna[m] s ferream* (l. *laminae ferreas*) 'ii' in *lib(urnam) ueterem Timeti-fer(ri) p(ondo) librae ix s(emis)*, 'iron sheets, 2, for the old *liburna* of Timetus—iron, pounds 9 $\frac{1}{2}$ '. *Lamna[m] s* is also read in A. Bruckner, R. Marichal, *ChLA* IV No. 242. The low weight, 4 $\frac{1}{2}$ lbs. each on average, indicates that they were not particularly large. An 'iron

scale' could possibly be a plate used as part of a fastening in this case, although in P. Ryl. 223 it may be more likely that they were used for repairs.

233, 235 κηπαρισίων = κυπαρισίων. Cf. XVIII 2195 141, where perhaps expand the abbreviation to κυπαρισσι(ών). For cypress wood in shipbuilding see L. Casson, *Ships and Seamanship*, 212, 213 n. 52, P. Apoll. 31.1; 32.2, 3, 11. In P. Beatty Panop. 2.178 it is to be used for steering oars.

ἀτόπου, 'of unknown origin(?)'. This word meaning 'out of place' is never used literally or colourlessly but always figuratively, 'absurd, eccentric, monstrous'. Comparing 149 Μηνά ναύτου ἀπό Κόμα, see n., I guess that the clerk felt that the sailor ought to be identified by his origin and therefore put in ἀτόπου to show that it was not just a clerical oversight that it was not given.

235 It is not entirely clear that this κατώτιον is the same as the γεουχικόν κ. of lines 228, 230, and 232. The succession of entries 'price of cypress wood . . . for the landlord's κατώτιον' and 'to sawyers who sawed cypress wood . . . for the κατώτιον . . . lately belonging to . . . Scholasticus' suggests that it probably is, although it is strange to find this elaborate identification of the boat in the last entry referring to it and not in the first.

Another difficulty lies in the translation of τοῦ κατωτίου πλοί(ου) τοῦ ποτε τοῦ . . . Χολαστικίου. It might possibly mean either 'the catotion-boat lately belonging to . . .' or 'the catotion (i.e. tender, see 228 n.) of the boat lately belonging to . . .'

ποτε τοῦ μακαρίου Χολαστικίου. Cf. 3805 23, XVI 1912 149 ἐξ ἐπι[τρ]οπῆς τοῦ κόμ(ετος) Χολαστικ(ίου), XIX 2244 65 δι(ὰ) Πετρωνίου καταμ(εῖναντος?)—cf. I. F. Fikhman, *Proc. XII Int. Congr. Pap.*, 127-9—τοῦ κόμ(ετος) Χολαστικίου (Χολαστικίου ed. pr., but the papyrus has -ίου; iota was concealed in an unnoticed fold), XXIV 2416 19 ἐπίδ(ος) τῷ κόμ(ετι) Χολαστικίῳ, P. Wash. Univ. I 42.8-9 ἐπίδος τῷ δεσπ(ότη) μο(υ) τὰ πά(ν)τ(α) μεγαλοπρ(επεστάτῳ) περιβλή(πτῳ) . . . Χολαστικίῳ κόμ(ε)τι, P. Ross.-Georg. III 12.10 † σύν θ(ε)ῶ τῆ δεσποί(νῃ) μου Φιλοστοργ(ίᾳ?)—I suspect φιλοστόργ(ω) or φιλοστοργ(οστάτῃ) is more likely to be correct—μητρ(ί) † Χολαστικίος υἱό(ς) αὐτ(ῆς). Unfortunately none of these papyri has a date. It seems nearly certain that all the *comites* are the same, and not unlikely that the last one is also the same. If so, all are to be dated not later than AD 565/6.

236 δι(ὰ) Φιλοξένου προ(νοητοῦ) Νετηίου, cf. 260-1. In XVI 2032 possibly of AD 540/1, see BL VI 105, we hear of another steward of this hamlet called Cyriacus (46, 48). For the place itself see P. Pruneti, *I centri abitati*, 119. In PSI III 165.4 we find it mentioned along with Iscum Panga (1, 5) and Cissonos (4), and its appearances here and in 1911 indicate that the area of its stewardship cannot have been far from the one dealt with in this account, that is, it was in the far south of the Oxyrhynchite nome. Cf. 3805 108 n.

237 μανδακ(.). Possible expansions are μανδακ(ών), μανδάκ(ων), and μανδακ(ίων), from μανδάκης, μάνδαξ (or μάνδακον?), and μανδάκιον, see ZPE 46 (1982) 204. These words usually denote a measure of capacity, often translated 'bundle'. It may here therefore mean a receptacle that could be carried by a camel. However, H. Stephanus, *Thesaurus*, suggests that its basic meaning is 'skin, leather'. If so, it may refer here to leather harness, while *χουινί(ων)* will be rope harness. Somewhat comparable is XLVIII 3407 3-9 σπουδάσεται (= -ατε) τὸν ταυρελάτην μετὰ τῶν μόσχων καὶ τοῦ ζυγοῦ καὶ χουινί(ων) αὐτῶν ἐξέλασε (= -αι) . . . πρὸς κύρην λίθου. The ropes there, though, may be tackle for hauling stones rather than ordinary harness.

238 Cf. 1911 156, for the same sum to three *camelarii* for the fifth indiction *κατὰ τὸ ἔθος*, cf. Hardy, 109.

239 For *χάρτης* meaning especially 'papyrus roll' see N. Lewis, *Papyrus in Classical Antiquity*, 70-8.

διφθερ(ών). This word, meaning 'skin', often refers to writing material. There are other signs that it had some technical sense in the Byzantine period. In another Apion account PSI VIII 953.48-9 we find an allowance of jars of wine delivered to *bucellarii* λόγ(ω) ἀναλώμ(ατος) τοῦ Παῦνι μη(νός) ἀκολούθ(ως) τῷ καθ' ἐν ὄντ(ι) ἐν τῷ διφθερ() τοῦ ἀναλώμ(ατος) τῆ(ς) α ἰνδ(ικτίωνος), 'on account of expenses for the month' of Payni in accordance with the detailed account, which is in the διφθερ(), of the expenses of the first indiction'. If τῷ is right, διφθερ() must be some cognate of διφθέρα such as διφθέριον or διφθέρωμα. In this case it contained an itemized account of the global entry of the wine issued to the *bucellarii*. In the Hermopolite estate account P. Bad. IV 95 one fragmentary entry runs, ἐξ(οδιασμοῦ) τῆς μακα[ρί]α(ς) Θεοδ[ώρ]α(ς) διφθ[ερ] (554). In XVI 1877 15 an endorsement on a fragmentary record of proceedings before a *praeses Aetiae* runs, † διφθ(έρα) τῶν ῥίπαρ(ίων) τῆς Ὀξυρυγχ(ιτών). If τῶν διφθερ(ών) here retains the sense of 'skin' the papyrus rolls must serve some subsidiary purpose; perhaps they were used for drafts. It may be that important and authoritative records were kept on parchment.

τοῦ γεουχικ(οῦ) χαρτουλαρίου. It is not clear precisely what is meant by 'the landlord's secretary'.

Hardy, 94-5, distinguishes three groups of *chartularii*. Note too I 136 17-18 παρεχόμενον μοι . . . παρὰ τῶν αἰδεσίμων χαρτουλαρίων τοῦ ἐνδόξου αὐτῆς οἴκου.

In 1911 152, 155 there are payments *κατὰ τὸ ἔθος* for salaries to two *chartularii*, but no payment for papyrus such as might have been expected from *κατὰ τὸ ἔθος* here. One custom has been established, it seems, between the fifth indiction and the fourteenth, and the other has been discontinued.

241 ἐποικ(ίον) Λιθίνης. According to P. Pruneti, *I centri abitati*, 97, this hamlet is known only from XIX 2243(a) 31, where it appears under the heading ἐν τῇ Νοτίῃ Παρορίῳ (= -ίω), line 30. In the same section there also appears the ἐποίκιον *Σωφροσύνης* (32, cf. 98 here), Πεκτή = Πεκτύ (33, cf. 85, 86, 99 here; 1st *pagus*: Pruneti, op. cit., 141-2), and Παγγύλεως (34), which does not appear in this account, but which is known to have lain in the first *pagus*, see Pruneti, op. cit., 129.

242 ἐδάφ(ος) Μεγάλου Γηδίου. Cf. μηχ(ανής) Μεγάλου Γηδίου, 132 above. Before Διογένους understand perhaps δικαίου, cf. 102, 100 n., but there was also an ἔδαφος Διογένους, cf. 126, 1911 53.

ἐδάφ(ος) Ὀξιδά. This place has not been found elsewhere.

243 ἀντι χόρτου. It seems that the field-guards were supposed to be paid in kind, cf. XVI 1913 16-18 (wheat). They seem to get money again in XVI 2033 ii 7.

προσάπαξ. My translation has 'in a lump sum', but perhaps it means 'once and for all', i.e. as the last payment of arrears of the previous indiction.

244-5 Cf. 1911 178-80, 1913 36-9, XVIII 2195 132-3, all three entries very similar to this one. They differ in the dates, the names of the *χορτοπαραλήμπται*, and in the sums involved. This and 1911 concern the same stewardship, but 1913 and 2195 are from two others, so that it appears that the expense of these regular purchases of hayseed was shared among at least three stewardships. In 1913 we find that the steward concerned accounted for two thirds of the amount bought while the remaining third fell to the share of another steward: ἀφ' (ὧν) ἠνέχθ(η) δ(ιὰ) Ἰουλιανοῦ προ(νοητοῦ) Ἀκτουαρίου κατὰ τὸ γ μέρ(ος) κτλ. (38-9).

The next entry is similar, but the hayseed is not bought from the same source.

244 Ἄρεως, cf. 248. See P. Pruneti, *I centri abitati*, 33-4, citing only the parallel passages (see previous note) and the very doubtfully read SB VI 9270.2, 19. The view of M. Drew-Bear, *Le Nome Hermopolite*, 70, that there was no place of this name in the Oxyrhynchite nome and that this is the Hermopolite village seems very likely to be correct, cf. 246 n. It might well have been convenient to go southwards for the purchase of seed, since the portion of the Apion estates here concerned lay in the south of the Oxyrhynchite nome.

Φιλοξένου χορτοπαραλήμπτ(ου). A man with the same name and title occurs in XVI 2032 74. J. Gascou, *CE* 47 (1972) 243-5, has argued that 2032 should be assigned to the indiction year AD 540/1, cf. BL VI 105. See now also ZPE 70 (1987) 56, in a text dated 19 June AD 556.

245 τῆς γεουχικ(ῆς) αὐτουργί(ας) Πάθ Ταμπεμοῦ καὶ Νοτί(νης) Παρορ(ίου). Cf. 247. The same αὐτουργία is mentioned in the three parallel passages (see 244-5 n.) with the variation that γεουχικ(ῆς) is replaced by νοτί(νης) in XVIII 2195 133. This looks like a clerical error, but it need not be. The collocation Πάθ Ταμπεμοῦ occurs only in these passages. The second element is the name of a village in the Eastern toparchy at first, later in the fifth *pagus*, and plausibly identified with the modern village of Tambu, see P. Pruneti, *I centri abitati*, 188-9 and map (at end). The Νοτίῃ Παρόριος seems to belong to an area farther south associated with the Upper (= South) toparchy and the first *pagus*, see 241 n., but that it was not far from Tambu is suggested also by XIX 2243(a) where the section devoted to ἡ Νοτίῃ Παρόριος (30-4) is followed immediately by that for Ταμπεμ[οῦ] (35-58).

246-8 Cf. 244-5 n.

246 π(αρά) . . . δι(ὰ). Cf. 225 n.

Κινκαρέτ. This name has not been found elsewhere in this form, but since Ἄρεως (244, 248) is a Hermopolite village, it is likely that this spelling represents *Κινκαρή*, which was indeed near Ἄρεως, see M. Drew-Bear, *Le Nome Hermopolite*, 254-6. The known Coptic versions are *TCINSEPEPT* and *TCENSEIPEPT* (ibid. 255), which show a consonantal group at the end not hitherto present in Greek versions. The tau here is a tolerable equivalent of *ϥ* (= ht). It is a divided tau such as occurs in *μετά* in 247. These are less usual in this document than the T-shaped ones and resemble gamma, which was my first reading, but the Coptic versions strongly support tau.

Ὀνωφρίου χορτοπαραλήμπτ(ου), cf. 244. See also 1911 178-9 δ(ιὰ) Ὀνωφρίου καὶ Ἰωάννου χορτοπαραλήμπτ(ων), 1913 36 Ὀνωφρίου χ.

249 ἐκχύσεως. Cf. F. Preisigke, *Wörterbuch*, s.v. (2). In the modern sakiyeh this is a wooden trough into which the pots on the vertical wheel discharge their water. At one end of the trough is an extension

at right angles through which the water flows away into a channel, see L. Ménassa, P. Laferrière, *La Sāqia*, p. 9, fig. 8. M. Schnebel, *Landwirtschaft*, 76-7, took the view that *ἐκχύσεις* were not connected with sakiyehs, but clearly the *μηχαναί* concerned here were sakiyehs and not irrigators of any less efficient type.

μηχ(ανήν) Τῶν Χωρ(ίων) ἐποικ(ίου) Ταρουσέβτ. Again, cf. 221-2 n., the name *Τῶν Χωρ(ίων)* must have been common, see XVI 1988 17-18, where we have an irrigator *καλουμέ(ν) Τῶν Χωρ(ίων) ἀντλοῦσαν εἰς τὰ αὐτὰ χωρία*, but this presumably stood, not in Tarusebt, but in the hamlet of Neu, which was the home of the tenant farmer whose contract 1988 is. See also XIX 2244 28 (Calorias), 31 (Matreu), 61 (Scelus); cf. 13 *μηχ(ανής) κ[α]λουμ(ένης) Τῶν Χωρ(ίων) Καλιούτος* in Leonidu. It is not quite so clear that it is a name in 1911 157-8, as amended above in 221 n.

250 The column totals are correct.

251 On the cultivation of *ἀραξ/ἀρακος* see M. Schnebel, *Landwirtschaft*, 185-9.

254 = 1911 153, where the words *κατὰ τὸ ἔθος* do not appear. This is because by far the largest share of the transported grain had only been granted to the monastery in AD 556/7, the same year which is concerned in the account, see 1911 147-51 = 184-7 here.

255 Cf. 230 and n. for John the notary.

256 Again the counting is inclusive, Epeiph 2-30 (29 days), Mesore 1-10 (10 days) = 39 days, cf. 231 n.

257 See 232 n.

258-62 This entry raises several unanswered questions. The expert in shipbuilding estimated sol. 18 for payments to carpenters (*τέκτονες*); a quarter, sol. 4½, is deducted for sawyers (*πρίκται*). Why? And why is it specifically stated that sol. 4½ are one quarter, while sol. 4 are deducted for shipwrights (*ναπηγοί*) without any statement about the proportion that they represent? Were the sawyers and shipwrights paid from some other account? Of the sol. 9½ remaining 3 had already been paid from another steward's account, cf. 236, so that the remainder should be sol. 6½, but it turns out that a further deduction has been made for no specified reason and this account paid out sol. 6½ less car. 29½, a fairly large loss for the carpenters, since car. 24 = sol. 1. The rate of the deduction is car. 4½ per sol.

Once we are alerted by this entry to the fact that the estate made deductions from its disbursements, it leaps to the eye that the same rate, car. 4½ per sol. 1, was applied in many of the entries here. Although there were other rates, this is the highest and the most common. The explanation of the practice of noting payments in solidi less carats given by L. C. West, A. C. Johnson, *Currency* 146-7, is that a tax-collector could so record the deductions that he was entitled to make on each payment and know where he stood at any moment. In 3804 the deductions seem to have been made by the estate in favour of itself before disbursement. These are similar to a few cases briefly considered by West, Johnson, *ibid.* 153. Note that the minus carats system of notation seems to have been applied in a different way in the calculations on the back of this roll, see 3805 7-8 n.

It may be useful to list these entries according to the rates:

1. At car. 4½ per sol.
 - 213-17 To canal workers: wages and stones for a cistern
 - 218-19 Purchase of old wine jars
 - 221-4 To canal workers: wages
 - 225 Purchase of riding animal
 - 226-7 Purchase of green fodder for riding stable
 - 228-36 Boatbuilding: wages and materials
 - 237 Purchase of camel harness
 - 241-3 To field guards: wages
 - 246-8 Purchase of hayseed; note 244-5, similar, at car. 3½
 - 249 Purchase of part for an irrigation machine
 - 251-3 Purchase of chickpeas (rounded up: sol. 3¼ treated as sol. 3½)
 - 255-62 Boatbuilding: wages and materials
 - 263-6 Purchase of millstones
 - 267-9 Purchase of various animals
2. At car. 4 per sol.
 - 184 Monetary value (notional?) of grain delivered to a monastery

3. At car. 3½ per sol.
 - 244-5 Purchase of hayseed; note 246-8, similar, at car. 4½
4. At car. 3½ per sol.
 - 151-3 To mason: wages
 - 155-6 To four taskmasters: wages? (This is the rate on the total of four payments. The first two payments are actually at that rate, the third man received a slightly more favourable rate of car. 3½, the fourth a slightly less favourable one of car. 3⅞. The last two payments involved thirds of a solidus, awkward to calculate.)
 - 239-40 Purchase of papyrus rolls for estate use
 - 254 Charge for transport of grain donated to a monastery
5. At car. 3 per sol.
 - 147 Donation to a rural church; cf. below section 7
6. At car. 2½ per sol.
 - 154 To estate steward: salary
 - 238 To camel drivers: salary
7. At car. 1 per sol.
 - 144-8 Donation to rural churches. (Five out of six churches receive this most favourable rate; one, for no visible reason, gets the rate of car. 3 per sol. The global figures in 144 confirm the itemized account in 145-8.)

In all the other entries of the expenses section the sums of gold are expressed in solidi and fractions of the solidus, just as they are in the receipts section. Most of these are not cash payments, but simply rent concessions. Only two entries appear to concern real disbursement without deduction. One is for payment of freight charges on a shipment of grain for taxes (149-50); no doubt it had to reach the state granaries net of charges. The other is for customary donations to a martyr's shrine made in the names of Apollon and Phoebammon, sons of a bishop (164-7). Hardy (pp. 141-2) plausibly deduced that the Apion family had acquired land already burdened with this obligation. Possibly the original donors had specified that the donations were to be free of encumbrances, although the Apion donations to rural churches were liable to deductions (144-8). One of the grain transfers to the monastery of Abba Andrew seems to have been made for money, although at a favourable rate (184), and the estate also paid for the transport of these 1,000 artabas plus the smaller donation of 12 artabas (254), making a deduction of car. 3½ per sol., which is at least not the highest rate. The other two grain donations to the same monastery have no value set upon them (185-7). There is no entry for the transport of the free donation of 100 artabas, which may therefore have devolved upon the monastery.

Finally we should notice that the regular pattern of the carat deductions in the estate's disbursements does not reappear in the instalments which the steward paid into the estate's account, see 276-80 n.

For my guess at a general explanation for the use of the minus carats system see 3805 7-8 n.

258 *καλαφατίζουσι*. In 262 *καλαφατιζομέ(νων)*, the middle, is used without any distinction in meaning.

On caulking see L. Casson, *Ships and Seamanship*, 14 n. 15, 15, 209, 339. Presumably the boat was built by the ancient Egyptian system, so the first two references are the relevant ones. It is noticeable, however, that the word *καλαφατίζω* and cognates do not appear in the papyri till the sixth century.

κατώτων = *κατώτιον*. Cf. 228, 235 nn. For the spelling see F. T. Gignac, ii 27-9.

259 *Ἀπολλῶ ναπηγοῦ τῆς Κυνών*. This shipwright from Cynopolis is not known from elsewhere. The Apion family had property in the Cynopolite nome, see Hardy, 81-2, 84-5.

263 *Σερήνου καὶ Μεγάλου μυλοκόπ(ων)*. LI 3641, of 7 February, AD 544, is a contract addressed to Flavius Apion II by Aurelius Serenus son of Elias, who agrees to serve Apion as a *μυλοκόπος* for his own lifetime. Elias may be the same as the *μυλοκόπος* of that name in XVI 1983 of AD 535, and his son may well be the same as the Serenus here. If so, the indiction 14 of our document, which must be later than the indiction 5 of 1911 = AD 556/7, is more likely to be AD 565/6, twenty-two years later than the beginning of Serenus' career, than any later indiction 14, cf. introduction.

264 *τοῦ νέου καλάθου τοῦ μυλαίου τοῦ γεουχικ(οῦ) ἐλαιουργί(ου) τοῦ κτήμα(τος) Ἀπελῆ*. On *κάλαθος* as part of a mill see LI 3639 10-11 n., though my theory offered there that it means the upper millstone of a donkey-mill is damaged by the information here that 'old stones', see 265-6, could be saved when a new one was installed. The upper stone of a donkey-mill was made in one piece. A complicated device made

up of several slabs of stone secured round wooden spars and thought to have been used for grinding or milling is illustrated in E. M. Husselman, *Karanis. Topography and Architecture* (1979), Pl. 92a, cf. p. 54.

The oil factory was the property of the owners of the estate and only leased to the oil-maker, see Hardy, 130-1, cf. line 77 above.

265-6 According to the contract of AD 544, LI 3641, the *μυλοκόπος* was to receive sol. 2½ 'for every new *strobilus* and every new *calathus*' (13), *ἐμοῦ λαμβάνοντος τοὺς παλαιούς λίθους*. It was not clear whether it was sol. 2½ for each part or for both. We may now guess that it was for both and that the *strobilus* was more expensive, because the price of a *calathus* here is only sol. 1½, from which is deducted sol. ½ for the old stones, in spite of what 3641 appears to state, and even from the remaining solidus a further charge of car. ¼ is deducted. The rate of this last deduction is the same as that applied to the carpenter's wages in 258-62 above, see n.

267 *ὄνοθλη(εία)*. This is a rare word cited only from the papyri, VI 922 24, 25, P. Colt Nessana 89.31, 34, both VI-VII, and from the glossaries, CGL II 384.16, III 399.54, 56. Ducange adds Demetrius Constantinopolit. lib. 2. Hieracosoph. cap. 9 *γάλα ὄνοθληεία, ἔλαιον ῥόδιον*, which with the kind assistance of Nigel Wilson I have located in R. Hercher, *Aelian, Var. Hist.* 2 (Leipzig 1866) p. 524. 13 (§ 15). Add P. Vindob. G 23204 fr. A. 4 (VI; *Jahrb. d. österreichischen Byzantinistik* 33 (1983) 8), G 26018 (VII; *ibid.* p. 10, 4 n., now P. Rainer Cent. 12.20).

268 *Παβάρι*. This is a new name, i.e. not in F. Preisigke, *Namenbuch*, or D. Foraboschi, *Onomasticon*. The form is possibly a short genitive, cf. 226 n.

ἀρδέια. The irrigation was presumably by sakiyeh, powered by the draught-animals. We should prefer *ἀρδ(είαν)* to *ἀρδε(υειν)* in XVI 1913 3.

268-9 *τῆς γεωχικ(ῆς) αὐτουργί(ας) Ἐξω τῆς Πύλης*. We know a good deal about something called the *προάστειον Ἐξω τῆς Πύλης*, see LI 3640 2 n., and especially G. Husson, *Rech. Pap.* 4 (1967) 192-6, *ead.*, OIKIA, 235-6. It was a palatial residence of the Apion family, presumably close outside one of the city gates of Oxyrhynchus, with associated vineyards, orchards and gardens. The word *αὐτουργία* implies that some land there was worked by employees rather than tenant farmers, which seems to be new information. On *αὐτουργία* in the Apion estates see Hardy, 117. However, 3805 70 records a payment for hunting rights *δ(ιά) τῶν γεωργ(ῶν) Ἐξω τῆς Πύλης* and these were presumably tenant farmers.

270-4 This section is paralleled by 1911 206-11.

270 The totals are correct, i.e. art. 291¼ choen. 1 (168), + art. 1, 196 (194), + 48 (250) = art. 1, 535¼ choen. 1, and sol. 38 ½ less car. 4 ¼ (168), + sol. 21 ¾ (194), + sol. 39 ½ less car. 18 (220), + sol. 54 ½ less car. 229½ (250), + sol. 26 ¼ less car. 116 ¼ (274) = sol. 179 ½ less car. 405. These carats are converted into solidi and fractions at 24 car. per sol., i.e. 405 = 16 ¾ or 16 ½ ½, and then deducted, i.e. sol. 179 ½ ½ minus sol. 16 ½ ½ = sol. 163 ½.

271 The excess expenditure, cf. 282-8 and n., from the account of the 13th indiction (AD 564/5) naturally cannot be checked from this account of the 14th indiction. It is stated at sol. 4 ½ and added to the current total, i.e. 163 ½, to make sol. 167 ½.

καὶ (δην.μυρ.) ρε εἰς νο(μ.) δ. These denarii come from col. ix, see 217, a subtotal, and 220, the column total. The subtotal and the column total appear at first sight to neglect the entry in 215 of den. myr. 600 expended on foodstuffs, but see 217 n., for a suggestion that the final total is correct.

The conversion of den. myr. 1,200 to sol. ½ gives a value of den. myr. 4,800 for the solidus, see further 272 n.

272 The figures for receipts cannot be completely checked because of damage, especially to col. i, but the figures here are the same as those given at the end of the receipts section of the roll (141-2); see 141-2 n. for some difficulties which they raise. It is very striking that they are the same as those given in 1911 207-8. (The ed. pr. gives *αφλε* 'L', but the photographs leave no doubt that 'L' is wrong and that the papyrus has *δ*, cf. 1911 69.) This means that the Apion rent-roll for this section of their estates remained the same from AD 556/7 to AD 565/6, see introduction.

Here the last element of the receipts, den. myr. 2,800, is converted to sol. ½ ¼ ¼ = ¾, while the same sum in 1911 208 is converted to sol. ½ ¼ = ¾. The photographs confirm this and the grand totals show a corresponding difference, here sol. 647 ¾, there sol. 647 ¾. The theoretical value of the solidus in this context for AD 556/7 appears, therefore, to be den. myr. 5169.2304, and for AD 565/6 it appears to be den. myr. 4977.7776. However, it is obvious that the ancient clerks did not work with figures like this. In considering 1911 208 along with XVIII 2195 48, where den. myr. 3,000 = sol. ¾, and 143-4, where den.

myr. 2,400 = sol. ¾, L. C. West and A. C. Johnson, *Currency*, 159-60, came to the conclusion that some unmentioned charge was included. All these cases represent occasions when the Apion estate accepted myriads of denarii, inconvenient for large transactions, and we may guess that their banker charged for changing this money into gold. In our case a clue has been given in 271, where den. myr. 1,200 of expenditure were converted to sol. ½, giving a nice round and therefore plausible value for the solidus of den. myr. 4,800, see 271 n. If we use this value to reconvert the solidi, we reach these results:

3804 272	den. myr. 2,800 = sol. ¾ = den. myr. 2,700: charge? den. myr. 100
1911 208	2,800 = ¾ = 2,600: 200
2195 48	3,000 = ¾ = 2,700: 300
143-4	2,400 = ¾ = 2,300: 100.

These figures look promising, but 2195 48 presents an anomaly and an inconsistency within 2195 itself. When I consulted the papyrus I found that the reading was wrong. Instead of *νο(μ.) L κδ' μη'* read now *νο(μ.) L ιβ' μη'*, i.e. sol. ½ ¼ ¼ = ¾. The entry in the table should now run:

2195 48	den. myr. 3,000 = sol. ¾ = den. myr. 2,900: charge? den. myr. 100.
---------	--

This restores consistency inside 2195, and allows us to suppose that in the year AD 556/7, represented in 1911, the banker could charge den. myr. 200 for a transaction of this kind, while in AD 565/6 (3804) and in a later tenth indiction which was probably AD 576/7 (2195) the charge had been reduced to den. myr. 100. It is certain that 2195 is the latest of these documents because the banker, John, who appears in 2195 147 also appears in I 144, which has a date-clause of AD 580.

Fractions of a solidus would mostly have been paid in base metal coins, otherwise described in terms of myriads of denarii, since gold coins were minted only as solidus, sol. ½, sol. ¾, and sol. ¾. The carat too, being a unit of weight equal to sol. ¼, was only payable in bullion or in myriads of denarii, cf. L. C. West, A. C. Johnson, *Currency* 138-9.

A solidus of den. myr. 4,800 would be divided as follows:

sol. ¾	= den. myr. 3,200 (double <i>triens</i>)
sol. ½	= 1,600 (<i>triens</i>)
sol. ¼	= 800
sol. ⅓	= 400
sol. ⅕	= 200 (1 carat)
sol. ⅙	= 100
sol. ⅛	= 50
sol. ⅑	= den. myr. 2,400 (half solidus)
sol. ⅒	= 1,200
sol. ⅓	= 600

These calculations may be too simplistic, but it seems very attractive and plausible to accept them, with the corollary that the solidus was reckoned at den. myr. 4,800 in these contexts for a period of about twenty years.

273 *πλήρ(ης) ὁ εἶτος*. Here the receipts and expenditure balance exactly; in other cases there was a small surplus to be sold, cf. Hardy, 100. He concludes that the concern of the Apions was to have their income in cash rather than in kind.

λοιπά . . . νο(μ.) νπ L ρς', 'remainder . . . sol. 480 ½ ¼'. The money surplus of the same area in AD 556/7 was sol. 503 ¾ (1911 211). This fall of about sol. 22 in a small section of the estate over a nine-year period can be compared with the fall of the gross total income of the country properties of the Apion family in the Oxyrhynchite area over about forty years in the sixth century (c. AD 540-86) from sol. 20,010 to 18,512. It is at least in line with the view that the revenues were 'stagnating' or even 'on the downturn', see J. Gascou, *CE* 47 (1972) 243-8, esp. 248.

274 The column total is correct. Of course, it totals only the amounts in 251-69 and does not reflect the summaries in 270-3.

275 (*δν*), cf. 279. The symbol is basically L-shaped, cf. H. C. Youtie, *Scriptumculae*, i 272. At the foot of the vertical stroke the pen was kept on the papyrus and moved diagonally upwards to the left for a short distance before beginning the horizontal, so making a small rightangled triangle outside the corner of the basic L shape.

Ἀναστάσιον τραπεζίτην, cf. 279. J. Gascou, *CE* 47 (1972) 244 n. 3, gives a revised list of the estate bankers or cashiers, with references. For Anastasius he gives I 145 (AD 552), XVI 1970 (AD 554), 1914 (AD 557?), 1911 (AD 557). The present text is the latest referring to him and the latest date it gives is 30 Mesore, indiction 14, i.e. 23 August, AD 566, see 279.

276-80 The account of these various payments is mathematically correct. The steward collected sums in gold and other coin to the value of sol. 647 $\frac{3}{48}$ (272) and made disbursements to the value of sol. 167 $\frac{1}{2}$ $\frac{1}{96}$ (271), and was obligated to pay to the estate the remainder, sol. 480 $\frac{1}{2}$ $\frac{1}{96}$ (273). He discharged the obligation in three instalments:

Tybi	25 (20.1.566)	sol. 200 less car. 1,012 (car. 5.06 per sol.)
Pharmuthi	25 (20.4.566)	sol. 200 less car. 1,200 (car. 6 per sol.)
Mesore	30 (23.8.566)	sol. 230 less car. 1,375 $\frac{1}{2}$ $\frac{1}{4}$ (car. 5.9815217 per sol.)
<hr/>		
Total		sol. 630 less car. 3,587 $\frac{1}{2}$ $\frac{1}{4}$ (= sol. 149 car. 11 $\frac{1}{4}$) = sol. 480 car. 12 $\frac{1}{4}$ = sol. 480 $\frac{1}{2}$ $\frac{1}{96}$.

There are different rates of deduction on payments made for similar purposes and in two cases the rates seem to involve difficult fractions. The situation is very similar in 1911 211-17. All the payments are said to be 'with *rhope*', which is usually a charge of car. $\frac{1}{2}$ per sol. for weighing coins, see L. C. West, A. C. Johnson, *Currency*, 133, 141. This, however, does nothing to improve the symmetry of the figures. The pattern is very different from that of the carat deductions from the estate's disbursements, which are at various, always easily calculable, rates, and no higher than car. $\frac{1}{2}$ per sol., see 258-62 n.

One guess at the explanation might be that payments into the estate account were carefully weighed and calculated, so that charges could be made for worn gold coins and possibly for payments in other coins, cf. 272 n. However, there is some resemblance here to the more complicated pattern of the receipts noted in the minus carats system on the back of this roll, for which see 3805 7-8 n., where I offer another guess at a general explanation for the use of the minus carats system.

282-8 Apollon and Isaiah and partners left the Apion holding of Tarusebt and went away or up (read presumably ἀπελθεῖν or ἀπελθεῖν), perhaps into the Western Desert or just possibly to a monastery or a community of monastic cells called Μέγα Ὄρος, see H. Cadell, R. Rémondon, *REG* 80 (1967) 343-9. The effect of their departure was not known till after the closing of the account for the 14th indiction and it had to be reserved for the next indiction's account. Eight solidi are credited to them, which presumably means that that sum is written off as irrecoverable, and forwarded as expenditure to next year's account, cf. the entry in 271 ἀπὸ πλείονος λόγου.

It is not clear why the concession was intermittent, made, it appears, in the 10th indiction, not in the 11th and 12th, but resumed in the 13th and 14th. The grammar is not clear in 285. For the translation I have guessed that the clerk left something out, e.g. καὶ <διὰ τὸ> μηκέτι ταῦτα συγχωρηθῆναι, 'and (because?) these were no longer conceded'.

Apollon and Isaiah do not appear elsewhere in this roll, but they do appear in 1911 146 συνεχωρήθη Ἀπολλῶ καὶ Ἰσαΐα καὶ κοιν(ωνοίς) ἀπὸ Ταρουσέβ ὑπὲρ ἐδάφ(ου) Ἐρωτος καὶ Ἀμάτου ἀπὸ νο(μ.) ιγ νο(μ.) δ. The concession of sol. 4 is the same, but the assessment for that year was sol. 13 rather than sol. 6 as here. Either the land was becoming less productive, or the extent had been reduced.

284 ἐδάφ(ων). The ink is faint and rubbed here, but the text seems to have ἐδαφῶν plural.

3805. ESTATE ACCOUNTS

No inv. no.

288 x 30 cm

AD 566 or later

These accounts occupy the back of 3804, which is a formal fair copy of a steward's account of the finance of his area for the year AD 565/6. It no doubt formed part of the records of a central bureau in Oxyrhynchus from which the Apion estates in the nome were administered. When it was no longer needed as evidence, its blank back was used in the bureau to take these accounts, which are of a much less formal kind.

They record miscellaneous financial transactions relating to places in every part of the nome, that is, the place-names include some known from each of the six toparchies into which the nome was divided in earlier times. However, there are no column totals or final totals as in 3804, col. ix degenerates into mere jottings, col. iv has been written upwards probably after cols. iii and v had been written in the normal way. Col. x, the final one, is also written upwards. Both these columns have calculations only; the transactions are not identified. There are numerous alterations throughout, including a few seeming mistakes. It is fairly clear that the document contains internal office memoranda, which were worked out or tried out on the blank paper of the back of 3804 before being transferred to fair copies elsewhere.

There are several items of individual interest: an emphyteutic lease (12), rent of a synagogue (56-7), a mule-cart used by the governor (82-4), scrap-metal sold perhaps to a cuirassier (111-12), to name only the most intriguing.

	(2nd hand) 'As excess (?): car. 13.'		

1-6 Since this account is written upside down in relation to the recto, the calculations which show that col. i of that document is the first, see 3804 1-14 n., also show that not very much can be lost from the beginning of this one. However, there may have been more blank space available on this side, because the roll may have had a protocollon written in a large stylized script (cf. e.g. P. Cair. Masp. II Plates VIII, XXI, XXV, XXVI), the back of which would have been available. Col. i here, therefore, was not necessarily the first column on this side.

7-8 There are many entries below on the same pattern. The mathematical calculations are fairly

simple and well paralleled, but it remains unknown what precisely is meant when a payment is expressed in terms of solidi minus carats or described as being by private, or public, or Alexandrian, standard, see the discussion in L. C. West, A. C. Johnson, *Currency in Roman and Byzantine Egypt* 140-56. It seems clear, however, that it is not a matter of coins of different weight, but only of accounting terms and charges, see further below.

The payment, a rent presumably, is expressed first as sol. 3 — car. 12, by private standard. (The solidus has twenty-four carats.) Private is converted to public standard by deducting a further two carats per solidus, see West, Johnson, *Currency*, 140. In this case, therefore, a further six carats are deducted, making sol. 3 — car. 18. The carats are converted to solidi and fractions of a solidus, for reasons which are not very clear since the next calculation tacitly converts them back again: i.e. car. 18 = sol. $\frac{3}{4}$ (except for $\frac{3}{4}$ all fractions must have a numerator of 1); sol. 3 — sol. $\frac{3}{4}$ = (sol. $2\frac{1}{4}$ =) sol. 2 + car. 6. It is stated that there are no charges for *rhope* and *incrementum*, see West, Johnson, *Currency*, 133, 141, (on *rhope*); 142, 145 (on *incrementum*). Public standard is converted to Alexandrian allegedly by adding car. $\frac{1}{4}$ per sol. 1, see West, Johnson, *Currency*, 144, but in fact the figures are rounded so that no fractions other than car. $\frac{1}{2}$ and car. $\frac{1}{4}$ can appear in the results. In this case the one third (two sixths) required for two solidi is rounded up to car. $\frac{1}{2}$, which is added to the preceding sol. 2 + car. 6 to give the final total 'by Alexandrian standard' of sol. 2 + car. 6 $\frac{1}{2}$.

Throughout 3805 the total for each entry is presented as being 'by Alexandrian standard', having in most instances been converted from 'private standard' by way of 'public standard'. In 3804 the standard is evidently 'private standard' throughout, although the standards are mentioned in only one entry (150), where payment to shippers for freight on a grain cargo is given first 'by Alexandrian standard' at sol. 1 $\frac{2}{3}$ and then 'by private standard' at sol. 1 $\frac{2}{3}$, which is repeated as the total for the entry and used towards the column total in 169 (short by sol. $\frac{1}{96}$, according to my calculation, see 169 n.), and hence towards the sum total of expenses (270). By way of explanation one might guess that the *ναύλον* *Ἀλεξανδρείας* had to arrive in state hands at Alexandria and that the state levied surcharges on the money it collected from the Apions, that is, that the Apions had to pay sol. 1 $\frac{2}{3}$ as the equivalent of a nominal demand for sol. 1 $\frac{2}{3}$. This shadowy beginning of an explanation may be applied also to the entries in 3805, see below.

In 3804 receipts are expressed in solidi and fractions of the solidus, only expenses are recorded in the minus carats system. It seemed to make sense that the minus carats represented deductions made by the estate in favour of itself on most of its disbursements. There were at least seven rates, from car. 4 $\frac{1}{2}$ per sol. down to car. 1 per sol., see 3804 258-62 n. In 3805 we again have many entries which make use of the minus carats system of notation. The nature of the transactions is obscured by the fact that all the entries are introduced by *δ(ιδ)*, whereas 3804 had *π(αρά)* for receipts and for expenses had the dative or *ὑ(πέρ)* *τι(μῆς)*, or the like. It could even be that we have both receipts and expenses in 3805, but most entries are more easily interpreted as receipts, which makes it impossible to apply the same explanation of the minus carats system.

Moreover, the pattern of the rates is different from that in 3804. For example, there are at least twelve different rates as against seven in 3804. The commonest rate in 3804, car. 4 $\frac{1}{2}$ per sol., is again well represented, but car. 4 per sol., which occurs only once in 3804, is by far the commonest here. The list is as follows:

1. At car. 5.3571428 per sol.—rounding of 5 $\frac{1}{3}$?
108-9 From a phrontistes, reason not clear
2. At car. 5 per sol.
87-8 Communal rent on two holdings
3. At car. 4.6315789 per sol.—rounding of 4 $\frac{2}{3}$?
26-7 For dykes
4. At car. 4 $\frac{1}{2}$ per sol.
59 Messenger for journey of *praeses*
72-5 Rent for land?
82-4 For fodder for carriage mules of *praeses*
102-3 Sale of wood
106-7 Sale of wood
111-12 Sale of old ox-plough
113-15 Theft of wood? (Penalty?)
118-20 Sale of baked brick

- 136-7 (Unspecified)
 140 (Unspecified)
5. At car. 4.35 per sol.—rounding of $4\frac{3}{8}$?
 36-7 Rent of a warehouse
6. At car. 4.2406015 per sol.—rounding of $4\frac{1}{4}$?
 97-9 Sale of barley
7. At car. 4.1875 (= $4\frac{3}{8}$) per sol.—at car. 4, plus surcharge of car. $1\frac{1}{2}$?
 95-6 Arrears of gold for dykes
8. At car. 4.0247933 per sol.—at car. 4, plus surcharge of car. $1\frac{1}{2}$?
 52-4 From villages for . . . ?
9. At car. 4 per sol.
- 7-8 Rent on land?
 9-10 Rent on land?
 16-17 Rent on land?
 18-19 For transport of fodder
 20-1 For transport of fodder
 22 For price of chaff
 23 Customary payment?
 24-5 For transport of fodder
 31-3 From villages for wages of *tracteutes*
 41-2 For price of chaff
 43-4 „ (rounded)
 50 „
 51 „
 61-3 For *catastatice* (unknown)
 68-9 For fixed charge on wine?
 70-1 For hunting
 76-8 Communal rent
 78-81 For belongings(?) of inhabitant of Palosis
 89-90 Rent of orchard
 91-2 Rent of land
 93-4 For dykes
 104-5 From pig merchants (4.05, but rounded?)
 116-17 Hire of a fishing boat
 122-4 (Sale of trees?)
 125-6 Sale of trees
 127-8 Unspecified (4.0714285, but rounded?)
 133-5 Unspecified
10. At car. $3\frac{3}{8}$ per sol.—rounding of $3\frac{3}{8}$?
 13-15 Rent on land?
11. At car. 2 per sol.
 38-40 Interest on mortgage
12. At car. 1 per sol.
 28-9 For dykes

In 138 minus car. 112 $\frac{1}{4}$ on sol. 252 $\frac{8}{8}$ represents the odd rate of car. 0.4438037. Since the sum is $\kappa\upsilon\beta(\sigma\pi\eta)$, at first sight it looks as if this deduction might be for $\rho\sigma\pi\eta$, a charge for weighing, which is conventionally car. $\frac{1}{2}$ per sol., see West, Johnson, op. cit. 133, 141. This cannot be right, because the sum following in 139 is $\epsilon\kappa\tau(\acute{o}\varsigma) \rho(\sigma\pi\eta\varsigma)$ but has minus car. 48 $\frac{1}{4}$ on sol. 22 $\frac{8}{8}$, representing a rate of car. 2.5597082 per sol. This may be the total of individual payments carrying different rates, although the average would be low.

These last two are obviously out of the ordinary, but for the usual kind of individual entry listed above a sort of explanation, based on the shadowy explanation of 3804 150 given above, might be hazarded. I guess that each entry records a sum of money which had, at least theoretically, to be delivered in Alexandria net of charges after being collected locally through the administration of the estate. The motives for the

payments were evidently very varied. In 7-8 the payment was on land, perhaps a rent, due in Alexandria as sol. 2 car. 6 $\frac{1}{2}$. The local estate administrators collected sol. 3 from the tenant and entrusted them to the state or public banking system, very little understood, see Johnson, West, *Byzantine Egypt* 173-5. The banker credited car. 12 (car. 4 per sol.) to the local account of the estate for the estate's administrative purposes, and charged car. 6 (car. 2 per sol.) for transferring the remainder to an account in Alexandria, thus reducing the sum to sol. 2 car. 6 'clear by public standard'. However, the banker allowed a rebate of car. $\frac{1}{2}$ (car. $\frac{1}{4}$ per sol. = $\frac{1}{8}$, rounded up to $\frac{1}{2}$), which rebate was given, not to the local account, but to the Alexandrian account, so that the total 'by Alexandrian standard' was sol. 2 car. 6 $\frac{1}{2}$. This explanation of 'conversion of the public standard to Alexandrian' as a rebate is perhaps supported by the use of *κουφίλλ(ετα)* in connection with another sort of 'conversion' (*παραλληλισμός*) in XVI 1916 10, 35. West, Johnson, *Currency* 142 n. 4, say that the clerk 'was apparently bothered by the idea of subtracting from a minus quantity and did not realize that it was in fact an addition'. If I am right in suggesting that these sums were being credited to the landowners and not being paid out as taxes, then an addition to the sum credited is a 'lightening' of their expenses and may have been a rebate.

This hypothetical description is designed to make the notation of the accounts fit what we might expect of the working of the finances of the estate, which belonged to a family of magnates who were active in Constantinople and other places far from Oxyrhynchus. Locally the estate was in a dominant economic position, but most of the profits must have gone out either to the owners or to the state taxes. It could pay its bills at discounted rates to agricultural workers and rural tradesmen and noted the discount by the minus carats system. A proportion of the receipts went to pay the expenses of the local administrative machinery, expenses including the charges of the public bank, and these sums too were noted in the minus carats system. The remainder of the receipts was credited to an account or accounts in Alexandria, which the owners could use for their other purposes.

A dozen entries fall outside this framework, because the sums are expressed directly 'by Alexandrian standard':

11	For <i>παραμυθία</i> , through a <i>riparius</i>	sol. 72
12	For hereditary lease (<i>ἐμφυτεία</i>), through the heirs of John son of Timagenes	sol. 83 car. 8
30	For <i>παραμυθία</i> , through a <i>zygostates</i>	sol. 100
34	For <i>συνήθεια</i> of an <i>ἐπικείμενος</i> , through villages	sol. 24 car. 23
35	For contract (<i>πάκτων</i>) for a harbour, through an <i>ἐπικείμενος</i>	sol. 15
58	For <i>catastatice</i> (unknown), through headmen of a village, Tacona	sol. 36
60	Through grain measurers	sol. 12
85	For <i>παραμυθία</i> , through an unspecified village official	sol. 20
86	For <i>παραμυθία</i> , through an area steward	sol. 12
100	Through an <i>osprigites</i>	sol. 72
101	Through a <i>βοηθός</i> , associated with the village of Spania	sol. 48
121	For rent of an old haybarn, through a <i>πραγμα(τευτής)</i>	sol. 18

A common thread is discernible: these clients are not the usual small tenant farmers or tradesmen. Most of them hold administrative posts of some kind; the substantial sum of sol. 83 car. 8 'for hereditary lease' (12) implies tenants of above average wealth. The payment through the headmen of a village for the unknown *catastatice* (58) is the most puzzling one, especially by contrast with 61-3, payment for the same through several unnamed villages, which goes through the usual conversions. It looks, however, as if these payments were to arrive in Alexandria free of deductions and as if this was a privilege for these clients, who dealt more directly with the landowners, without paying tribute to the estate's local administrative machine.

This group of payments made directly by Alexandrian standard is interesting also for the illustration it gives of the estate's relations with holders of public appointments. The *riparius* and the *zygostates* in making payments for *παραμυθία* seem to stand in the same relation to it as the area steward, and we can see that his *παραμυθία* of sol. 12 probably reflects a clause in his contract, see I 136 29-31. Compare too XIX 2239, a work contract between a large landowner, not an Apion, and an *ἐπικείμενος*, who paid sol. 30 by Alexandrian standard as an entrance-fee (*λόγω εἰσβατικοῦ*), which seems to be the same sort of payment as the steward's *παραμυθία*, see 2239 21 n. J. Gascou, *Travaux et Mémoires* 9 (1985) 1-90, has argued that the landowners were agents of the state in making such appointments and that it is not correct to describe the holders as

a 'private' *rīparius* (ibid. 5-6, 43, 45-6, 61 and n. 339) or as the *zygostates* of a particular person, even though this is actually done in XXXVI 2780 22: ζυγοστάτου ἀγῆς = ζ. Φλαουίας Γαβρηλιάς (ibid. 56).

11 Θεοδώρου ῥιπαρίου. Cf. 116. The same combination of name and title occurs in VIII 1147 10, but the name is too common for identity to be probable. On 'private' *rīparii* see above 7-8 n. *ad fin.*

παραμυθ(ίας). This is possibly a premium paid on entry to office as *rīparius*, cf. I 136 29-31, on a premium of sol. 12 paid for the office of *προνοητής*, with line 86 below and above 7-8 n. *ad fin.*

12 ἐμφυτεύας; l. ἐμφυτεύας. Imperial land was frequently managed under this system of perpetual heritable leases, see A. H. M. Jones, *LRE*, i 417-20, D. Simon, 'Das frühbyzantinische Emphyteusrecht', *Symposion 1977* (Vorträge z. gr. und. hellenistischen Rechtsgeschichte (Chantilly 1-4 Juni 1977), eds. J. Modrzejewski, D. Liebs), 365-422. Possibly the Apion family was tenant-in-chief in this case and put the land out on lease to sub-tenants, cf. Simon, op. cit., 419-21 on the tendency for emphyteutic leases of imperial land to be held by great landowners. However, in the late fifth century the system began to be applied in private leases, see Simon, op. cit., 421-2, so that here we may have a private emphyteutic lease by the Apion estate to John son of Timagenes, which is what it appears to be at first sight. Not much is known about such leases between private persons, see A. C. Johnson, L. C. West, *Byzantine Egypt: Economic Studies*, 73-4, P. Cair. Masp. III 67298-9, P. Michael. 41.3; cf. 3803 10 n. If sol. 83 car. 8 represents an annual rent, the land must have been extensive, cf. above 7-8 n.

13 τοῦ τῆς ἐνδοξ(οστάτης) μνήμης Φοιβάμμωνος: unidentified.

ἑδάφ(ου) Ψά: unidentified.

16 Κισσώνος. Cf. 3804 48 n.

22-3 The calculations have not been written out fully: subtract car. 2 to get public standard, i.e. sol. 1 - car. 6 = car. 18, from which nothing is deducted for conversion to Alexandrian standard at car. $\frac{1}{2}$ per sol. 1, because the result, car. $\frac{1}{2}$, is too small to be rounded up to car. $\frac{1}{2}$, the minimum fraction to be taken into account, cf. 7-8 n. However, in 50-1 the clerk has taken the opposite view and rounded up to car. 18 $\frac{1}{2}$.

23 The damaged word might be *συνθηθείας*, cf. 34 and n.

Χολαστικίου. Cf. 3804 235 n.

24-5 In this entry the usual passage about the conversion of carats (car. 36 = sol. 1 $\frac{1}{2}$) has been omitted.

30 ζυγοστάτου. Cf. A. H. M. Jones, *LRE* i 445, ii 1185 n. 84; J. Bingen, M. Hombert, *CE* 45 (1970) 151; above 7-8 n. *ad fin.*

παραμυθ(ίας). Cf. 11 n.

31 For *κωμ(ών)* rather than *κωμ(ητών)*, *κωμ(αρχών)* etc., cf. 52 and n.

πρακτευτοῦ. Cf. A. H. M. Jones, *LRE* i 450-1, ii 1188 n. 98. He was a tax-collector, a representative ultimately of the praetorian prefect. This payment, therefore, shows the Apions acting in some sense for the state, cf. J. Gascou, *Travaux et Mémoires* 9 (1985) 60, 3804 30 n.

34 Is the payment customarily made for the benefit of the overseer, but into the estate funds in the first instance, or is he supposed to pay it, but actually gets the money from the villages? A contract of an *ἐπικείμενος* of the general sort, see 35 n., XIX 2239, refers to *πάσας τὰς συνθηθείας ἅς εἴωθεν λαβεῖν ὁ αὐτὸς ἐπικείμενος* κατὰ τὸ ἔθος παρὰ τῶν γεωργῶν εἴτε ἐν σίτῳ καὶ ἐν οἴνῳ καὶ ἐν ἄλλοις εἶδεσιν (18-20). These seem to be perquisites of the *ἐπικείμενος*. Could it be that the post was at this moment unfilled and that the villagers had to pay their customary dues into the estate funds for that reason? Cf. 23 n.

35 There seem to be at least two sorts of *ἐπικείμενος*, one sort employed by an estate to act as a general supervisor of various agricultural activities and equipment, see especially XIX 2239, and another sort appointed as a foreman with charge of some particular job. The one in line 34 looks like the first sort; this one looks like the second. He was apparently in charge of a harbour at Nesu Lachanias, cf. P. Herm. Rees 69 (AD 410).4 *ἐπικειμένῳ τῇ κρηπίδι περὶ Κλεοπάτρας*. There *κρηπίς* means a riverside wharf. The parallel is not exact, because the person in P. Herm. Rees 69 is a Flavius and an *ex-defensor* and his position may be a public one. Here it seems that the *ἐπικείμενος* holds a contract (*πάκτον* = *fractum*), presumably from the Apion estate. Compare the *νοτάριος καὶ ἐπικείμενος τῷ ἔργῳ τοῦ αὐτοῦ* (sc. *γεωυχικοῦ*) *κατωτίου* 3804 230, 255. The job is often defined, e.g. ἐ. τοῦ τελωνίου (SB V 7520.17), ἐ. τῷ λιμῆτι (SB V 7800.2-3), ἐ. τῷ κτισθέντι τετραπύλῳ (SB V 8699.10). In XVIII 2205 3, 10 read *χωματεπικτ()* i.e. *χωματεπείκτου* for both *χωμάτ(ων) ἐπικ(ειμένον)* and *χωμάτ(ων) ἐπικειμ(ένου)*. In XVI 1836 6 and 2051 45 for *ἐπικ(τη) = ἐπείκτη* expand *ἐπικ(ειμένῳ)*. Uncompounded *ἐπείκτης* is at present confined to a period c.AD 250-338, see N. Lewis, *The Compulsory Public Services of Roman Egypt*, 26.

Νήσου Λαχανιάς. Cf. P. Pruneti, *I centri abitati*, 120, citing especially P. Amh. II 149.5-6, where it is

said to lie *πέραν τῆς Ὁξυρρυγγ(ιτών) πόλεως*, which probably means that it lay just east of Oxyrhynchus on the opposite bank of the Bahr Yusuf.

38 *κυράς* = *κυρίας*. Cf. F. T. Gignac, *Grammar* i 302. There was a lady called *Καλή* in the Arsinoite branch of the Apion family in AD 584, see CPR X 127.5 *καὶ κυρῆ Καλή*—as suggested in the note, for the *Ἰερακάλῃ* of the text—*τῇ καὶ Πουλχερίᾳ ἐκ πατρὸς Τραπηγγίῳ κτλ.* The name is not particularly distinctive, even with the addition of *κυρᾶ*, cf. P. Ross. Georg. V 11.4, SB I 4661.7, 8, 17, but the style of the reference to her shows that this lady was socially superior, and she may have been a member of the Apion family.

43-4 The clerk has hesitated over the calculations. The deduction to convert private standard to public is car. $(2 \times 1\frac{1}{2}) = 2\frac{1}{2}$; this, deducted from sol. $1\frac{1}{2}$ - car. $5\frac{1}{2}$, gives sol. $1\frac{1}{2}$ - car. $7\frac{1}{2}$. The clerk has first rounded up to car. 8 and subsequently rounded down to car. $7\frac{1}{2}$ without having cancelled his first thought. Since there are twenty-four carats to the solidus, sol. $1\frac{1}{2}$ = sol. 1 car. 8. The deduction of car. $7\frac{1}{2}$ gives sol. 1 car. $\frac{1}{2}$. Car. $\frac{1}{2}$ = sol. $\frac{1}{60}$. The deduction for conversion of public to Alexandrian standard should be car. $\frac{1}{2}$, which is neglected as usual. The correct total, sol. 1 car. $\frac{1}{2}$, was written, but in the end the clerk rounded car. $\frac{1}{2}$ up to car. $\frac{1}{2}$. It is not clear why, since quarter carats are admitted in the totals of other entries, e.g. 17, 19, 33, 37.

45-9 These lines, constituting col. iv, have been written in the space between cols. iii and v, which were probably written first, although this means that a wider gap than usual had been left between cols. ii and v. If iv had been there first, however, it would have been very difficult to plan the layout of the normal columns, which are over 30 cm wide. As in col. x, the lines run upwards along the fibres of the verso, rather than across the fibres as in cols. i-iii and v-ix.

45-6 Line 45 contains a botched attempt at the calculation which appears correctly in 46.

47 There are forty choenices to the artaba. The result has been rounded up very slightly, i.e. $586\frac{1}{2} \div 10 = 58\frac{13}{20}$ (or $\frac{1171}{40}$), whereas sol. 58 car. $14\frac{1}{2}$ = sol. $58\frac{14}{20}$ (or $\frac{1171}{40}$).

48-9 The totals of artabas and solidi are correct, but it is not clear what *ἀνθ'* (*ἄν*) means in this context or where the extraneous figures which follow it came from.

50-1 Cf. 22-3 n.

52 *ἐξῆς ἐγγεγραμμ(ένων)*. No list of villages and holdings follows, cf. 55 n., 61. Presumably the phrase has been taken over from a record in which the names did appear. The same is probably true of the entry in 31.

55 *οἷ(τωσ)*. The list of places should follow, cf. 52 n., 64.

56 *Ἀζαρ*. The initial letter seems to have been written over an unfinished zeta, an understandable mistake. There is no sign of abbreviation. The form of the name seems to be new, though *Ἀζαρος* is fairly common. Another possible way of taking it would be to suppose that the zeta is crossed out rather than altered to lambda, i.e. [ζ] *Ἀζαρ*, or even *Ἀζαρ(ίου) Ἰουδαίου* by haplography.

It seems reasonable to guess that 'the synagogue' is one in or near Oxyrhynchus, since no locality is specified. It is also worth noting that *συναγωγή* here obviously means the building itself, since it has been said that in Egypt *προσευχή* refers to the building and *συναγωγή* to the community of Jews, see CPJ III 473 (= IX 1205).7 n., but see E. Schürer, *History of the Jewish People* (revised English edn., 1979) ii 439-40. On Jews in the Byzantine period see A. H. M. Jones, *LRE* ii, 945-50. I have not found another reference to a synagogue for rent. The normal thing was for the community of Jews to build one for its own use.

58 *μειζόν(ων)*. Cf. P. Mich. XIV 683.1 n.

καταστατικ(ής). See 61 for the ending. *Catastatice* appears to be completely new. We might guess that it is a premium paid for the appointment (*κατάστασις*) of the *μειζονες*, but this is far from certain and looks less attractive for 61, where the payments are made by the villages, and no office is mentioned.

59 *ἀρχισυμμ(άχου)*. On *σύμμαχοι* see A. Jördens, *ZPE* 66 (1986) 105-16, P. Cair. Isid. 80 introd., 4 n., 9, Hardy 111, cf. 73 n. 1. This payment could be taken to imply that he was the employee of the Apion estate rather than of the government or city, but note the views of J. Gascou (3804 30 n.).

ἀρχο(ντος). This is presumably the *praeses* of Arcadia. According to Georgius Cyprius, *Descriptio Orbis Romani* (ed. H. Gelzer, Bibl. Teubn.) 745, Oxyrhynchus was the metropolis of the province. Probably, therefore, it was the main residence of the *praeses*. It is not at all clear why the *ἀρχισύμμαχος* paid car. 17 $\frac{1}{2}$ to the Apion estate in respect of the journey (absence) of the *praeses*. Cf. 82 n.

60 *στομμετρῶν*. Cf. G. Rouillard, *L'Administration* 132-4; A. Calderini, *ΘΗΚΑΥΡΟΙ* (Studi della Scuola Papirologica di Milano IV No. 3) 88-90, who emphasizes that they usually appear in a metropolis, not in

the countryside; P. Berl. Borkowski xiii 27 n., on three (or four) *sitometrae* owning houses not far apart in Panopolis. The most informative document is SB I 5273 = SPP XX 128 (AD 487), a deed of surety for a *sitometres* from Arsinoe, who had undertaken to receive grain, especially grain taxes, in a village. The document is addressed to a *πρωτεύων* (cf. Pap. Ludg. Bat. XIII 13.1 n.) of Arsinoe, which implies that the post of *sitometres* was at that time a public service imposed on metropolitans and in this instance at least carried out in a village. BGU III 838.15, 30 (AD 578) refers to a guild (*ἐργασία*) of *sitometrae*. The payment here may imply that these ones were appointed through the Apion estate, cf. 7-8 n. *ad fin.*

61 Cf. 52 n., 58 n.

63 The conversion charge of car. $\frac{1}{8}$ per sol. 1 on sol. 298 works out exactly at car. 49 $\frac{3}{8}$, which has been rounded up to car. 49 $\frac{1}{2}$.

64 Cf. 55 n.

65 Ἰβότιος: known only from XVI 2032 36 (Ἰβοείτος), cf. P. Pruneti, *I centri abitati* 67.

65-6 πλει(όνων) τῆς ἀντικαταλλαγῆς. Cf. P. Flor. I 47 = M. Chr. 146(+SB I 5671), where in an exchange of accommodation one party receives an *ἐκλογή* (14) of two hundred drachmas, representing the difference between the values of the properties; P. Wisc. I 15, where the money payment is *πλεῖω συντεμίσσεως* (10, as corrected by D. Hagedorn, *ZPE* 1 (1967) 151), 'in excess of valuation', that is, representing the difference between the values of the exchanged donkeys. P. J. Sijpesteijn gives more bibliography in P. Wisc. I p. 61, to which add P. Mich. XI 612, which also mentions an exchange of property with a church. The references to *ἀντικαταλλαγή* in XVI 1917 48, 50, 90, XIX 2243(a) 82, obviously involve the Apion estate, but are too brief to be helpful. Here the church exchanges properties with the Apion estate and pays it an excess through the steward of the area. The church was not necessarily in or near Ibois, although one of the exchanged properties evidently was.

67 The monks of St Phoebammon are new, though the martyr saint himself was popular, see H. Delehayc, *Les martyrs d'Égypte* 33, 100, 104, 105, 108, 113. Monks of St Phoebammon were supposed to appear in P. Cair. Masp. III 67299.51, see P. Barison, *Aegyptus* 18 (1938) 88-9, but the text has been corrected (BL III 36). However, cf. Barison, *ibid.* 117 (no. 40), a church(?) in Aphrodito; 129-31, a monastery near Memnonia.

Thmoenacomis appears here in full for the first time, but cf. Θμ[ουακωμ(), Θμουακωμ(), in XLII 3047 4, 44 (AD 245).

Nesu Tapetroniu is unknown, i.e. not in P. Pruneti, *I centri abitati*. The second element is compounded of the Latin name Petronius and the Egyptian feminine article, but no personal name such as *Ταπετρώνιον* is attested. A place-name *Πετρωνίου* is attested, see Pruneti, *op. cit.* 150.

ποταμοφορ(θη)γηθ(είσης?). From the layout of the papyrus it is clear that this misspelled note gives the reason for non-payment. The sol. 14 do not appear in the position at the extreme right which final figures occupy in this account, and the conversion of them from private to Alexandrian standard has not been calculated.

68 Πακέρκν. Cf. P. Pruneti, *I centri abitati*, 131-3. There were at least two places called *Πακέρκη*. The spelling *Πακέρκν* appears also in XVI 1839 6, 2034 14, and XVIII 2207 18.

70 Cf. 3804 268-9 n. The hunting seems to be a new detail.

73 καστριαν(ών), i.e. *castrensiani*, cf. J. Maspero, *L'Organisation militaire*, 60-1. A *κάστρον Ψώβθεως* is mentioned in XVI 1883 2 (AD 504), 2004 1 (V), and 3793 9 (AD 340), cf. CPR V 13.3 n. (and *ZPE* 56 (1984) 81, i 3 n.). They may be soldiers attached to that fort, wherever it was, cf. 3793 9 n.

στρ(ατη)λ(άτη). Cf. J. Maspero, *L'Organisation militaire*, 88-99. He could have been commander of the same camp, but need not have been.

75 The charge for conversion from public standard to Alexandrian, car. $(17\frac{1}{2} \times \frac{1}{8}) = 2\frac{1}{2}$, has been rounded up to car. 3.

76 ἀποτάκτου χωρ(ίων). Cf. 3804 34 n.

81 The rounding up of the charge for conversion of public standard to Alexandrian has been increased. At car. $\frac{1}{8}$ per sol. 1 the exact charge on sol. 16 $\frac{3}{8}$ would have been car. 2 $\frac{1}{8}$, so that what was originally written, 2 $\frac{1}{2}$ $\frac{1}{4}$ (= 2 $\frac{3}{8}$ = 2 $\frac{1}{8}$) is the nearest permissible rounding up, but this has been raised to car. 3, for no obvious reason.

82 This payment may be connected with the journey of the *praeses* mentioned above in 59, see n. On mule-carts and other vehicles see A. H. M. Jones, *LRE* ii 830, L. Casson, *Travel in the Ancient World*, 179-82. On the rights of high officials to the use of carriages see W. Weber in the exhibition catalogue *Spätantike*

und Frühes Christentum (Liebighaus Museum Alter Plastik, Frankfurt am Main, 1983) 310. Carriage horses were reserved for the emperors.

I ought to confess that I do not quite see how *οχημα* was written: the remains look too extensive for *ημ*. However, some version of *οχηματος* seems inevitable, cf. P. Beatty Panop. 2.302, 304.

85 The title of an official has been omitted. Perhaps *προνουητοῦ* is not very likely, since the sum is only sol. 12 in 86 and in I 136 31, cf. above 11 n.

85 and 86 παραμυθ(ίας). Cf. 11 n.

87 Ταρουέβτ, Λουκίου. Cf. P. Pruneti, *I centri abitati*, 199, 98. These places were in the same stewardship, see 3804 introduction.

ἀποτάκτου χωρ(ίων). Cf. 3804 34 n.

89 Νήσου Λευκαδίου. Cf. 3804 introduction and 15-16 n.

91 Χοινώθμεως. Read probably *Χοινώθμεως*. For this and other spellings see P. Heid. IV 320.10 n. It was a Heracleopolite village in one of two toparchies called *Κωίτης*, *Κ. Άνω* or *Κ. Κάτω*, see P. Heid. 320. We might guess that it was in *Κ. Άνω*, i.e. the Upper (or southernmost) Coite toparchy, for it was presumably close to *Κέ(ς)φθα*, which was in the Lower, i.e. northernmost, toparchy of the Oxyrhynchite nome, see P. Pruneti, *I centri abitati*, 174-5. The more usual spelling is *Κέσφθα*, but *Κέφθα* is well attested as a variant, cf. 121.

I do not know what is meant by the *παλαιά χωρία* of Sespthia; perhaps just that they had now passed to Choenothmis?

The marginal marks cannot be well represented in print. There are various oblique strokes which may be decorative or significant rather than signs of cancellation. The zeta may stand for ζ(ήτησον) or the like, see 3804 162, *χρη ζήτησαι κτλ*. The cross indicates an accounting difficulty, cf. 102-3 n.

93 *χωμ(άτων)*. Cf. 95-6; E. R. Hardy, *The Large Estates*, 59-60.

95 *λοι(πάδος) χρυ(σικών)*. Cf. I 136 13 for the expansion.

χωμ(άτων). Cf. 93 n.

95-6 The calculations are exact except for the rounding up of the charge for conversion from public to Alexandrian standard, sol. 5 $\frac{3}{8}$ being treated as if it were sol. 6.

97 The cross in the margin indicates an accounting difficulty, cf. 97-9 n., 102-3 n.

Κυριλλά is otherwise found only in XIX 2244 52. Most probably the form represents the genitive of an unattested personal name *Κυριλλάς*, although ed. pr. has *Κύριλλα* and A. Calderini, *Diz. dei nomi geografici* III.ii 169 has *Κυρίλλα*. On names in -*ας* see F. T. Gignac, *Grammar* ii, 16-18.

97-9 The calculation was worked out first for a volume of art. 295 choen. 8 at the price of sol. 1 - car. 4 $\frac{1}{4}$ per art. 14, but the figures for this part of the sum are sadly astray: 295 $\frac{1}{2}$ ÷ 14 gives 21 $\frac{5}{8}$, not anything like 22 $\frac{3}{4}$, for instance, and so on similarly. I have not been able to find any plausible relationships in the deleted passages. The calculation which replaced this one, for a volume of art. 155 choen. 8 at the original price of sol. 1 - car. 4 $\frac{1}{4}$ per art. 14, is at first satisfactory apart from one or two approximations for the purpose of using simpler fractions. For example, 155 $\frac{1}{2}$ ÷ 14 gives 11 $\frac{5}{8}$, which has been rounded up to 11 $\frac{1}{2}$ for multiplying the sol. 1 element of the price. Similarly, car. 4 $\frac{1}{4}$ × 11 $\frac{1}{2}$ gives car. 47 $\frac{5}{8}$, which has been rounded down, if the calculation was actually done this way, to car. 47. In the conversion of private standard to public there was a hesitation. The true figure should have been car. $(11\frac{1}{2} \times 2) = 22\frac{1}{2}$, to be added to car. 47; 69 $\frac{1}{2}$ was first, it seems, rounded up in the usual way to 69 $\frac{1}{2}$, and then rounded down to 69. After this the calculation proceeds: car. 69 = sol. 2 car. 21, i.e. sol. 2 $\frac{21}{64}$, of which the fraction is expressed as $\frac{1}{2}(\frac{11}{32}) + \frac{1}{8}(\frac{8}{32}) + \frac{1}{64}$. At this point the calculations should have been: sol. 11 $\frac{1}{2}$ - 2 $\frac{21}{64}$ = sol. 8 $\frac{5}{32}$ = sol. 8 $\frac{1}{8}(\frac{5}{4}) + \frac{1}{32}$. Somehow it has come out at sol. 8 $\frac{7}{32}$ = sol. 8 $\frac{1}{8}(\frac{9}{4}) + \frac{1}{32}$. The charge of car. $\frac{1}{8}$ per sol. 1 for conversion of public standard to Alexandrian on sol. 8 $\frac{7}{32}$ + $\frac{1}{32}$, i.e. car. $1\frac{1}{8} + \frac{1}{32} + \frac{1}{32}$ = car. 1 $\frac{5}{16}$ has been rounded up as usual to car. 1 $\frac{1}{2}$, but this has been added not to sol. 8 $\frac{1}{32}$ (= 7 carats), but to the correct figure at that price 8 $\frac{1}{32}$ (= 5 carats), to produce sol. 8 car. 6 $\frac{1}{2}$ $\frac{1}{2}$.

100 *δσπριγίτου*. Perhaps read *δσπρηγίτου* derived from *δσπρηγός*, 'carrying *δσπρια*', cf. L. R. Palmer, *Grammar*, 114 for this spelling. Adjectives in -*ηγός* often apply to boats, cf. J. R. Rea, *ZPE* 46 (1982) 206 (add esp. BGU XIII 2353), and in XVI 2021 7-11 the *δσπριγίτης* is concerned with grain transport by boat, cf. A. C. Johnson, L. C. West, *Byzantine Egypt: Economic Studies*, 327.

The amount suggests that the payment may be a premium, cf. 11 and n., 101 n.

101 *βοηθ(ού)*. It is not clear to whom this man was an assistant. The sum, exactly half of the one in the preceding entry, may again be a premium.

101-2 The crosses in the margin probably relate to the oddities in 102-3, see note, but they are placed rather high.

102 ἀκανθεῶν. On the ending -έα for names of trees and plants see L. R. Palmer, *Grammar*, 51-2; add *κυκομορέα*, P. Apoll. Ano 11.5, CPR VIII 71.13.

102-3 The figures have been altered and the crosses in the margin, opposite 102 and slightly above, presumably draw attention to the fact that they cause difficulty, cf. 104, 106, 108, 111, 113, 116, 133. As they stand the figures do not conform to the usual practice. Assuming that nothing is added for *rhope*, *incrementum*, and conversion from public standard to Alexandrian, the calculation on, by private standard, sol. $1\frac{1}{2}$ - car. 6 should have worked out at, by Alexandrian standard, sol. $1\frac{1}{2}$ - car. $8\frac{3}{4}$ (rounded up from car. $(1\frac{1}{2} \times 2 = 2\frac{3}{4} + 6 =) 8\frac{3}{4}$), i.e. sol. 0 + car. $23\frac{1}{4}$. On the original figures, sol. 2 - car. 9, it should have worked out at sol. 2 - car. 13, i.e. sol. 1 + car. 11, and from this we can reach the final figure by adding the usual fee for conversion from public standard to Alexandrian at car. $\frac{1}{4}$ per sol. 1. In this case it is car. $\frac{3}{4}$ rounded up as usual to car. $\frac{1}{2}$, so that sol. 1 + car. $11\frac{1}{4}$ is the correct amount for the original figure. This same calculation appears correctly in 113-15 and again, successfully altered, in 106-7.

104 For the crosses in the margin see 102-3 n.

χοιρεμπῶλ(ων) = χοιρεμπόρων, rather than χοιροπωλῶν, especially since χοιροπώλης is not yet recorded in the papyrological dictionaries. For the phonetic changes see F. T. Gignac, *Grammar* i 227 ($\omega = o$), 103, 104-5 ($\lambda = \rho$).

κ[δ']]. The exact calculation would have produced car. $(2 \times 3\frac{1}{2} = 6\frac{1}{2} + 13\frac{1}{2} =) 20\frac{1}{2}$, first rounded up to $20\frac{1}{2}$ and then rounded down to 20. The sum clear by public standard was worked out correctly from the rounded up version, then cancelled and replaced by the correct result according to the rounded down version. The same sort of change has been made in 109.

105 κερ. [ιβ]. This is correct and appears to have been cancelled in error. There is no other version underneath these figures, though the sign for one-half is a little distorted.

106 For the crosses in the margin see 102-3 n.

ἀκανθ(εῶν). For the expansion of the ending cf. 102 and n. The omission of the location of these trees is perhaps an error, see 102 and 113, where locations are specified.

106-7 The changes to the figures are consistent; the calculation was worked out correctly for sol. $2\frac{1}{2}$ - car. $11\frac{1}{4}$, and then again correctly for sol. 2 - car. 9, a sum which is conspicuous in 102-3 and again in 113-15, all three entries relating to wood.

107 [κερ. κ]. The intention was to cancel only $\kappa = 20$; κερ. = κερ(άτια) should have remained.

The figures in the right margin represent car. $8\frac{3}{4}$, which is the difference between the original result of sol. 1 + car. 20 and the corrected result of sol. 1 + car. $11\frac{1}{4}$, cf. 112 n.

108 For the cross in the margin see 102-3 n.

φ[ρο(ντιστοῦ)]. Cf. 3804 57 n.

Νετνήου. Cf. P. Pruneti, *I centri abitati*, 119; 3804 236 n. This appearance in association with Nesmimis, known to have lain once in the Upper Toparchy, see Pruneti, op. cit., 118, confirms the evidence that it lay in the extreme south of the nome.

109 The changes were caused by first rounding up and then rounding down the exact figure: $2\frac{1}{2} \times 2 = 4\frac{1}{2} + 12\frac{1}{2} = 17\frac{1}{2}$, rounded up to $17\frac{1}{4}$ and then down to 17. Cf. 104 n.

111 For the cross in the margin see 102-3 n.

βωλοστροφικ(οῦ). Read presumably βωλοστροφικ(οῦ), a new word, cf. LSJ s.v. βωλοστροφία, *Suppl.* s.v. βωλοστροφία.

κλιβ(αν-). The two obvious possibilities are κλιβ(ανεί), 'baker', and κλιβ(αναρίω), 'armoured cavalryman'. The κλίβανος can be of metal, see H. Stephanus, *Thesaurus*, s.v. κρίβανος, LSJ s.v. κριβανίτης, TLL s.v. *clibanus*, W. Hilgers, *Lateinische Gefässnamen*, 148-9, so that either a κλιβανεύς or an armoured soldier might have had a use for this scrap metal. The metal vessel identified as a *clibanus* by D. H. Quentin, 'Clibanus, Pigeilla, Panis Artopticius', in *Rendiconti della Pontificia Accad. Rom. di Archeologia* 4 (1925-6) 81-9, esp. 86-7, figs. 2-3, does bear a certain resemblance to a cuirass and would satisfactorily explain the term *clibanarius*, 'cuirassier', see further D. Hoffmann, *Das Spättrömische Bewegungsheer* 267-9, cf. M. P. Speidel, *Epigr. Anat.* 4 (1984) 151-6.

112 The half sign near the end of the line should have been cancelled along with the preceding gamma. Car. 2 in the margin is the difference between the cancelled figure of sol. 3 car. $\frac{1}{2}$ and the corrected total of sol. 2 car. $22\frac{1}{2}$, cf. 107 n.

113 The crosses in the margin usually denote difficulties in the account, see 102-3 n. Here the figures are consistent and unaltered, but it is noticeable that some of them are the same as those in the confused entry in 102-3, also relating to wood, see further below.

ἐργοδιώκ(ου). Cf. E. R. Hardy, *The Large Estates*, 110. These 'foremen' were attached to particular settlements or groups of settlements, but their activities could cross the boundaries of the areas administered by the *προνοηταί*, see 3804 155-6 n.

ξύλ(ων) κλαπ(έντων). Also possible is ξύλ(ου) κλαπ(έντος). Perhaps this is a fine levied on the ἐργοδιώκτης for allowing the wood to be stolen. It is noticeable that the sum, by Alexandrian standard sol. 1 + car. $11\frac{1}{4}$, is the same as the part-price for two fallen acacia trees in 102-3, see note for the difficulties over the figures, and for three acacia trees in 106-7. It is odd that parts of two trees, three trees, and an unspecified amount of stolen wood should all have the same value.

116 For the cross in the margin see 102-3 n. Here the figures are consistent, but some of the superfluous wording has been omitted, cf. 117.

Θεοδώρω ῥιπαρ(ίω). Cf. 11 and n.

117 Some of the usual wording has been omitted, cf. 116 n. After the total clear by public standard the entries usually specify that nothing has been added for *rhope* or *incrementum*, and give the charge for conversion from public standard to Alexandrian standard at car. $\frac{1}{4}$ per sol. 1. Here all this is omitted, but the conversion is actually calculated, i.e. car. $\frac{1}{4} \times 4 = \frac{1}{2}$, rounded up as usual to $\frac{3}{4}$, and added to the total clear by public standard.

118 ἐπικ(ειμένου). Cf. 35 n.

On brickmaking see 3804 151-3 n.

121 πραγμα(τευτοῦ). Since he pays directly 'by Alexandrian standard', like officials or estate employees such as *riparius* (11), *zygostates* (30), and area steward (86), cf. 7-8 n., he is more likely to be an agent, cf. XLII 3048 15, 19, XLV 3260 4, than a trader, cf. XVI 1880 5 n., L 3577 introduction p. 93.

Σέφθα. Cf. 91 n.

122-37 This column (ix) is narrower than the preceding ones and the entries have less detail, some of them being very sketchy indeed, no more than jottings.

122-4 Comparing 125, ὕ(πέρ) ἀλλ(ων) β ἀκανθ(εῶν), we might guess that ἀνκ() is a mistake for ἀκανθ(), but νκ seems clear enough and the final superscript does not look like theta as in 125.

The figures are consistent.

125-6 The figures are consistent as far as they go but the calculation is not brought to a conclusion. The correction of car. $14\frac{1}{2}$ to 15 is carelessly done, leaving $\iota = 10$ standing twice. One might equally well print $\iota[\delta\lambda][\iota]\epsilon$.

127 The first entry was incompletely deleted and then abandoned.

127-8 These figures are consistent, with the usual rounding up of car. $(2 \times 2\frac{1}{2} =) 4\frac{1}{2}$ to $4\frac{3}{4}$. The final result by Alexandrian standard, i.e. sol. 1 + car. 18, has not been written down here.

129 The first amount, sol. 3 - car. 18, does not obviously relate to anything else in the neighbourhood. It is certainly not the correct result of the calculations in 127-8. The second amount, sol. $2\frac{1}{2}$ - car. $14\frac{1}{2}$, looks like a distortion of the second stage of the calculations in 127-8, sol. $2\frac{1}{2}$ - car. $14\frac{1}{4}$.

130 κ(α)θ(αρά) δημ. νο(μ.) has been repeated and then abandoned.

130-1 The first stages of this calculation seem to have been omitted. It is partially repeated in 132.

132 The isolated figures '3' and '12' seem unconnected with the rest, which is a partial repetition of 130-1.

133-5 For the cross in the margin see 102-3 n., but there is no significant error, apart from the first νο(μ.), which seems to have been abandoned. ἀλλ() may go with the second νο(μ.), i.e. 'another sol. 4', etc. The figures are consistent.

136-7 The figures are consistent.

138-46 This column (x) is written along the fibres upwards. No relation has been discovered between it and any of the other items on either the verso or the recto of the roll. The hand is not decidedly different from the other, or others, found on the verso.

141 This sum of, by Alexandrian standard, sol. 255 car. $2\frac{1}{4}$ appears again in 146, but the working-out which intervenes in 142-6 contains many deletions and corrections and according to my readings and calculations is not precisely correct, although broadly acceptable.

142 First comes the correct total of the sums in 138-140, described here as being all 'by private

standard'. When this is converted to public standard the fractions of a carat ($\frac{1}{2} \frac{1}{4}$) are ignored, i.e. $277 \times 2 = 554 + 176$ (instead of $176 \frac{1}{2} \frac{1}{4}$) = 730. This number of carats is correctly converted to sol. $30 \frac{1}{2} \frac{1}{2}$ (720 (sol. 30) + 8 (sol. $\frac{1}{2}$) + 2 (sol. $\frac{1}{2}$) = 730).

143 The first calculation should have been sol. $277 \frac{1}{2} \frac{1}{2} \frac{1}{2}$ (i.e. $\frac{333}{8}$) — sol. $30 \frac{1}{2} \frac{1}{2}$ (i.e. $\frac{390}{4}$) = $246 \frac{3}{8}$ (i.e. $\frac{3}{8} \frac{1}{48} \frac{1}{96}$). It is not quite certain that this total was correctly reached. The first result was $246 \frac{3}{8}$, i.e. $\frac{333}{8}$ instead of $\frac{333}{8}$. The interlinear correction is faint at the beginning but may have had $\beta f = \frac{3}{8}$. Then comes $\bar{\eta} = \frac{1}{8}$ and it is not absolutely clear that this has been deleted, though it may have been. The sum of sol. $\frac{333}{8}$ cannot be correctly expressed in such a way as to end with $\bar{\eta} \mu \bar{\eta} \rho \varsigma' = \frac{1}{8} \frac{1}{48} \frac{1}{96}$, which is $\frac{1}{8}$. The difference, $\frac{3}{8}$, would properly be $\frac{1}{24}$ ($\perp \kappa \beta$), which does not produce the required descending order of fractions.

If the fractions of a carat (car. $\frac{1}{2} \frac{1}{4} = \text{sol. } \frac{1}{48} \frac{1}{96}$) had not been neglected in this conversion from private to public standard, see 142 n., the calculation would have been sol. $277 \frac{1}{2} \frac{1}{2} \frac{1}{2}$ (i.e. $\frac{333}{8}$) — $30 \frac{1}{2} \frac{1}{2} \frac{1}{2}$ (i.e. $\frac{390}{4}$) = $246 \frac{3}{8}$ ($\frac{333}{8}$), but it does not seem to be this which lies behind the confusion here.

The calculation for *rhope* does not meet the expectations aroused by 138-40 and 142. According to them the total of sol. $277 \frac{1}{2} \frac{1}{2} \frac{1}{2}$ less car. $176 \frac{1}{2} \frac{1}{4}$ (142) is made up of sol. $252 \frac{1}{2} \frac{1}{2} \frac{1}{2}$ less car. $112 \frac{1}{4}$ with *rhope* (138), plus sol. $22 \frac{1}{2} \frac{1}{2} \frac{1}{2}$ less car. $58 \frac{1}{2}$ free of *rhope* (139), plus sol. $1 \frac{1}{2}$ less car. 6 described simply as 'by private standard'. Here the same total of solidi, ignoring the carats, is divided into sol. $256 \frac{1}{2} \frac{1}{2} \frac{1}{2}$ with *rhope* (and *incrementum*, see 144) and sol. 21 free of *rhope* and *incrementum*, for reasons I do not understand.

At the end of the line the original figure was $128 \frac{1}{2}$ and it appears that the figures representing $28 \frac{1}{2}$ have been struck through without being replaced. Car. $128 \frac{1}{2}$ would be correct for sol. 257 at car. $\frac{1}{2}$ per sol. 1 and 257 could be regarded as a rounding-up of $256 \frac{1}{2} \frac{1}{2} \frac{1}{2}$.

144 *Incrementum* is calculated at car. $\frac{1}{8}$ per sol., cf. L. C. West, A. C. Johnson, *Currency*, 142, 145. The original total on the line was $34 \frac{1}{2} \frac{1}{4}$, which implied that it was calculated on sol. 278, i.e. $34 \frac{3}{4} \times 8 = 278$. This could be regarded as a rounding-up of the whole total in line 142, i.e. $277 \frac{1}{2} \frac{1}{2} \frac{1}{2}$ by private standard. The final $\frac{1}{4}$ of $34 \frac{1}{2} \frac{1}{4}$ has been struck out, implying that it was calculated on sol. 276, i.e. $34 \frac{1}{2} \times 8 = 276$, which could be regarded as a rounding-down of the same total in line 142. The figure of $34 \frac{1}{2}$ has been allowed to stand, but above it has been written 32, implying that *incrementum* was calculated on 256, i.e. $32 \times 8 = 256$. This is a rounding-down of what we have been led to expect by line 143, i.e. sol. $256 \frac{1}{2} \frac{1}{2} \frac{1}{2}$ being free of *rhope* and *incrementum*.

The next step was to give the total of *rhope* plus *incrementum*, at which the first attempt was car. $172 \frac{1}{2} \frac{1}{4}$. The end of this, $2 \frac{1}{2} \frac{1}{4}$, was struck out, but replaced by something above the line also ending in $\frac{1}{4}$. Next the original sum of $172 \frac{1}{2} \frac{1}{4}$ is converted correctly to sol. 7 car. $4 \frac{1}{2} \frac{1}{4}$ ($24 \times 7 = 168 + 4 \frac{1}{2} \frac{1}{4} = 172 \frac{1}{2} \frac{1}{4}$), and here the figures for carats are struck out and replaced at the side by $5 \frac{1}{4}$. This suggests, though I cannot verify it from the remains, that the original $172 \frac{1}{2} \frac{1}{4}$ had been corrected to $173 \frac{1}{4}$. However, I must confess that I cannot relate these totals in the one-seventies to the preceding figures.

The final step of this stage was to write in above the line, without cancelling what seem to be mistakes, figures which we can accept, namely car. $160 \frac{1}{2}$, which is the correct total of $128 \frac{1}{2}$ plus 32, and sol. 6 car. $16 \frac{1}{2}$, which is the correct conversion of car. $160 \frac{1}{2}$, i.e. $6 \times 24 = 144 + 16 \frac{1}{2} = 160 \frac{1}{2}$.

145 The total given here after correction, sol. 253 car. $8 \frac{1}{4}$, is car. 1 short of what we expect, i.e. $246 \frac{3}{8} \frac{1}{48} \frac{1}{96}$ (= $\frac{333}{8}$) clear by public standard + sol. 6 car. $16 \frac{1}{2}$ (= $\frac{336}{4}$) for *rhope* and *incrementum* = sol. 253 car. $9 \frac{1}{4}$ (= $\frac{337}{4}$). I have not been able to find any plausible reason for this among the previous errors and alterations.

145-6 The total for conversion to the Alexandrian standard worked out at car. $\frac{1}{8}$ per sol. 1 on sol. 253 was given originally as car. $42 \frac{1}{4}$, which could represent a rounding-up of the correct figure $42 \frac{1}{8}$. Subsequently the $\frac{1}{4}$ was deleted, thus rounding the figure down to car. 42. The conversion was put first as sol. 1 car. $18 \frac{1}{4}$ to answer to $42 \frac{1}{4}$ and again the quarter was deleted, leaving sol. 1 car. 18.

146 The total of sol. 253 car. $8 \frac{1}{4}$ plus sol. 1 car. 18 should have been sol. 255 car. $2 \frac{1}{4}$, but instead of car. $2 \frac{1}{4}$ we seem to have had first car. $17 \frac{1}{4}$, corrected first to car. 5 and only then to car. $2 \frac{1}{4}$ above the line.

The last note of all seems to say that there is an excess of car. 13, which is again incomprehensible.

III. PRIVATE LETTERS

3806. PRIVATE LETTER

34 4B.72/L(1)a

22.5 x c.29 cm

21 May 15

This letter, written throughout in a large clear practised cursive, is mainly of interest as a dated palaeographical specimen, see Plate VII. Two sheet joins, one near the right edge substantially complete and one much damaged near the left edge, show that the piece was cut from a blank roll and written along the fibres in the normal way. The left edge, which was on the outside when the letter was rolled up for dispatch with the right edge inside, has suffered damage which mainly affects the address on the back, and the prescript was almost completely lost when a strip from the top became completely detached; this happened while the letter was in roll form, as the repeating pattern of the broken edge shows.

'(A to B?) greeting and good health!'

'Since . . . is going upstream I judged it necessary to salute you by letter and invite you to write to me about whatever you may want. I shall do it with great pleasure. I attend on your brother every day in case he wants to send letters to you. Show the sample of wool to Philus, and write me if it pleases her or not. I believe that it will rather please her, for I gave (it) every attention, besides having given the dyer an imported sample as well, and even so this one turned out nicer. For the rest, look after yourself so as to keep well, and write me answers to (my) first (letters). Keep well in spirit! Farewell!'

'Year 1 of Tiberius Cacsar Augustus, Pachon 26.'

Address: ' . . . , secretary of Corrhagus.'

1-2 The basic pattern of the prescript is likely to have been, 'A to B *χαίρειν και υγιαίνειν*', cf. F. X. J. Exler, *A Study in Greek Epistolography* 32-3. It is possible that it had a longer variant running to a second line now entirely lost. The remains of the first three letters surviving suggest]διρ[or]αφ[, which could be supplemented in many ways, e.g. Διρ[-, Γ]αίρ[ε]. The address describes one of the parties as 'secretary of Corrhagus', which is not likely to have been repeated here. Line 1 could have been shorter than the average.

3 . . . ωνίου. The trace is a horizontal joining omega. The most obvious possibilities are γ, ε, θ, ς, and τ, and names to suit all these can be found in F. Dornseiff and B. Hansen, *Rückläufiges Wb. d. gr. Eigennamen* 239-40; e.g. Αρ]θωνίου, Αν]τωνίου, to take common names.

ἀναπλέοντος. Since the bearer of the letter was sailing upstream, it is probable that the letter was directed to Oxyrhynchus from some place on the Nile or the Bahr Yusuf north of Oxyrhynchus or from Alexandria itself.

ἀναγκαῖον. The remains of the damaged letter rather suggest alpha, but this would be an error.

4 παρακαλέσ{ε}αι. Cf. 9 ἀρέσ{ε}ων. This is a common type of phonetic spelling, see F. T. Gignac, *Grammar* i 154-65, esp. 159-60.

5 ποιήσω{ι}. Cf. 6 παρεδρεύω{ι}, 12 ἐξέβη{ι}, and Gignac, op. cit. i 183-6, esp. 185.

5-6 τῶι ἀδελ(φῶ) cov. Cf. 3808 introd., 3812 17 n., 3813-15 introd. para. 2, 3819 introd., 3820 1 n.

6 παρεδρεύω{ι}. Cf. 5 n.

7 μὴ θέλει, 'in case he wants'. Cf. LSJ s.v. μὴ B.8.b, Blass, Debrunner, Rehkopf, *Grammatik d. neutestamentl. Griechisch*¹⁵ p. 300 § 370 and nn. 2, 5.

7-8 δῖγμα, δῖξον. Cf. Gignac, op. cit. i 189-90. Contrast δείγμα (11).

8 ἦ = εἶ. Cf. Gignac, op. cit. i 240.

9 ἀρέσ{ε}ων. Cf. 4 n.

10-11 ξενικὸν δείγμα. Cf. 7-8 τὸ δῖγμα (= δείγμα) τοῦ [ε]ριδίου. Cf. E. Wipszycka, *L'Industrie textile* 27, for the import of wool to Egypt.

12 ἐξέβη{ι}. Cf. 5 n.

σεα(υ)τοῦ. Cf. Gignac, op. cit. i 186-9, esp. 187-8.

13-14 υγιαίνει μοι ψυχῆι. Cf. P. Herm. Rees 5.14 ἐρρωμένον ψυχῆι τε καὶ σώματι, SB VI 9401.8 ἐρρωμένον ψ. τ. κ. c.

15 The date is equivalent to 21 May, AD 15. It is well known that the numbering of the Egyptian regnal years of Tiberius proves that his *dies imperii* fell not earlier than 1 Thoth = 29 August, which was the New Year's Day of the Egyptian calendar as reformed under Augustus, see especially D. M. Pippidi, *Autour de Tibère* 125-32, cf. O. Montevicchi, *YCS* 28 (1985) 267-72. This confirms the evidence of the ancient historians that he did not become emperor immediately upon the death of Augustus on 19 August, AD 14. Unfortunately the Egyptian date clauses are not yet of much help in narrowing the range for the actual date, but it may be worth while to try to identify the significant items of evidence.

The latest date by regnal year of Augustus, surprisingly the only one surviving to specify year 44, is found in a rock inscription from Gebel es-Silsila, SB III 6845 derived from F. Preisigke, W. Spiegelberg, *Ägypt. u. Griech. Inschriften . . . Gebel Silsile*, No. 28 and Taf. II. The published reading of the date clause gives the month as Φ]αῶφι, which is hard to reconcile with the drawing in Taf. II. Professor Ricardo Caminos, who examined the original in 1982, has kindly given me full access to his tracing and notes and has permitted me to give his version of the date clause. I am grateful to him and to the Egypt Exploration Society for permission to make use of this improved reading in advance of publication in R. A. Caminos, *Gebel es-Silsilah* v (no date yet available). The date clause runs, (ἔρου) μὲ] Καίσαρος (vac.)] Θῶθ (vac.) ρ, i.e. 17 September, AD 14. The space at the end of 5 is too small to accommodate Θῶθ in full and the writer was naturally reluctant to divide it. The space in 6 was motivated by a rough patch in the rock, though

it also serves to equalize the layout. Marks between the omega and final theta of Θῶθ, which are very prominent in ed. pr.'s Tafel. II and which were read as the second phi of Phaophi, are very thin lines seemingly not related to the rest but avoided by the writer of the dedication.

This date is less than a month after the death of Augustus and comes from a site about 145 km south of Thebes (Luxor), cf. R. A. Caminos in *Lexikon d. Ägyptologie* ii 441. It tells us nothing out of the ordinary, since news of an accession usually took as much as fifty or sixty days to penetrate so far even as Thebes, see U. Wilcken, *Gr. Ostr.* i 800-7. The latest Augustan date from Thebes itself is the demotic tax receipt O. Mattha (= G. Mattha, *The Demotic Ostraca*) 13, of 30 August, AD 14, only eleven days after the emperor's death.

The first date ostensibly by Tiberius is now O. Dem. Leid. (= M. A. A. Nur El-Din, *The Demotic Ostraca in . . . Leiden*) 57.3, doubtfully dated to the first regnal year, in the month of Thoth; the day number is lost. If the year number were correct, the date would be earlier than 28 September (= 1 Phaophi), AD 14, in which case the news of the new *dies imperii* would have taken less than 30 days (29 August-27 September) to reach Thebes, which would be a record. Dr Mark Smith informs me that the drawing of the damaged number in O. Dem. Leid. p. 590 could represent equally well 1, 2, or 5, so that this item gives no reliable date. I am grateful to Dr Smith also for much more advice and direction among the demotic texts.

The next ostensible date appears in P. Tebt. II 561 (description) as (ἔρου) α Τιβερτίου Καίσαρος Σεβαστοῦ μηνὸ(ε) Νέου [Σεβα(στροῦ)] β = 29 October, AD 14. Both figures are marked doubtful, and in addition this would be the earliest occurrence of the month name *Νέος Σεβαστός*, which replaced *Ἄθῶρ*. Two later dates in the same month of the same year refer to Hathyr, see below, and reliable evidence for *Νέος Σεβαστός* does not appear till year 2 (PSI IX 1028; cf. K. Scott, *YCS* 2 (1931) 243). This item too must be regarded as doubtful.

Next comes O. Edfou III 401.4 (ἔρου) α Τιβερτίου Καίσαρος Ἄθῶρ τᾶ = 7 November, AD 14 (Apollinopolis Magna). This seems to be the first reliable date. Note the month name Hathyr, which also occurs in the next item, O. Dem. Leid. 56. 4-5, dated 1 Tiberius, Hathyr 14 = 10 November, AD 14 (Thebes). These two dates coming from southern Egypt suggest that the *dies imperii* was known in Rome at the latest by about fifty or sixty days before, say in the second half of September.

So far, then, the evidence of the Egyptian texts can only be claimed to show that the *dies imperii* fell after 29 August and before, say, 20 September, the second terminus being no more than a very rough approximation. K. Wellesley, *JRS* 57 (1967) 23-30, has argued that the likely date is about 3 or 4 September, which falls within the range indicated. More recently M. M. Sage, *Anc. Soc.* 13/14 (1982/3) 293-321, has argued for the 'long' chronology, placing the date about mid-October (pp. 310-11). The ostraca of 7 and 10 November make so late a date very improbable. The 'middle' chronology (see Sage, op. cit. 293 n. 3 for references) places both *dies imperii* and the deification of Augustus on 17 September (cf. op. cit. 294 and n. 7), another date not contradicted by the Egyptian texts.

16 Addresses are not standardized enough for us to know whether it ran, 'to A, secretary . . .', or 'to A. from B, secretary . . .'

Corrhagus is a rare name, probably Macedonian, see M. Holleaux, *Études d'Épigraphie* ii 81-3, I. Russu, *Ephemeris Dacoromana* 8 (1938) 120, 130, 194-5. Add W. Clarysse, G. Schleppens, *CE* 60 (1985) 41, n. line 4, *SEG* 33 (1983) 155 no. 529.

3807. BUSINESS LETTER

58/B(36)a

24.5 × 30 cm

c.26-28?

Only the close of this letter and the postscript are well preserved. The upper left portion of col. ii is broken away and of the preceding column only the ends of the last eleven lines survive. It is written in a clumsy but practised first century hand with

numerous abbreviations. The piece has been cut from a roll and the writing runs along the fibres of the recto in the usual way, as can be seen from two sheet-joins c.5.5 cm and c.19.5 cm from the left edge, so that the visible width of the middle sheet is c.14 cm. At the right the height of the roll seems to be completely preserved except for wear. The back is mostly blank except for stray blots, although at one point there are faded remains which might represent a short docket of ten or fifteen letters, not one of which has been recognized for certain.

The interest lies largely in the reference to Hiberus (39), who is obviously the governor of Egypt mentioned by Philo, *In Flaccum* 2, as the predecessor of Avillius Flaccus, and by Dio, LVIII 19.6, as the successor of Vitrasius Pollio. Unfortunately the letter is not dated. From the mention of a 'register . . . of the 12th year', AD 25/6 (36), and of a 'period of three years' (*τριετίας*, 40), I have argued that the date of the letter is not likely to be later than early in year 15, AD 28/9. If this is correct, there are interesting repercussions on the list of prefects for the period and perhaps on the understanding of the career of the younger Seneca, see 39 n.

44 διοπολιτικῶ

21 ff. '... through the former strategus of the Oasis... here for two days... If you want to enter upon the pratoria with Chaereas, you may. If not, you may take a toparchy and enter upon it when you have finished (or 'paid?'). It is necessary to hurry and finish the registration in time for the... festival of the olyra-threshing(?). For... registration is taking place from the 25th.'

'I told Paysirion the... to ask Comon the wineseller for 8 drachmas, unless he delivered at the office.' (2nd hand?) 'Farewell.'

(1st hand) 'After this I received the evidence of Diogenes. I greatly blame the armed guards for not escorting me to Dicomia. I wrote instructions to deliver the register of sureties for the 12th year (to you?). We hear tell from the people sailing upstream that the clerks of the Low country who have previously sailed downstream are being detained because Hiberus himself is going through the books, especially the deficits of the three-year period, for which reason I am afraid that I too may be detained there for a long time. I received the two rolls of papyrus. I am very pleased that I am about to sail downstream(?) although I have had no satisfaction because of the Diopolite affairs. So don't you (have any regrets?) either.'

3 For ς = (λοιπ-), i.e. a version of δ̂, see H. C. Youtie, *Scriptiunculae* ii 817.

4 The first trace is a vertical,]η or]ι; not]ν, therefore not ε]νλαβεῖν.

6 Possibly ἀ]πογορ(αφ-), cf. 28.

8 The isolated omicron seems unavoidable, in spite of slight damage. Either δ followed by a participle or δ followed by a verb is conceivable.

8-9 Perhaps σῶμα means 'corpse', followed by something like ταῦτα γ]άρ ἀνθρώπινα, 'For these things are (part of being) human', cf. 3819 12.

10 The bare mention of a Jew adds little to what is known about Judaism in Egypt in this period, for which see E. M. Smallwood, *The Jews under the Roman Rule*, Ch. 10 'The Jews in Egypt and Alexandria', pp. 220-55, or for more detail A. Kasher, *The Jews in Hellenistic and Roman Egypt*.

13 Restore perhaps τὸ[ν] Ἡρακλάτο(ς), rather than το[ῦ], cf. 16 τὸν Ναρκίττου, but the sense does not emerge.

14-15 The sense may be, 'Find out where... apianus (is hiding?), so that he shall not be idle (or "not be without work?"), and instruct him (or another?) to ask for so many drachmas from the... of Narcissus'.

15 Κα]σπιανός and Α]πιανός are the obvious possibilities, cf. F. Dornseiff, B. Hansen, *Rückl. Wb. d. gr. Eigennamen* 266.

17-18 It may just possibly be relevant that there was a πράκτωρ δερμάτων in the early third century AD, see BGU II 655 and cf. 24.

20]θμη(.). Part of ἀριθμησις is perhaps likeliest.

21 στρατηγῶ) Αὐάσει(ς). In this series we usually expect an Oasis to be the Small Oasis (Bahariya), most easily reached from Oxyrhynchus, but an allusion to a Diospolis, perhaps one of the two in the Thebaid, occurs below in 44, which opens up the possibility that this might be the Large Oasis (Khargeh). The few known strategi of these two oases are listed in G. Bastianini, J. E. G. Whitehorne, *Strategi and Royal Scribes* (Pap. Flor. XV) 83-4.

22 στρατ. [...]. Either στρατη[] or στρατ[] would suit.

24-5 It seems that the recipient was invited to take a post either as a practor or as a toparch, two offices to which appointment was later compulsory, cf. F. Oertel, *Liturgie* 195-204, 162-4. The writer was evidently influential.

24 It is not clear whether εὐν Χαίρεά belongs in the protasis or in the apodosis, but the sense is much the same in either case.

The only Chaereas in B. W. Jones, J. E. G. Whitehorne, *Register of Oxyrhynchites 30 B.C.-A.D. 96*, is the strategus who is attested from February AD 23 to January AD 29, *ibid.* p. 47 no. 827. This is very suitable to the indications of the date, see 39 n., but not at first sight to the context, which seems to imply that Chaereas was to be a colleague of the addressee as practor. Perhaps, however, it is the help or the company of the strategus which is recommended.

26-7 The word ὄλυροκοπία, spelled here perhaps ὄλυρω-, is new. Olyra is a grain, not yet identified for certain, see D. W. Rathbone, *ZPE* 53 (1983) 272-5. Workers called ὄλυροκόποι appear in OGIS II 729 (= SB V 8924).4, whom Dittenberger asserted to be millers and bakers, perhaps rightly, cf. ἀρτοκόπος, in which case the reference here is not to threshing but to baking.

The remains of what is presumably an adjective in 26 are fairly slight, but perhaps a good guess could be verified; [μ]εγάλην, though perhaps not impossible, does not seem to suit.

27-8 The nature of the registration is not clear. It is thought that the regular census, called κατ' οἰκίαν ἀπογραφὴ from the reign of Nero, may have taken place on two occasions in the reign of Tiberius, in year 6 = AD 19/20 and year 20 = AD 33/4, see recently C. Balconi, *Atti del XVII Congresso Internazionale di Papirologia* iii 1103-4. The first is excluded by the mention of year 12 (36) and if my view of the dating is right, see 39 n., the document is too early to represent even preparations for the second occasion.

In 38 I thought first of] τῆς ἀπογορ(αφῆς), but it is then difficult to find a satisfactory restoration. Since the first surviving letter is represented only by the end of a high horizontal, it could suit [ῆ τῆς] γῆς ἀπογορ(αφῆ). Even so it is not entirely clear what sort of registration of land this would be, see O. Montevecchi, *Papirologia* 184-7, for a summary of the sorts of registration which are attested. It is possible that the registration has a direct connection with the appointment of practors and toparchs.

30 εἶπον might be imperative, 'tell', rather than indicative, 'I told', see B. G. Mandilaras, *The Verb* 292 (§683.1), cf. 289 (§664.1), Blass, Debrunner, Rehkopf, *Gramm. d. neutest. Griechisch*¹⁵ 63 (§81.1). A Paysirion of the right date (July AD 27) occurs in XVII 2148 7, but the bare name gives no clue to ν...ῆ here. The trace of the letter following upsilon is difficult to reconcile with pi, which would offer the best range of possibilities.

31 ἱε (= εἶς) [οἶ]κο(ν). Cf. 6, 19. This phrase may suggest some sort of financial office, where business payments could be made, cf. L 3593 27-8 n.

32 The farewell formula is written bigger and perhaps done with a coarser pen. In so short and damaged a sample it is difficult to be sure whether the hand is different. If so, the main hand, which also appears in the postscript, will be that of a clerk and the principal will have written the farewell.

33-5 The connection of thought is not entirely clear, but it looks as if the evidence of Diogenes concerned something which happened in the absence of an armed escort while the sender was travelling to Dicomia.

33 προσμαρτύρη(εν). The compound is new, cf. ἀντι-, ἐκ-, ἐπι-. In the papyri the verb προσμαρτυρέω means 'to bear witness', never 'call to witness'; in P. Ant. I 40.7 for προσμαρ(τύρησε) read πρόσ ἐμαί, that is, εἰάν δὲ ἀποβληθῆ, πρόσ ἐμαί (= ἐμέ) τὸν Ἀπολλώνιον, 'but if it (a cloak for *uestis militaris*) is rejected, (the responsibility is to lie) on me, Apollonius'.

34 μαχαιρο(φόρους). Very little is known about these armed guards or escorts, cf. F. Preisigke, *Fachwörter* 120, F. Oertel, *Liturgie* 57, 412. The title is less common in the Roman than in the Ptolemaic period, but cf. P. Grenf. II 62.15 (AD 211).

35 Δικωμί(αν). Cf. A. Calderini, S. Daris, *Diz. dei nomi geogr.* ii 103, which doubtfully locates it in the Heracleopolite nome. All the previous examples are in documents of Arsinoite or Heracleopolite provenance.

36 The remains at the beginning of the line are very meagre. Perhaps ε[ο] gives the easiest sense. With μ[οι], superficially even more attractive, we might expect πέμφαι rather than δοῦναι.

ἱκανοδοσι(ν). This noun occurs in the papyri only in SPP XX 283 (= SPP XIV Taf. X = C. Wessely, *Schrifttafeln*, p. 9 no. 14, Taf. VI).5, verso 1, cf. 6, where the Latin equivalent appears as *satisfatio*, cf. LSJ

s. v *ικανοδοσία*. This is of the fourth century AD. The agent noun *ικανοδότης* occurs in BGU IV 1189.3 (1 BC/AD 1). The verb *ικανοδοτέω* occurs in P. Mich. V 244.10 (AD 43), where it is garbled (*είκανοδοθήσεται* = *ικανοδο(τη)θήσεται*?); it is restored without much warrant in P. Oxf. 6.21 (AD 350), and also appears as a participle, *ικανοδοτούντ.* [(29), in II 259 (lines 1-22 = M. Chr. 101) of AD 23. This last is in a private letter appended to a bail contract addressed to the jailer of a city jail, called first *τῆ τοῦ Διδός φυλακῆ* (4) and then *[τ]ῆς πολιτικῆς φυλακ[κ]ῆς* (8). It is tempting to think that this is the prison of some city called Diospolis (*Διδός πόλις*) and that there may be some archival connection with our document, cf. 44 n. The text was reprinted as part of the archive of Tryphon the weaver, M. Biscottini, *Aegyptus* 46 (1966) 186-9, but the connection is not clear.

τοῦ ιβ (ἔτους) = AD 25/6, cf. 39 n.

37-42 This sentence is the most interesting part of the document, especially because it reveals the activity of Hiberus, see 39 n., in going through the books himself. The phrasing implies that this was unusual. No doubt it was usually left to subordinates of the governor. It seems that at the time of writing he was dealing with 'the clerks of the Low country who have previously sailed downstream'. Although *γραμμ(ατέας)* is not unambiguous, it looks as if it refers to royal scribes, *βασιλικοὶ γραμματεῖς*, who were attending a *conuentus* held by the governor either at Alexandria itself or in some other centre convenient for 'the Low country', such as Pelusium, cf. IV 709 4-6, 8-9. The sender of the letter feared being detained himself, presumably because he held a similar post, not necessarily in the Delta. He may have expected to be called to a session for the Heptanomia or the Thebaid. His locality is not certain, except that he was far enough south to receive news, probably from Alexandria or Pelusium, from persons 'sailing upstream'. He mentions a journey he took to Dicomia, which was north of Oxyrhynchus, see 35 n. This journey may lie in the past and be mentioned only because of some incident that took place during it in the absence of an armed guard, see 30-5 n. Dicomia was not a nome capital, so it would be unlikely that an official of middle rank, such as a royal scribe, would spend much time there. In 44-5 he refers to 'Diopolite affairs', which may suggest that he was posted to one of the three nome capitals called Diospolis, see 44 n. In a badly damaged patch in 43 I have restored *κατα[πλ]εῖσαι*, because the writer expected to be detained like the *προκαταπεπλευκός* *γραμμ(ατέας)* and therefore presumably expected to 'sail down'. If that is correct, one of the two places called Diospolis in the Thebaid is more likely to be meant than Lower Diospolis, which lay in the Delta due east of Alexandria and from which the journey would be too complicated to describe in this routine fashion.

39 The *Κάτω χώρα* was roughly the Delta, although it included certain areas 'west of the Canopic and east of the Pelusiac branches' of the Nile, see J. D. Thomas, *The Roman Epistrategos* 16-17.

For the rare name Hiberus see I. Kajanto, *The Latin Cognomina* 199.

There seems no doubt that this Hiberus is to be identified with the governor of Egypt mentioned by Philo, *In Flaccum* 2 and Cassius Dio LVIII 19.6 (Boiss. ii p. 607). The Philo passage stands as follows:

ὁ Φλάκκος οὖν οὗτος . . . μετὰ τὴν Ἰβήρου (Ἰβήρου S. Reiter βήρου G. *σεβήρου* ceteri (v.), see Philo, ed. Cohn VI p. 120.12) *τελευτήν, ὃς ἐπετέτραπτο Αἴγυπτον, καθίσταται τῆς Ἀλεξανδρείας καὶ τῆς χώρας ἐπίτροπος.*

Therefore Hiberus died in office and was replaced by Flaccus. Philo also tells us that Flaccus served six years in all, five in the lifetime of Tiberius, one till Gaius dismissed him (*In Fl.* 8), so that he must have taken office in about AD 32.

The emendation of the name in Philo's text rests on Dio LVIII 19.6 *κὰν τούτῳ Οὐιτρακίου Παλιώνος τοῦ τῆς Αἰγύπτου ἄρχοντος τελευτήσαντος Ἰβήρω* (l. Ἰβ-) *τινὶ Καίσαρείῳ χρόνον τινὰ τὸ ἔθνος ἐπέτρεψε* (sc. ὁ Τιβέριος).

In the modern literature Hiberus is assigned a short prefecture or vice-prefecture confined to AD 32, say therefore in 18 Tiberius, AD 31/2 and/or 19 Tiberius, AD 32/3. Here, however, the writer is interested in the 'register of sureties for year 12' (line 36) = AD 25/6, and Hiberus is going through the books for 'the three-year period'. It is probable that year 12 is over and that the register for AD 25/6 is complete, placing the date of this document at the earliest probably in year 13, AD 26/7. We could even allow that year 12 was the first of 'the three-year period', years 12-14, and so assume that the date of the letter might be as late as early in year 15, AD 28/9, but it would be hard to credit that the date of the letter might be as late as year 18 or 19.

We may now turn to another puzzling document, dated 29 August, AD 28, the first day of 15 Tiberius.

It is a dedication on behalf of Tiberius, Livia, and their *domus*, to Heracles Callinicus and Ammon in the Small Oasis, *BIFAO* 73 (1973) 183, Pl. XV:

ὑπὲρ Αὐτοκρά[τ]ορος Τιβε-
ρίου Καίσαρος Σεβαστοῦ καὶ
Ἰο[υ]λίας Σεβαστῆς καὶ τοῦ οἴκου
α]ψῶν ἐπ[ί] Ποπλίῳ Φ[λα]υίου
5 Ο]νήρου Ἡρακλείδης Ἡρακλείδου
Εὐσέβειος στρατηγὸς Ἡρακλεῖ
Καλλινε[ί]κω καὶ Ἀμμωνι
θεοῖς συννάοις ἀνέθηκεν.
(ἔτους) ιε Τιβερίου Καίσαρος Σεβαστοῦ
10 μηνὸς Σεβαστοῦ α.

It is common in parallel passages of dedications of this kind to find that *ἐπί* introduces the name of the prefect of Egypt, although in only one other example (SB V 8897; AD 12) does he occur without a title, see G. Bastianini, *Atti del XVII Congresso Internazionale di Papirologia* iii 1338. Now that the new papyrus gives us some reason to look for Hiberus at a date earlier than was expected, we must wonder whether to restore his name in this inscription. The published plate seems to show only damage to the left of the first eta in line 5, so that *...ηρου* is the real point of departure. Moreover the eta is well to the left of the upright of the tau of *α]ψῶν* in 4; in fact, the upright of tau in that line is in the same vertical alignment as the upright of the rho in the line below. Similarly, the first sigma of *Εὐσέβειος* in line 6 begins slightly to the right of the first upright of the eta of *...ηρου* in 5. In other words, the two letters missing in line 5 occupied much less space than *α]ψ-* in 4 and slightly less space than *Εὐ-* in 6. Omicron in this script is a fairly broad letter, so that *Οὐ]* would have been much too wide. On the other hand, since iota is narrow, *Ἰβ]* would be very suitable. The combination occurs twice in *Τιβερίου* (1, 9), which is useful for comparison. There are numerous examples of omicron upsilon too.

One objection to this view is that Dio calls Hiberus a *Καίσαρειος*, that is, an imperial freedman, which is not obvious from the nomenclature P. Flavius Hiberus. Dessau had plausibly suggested that M. Antonius Hiberus, consul of AD 133, possibly the same as Antonius Hiberus, governor of Moesia Inferior under Pius or Marcus and Verus, was a descendant of this governor of Egypt, whom he took to have been a freedman of Antonia Drusi, see PIR² I A.836, 837. I know of no P. Flavius whose freedmen might have entered the *familia Caesaris* and indeed Publius is rarely found with Flavius.

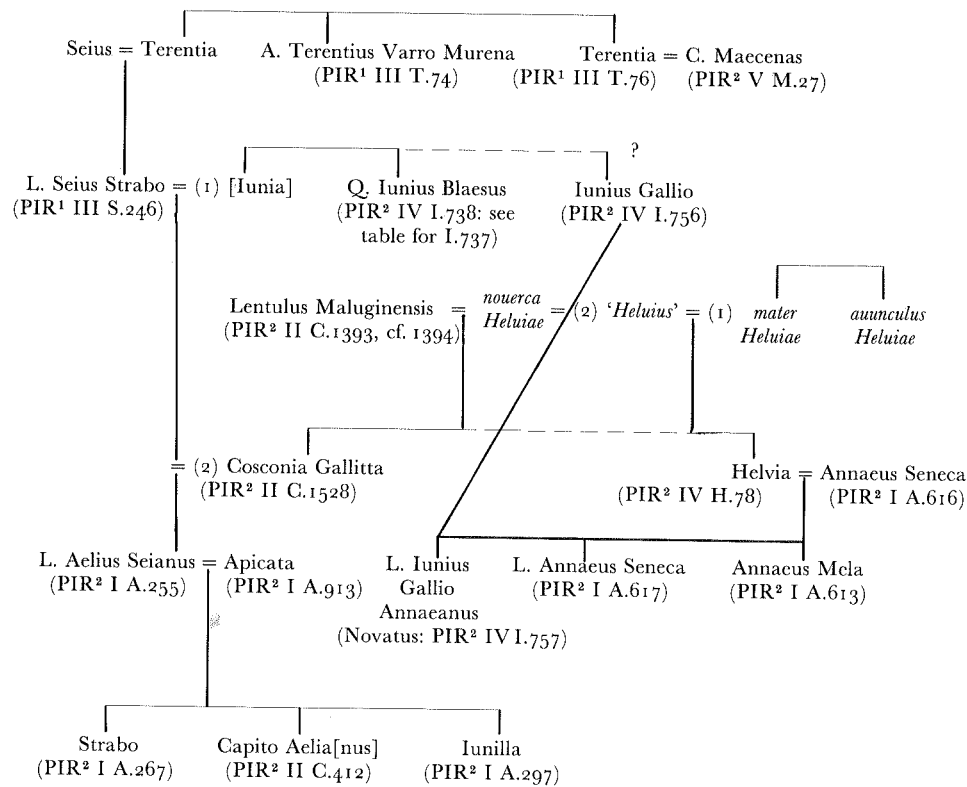

Another objection is that the younger Seneca says that the husband of his mother's stepsister had been prefect of Egypt for sixteen years. In recent times this prefect has been identified with C. Galerius, attested by documents in AD 23 only, but presumed to have served from AD 16 to 31, cf. C. Balconi, *Atti del XVII Congresso Internazionale di Papirologia* iii 1100-5. If Hiberus was in place by AD 28/9, no opening remains anywhere for a prefecture of sixteen years. The figure of sixteen years appears twice in the *Consolatio ad Helviam*, 19.6.

To escape these difficulties we might argue that Hiberus was appointed, perhaps as a vice-prefect rather than a prefect, precisely because he was already in the country in some other capacity when the prefect died, and that the references in the letter and in the inscription, neither of which gives a title, belong to his earlier activities.

However, in spite of the difficulties and uncertainties, I believe that the straightforward view of the documentary evidence is that Hiberus was already governing the country on 29 August, AD 28, and that we should regard the figures in the manuscripts of Seneca as corrupt, perhaps for *sex* or *septem*, even though at some stage the two occurrences must have been reconciled. Various views of the palaeography might be taken, e.g. SEX → SE X → SE DECEM → SEDECIM?; VI → <X>VI?; SEPTEM → SE//M → SE<DECI>M? Or, since the good behaviour of the prefect's wife obviously increases in merit with the length of his term, someone may have thought that a higher figure was needed.

This opens up the interesting, but complicated, prospect of considering on other grounds with which prefect of Egypt Seneca might have been distantly connected. Since one of the candidates is very much more interesting than the others, namely L. Seius Strabo, the father of Sejanus, it seems tempting to pursue the investigation of this possibility, even though it ends as speculation. A political link with Sejanus has been argued by Z. Stewart, 'Sejanus, Gaetulicus, and Seneca', *AJP* 74 (1953) 70-85.

By the flexible standards of Roman prosopographical studies a case could be put for a family tree somewhat on the following lines:

For more detail, e.g. on a possible first marriage of Iunia and on the Lentuli Maluginenses see R. Syme, *The Augustan Aristocracy*, Table XXIII with pp. 300-12.

It has been maintained recently that Seius Strabo never was prefect of Egypt, see J. Schwartz, *ZPE* 48 (1982) 192; D. Hennig, *L. Aelius Seianus* 7-8, but we learn from Dio (LVII 19.6) that Sejanus became sole prefect of the praetorian guard when Strabo, his colleague, was sent to Egypt, and it is hard to accept that an ex-praetorian prefect could be sent by Tiberius to Egypt for any other purpose than to be governor of the province. Unfortunately there are as yet no documents from Egypt to confirm this. The emended text of Pliny, *NH* 36.197, where '*in hereditate eius qui praefuerat Aegypto*' has become '*<S>ei[us] qui*' (O. Hirschfeld, *Hermes* 8 (1874) 473) or '*<Sei> eius qui*' (M. Hertz), although very plausible, especially since Tiberius is the emperor mentioned, cannot afford proof.

That he married a Iunia is indicated by the description of Q. Iunius Blaesus as the *auunculus*, mother's brother, of Sejanus (Tac., *Ann.* 3.35, 72; 4.26) and by the name of the daughter of Sejanus, Iunilla (CIL XIV 4533 ii 20). It is more debatable whether it suits the phrase of Velleius Paterculus, 2.127 *Seianum . . . materno . . . genere . . . clarissimas ueteresque et insignes honoribus complexum familias*. If this is not mere flattery, Blaesus must have been well born, not a new man, as has been thought (R. Syme, *Roman Revolution* 363 n. 1).

No connection between Junius Blaesus and Junius Gallio has been suggested before. Gallio was a senator, an orator, and a friend of the elder Seneca, whose eldest son he adopted. The connection becomes

really plausible only if the connection between the Senecas and Seius Strabo is approved, see below. He has been thought to be a Spaniard, chiefly because of his friendship with the elder Seneca and a possible allusion in Statius, but see M. Griffin's remarks in *JRS* 62 (1972) 12 n. 131, 'That Gallio was Spanish is a conjecture, P.-W. x 1035 ff.: the Gallio in Statius, *Silvae* ii, 7, 32 is probably his adopted son, to whom the epithet 'dulcis' was appropriate (cf. Seneca, *NQ* iv, pref. 11)'. See also Griffin, *Seneca* 32 n. 5. The latest commentary, H.-J. Van Dam, *Statius, Silvae II*, p. 469, does not even consider the possibility that our orator is meant. Gallio fell from favour shortly after Sejanus; Tiberius called him a *satelles Seiani* (Tac. *Ann.* 6.3), which sits well with *auunculus Seiani* for Blaesus. Although a senator he never became consul and so Velleius' remark that Sejanus had 'brothers, cousins, and a maternal uncle of consular rank' (2.127) does not exclude his being the brother of Blaesus, but of course any reasonably close relationship would equally suit my point here.

Sejanus was born at Vulsinii (Tac. *Ann.* 4.1, cf. 6.8 *Seianum Uulsiniensem*, 4.3 *municipali adultero*). Although D. Hennig, *L. Aelius Seianus* 10-11 n. 31, minimizes this and emphasizes his property and freedmen in Ostia (cf. p. 6), important inscriptions attest Seii in Vulsinii, see M. Corbier, *MEFRA* 95 (1983) 719-56, and there is one from there in which it would be perverse to reject the restoration [Str]aboni [pra]efecto [pra]etori[i] (CIL XI 2707). In the light of this it has been traditional, but not uncontested, see Hennig, op. cit. 9-10, to supply Seius Strabo's name at the head of a broken building inscription (CIL XI 7285 = *ILS* III ii 8996; photo in Corbier, art. cit. 750):

praefectus Aegypti [i et]
Terentia A. f. mater eiu[s] et]
Cosconia Lentulii (sic) Malug[inensis] f.]
Gallitta uxor eius . . . (balneum . . . ded[erunt]).

The only alternative name yet suggested is that of Caecina Tuscus, of unknown *origo*, prefect of Egypt AD 63-4, see G. V. Sumner, *Phoenix* 19 (1965) 134-45, against which it can be said that the son of the consul of AD 10 did not necessarily have the *cognomen* Maluginensis and that Terentia Auli filia, seemingly a well born lady, becomes the *nutrix* of Nero, see M. Corbier, *MEFRA* 95 (1983) 751-3.

If the prefect is Seius Strabo, his mother was a Terentia, sometimes identified as daughter of Aulus Terentius Varro, sister of A. Terentius Varro Murena and of the Terentia who was married to Maecenas, see R. Syme, *Roman Revolution* 358 and Table VI. This might illuminate the promotion of Strabo by Augustus, see Corbier, art. cit. 751.

His wife, at this latest stage of his career, was now a daughter of Lentulus Maluginensis, presumably the father of the Ser. Lentulus Maluginensis who was a suffect consul in AD 10. It has been suggested that she had been adopted by a Cosconius (PIR II C. 1393) or that she was named after her mother according to a custom thought to be Etruscan (G. V. Sumner, *Phoenix* 19 (1965) 138). Of course, if Cosconia Gallitta were the mother of Sejanus, the remarks of Velleius on his splendid maternal ancestry would be justified. Cornelii Lentuli appear prominently in the consular lists of the reign of Tiberius. But she would then seem to be a sister of Q. Iunius Blaesus. This is not impossible, but it piles up the anomalies of nomenclature and the hypotheses of complicated webs of adoption. At this point it is worth noting that Iunius Blaesus was the colleague of Ser. Lentulus Maluginensis in his suffect consulship of AD 10, so that we are certainly searching in the same circles of society.

Seneca's account of his distant connection with a prefect of Egypt mentions no names. It occurs in the essay of consolation addressed to his mother. Her name is known only from the variously phrased titles in the medieval manuscripts of this work as Helvia (*Helbiam A, R; Helbiae V*), and since this is also the name attributed to Cicero's mother (Euseb. *Chron.* ed. Helm p. 148 = Schoene ii 131; Plut. *Cic.* 1.1), it may not be above suspicion, but fortunately this is not relevant to the present inquiry. She was the only child of her father (*Consol. ad Heluam* 18.9 . . . *patrem cogita. Cui tu quidem tot nepotes pronepotesque dando effecisti ne unica esses*). Her father was still alive, presumably at an advanced age, when Seneca, born c.4-1 BC, was exiled by Claudius (ibid. 18.9 *Illo uiuo nefas est te quod uixeris queri*). Her mother had died at or shortly after her birth and she had been brought up by a stepmother (ibid. 2.4 *amisisti matrem statim nata, immo dum nasceris . . . Creuisti sub nouerca . . .*). She had a sister slightly older than herself, who must have been a stepsister since Helvia was the only child of her father, see above (ibid. 19.1 . . . *sororem tuam . . . in huius primum respirasti sinu . . .*). The stepsister married a man who became prefect of Egypt (ibid. 19.6 . . . *Aegyptum maritus eius optinuit . . .*). She had not been married before (*cui uirgo nupsit* ibid. 19.4). She

accompanied him for the whole of his term in Egypt, sixteen years according to the manuscripts, and lived there in decent obscurity without incurring any reproach (ibid. 19.6).

Confusion has been caused by the passage in which Seneca calls the prefect, the husband of his mother's stepsister, *auunculum nostrum* (ibid. 19.4), since technically *auunculus* means only 'maternal uncle'. The family tree constructed by P. Moreau, *Mélanges* . . . P. Wuilleumier 248, to show how Helvia's stepsister's husband could in fact have been a maternal uncle of Seneca does not satisfy the condition that the stepsister should be perceptibly older than Helvia, see 19.1, quoted above. On the affectionate overtones of the word *auunculus* see M. Bettini, *Sodalitas: Scritti* . . . A. Guarini ii 855-80. He recalls that the social relationship of a son with his father 'did not belong to the domain of affection, but to that of etiquette and honour' (858, cf. 856); the same applied to *patruī*, paternal uncles (870, 878). On the other hand affection was entirely appropriate between a young man and his grandfathers on both sides (*auī*), his mother, and his mother's brothers (*auunculi*, 'little grandfathers'; 869). We can compare the emphasis placed on the blow suffered by Helvia when she lost her *auunculum indulgentissimum* (ibid. 2.4). The prefect stood in no easily and shortly definable relationship to Seneca, but it is as natural in the circumstances for him to call the prefect 'our uncle' as it is for him to call the prefect's wife 'your sister' rather than 'the daughter of your stepmother'. Of course overtones of this kind are entirely absent when Tacitus calls Iunius Blaesus '*auunculus Seiani*'.

The prefect died on the return voyage (19.4 *in ipsa quidem nauigatione*); his wife braved danger to bring his body home for burial, a victim of total or partial shipwreck (19.4 *euictisque tempestatibus corpus eius naufraga euexit*). Seneca saw her exemplary behaviour in bereavement (19.4 *exemplum* . . . *cuius ego etiam spectator fui*, cf. 19.7). This is usually taken to mean that he had been to Egypt and shared the disastrous voyage, but there is no convincing suggestion of first hand acquaintance with Egypt in the rest of his work, so that perhaps his visit should be doubted. The prefect's wife had known Seneca as a child, she had brought him to Rome in her arms, nursed him through a long illness and canvassed for his quaestorship, overcoming her usual modest and retiring disposition to the point of being ambitious on his behalf (19.2).

The date of his quaestorship is unknown, but worth discussion, cf. M. Griffin, *Seneca* 43-5. He was born about 4-1 BC (Griffin, *Seneca* 35-6). The office could not be held till the age of twenty-four, not by Seneca therefore before about AD 20-3. On the accepted view the prefect's wife was in Egypt from AD 16 to AD 31; she could hardly have canvassed for him in the way he describes till later. If there is anything at all in the suggestion of involvement with Sejanus, the years AD 32-7 would have been unfavourable to his holding office. In the first few years of Gaius the associates of Sejanus were favoured again, according to Stewart, *AJP* 74 (1953) 75-7, so that these years are possible, although there is a story that Seneca attracted the disfavour of Gaius at some stage, perhaps in AD 39 (Dio LIX 19.7; Griffin, *Seneca* 53-6). In AD 41, early in the reign of Claudius, Seneca was exiled for complicity in the immoral behaviour of Julia Livilla, sister of Gaius. He held a praetorship in AD 50, shortly after his recall.

If, however, the prefect was Seius Strabo, who went to Egypt after Q. Magius Maximus, still in office sometime in AD 14/15 (*BIFAO* 70 (1971) 21-9 = *AE* 1982 no. 912), and Strabo had a term of six or seven years, ending obviously before February/March AD 23, when C. Galerius is attested (IGRR I 1150 = SB V 8317), then his widow can have canvassed for Seneca when he was about the regular age for the office and we can attribute his failure to go on to the praetorship to the fall of Sejanus in AD 31. The optimum ages for the quaestorship and the praetorship were twenty-four and twenty-nine, but no precise arguments can be elicited from that. If the prefect's widow is to be identified with Cosconia Gallitta, her influence as the daughter of Lentulus Maluginensis as well as the stepmother of Sejanus will indeed have been important for Seneca.

Below is a list of prefects for the reign of Tiberius according to the arguments presented above. It is in skeleton form: references not significant for the dates are to be found in G. Bastianini, *ZPE* 17 (1975) 269-71; 38 (1980) 76.

Q. Magius Maximus	Last attested in 1 Tiberius = AD 14/15 (<i>BIFAO</i> 70 (1971) 21-9 = <i>AE</i> 1982 no. 912).
L. Seius Strabo	Dio LVII 19.6; (probably Pliny <i>NH</i> 36.197; CIL XI 7285 = ILS III 8996; Seneca, <i>Cons. ad Heluiam</i> 19.6). There are no objective dates; perhaps in office for six or seven years, <i>per †sedecim† annos</i> , Seneca, loc. cit.
C. Galerius	First attested February-March AD 23 (IGR I 1150 (= SB V 8317).2). Last attested 27 August, AD 23 (SB III 7256.3-4).
Vitrasius Pollio?	Dio LVIII 19.6. There are no documentary dates. The predecessor of Hiberus.

P. Flauius [Hib]erus	29 August, AD 28 (<i>BIFAO</i> 73 (1973) 183-9). (Dio LVIII 19.6; Philo, <i>In Flaccum</i> 2).
A. Auillius Flaccus	First attested in a document 9 August, AD 34 (WO 1372 (= <i>W. Chr.</i> 414).4). The successor of Hiberus, Philo, <i>In Fl.</i> , 2. Philo says that he served for six years, five under Tiberius, which implies his entry to office in AD 32.

There remains unplaced an Aemilius Rectus whom Dio, LVII 10.5, names as a prefect of Egypt instructed by Tiberius to shear his sheep, not shave them. Some suspicion attaches to the story because L. Aemilius Rectus is well attested in office by documents of AD 41 and 42. A similar suspicion falls on Vitrasius Pollio because C. Vitrasius Pollio is attested in office by documents of 28 April, AD 39 and of AD 39/40. For the moment we cannot be certain in rejecting either, but iteration in the prefecture of Egypt is attested for certain once only, in the reign of Constantine, for Flauius Philagrius (PLRE I 694), and the dates are rather close to suit the hypothesis of father and son in these cases, though it may fit the homonyms T. Flauius Titianus, AD 126-32 and 164-8.

40 *τῆς τριετίας*. Cf. 39 n., for the possibility that this three year period included year 12. The *τριετία* seems to have had some conceptual currency as the ideal duration of office for a strategus of a nome or a magistrate of Alexandria or for a public service appointment, but it cannot be observed in practice, see G. Chalon, *L'édit de Tiberius Julius Alexander* 181-2. Here we have the severely practical matter of an audit covering the books of a three year period, but there may possibly be some connection with the offices of (royal?) scribe or prator or toparch mentioned above.

41 *ἐκεῖ* means wherever Hiberus was conducting his audit, perhaps, therefore, Alexandria or Pelusium, see 37-42 n.

42 For *χάρτης* meaning 'papyrus roll' see N. Lewis, *Papyrus in Classical Antiquity* 70-8.

43 *ἐπὶ τῷ με μέλλειν*. The disyllabic 'emphatic' form *ἐμέ* is usually employed as the subject before the verb, see F. T. Gignac, *Grammar* ii 162 a. 3, n. 1. In this case the preceding vowel may have had an influence; it may be a case of aphaeresis, i.e. *τῷ 'μέ μ.*, cf. Gignac, *Grammar* i 319-20.

κατα[πλ]εῖσαι. This is a doubtful reading, but seems to fit what can be gathered of the circumstances, see 37-42 n.

44 *Διοπολιτικῶ(ν)*. See J. D. Thomas, *JEA* 50 (1964) 139-43 for the three cities called Diospolis, cf. H. Gauthier, *Les nomes d'Égypte*, Pls. IV, V (maps). Either Diospolis Magna (Thebes) or Diospolis Parva (Hiw), both in the Thebaid, would suit my restoration of *κατα[πλ]εῖσαι* in 43, while Lower Diospolis (*Διὸς πόλις Κάτω*; El Balamun) offers a connection with the *Κάτω χώρα* but would not suit 43; see 37-42 n. for the argument in favour of this interpretation of the remains.

45 Perhaps *πραγμάτων* means 'troubles', but the context is not clear enough to be sure. The translation of the last sentence is based on guessing *μεταμέλεθε* for the end of the line, but the traces are too scanty to confirm it. Perhaps we should rather recognize *με* after *ὕμει*.

3808. DEMAS(?) TO AGATHODAEMON

38 3B.85/E(1-4)d

14.5 × 19 cm

First/second century

Demas, who was away from home, wrote to Agathodaemon telling him to supervise some farm work and to see to a transaction involving a quantity of jars. He was to report any neglect in the farm work to a teacher (*καθηγητή*), which seems to imply that Agathodaemon was still young enough to be continuing his education. He is addressed as 'brother' (2, 18), but *φίλοι* in the address (19), and the endorsement, *ἀπὸ Δημᾶ φίλου* (19-20), suggest that the relationship was not by blood, see 2 n., cf. 3812 17 n., 3813-15 introd. para. 2, 3819 introd., 3820 1 n.

There are seven vertical folds dividing the letter into eight panels, the one on the left very narrow. The letter was evidently rolled up with the left edge inside and then squashed into a flat spill. The exposed right edge was tucked into the package for

protection. Line 19, the address, was written downwards along the fibres on one side of the spill, on the back of what is now the third panel from the right, as viewed from the front. It was written with a wide gap between Δ]αίμωνι and φίλωι, so as to leave room for a binding to encircle the middle of the package. Lines 20-1, ἀπὸ Δημᾶ | φίλου, were written on the lower half of the other side of the spill, on the back of what is now the second panel from the right viewed from the front. They are written on a smaller scale, probably in a second hand, and instead of being parallel with the sides of the package rise fairly steeply, at about 45° from the horizontal. They may be part of the address, but probably they are an endorsement put on by the recipient to identify it from the outside.

The script seems to belong to the early second century or to the late first. It is practised but looks rapid and untidy, chiefly perhaps because in parts the letters slope forward and in other parts are decidedly backhand.

Δημᾶς ?] Ἀγαθ[ῶ Δαί]μωνι τῶ
ἀδελ[φῶ χ[αίρειν.] (vac.)
(vac.)

πρὸ τῶν ὄλων ἔρρω[ῶσθαί ε]ε εὐχομαι.
ὡς καὶ κατ' ὄψιν σε ἦ[τησ]α, καὶ νῦν σοι
5 γράφω ἐπισχεῖν τοῖς ἔργοις τοῖς ἐν ἀ-
γρῶ ἵνα μὴ ἀμεληθῆῖ κᾶν τι ἦν ἀμε-
λούμενον, δῆλωσον τῶ καθηγη-
τῆ. ἔγραψα δὲ αὐτῶ ἵνα τὸ τῶν
κενωμάτων τὸ πρὸς Ἑρακλῆ'ν' ἀπαρ-
10 τίσει μετὰ σῆς γνώμης. ἀσφα-
λισάσθω οὖν αὐ[τ]ὸν ὡς ὑπέσχω μοι,
ἵνα ἐλθὼν εἰς τὸν καιρὸν ἀποκριθῆ
ἡμεῖν καὶ μὴ χείρων τοῦ πέρυσι γένηται.
ἄσπασαι Χελε,ραν καὶ ἔντειλαι αὐ-
15 τῶ περὶ τῶν χλωρῶν τοῦ ἔλου. ἄσ-
πασαι Δημήτριον τὸν φύλακα καὶ τὰ
[π]αι[δ]ία αὐτοῦ. (vac.)
(vac.) ἔρρωσο ἀδελφε.

Back, downwards along the fibres:

Ἀγαθῶ Δ]αίμωνι (vac.) φίλωι.
20 (vac.) (m. 2) ἀπὸ Δημᾶ
φίλου.

1 l. Δαίμωνι 3 ευχομαι— 6 l. καί, ἐάν τι ἦ 13 l. ἡμῖν 19 l. Δαίμωνι

'Demas to Agathodaemon his brother, greetings.'

'Before all I pray for your health. Just as I asked you face to face, I now write to you to attend to the work in the field so that it may not be neglected, and if anything is being neglected, tell the teacher. I wrote to him to dispatch the business of the empty jars for Heracles with your agreement. So let him make him secure, as you promised me, so that he may come at the proper time and answer to us, and not become worse than last year. Greet Ch . . . and give him instructions about the green crops in the marsh. Greet Demetrius the guard and his children.'

'Farewell brother.'

Back. 'To Agathodaemon, (my) friend.'
(2nd hand) 'From Demas, (my) friend.'

1 Δημᾶς? Cf. 20.

2 ἀδελ[φῶ. Cf. the farewell, ἔρρωσο ἀδελφε (18), but contrast the address, Ἀγαθῶ Δ]αίμωνι φίλωι (19), and the endorsement, ἀπὸ Δημᾶ φίλου (20-1). Evidently 'brother' is not to be taken literally. Terms of blood relationship were very frequently used to indicate affection or respect between persons who were not related, cf. introd.

4 ἦ[τησ]α? Cf. XIV 1665 4-5 καθὼς καὶ . . . κατ' ὄψιν ἠτησάμην. Also possible would be e.g. ἦ[ξίως]α, ἦ[πειξί]α, 'requested, urged'.

6-7 κᾶν τι ἦν ἀμελούμενον. For κᾶν where we would write καί, ἐάν see XLVI 3285 20 n. For the frequent use of ἦν as the equivalent of ἦ see F. T. Gignac, *Grammar* ii 405. The periphrastic form of the present subjunctive passive is perhaps to be compared with the periphrastic future ἔσει (= ἔσει) . . . χαριζόμενος, P. Herm. Rees 9.11-13, see Gignac, op. cit. ii 289-90; cf. ibid. 305-7 on periphrastic perfects which employ perfect or aorist participles, with 3819 14-15 and 3820 12, 13-14.

7-8 τῶ καθηγητῆ. Cf. introd. The word is not common in the papyri, see XVIII 2190 7, [15], 24, 26, 31 (the student's point of view!), P. Giss. 80.7, 11, P. Osl. III 156.1, 12, VI 930 (= W. Chr. 138).6, 20, P. Tebt. II 591. All these documents are undated private letters. They range roughly from about AD 100 to about AD 200, according to the assigned dates. No satisfactory picture emerges from them. The word can apply to teachers of quite advanced pupils, see 2190, and this seems to be the case here, where the young man is old enough to supervise farm work and take part in business affairs, if not to manage them quite alone.

9 Ἑρακλῆ'ν'. Cf. F. T. Gignac, *Grammar* ii 71-2.

10-13 The meaning of ἀσφαλίσθω is doubtful here, see LSJ, WB s.v. ἀσφαλίζω, which allow 'to arrest, to safeguard, to secure oneself against'. Consequently it is not clear who is the subject in the final clauses. It may be that the teacher is to control Heracles and make sure that his behaviour improves. Alternatively, perhaps the teacher is to safeguard Heracles against some loss and so behave better himself.

14 Χελε,ραν. No such name seems to be known.

15 τῶν χλωρῶν τοῦ ἔλου. The precise connotation of χλωρά, 'green crops', is not known, cf. L 3589 5-9 n. The marsh was probably unsuitable for a grain crop, but usable for fodder.

20-1 Cf. Introd. The underlining of 20 goes far to the right of Δημᾶ, but there is clearly no writing after -μᾶ, which suits the damaged remains better than -μέου or -μου.

3809. LETTER OF A BARBER

48 5B.31/C(1-6)b

8.5 × 14.5 cm

Second/third century

A young barber, recently out of his apprenticeship, writes back to his old master with news of success in his job and greetings for the master and his wife and for his fellow apprentices.

The foot of the letter is lost but remains of the farewell formula survive. The beginnings of the lines are lost as well. The back is blank except for one trace of ink, which probably comes from the address which will have stood on the back of the portion lost at the left. The letter was rolled up in the usual way with the right edge

inside and then squashed flat. The papyrus has broken along the fourth fold from the right and to judge from the amount of missing text there would have been one more fold and two panels. The left-hand panel would probably have been tucked inside to protect it from damage and the address would have been written on the back of the second panel.

There is a sheet-join running vertically about 6 cm from the right edge, showing that the writing is on the recto of a piece cut from a roll in the usual way. The script looks professional, but the wording is clumsy enough to suggest that it followed the barber's dictation fairly closely.

Ἀγα]θάγγελος Πανάρι κουρί
] πλείστα χαίρειν.
 ἀσπ]άζω καὶ Ἑλιωδώρα<ν>. τὸ
 προ]σκύνημα ὑμῶν ποιῶ
 5 πα]ρὰ τοῖς ἐνθάδε θεοῖς καὶ
 τὸ] προσκ[ύ]νημά σου ἐκάς-
 τη]ς ἡμέρας ποιῶ. θεῶν
 θε]λόντων ἤδη τὸν δεσπό-
 τη]ν κίρω, καὶ τοὺς ἐνοίκους
 10 πά]γτας κίρω. οἶαν ἡμέ-
 ραν] ἐὰν κίρω, τὸ προσκύνη-
 μ]α εἴωθα ποιεῖν. ἀσπάζου
 τ]ρὸς συνμαθητὰς πάντας.
] [. . .] . . .

1 Ἰ. Ἀγα]θάγγελος Πανάρι κουρί 9, 10, 11 Ἰ. κίρω 13 Ἰ. συνμαθητὰς

'Agathangelus to Panares the barber, very many greetings. I salute Heliodora too. I make obeisance for both before the gods here and I make your obeisance each day. By the gods' will I am already barber to the master and I am barber to everyone in the house. Whichever day I have barber's work to do it is my custom to make the obeisance. Salute all my fellow apprentices!

'I pray for your health!'

1 Ἀγα]θάγγελος and Πυ]θάγγελος are the known possibilities, see F. Dornseiff, B. Hansen, *Rückl. Wb. d. gr. Eigennamen* 256. In P. Lond. III 1170.614 (p. 101) Παθάγγελος is taken to be a mistake for Πυθάγγελος.

Agathangelus is a slave name in XLIV 3197 9, 14 (two men), and may be in P. Ross. Georg. II 24.4, cf. τοῦ δούλου (9), and P. Tebt. II 414.32, where an Agathangelus is associated with παιδία. These are all the references in papyri which I know. For the possibility that our man might be a slave see 8-9 n. Pythangelus on the contrary is known particularly as the name of Ptolemaic dignitaries, e.g. W. Clarysse, G. Van Der Veken, *Eponymous Priests* (Pap. Lugd. Bat. 24) nos. 68, 78, 132, cf. W. Peremans, E. Van't Dack, *Prosop. Ptol.* ii 1998, 4425, iii 5257?, vi 16298.

3 ἀσπ]άζω. Contrast ἀσπάζου (12). Cf. F. T. Gignac, *Grammar* ii 325.

Ἑλιωδώρα<ν>. Cf. F. T. Gignac, *Grammar* i 111-19, esp. 111. I take Heliodora to be the wife of Panares.

3-7 τὸ [προ]σκύνημα . . . πα]ρὰ τοῖς ἐνθάδε θεοῖς. Cf. G. Geraci, *Aegyptus* 51 (1971) 3-211, esp. 189-92. Although ἐκάς[τη]ς ἡμέρας follows the regular formula, οἶαν ἡμέ[ραν] ἐὰν κίρω (10-11) suggests that he did not in fact perform the rite every day, cf. Geraci, 201-2.

8-9 δεσπό[τη]ν. This term rather suggests that the young barber was a slave, cf. δουλικά κόματα . . . οἷς δνόματα . . . Νάρκισσον κουρέα (P. Mich. V 326.8, 45), δουλικῶν κομάτων τὰ ὑπογεγραμμένα . . . Γεμίον κουρέα (XLIV 3197 4-5, 14). Apprentices might be either free or slave; for slave apprentices cf. I. Biezuńska-Małowist, *L'Esclavage* ii 85-7, J. A. Straus, *Historia* 26 (1977) 78. No apprentice contract for a barber (κουρεύς) is known to me; those for κτενισταί seem to concern wool-carding (Biezuńska-Małowist 87). For apprentice barbers cf. LI p. xiv, under XXXI 2586 7. In this case the name, Agathangelus, may help to indicate that the young barber was a slave, see 1 n.

10-11 οἶαν ἡμέ[ραν]. Cf. 3-7 n. For the accusative denoting a point in time cf. E. Mayser, *Grammatik* ii.2 p. 332 (§ 105.2), Blass, Debrunner, Rehkopf, *Gramm. d. neutest. Griechisch*¹⁵ 131-2 (§ 161.3 and n.).

11 For ἐὰν in place of ἄν in indefinite relative clauses see B. G. Mandilaras, *The Verb* pp. 266-7 (§§ 596-7).

14 At the end ρ^μ, with raised mu, is fairly clear; read in full perhaps ερρωσ.ε[υχ]ρ^μ = ερρωσθ(αι) ε[υχ]ρμ(αι).

3810. CALLIAS TO CYRILLA

38 3B.86/N(1-3)a

11 × 35 cm

Second/third century

A reference to an obeisance (προσκύνημα) before 'the lord Apis', which is only the third of its type to be published, indicates that this letter was written from Memphis, see 3-5 n. Although it is a private letter, it is interesting because it came from a man employed on public business. Callias, the sender, took orders from a royal scribe, who sent him from Memphis to Athribis and so caused him to lose contact with a certain Dioscurides. He wrote to 'the lady' Cyrilla chiefly to tell her the good news that 'the strategus was released to his strategiate', adding that Dioscurides had no more to worry about. He went on to say that one of the governor's guards (αιγγλάριος) came to the royal scribe and himself shared in releasing (συναπέλευσεν) the strategus of the Lycopolite nome and two other strategi. The simultaneous release of three district governors at Memphis significantly recalls the so-called *conventus*, a review of the affairs of the districts periodically conducted by the prefect of Egypt, see especially M. Foti-Talamanca, *Ricerche sul processo: I L'Organizzazione del 'Conventus' del 'Praefectus Aegypti'* i 31-41. Memphis is the city best documented as the seat of the *conventus*.

The letter closes with greetings to Cyrilla's household, after which, in a smaller and more rapid hand, stands a farewell formula. The main script is a very good official cursive, firmly based on the 'Chancery' style, on which see G. Cavallo, *Aegyptus* 45 (1965) 216-49, with 15 plates. Tavola 10 shows two documents, BGU I 296 of c.AD 219/20 and P. Lond. II 353 of AD 221, which are close to 3810. It seems likely that the main hand is that of a clerk, possibly one who usually worked in the office of the royal scribe. The cursive farewell formula will be in that of Callias himself. The remains of the address on the back are very scanty, but they recall the clerk's hand.

A sheet-join running vertically very near the right edge shows that the piece

was cut from a roll c.35 cm tall and that the letter was written along the fibres of the recto. A deep horizontal crease near the middle of the sheet shows that it was folded there first. With the top half of the letter inside it was then rolled and flattened in the usual way into a flat spill about 18 × 2.5 cm, on one side of which the address was written.

Καλλίας Κυρίλλῃ τῇ κυρίᾳ
χαίρειν.
πρὸ μὲν πάντων τὸ προσκύνημα
σου ποιῶ καθ' ἑκάστην ἡμέραν
5 παρὰ τῷ κυρίῳ Ἀπιδι καὶ τοῦ Κυρίλλου
Διοσκοροῦδου καὶ τοῦ Κυρίλλου '....ου' [...ν]
Ἀποει[.]ρος. πεπόμφι γάρ με ὁ βασιλικὸς
εἰς Ἀθρίβειν ἕνεκα ἵππου, παρήλ-
θέν με Διοσκουρίδης. γράφω σοι
10 οὖν, κυρία, περὶ τῆς εὐαγγελίας
ὅτι ἀπελύθη ὁ στρατηγὸς εἰς τὴν
στρατηγίαν. Διοσκουρίδης μὴ
ἀγωνεῖ > λοιπὸν περὶ μηδενός.
οὕτως γὰρ ἀσφαλῶς κυγγάριος
15 ἔλθων τῷ βασιλικῷ καὶ αὐτὸς συν-
ἀπέλυσε τὸν στρατηγὸν τοῦ
Λυκοπολείτρου καὶ ἄλλους δύο.
ἄσπας[αι] τοὺς ἐν οἴκῳ πάντα. γρά-
ψον μ[οι] περὶ τῆς σωτηρίας σου.
20 (m. 2) ἔρρωσθαί σε εὖχο(μαι), κυρία,
πολλοῖς ἔτεσιν εὐτυχ(οῦσαν).

Back, upwards along the fibres:

(m. 1?) ἀπόδος (plus further scanty remains)

6 l. Διοσκουρίδου? 7 l. πεπόμφι 8 l. Ἀθρίβιν 13 l. ἀγωνιᾶ (subj.) or ἀγωνιάτω
17 l. Λυκοπολείτου 20 ευχῶ 21 ευτυχ

'Callias to Cyrilla, (his) lady, greetings.'

'Before all I make your obeisance every day before the lord Apis and (that) of Cyrillus son of Dioscurides(?) and of the other(?) Cyrillus, son of A . . . For the royal scribe had sent me to Athribis on account of a horse, (so that?) Dioscurides got ahead of me. So I write to you, my lady, about the good news that the strategus was released to his strategiate. Dioscurides should not worry any more about

anything. For just so a *singularis* came safely to the royal scribe and himself helped to release the strategus of the Lycopolite nome and two others. Greet all those in the household. Write to me how you are.'

'I pray for your health, lady, for many years in prosperity.'

'Deliver to . . .'

3-5 Cf. G. Geraci, 'Ricerche sul Proskynema', *Aegyptus* 51 (1971) 3-211, and esp. 185-6 for the two earlier examples associated with Apis, SB VIII 9903 (= E. G. Turner, *Rech. Pap.* 2 (1962) 117-21 = I 160 description), and SB VIII 9930 (= id., *Festschrift Oertel*, 32-3). It was clearly the custom to invoke the local god. Memphis is specifically mentioned in SB 9903.

5-7 The ends of the lines are badly abraded and there is a hole near the beginnings. I think two persons called Cyrillus, probably related to Cyrilla, were associated with her in the obeisances to Apis. They are distinguished by patronymics and I think that the second one was described as ἄλλον, which was struck through and replaced by ἐτέρου above the line. (I should perhaps say that neither in 5 nor in 6 is it possible to read τοῦ κυρίου μου in place of τοῦ Κυρίλλου.) Διοσκοροῦδου (6) looks like an erroneous mixture of two common names, Διόσκορος and Διοσκουρίδης. I should think Διοσκουρίδου was intended, and possibly he was the same man who is mentioned in 9 and 12. Ἀποει[.]ρος (gen.) seems to be unknown; ἀπό remains possible, but a suitable place name is equally elusive. I do not think that it is possible to read nu for epsilon iota, to give ἀπό[τ]ος.

7 βασιλικός, sc. γραμματεὺς. Cf. 15.

8 Ἀθρίβειν = Ἀθρίβιν. Cf. A. Calderini, *Dizionario dei nomi geografici*, I i 32-3. It was a nome capital in the Delta about fifty or sixty kilometres north of Memphis.

ἵππου. I believe that ἵππου is correctly read and that the clerk lost track of the grammar. He may have forgotten that he had just written πεπόμφει γάρ and thought that he had written ἐπεὶ πεπόμφει; or he may have left out ὥστε after ἵππου. There may also be the possibility of putting the punctuation before ἕνεκα ἵππου, assuming a harsh asyndeton, 'For the royal scribe had sent me to Athribis. Because of (his) horse D. got ahead of me'. On the whole this seems less likely to me.

(Mr Parsons points out that 'anticipatory' γάρ is sometimes used to mean 'since, as' in a way which could suit this passage exactly, see J. D. Denniston, *The Greek Particles* 69-70. If this is what Callias wrote and meant to write, it is noteworthy in a papyrus letter. In that case translate, 'Since the royal scribe sent me . . ., D. got ahead of me'.)

9-12 I take it that this means that the prefect's review of the business of the district had been terminated and that no blame had fallen on the strategus, cf. introd.

12-13 Since the negative is μὴ, it seems that ἀγωνεῖ must represent ἀγωνεῖ(ᾶ) = ἀγωνιᾶ (3rd pers. sing. pres. subj.) or ἀγωνεῖ(ᾶτω) = ἀγωνιάτω. Dioscurides, therefore, was in touch with Cyrilla. He had either passed through Memphis while Callias was away or had simply left Memphis before Callias got back from Athribis, see 7-9. Cf. 14-17 n.

14 κυγγάριος = κυγγουλάριος = (*equus singularis*). See especially M. P. Speidel, *Guards of the Roman Armies. An essay on the singulares of the provinces*. For papyrus references see S. Daris, *Lessico Latino*, s.v. κυγγουλάριος; add P. Lond. V 1755.6; 1756.9; 1757.6 (with J. G. Keenan, *ZPE* 24 (1977) 197-8); CPR VII 24 verso 12; 26.26 (with J. Gascou, *CE* 54 (1979) 340 and 58 (1983) 229); P. Sorbonne inv. 2291.5-7 (M. Drew-Bear, *CE* 54 (1979) 291-303). The provincial *singulares* formed a corps of guards for the governor, who often entrusted individuals with special duties, see Speidel, op. cit. 44. Here the duty seems to be that of messenger, an aspect which is prominent in the late period, fourth to seventh centuries, when their service had degenerated into a civilian *militia officialis*, cf. Keenan, *ZPE* 24 (1977) 197 n. 2, Drew-Bear, *CE* 54 (1979) 295-6. There is allegedly one eighth-century reference, but it may be wondered whether κυγ() in P. Apoll. Ano 83.5 is certainly relevant. May it not be, for example, merely a phonetic version of ζυγ(οστάτου), which appears in the parallel line 1? See F. T. Gignac, *Grammar* i 120.

For the syncopated form κυγγάριος see F. T. Gignac, *Grammar* i 309, cf. 219 for the commoner κυγγουλάριος.

14-17 Since the agent was one of the prefect's guards, it is plain that the strategus was released by the prefect. See introd. for the *conventus* as the probable occasion of the release. The royal scribe is presumably the same one from whom Callias took orders (7-8). The guard seems to have conveyed to the royal scribe the order to release the strategus of the Lycopolite nome and presumably this is the strategus already referred to in 11. Does this mean that the strategus of the Lycopolite was not present in Memphis? Could he be the Dioscurides who was to be relieved by the good news that the strategus had been released?

In that case it would seem that the strategus 'got ahead of' Callias by leaving Memphis while he was at Athribis. Dioscurides went to somewhere near Cyrilla, who was presumably in Oxyrhynchus, where the letter was found. By this string of conjectures we arrive at the following situation: Dioscurides was an Oxyrhynchite serving as a strategus in the Lycopolite nome, according to the rule whereby strategi and royal scribes in this period had to be recruited from outside the district, see J. G. Tait, *JEA* 8 (1922) 166-73. He and his royal scribe, in whose service Callias was, went to Memphis to attend the *conventus* for the districts of the Thebaid, cf. M. Foti-Talamanca, *Ricerche sul processo* i 31-5. Dioscurides, leaving the royal scribe to represent the nome, went to Oxyrhynchus before the prefect's review was finished and at a moment when Callias was doing an errand for the royal scribe at Athribis. The prefect was satisfied of the good conduct of the affairs of the Lycopolite even in the absence of the strategus and sent his guard to inform the royal scribe that the strategus was 'released'.

If we look for evidence of Lycopolite strategi from Oxyrhynchus, see G. Bastianini, J. E. G. Whitehorne, *Strategi and Royal Scribes* (Pap. Brux. XV) 77-8, we find one candidate in XLIV 3167 addressed to [c.6]δηι στρατηγῶ Λυκοπολείτου [(line 2) and datable between 24 September, AD 195, a retrospective date given internally (3167 18-19), and 4 November, AD 197, by which time Caracalla is known to have entered the dating clauses (VI 910 42-7). The damaged date clause of 3167 18-20 refers to Septimius Severus alone. The document was found at Oxyrhynchus, but entirely concerns the Lycopolite nome, so that it may well be an item brought back by an Oxyrhynchite who served as strategus in the Lycopolite, cf. Tait, *JEA* 8 (1922) 169-71, esp. 170 § 15. There are about seven pages of names ending in -δης in F. Dornseiff, B. Hansen, *Rückl. Wb. d. gr. Eigennamen* 149-56, so that Διοσκουρίδης would not be by any means a certain restoration, but it is at least a possibility that 3167 and 3810 refer to the same person.

All this is, of course, highly conjectural. If it is right, there is no need for Callias or his superior the royal scribe to have any Oxyrhynchite connections.

17 καὶ ἄλλους δύο. Presumably the royal scribe had nothing to do with these other strategi, who are simply tacked on to the sentence, as having received their dismissal from the same messenger.

22 Although faint, ἀπόδος is certain. After that, we expect something like Κυρίλλη π(αρά) Καλλίου, possibly with a design, cf. XLVIII 3396 32 n., before π(αρά). I cannot discern this wording in the scanty traces and Καλλίου may have been followed by a title or other description, since the remains are spread over an unexpectedly long line and the final letters might be read as -ατον.

3811. BUSINESS LETTER

38 3B.83/D(1-2)a

14 × 13 cm

Third century

Terse and businesslike, this letter is wholly concerned with the single matter of getting a builder to stack and fire some bricks.

The writing runs along the fibres, but the roughness of this surface suggests that it was the verso of the original roll from which the piece was cut. There is no sheet-join surviving to confirm this opinion. There seems to have been no address on the back, but rather remains of writing which has been washed out deliberately, giving the impression that there was a text here rather similar in layout to the surviving letter. This writing ran across the fibres of what is judged to be the recto, contrary to the usual custom. All this suggests that the sheet had been used even earlier and that the surviving letter is perhaps the third text to have been written on it.

The script is a practised upright cursive, decorated by thick serifs. It seems to imitate good official hands of the third century, such as LI 3614 (Pl. V).

Ἐρείων Παγένει χαιρεῖν.

εἰ ἔτι Πινουτίων ὁ οἰκοδόμος παρὰ
σοῖ ἔστιν, ἀναγκαίως πρότρεψαι αὐ-
τόν, τοῦ δικαίου μισθοῦ αὐτοῦ λαμ-

5 βάνοντος, στοιβάσαι καὶ ὑποκαῦ-
σαι τὴν ὀπτόπλιθον Εὐδαί-
μονος τοῦ πατρὸς Πλωτείου.
ἀλλὰ μὴ ἐν παρέργῳ χῆς. ἀναγ-
καίως γενέσθω τὸ ἔργον. ἡ δὲ ὀ-
10 πτόπλιθος ἐν ἐποικίῳ ἔστιν
Οὐάλεγτος. ἔρρωσο.

1 l. Ἐρείων 3 αναγ'καιως 5 ὑποκαυ 7 l. Πλωτίου 8 αναγ'

'Horion to Pagenes, greetings. If Pinution the builder is still with you, press him urgently to stack and fire the burnt-brick of Eudaemon the father of Plotinus, for the proper wage, which he will receive himself. Do not treat (this) as a side-issue. Get the job done urgently. The burnt-brick is in the farmstead of Valens. Farewell.'

4-5 τοῦ δικαίου μισθοῦ αὐτοῦ λαμβάνοντος. This can, with difficulty, be taken as it stands, 'at the proper (rate of) pay, himself receiving', i.e. 'for the proper wage, which he will receive himself'. Alternatively, we might emend to τὸν δίκαιον μισθὸν ἢ τοὺς δικαίους μισθοὺς, but the genitive of price looks as if it was part of the sentence as originally formulated, while αὐτοῦ λαμβάνοντος may have been an afterthought.

5-6 στοιβάσαι καὶ ὑποκαῦσαι τὴν ὀπτόπλιθον. One thinks first of the bricks being stacked in a kiln, but it is also possible to stack bricks loosely, leaving tunnels at the foot of the stack to be filled with combustibles, which are then set alight to fire the bricks, see L. Ménassa, P. Laferrière, *La Sāqia* 1-3, fig. 1. On brick in the papyri see G. Husson, *Oikia. Le vocabulaire de la maison privée en Égypte d'après les papyrus grecs* 232-5. Fired brick is rarer than raw, and is especially, though not exclusively, associated with wells and cisterns, cf. L. C. Youtie, *ZPE* 50 (1983) 59-60. In this letter the brick is called ὀπτόπλιθος even before it is fired.

6-7 Cf. 3802 4. If the persons were the same, the date of 3811 would be reasonably close to AD 296. Note the similarity of the inventory numbers, which could indicate that the items were found not far apart.

10-11 ἐποικίῳ . . . Οὐάλεγτος. Cf. P. Pruneti, *I centri abitati* 127, citing only the sixth-century Apion estate account XVI 1912 66-7, 71, 73, 77, 118, 136, all references to persons ἀπὸ Οὐάλεγτος except for 118 mentioning an ἐκκλησία Οὐάλεγτος. It seems quite likely that the ἐποικίον is the same place in spite of the difference in dates.

3812. EUNÖIUS TO HORIGENES

67 6B.10/J(1-2)a

19.5 × 17 cm

Later third century

This letter is the fourth to record the celebration in Egypt of the Roman New Year under the simplified name of the Calends, see 5-6 n. The sender reproaches his correspondent for not visiting him for the occasion, as promised and expected, and

for not even sending the customary present of honey. In a postscript he urges him to come for the festival of Anubis.

The letter is written across the fibres on the back of a piece cut from a register of men's names with amounts of grain, published above as **3786**. The only entry not of this type is a heading consisting of the name of a district of Oxyrhynchus, *Βορρά* (or *Νότου*) *Κ]ρηπειδος* (i 16), cf. H. Rink, *Strassen- und Viertelnamen von Oxyrhynchus*, 38-9. However, although the letter is written on used paper from Oxyrhynchus and contains deletions and corrections, and although there is no address on the back, it does not seem to be a mere draft, because there are probably two hands. In my judgement a clerk wrote the main block and the three-line postscript (17-19), which is on a smaller scale and more rapid, while the two-line formula of farewell (13-14) is in a different small cursive. The sender would hardly have written the farewell formula in the usual way on a draft which was not to be sent. This should therefore be the actual letter, probably sent from elsewhere in the city or from somewhere nearby. The bearer of the letter presumably did not need an address. The recommendation of him in 12-13 suggests that he was not known to the recipient, but was expected to make himself known rather than just leave the letter at the house.

Although the phonetic spelling *γλυκείων* for *γλυκίων* (6) remains, four others in the body of the letter have been corrected: *ἀσχολεία* to *ἀσχολία* (3), *και* to *σε* (3), *μέλει* to *μέλι* (6), and *κοί* to *κύ* (7). Above the iota of *ευσσίτους* (9) the corrector wrote *ει* and then cancelled it again when he realised that the original spelling was correct. An omitted word, 'τὴν', has been added above the line in 12. In 13 *Εὐνοίου* has been changed to *Εὐνοίῳ*; with *κύντροφος* either would have been acceptable, but the dative is more literary. This unusual scrupulousness is matched by the unusual use of lectional signs, cf. E. G. Turner, *Greek Manuscripts of the Ancient World*, pp. 14, 118 (= ed. 2, pp. 11-12, 118). Apart from the cases of diaeresis, both 'organic' and 'inorganic', see Turner, *op. cit.* 12 (= ed. 2, p. 10), common in private letters, there are: an oblique stroke for strong punctuation (5), one high stop (11), probably two rough breathings (6, 12?), two examples of apostrophe used as a diastole (9, 10), and one slightly doubtful accent (10). The postscript is more careless: *αλ'* (with a proper apostrophe) for *ἀλλ'* was left uncorrected, *πανήγυρις* was corrected to *-ιν*, another article was omitted and restored above the line, and the odd, but explicable, slip of *Σεβαστοῦ* for *Ἀνούβιδος* had to be corrected, see 19 n. The facetious style of the letter, though simple enough, is more literary than colloquial. Eunöius was evidently an educated person with literary tastes.

The assigned date is based on a palaeographical judgement of both sides of the papyrus. It may be that the register is connected with the corn dole archive of around AD 270, but this is not certain, see **3786** introd.

The rare name Eunöius also occurs in **3801**, a short business note of AD 295. Again a connection is possible but not certain. If there is only one Eunöius, we could reasonably expect him to have written in his own hand **3812** 13-14, a short farewell

formula, and **3801** 4, a single abbreviated word. They are not obviously in the same hand, but they are not distinctive enough to exclude the possibility that they were written by one man.

There is one sheet-join visible on the recto, where it is clear that the whole height of the roll is not preserved, see again **3786** introd. It looks as if a piece was cut vertically from the roll and the piece then divided again horizontally. The back of the top part was then used for the letter.

Εὐνόιος Ὠριγένει τῷ τιμιωτάτῳ πλείστα χαίρ[ει]ν.
 τὸ σπουδαῖον τῶν λόγων ἔργῳ παρείδες. ἡμεῖς δὲ τῇ
 σῆ ἀσχολ[ε]ῖα συνγινώσκομεν, ἀλλὰ χρὴ σ[αι] 'ε' μεμνή-

'Eunöius to Horigenes, his most treasured (friend), very many greetings!'

'The earnestness of words you have in deed disregarded. We forgive your being busy, but you must remember the things you promised and be in earnest about the things you said you would do. For at the sweet Calends, when honey should have been sent—you are sweeter than it!—, you were careless in that direction too, and that although we were expecting you to come for the festival of the Calends, and you have left your fellow-feasters feastless. I write this to you during the festival, by way of a joke, and reminding

you of your earnest feeling for us. Look upon the man who delivers the letter to you as one of us, for he is someone close to Eunōius.'

'May the gods preserve you for ever with all the household!'

'But see that you do not neglect it, my lord father! Come to Eunōius for the festival of our most divine [Augustus] Anubis.'

1 *Εὐνόιος*. Cf. W. Pape, G. Benseler, *Gr. Eigennamen* 415. It is not in F. Preisigke, *Namenbuch*, or D. Foraboschi, *Onomasticon*.

2 *σπουδαίων*. For a survey of words with the stem *σπουδ-* in the papyri see J. H. Moulton, G. Milligan, *Vocabulary of the Greek Testament* (Part VII, 1928) 585-6. There is an echo which I have put into the translation, without, however, achieving natural English. At this place there seems to be a mixture of the idea of doing zealously the things that it is proper to do (*σπουδάζων* 4) and being zealous to serve one's friends (*σπουδῆς* 11). I think that the pompousness of this sentence is meant to be funny, so that there may also be an allusion to the opposition between *τὸ σπουδαίων* and *τὸ γελοίων*, cf. 10 n. on *προσπαίζων*.

3 *συγγινώσκωμεν* = *συγγινώσκομεν*. There is a gap wide enough for two letters between *ων* and *ωσκομεν*, perhaps because of a roughness in the papyrus. There is also a narrow vertical split enlarged by a bookworm, but it does not seem likely that there was an apostrophe used as a diastole here, cf. E. G. Turner, *Greek Manuscripts*, p. 13 (= ed. 2, p. 11). On the other hand in *ἐπηγγείλω* = *ἐπηγγείλω* (4) there is certainly some ink at a high level which, in spite of the damage, is likely to have been an apostrophe. If it had been a gamma to replace the nu, the nu would show signs of correction and we would expect a similar correction here in line 3.

ϵ[[αι]]'ε'. Cf. F. T. Gignac, *Grammar* i 193.

4 *ἐπηγγείλω*. Cf. app. crit. and 3 n.

5 For strong punctuation by oblique stroke see E. G. Turner, *Greek Manuscripts* no. 66 (p. 110), no. 47 (pp. 67, 84-5), cf. p. 10 (= ed. 2, p. 8). Cf. XXXI 2603 29 (plate in *JEA* 48 (1962) 133), L 3533, LII 3657-8, (XXX 2513+) LIII 3698. Similar signs occur in some Christian texts of the Byzantine period and in a few cases they are used lavishly to separate phrases or individual words, see G. Bastianini, *Wiener Studien* 97 (NF 18, 1984) 195-202, esp. 196-8. In LIII 3712 (Eur., *Phoen.*) an oblique stroke appears at the ends of some lines, but its function is not clear.

5-6 *Καλάνδαις*. Other papyrus letters, P. Wisc. II 72, CPR VIII 52, and perhaps W. Chr. 483 (= P. Lond. III (p. 213) 951 verso), refer to the Calends as a holiday or festival, and in XII 1475 31-2 a sale of land stipulates that liability for taxes should pass to the buyer on the Calends, month unspecified. In all these cases the reference is to the Roman New Year, which came to be celebrated all over the Empire and to be known in Greek simply by the name of 'the Calends', without mention of the month, see the discussion in J. R. Rea, 'On the Greek Calends', *Proceedings of the XVIII International Congress of Papyrology* (forthcoming). To the bibliography there add now D. Baudy, 'Strenarum Commercium', *Rhein. Mus. N. F.* 130 (1987) 1-28.

6 *μέλι*. Cf. M. Meslin, *La fête des kalendes* 42. Ovid, *Fasti* i 185-8, makes Janus explain that honey and other sweet things are appropriate gifts for New Year because they give an omen that the rest of the year will be 'sweet'. Money, as in CPR VIII 52.10-11, is even sweeter (189-226)!

γλυκείων = *γλυκίων*. This is the only uncorrected phonetic spelling, see introd., apart from the unassimilated nasals *συγγινώσκομεν* (3) and *ἐπηγγείλω* (4).

οὔ (like *ένα* 12?) has a rough breathing, see introd., cf. E. G. Turner, *Greek Manuscripts*, pp. 14 (= ed. 2, pp. 11-12), 118.

7 *οἶ* was corrected to *οῦ* by deleting the omicron and adding a bowl at the top of the iota, which thus became the stem of the new upsilon. For the phonetic equivalence see F. T. Gignac, *Grammar* i 198-9.

8 *ἐορτήν*, cf. 10 and 18 n.

9 *τοὺς συσσίτους ἀείτους*. The New Year celebrations, sometimes lasting over five days, began with a festive meal on New Year's Eve, see *RE* X 1562, A. Müller, *Philologus* 68 (1909) 481-2, M. Meslin, *La fête des kalendes* 71-2. It is probably alluded to here. The metaphor implies that the other dinner guests of Eunōius had not been able to enjoy the honey of Horigenes's company, cf. 6.

For the apostrophe used as a diastole (*συσσίτουςἀείτους*), cf. 10, see E. G. Turner, *Greek Manuscripts* pp. 12-13 (= ed. 2, p. 11), 62.

10 *ἐν ἐορτῇ ἐν'εορτῇ* pap. For the apostrophe/diastole see previous note. It is perhaps too charitable to

transcribe the accent as a circumflex; it looks more like an acute. It may be slightly damaged or it may be just badly made, but it could also be a mistake.

προσπαίζων. *LSJ* s.v. I. 2 tells us that this verb is the opposite of *σπουδάζω* in Pl. *Euthd.* 283 b. Cf. 2 n. The celebration of the New Year tended to take over the hilarity of the Saturnalia, celebrated shortly before, see *RE* X 1562, M. Meslin, *La fête des kalendes* 90-2, so that the facetious tone of this letter was probably thought to be particularly appropriate to the season.

11 After *σπουδῆς* there is a stop, a high stop from its context, which requires strong punctuation, but at middle rather than high level, being below the extended horizontal cap of the sigma. For the system see E. G. Turner, *Greek Manuscripts*, pp. 10-12 (= ed. 2, pp. 8-10).

12 The writing of the inserted *τῆν* looks more like that of Eunōius' farewell formula in 13-14 than like that of the clerk's own corrections in 19. It may be that the correction of the spelling was done by Eunōius himself, but it is not possible to be sure where the corrections consist only of a deletion or have a single superscript letter or part of a letter as in ϵ[[αι]]'ε' (3) and ϵ[[ο]]ύ (7). The punctuation and lectional signs are the work of the clerk, so far as I can see.

ἐνα. Cf. 6 n.

13 *Εὐνόϊω* (-ω corr. from -ου). See introd. for the correction. Eunōius uses his own name here and in 18 instead of *ἐμοί* and *ἐμέ*. I think this is part of his facetious style and not a case of the clerk writing in his own *persona*.

κόντροφος. For a survey of its uses in the papyri see J. H. Moulton, G. Milligan, *Vocabulary of the Greek Testament* (Part VII, 1928), 615, cf. G. H. R. Horsley, *New Documents Illustrating Early Christianity* III (1978) no. 9 pp. 37-8. Its sense is usually rather weak, i.e. 'friend' rather than 'foster-brother'.

13-14 For similar farewell formulas with optatives cf. P. Herm. Rees 2.28-32, 3.20-5, 5.27-9.

15 I suspect that the unfinished alpha was a false start to the postscript 17-19, beginning ἀλλ' ὅρα. It may be that it is in the hand of Eunōius, and that he began to write the postscript himself before changing his mind, or it may be that the clerk started here and then decided that it would be more convenient or more appropriate to write it below.

16 To judge from the width about twenty letters on the smaller scale have been very thoroughly blotted out with ink. Nothing has been read. It may have been something which was there before the letter was written, of course.

17 For the formula ἀλλ' ὅρα μὴ ἀμελήσῃς cf. H. A. Steen, 'Les clichés épistolaires', *Classica et Mediaevalia* 1 (1938) 162-6.

πάτερ. From the tone of the letter it seems very unlikely that Horigenes was the father of Eunōius by blood, and there is abundant evidence that terms of blood relationship were much used as marks of friendship and respect, see e.g. P. Mich. VIII 467-81 introd., 468.46-7 n., H. C. Youtie, *Scriptunculae* ii 891 and n. 6, cf. 3808 introd., 3813-15 introd. para. 2, 3819 introd., 3820 1 n.

18 *Εὐνόϊον*. Cf. 13 n.

πανήγυρις. The word denotes an 'assembly' . . . 'esp. a festal assembly' (*LSJ*), and so should mean a public event, but there are two papyri which use it to refer to birthday celebrations for private individuals, see M. Vandoni, *Feste Pubbliche*, nos. 137 (V AD) and 149 (I BC/I AD). Occurrences of *ἐορτή* (cf. 8, 10 here) and *πανήγυρις* in the papyri have been reviewed lately by L. Casarico, *Aegyptus* 64 (1984) 135-62. See too F. Perpillou-Thomas, 'La panégyrie au gymnase d'Oxyrhynchus', *CE* 61 (1986) 303-12; she points out (303 and n. 4) that *πανήγυρις* is rarely used to denote festivals of gods, giving only two references where the word is found followed by the name of the god as here: π. Ἀθηνᾶς (SB V 8159.24), π. τοῦ Νείλου (XLIII 3148 2). It is, by contrast, particularly used of a Greek festival connected with the gymnasium at Oxyrhynchus, which took place c.24 Tybi, 19 January. This season would suit our letter well, but it is difficult to connect Anubis with Greek gymnasial festivities.

19 τοῦ θειοτάτου [ο]υ [ήμ]ων [[σεβαστοῦ] Ἀνουβιδος. There exists a series of statues representing Anubis as an emperor with a dog's head and there is one inscription with a dedication worded *Anubi Aug(usto)*, see J.-C. Grenier, *Anubis Alexandrin et Romain* 39-40, pl. XIVb; 93 no. 57. It is remotely possible that this conception of Anubis may have contributed to the error, but the main cause of it lies in the use of *θειότατος* as a standard epithet for the emperor, on which see S. R. F. Price, *Rituals and Power* 245-6, citing especially J. Rougé, 'Ο θειοτάτος Ἀνγουστος', *Rev. phil.* 43 (1969) 83-92. In Egypt at least it is applied more frequently to emperors and kings than to gods, see G. Ronchi, *Lexicon Theonymon* ii 435-6, which links it only with the name of Memnon (four inscriptions on the colossus, one on the tomb of Rameses VI).

The festival in question has not been identified. In the Greek papyri only one Anubis festival is satisfactorily dated, from P. Hibeh I 27.170-3. This is a calendar of Sais of the early Ptolemaic period, which records a festival for Anubis on the day of the autumn equinox. Anubis was associated with the equinoxes, see *RE* I 2646-7, so this festival may have been celebrated more widely than just in Sais, but it seems unlikely that a date so remote from 1 January is referred to here. Other festival-dates can be culled from S. Schott, *Altägyptische Festdaten* (a reference which I owe to Dr Mark Smith), but none seems sufficiently close or outstanding to qualify for identification with this one.

Anubis is the chief god of the neighbouring Cynopolite nome, see especially J. Vandier, *Le Papyrus Jumilhac*. We might expect him to appear very rarely in the Oxyrhynchus papyri if we recall Plutarch, *Isid. et Osir.* 72, mentioning riots between Oxyrhynchites and Cynopolites associated with the sacrifice by each side of the other's sacred animal, and in fact there is only one other reference: X 1256 mentions a priest of Anubis in a Cynopolite village. However, the worship of the oxyrhynchus fish is not met with at all in the papyri from Oxyrhynchus; contrast PSI VIII 901, a sworn undertaking by Arsinoite fishermen not to catch oxyrhynchi or lepidoti. The Oxyrhynchite attitude to Anubis is simply not known and this isolated mention of him is hard to put into a comprehensive context, but the letter proves that he received some respect there.

It should be added that A. Alföldi has argued in a series of works (*A Festival of Isis* (1937), *Die Contorniaten* (1943), *The Conversion of Constantine* (1948), p. 80, 'Die alexandrinischen Götter', *JAC* 8/9 (1965/6) 53-87), that the pseudo-coins called 'contorniates', some of them bearing types of Isis, Sarapis, and Anubis, were distributed in Rome on 3 January, upon which date he would fix a festival of Isis Pharia. If proved, this would provide a good context for our letter. The sender would be inviting a person who lived nearby, see introd., and who had failed to turn up to dinner on 31 December, see 9 n., to come along to some continuation of the celebrations on 3 January analogous to the *vota publica* in Rome. The word *πρωίγγυς* would be wholly appropriate to this sort of event. Alföldi's arguments are not accepted by M. Meslin, *La fête des kalendes* 59-66, and in any case we might wonder for what special reason Anubis would lend his name to this celebration, rather than Isis or Sarapis. However, it is undeniable that there is a series of contorniates with reverses showing Anubis and the legend *VOTA PVBLICA*, see Alföldi, *A Festival of Isis* 20-2 and the relevant plates, esp. XIV. *Vota* were particularly associated with 3 January, see *RE* Suppl. XIV coll. 968-70, and were for the health of the emperor, a fact which might be seen as a further explanation of the use of *θειότατος* and a background to the deletion of *σεβαστοῦ*.

3813-3815. LETTERS TO APOLLONIUS

All three of these letters were found in the third season of excavations at Oxyrhynchus (1903-4) and have inventory numbers which suggest that at that time they lay not far apart. Although Apollonius is a common name, they could well be directed to the same man, described in 3813 88 as a hypomnematographus and ex-prytanis, see note. He might possibly be the same as Aurelius Apollonius alias Dionysius, who was prytanis of Oxyrhynchus several times in the late third century, see most lately P. Laur. IV 155. 1-4 n. There is no internal evidence, apart from the name of the addressee, to link the letters.

In 3813 (1) Justus addresses Apollonius as 'my lord brother', in 3814 (2) Theodorus calls him 'my lord father', and in 3815 (3) Eusebius calls him 'my lord son'. If we take these and the other terms of blood relationship which occur literally, we could construct a consistent family tree, as follows:

However, it seems much more likely that most of these expressions are terms of respect and affection, as so often, rather than factual statements of blood relationship. As a striking example of this custom, the pitfalls of which are still too little appreciated, see XLVIII 3396, a letter from Papnuthis to his 'lord father' and 'lady mother' (1-2), who were truly his parents, as we know from other items of the archive. In it he sends greetings to an additional 'mother' (29) and two more 'fathers' (27, 28-9)! Cf. 3808 introd., 3812 17 n., 3819 introd., 3820 1 n.

3813. JUSTUS TO APOLLONIUS

38 3B.85/C(1)a

19 × 28 cm

Third/fourth century

In spite of particularly severe damage in lines 17-34, this is the most interesting of the three letters. Justus, who wrote from Alexandria, was very anxious to take possession of the property of a freedman of his who had died, although the freedman had a son whose opposition he feared. He mentioned that the arrival of a governor was likely to suppress 'the nonsense of certain people', and reported that a petition from a brother or colleague (*ἀδελφοῦ* 51-2) of Apollonius against certain fellow magistrates concerning an uproar in the gymnasium had arrived in Alexandria and had been talked about 'all over headquarters' (*ἐν ὅλῳ τῷ πραιτωρίῳ* 58). He touched on some business in Alexandria which he might be able to settle before his return journey to attend to the affair of the freedman, and closed with some remarks about the vintage and wine-making.

Close to the left edge of the letter there is a sheet-join with the right sheet overlapping the left. This shows that the piece was cut from a roll in the usual way and that the recto was used for the letter, although the cut piece was turned upside down, so to speak, before the letter was written. The five vertical creases left by folds and the repeating pattern of damage show that the letter was rolled up with the right edge inside and pressed into a flat spill. The exposed left edge was tucked inside for safety and the address was written upwards along the fibres of one of the sides. A pattern in ink, here much blotted, indicates where a strip of binding material encircled the middle of the spill, cf. XLVIII 3396 32 n.

 88 ὑπομνηματογραφοπρυτανεῦ 89 υἱῶ (vac.) ἰουστος

'To my lord brother Apollonius, hypomnematographus, Justus, greetings. My son Dioscurides wrote to me that Diogenes the son of Marcella had died and you, my lord brother, knowing that it is on your account that I am staying here, ought to have looked after and taken care of the affair with regard to our advantage. For you know, even if I do not write to you, that the affairs of freedmen fall under the control of their patrons. So you will do well if you assume my character and make my son Dioscurides put on record the beasts and the produce of the harvest and whatever else . . . ed to him, first making (?) . . . (of?) Milo(?) . . . and(?) on account of the papers which are stored there . . . all the written documents . . . is (are?) in store. Dioscurides knows where I mean (?) . . .'

(36 ff.) 'For the nonsense of certain people has no effect any longer following the arrival of my lord the governor. If Horus gets up to his nonsense—if indeed he survives—, saying that it is his prerogative to hold on to his father's title, let him learn that he will have no power against what is right. I mean that Calocaerus—whom he himself knows—that he will help us rather than the aforesaid Horus.'

'I tell you, so that nothing may escape your notice, that the petition submitted by your colleague (or 'brother?') against certain fellow magistrates, about there having been some uproar in the gymnasium, was sent here to the most glorious Alexandria and was heard of all over headquarters and, so to speak, came to the ears of the person responsible. So, in order that you might look to their (or 'your own?') advantage, I informed you of this fact.'

'So then, in connection with . . ., as I said before, having stirred up everything against him until he gave me leave to depart, finally I am not even waiting for Alexander so as to complete the matter of the six talents also before I set out. If indeed he comes up to the 15th—the whole of the 15th, (well and good!). But if after all he doesn't come, I too shall set out. For this fellow is not going to bring his case to court ever. For it is about a nonsense on his part, as you know. In the matter of the unfinished business of the freedman I am confident that you are not going to remain quiet, so that we may not be made a laughing-stock even by outsiders. You need no instruction about either the vintage or the creditors. Also let him report to me both the yield of new wine and . . . (as?) I instructed you. I wish you well.'

Back: 'To my lord brother Apollonius, hypomnematographus, ex-prytanis, and to Dioscurides (my) son, Justus.'

1-2 For Apollonius see 88 n.

4-5 υἱοῦ Μαρκέλλης. The metronymic is used in this case because a child born of a slave mother could have no official father.

7 διατρίβω{ν}. Cf. 12 ὑποτέλλει{ν}. For the frequent phonetic problems of final nasals see F. T. Gignac, *Grammar* i 111-14.

8 φροντίδων = -ίζων. Cf. 80 ἀφηρυχάδειν = -άζων; see F. T. Gignac, *Grammar* i 75-6.

10-13 I have translated cautiously, 'the affairs of freedmen fall under the control of their patrons', but he may mean, 'the property of freedmen belongs to their patrons'. Later passages imply that Justus hoped to acquire all the freedman's possessions although there was a son. After a formal Roman manumission a patron was legally entitled to half of his freedman's estate at most, if there were children to inherit, see M. Kaser, *Das römische Privatrecht* ii 486, 508-10, A. Watson, *The Law of Succession* 185-7, citing especially Gaius, *Inst.* III §§ 39-42. Masters often manumitted informally in order to retain greater rights of succession, see A. Watson, *Roman Slave Law* 23-45.

12 ὑποτέλλει{ν}. Cf. 7 n.

17-18 The collocation of animals and harvest shows that the freedman was involved in agriculture.

19 . . .], νεν. The trace is a horizontal joining nu near the top; alpha and epsilon are perhaps the likeliest, but not necessarily the only, possibilities. We need a past tense meaning 'belonged', 'was entrusted', or something similar. I have found no plausible restoration.

20-36 Although the damage does not seem very extensive, what remains is so ambiguous that I have not been able to find a coherent story in these lines. They seem still to concern the affair of the freedman.

20 The name Μίλων, in the nominative or genitive, is perhaps to be recognized here. A place called Μίλων[ος?] is attested once, XII 1545 g.

21] καί is a good possibility. An infinitive in -]σαι or -c]θαι seems not to satisfy the traces.

24-5 Above the epsilon of οἶδεν is something which looks like an interlined sigma. It may be that a correction of οἶδεν to οἶδεσ was intended, cf. F. T. Gignac, *Grammar* ii 353-4. Against which it may be said that (1) the nu is uncanceled, (2) the clerk uses οἶδασ in 10, and (3) the interlineation is placed rather far

to the left for this interpretation. The semi-circle may be a misplaced attempt to define the top of epsilon rather more clearly.

27 κατὰ τ[οῦ] νόμου. Cf. 31-2.

31]αξιῶσι. The context, damaged though it is, seems not to favour -αξιῶσι; perhaps -αξιῶσει, whether noun or verb, simple or compound, was intended. Mr Parsons suggests [ἐπέ]νευεν [...] ἀξιῶσι(ε)ι, cf. P. Mert. I 26.14 ἐπένευεν αὐτῆς τῆ ἀξι[ώ]σει ὁ . . . ἐπανορθώτης. This may provide a link, cf. 65 n., with 64-8 below, especially with κατανεύει τοῦ ἐξελεθῆν (67-8), but I can get no further. Here κ[ατέ]νευεν will not suit the trace, for which nu might be best, and [κατέ]νευεν seems too long for the space, but the sense is unaffected. In the gap supply perhaps [μου τῆ].

33-6 The final omicron of 33 is written large, suggesting the articulation]ν ο. Restore perhaps φοβ[οῦ]μενος ὁ τ[ῆ] ρῆδῆν ἐμο[ι] κατ'ἀλέλειπτα[ι] τ[ῶ]ν δια[φερ]όντων τῶ πράγματι, 'being afraid because none of the things which relate to the affair have been left to me', but this is of dubious meaning and hard to connect with what precedes. Who was afraid? Was it the writer, or ὁ παῖς, if that is the right articulation in 32? A patron was entitled to a half share of his freedman's estate, if there were no children to inherit, and for large estates even if there were, cf. 10-13 n.

36-7 φρουαρίαι = φλυαρίαι. Cf. 40, 77. On interchange of liquids see F. T. Gignac, *Grammar* i 102-7; here assimilation may be involved.

38-9 This must refer to the arrival of a prefect in Alexandria. In P. Lond. III 1170.3 (p. 93) ἐπίβασις denotes the arrival associated with the entry to office of a strategus, so that here it may refer to a first arrival, cf. OGIS II 669 (edict of Ti. Julius Alexander).5 *cxhedon de ex od tēs plēwos epēβhēn kataboōmēnos upō tōn entyghanōntōn κτλ.*, with the commentary of G. Chalon, *L'Edit* 95 n. 3. For the importance attached to the first formal entry of a proconsular governor to his province see F. G. B. Millar, *The Roman Empire and its Neighbours* 63, citing *Dig.* I. 16.4. The prefect of Egypt probably observed similar conventions, cf. *Dig.* I. 17.1.

40 φρουαροί = φλυαρηί. Cf. 36-7 n. for interchange of liquids and F. T. Gignac, *Grammar* ii 363-5 for confusion of the classes of contracted verbs.

41 For αὐτοῦ rather than αὐτοῦ see F. T. Gignac, *Grammar* ii 170-1.

τοῦ ὄνομα ἔχειν. There is a strong tendency for the articular infinitive to appear in the genitive, cf. 68, even where another case might seem appropriate, as here the accusative would; see B. G. Mandilaras, *The Verb* 334-7 (§§ 815-35).

For ὄνομα, 'legal title' see *WB* s.v. (2), col. 184.

58 πραιτωρίω. See S. Daris, *Lexico Latino* 94-5; add XLIII 3150 14-15 and n., P. Petaus 47.44; 48.2. Little is known of the one in Alexandria, see A. Calderini, *Diz. dei nomi geografici* I i 138.

59 ἔσει = ἔσει. Cf. F. T. Gignac, *Grammar* i 66.

60-1 αὐθέντου. It is not clear what is meant. Was someone in government circles at Alexandria guilty of instigating disorder in Oxyrhynchus? Or was 'the person responsible' the one who was to settle disputes arising out of the disorder?

62 τὸ συμφέρον αὐτῶ(ν). 'Their advantage' may be correct, referring to the brother or colleague (ἀδελφοῦ 51-2) of Apollonius and some associates of his, but 'your own (pl.) advantage' is expected, in which case αὐτῶν is for ἐαυτῶν, cf. F. T. Gignac, *Grammar* ii 169, but αὐτῶν is not likely to be correct, *ibid.*, 170-1. The clear and deliberate horizontal above the omega in αὐτῶ makes it very unlikely that αὐτῶ was intended.

64 ἰσχαροσιμίου seems to be unknown, cf. F. Dornseiff, B. Hansen, *Rückl. Wb. d. gr. Eigennamen* 137 (-μας), 162 (-μης), 262 (-μιος), P. Kretschmer, E. Locker, *Rückl. Wb. d. gr. Sprache* 358 (-μιός), 434-5 (-μιος). The most obvious possibility is a new compound of ἰσχω and ἀρόσιμος, on the model of ἰσχαίμιος, 'blood-staunching, styptic', but if so I fail to understand the sense of it. I am inclined to view it as a new adjective in -μιος, cf. L. R. Palmer, *Grammar of the Post-Ptolemaic Papyri* 27-8. Perhaps, then, he meant *ἰσχαρώσιμος 'scabby', cf. F. T. Gignac, *Grammar* i 249-51, esp. 250 para. (c), for the change ε)ι, and *ibid.*, 275-7, for the much commoner ω)ο. However, there may be some connection with the equally puzzling ὁ Ἰσχαροσιέραξ (?), which occurs in a damaged context in P. Mil. I 24.18. If it is rightly taken as a name, that solution may suit our problem too.

65 καθὼς καὶ προείπον. An echo of 67-8 (κατανεύει) is perhaps to be recognised in 30-1 ([ἐπέ]νευεν . . . ἀξιῶσι(ε)ι?), see 31 n., but I can get no further with it.

66 κυκώσας. This verb has not yet appeared in the papyrological dictionaries.

68 τοῦ ἐξελεθῆν. Cf. 41 n.

69-70 περιμένω. The future, περιμενώ, is also possible, but the present in a future sense is equally idiomatic, see B. G. Mandilaras, *The Verb* 102-7 (§§ 214-21), and cf. 75, ἐξέρχομαι[αι], 'I shall set out'.

71-2 πρὸ τ[ῆ] οὔ[ν] ἐξ[έ]λ[θ]ω. Cf. III 611 (descr.) πρὸ τοῦν Ἀγαθοκλῆς διατελεῖται, XXXVI 2781 4 πρὸ τοῦν ἔλθωμεν. R. C. Horn, *The Use of the Subjunctive* 128, suggested that this was πρὸ τοῦ plus nu movable, comparing P. Fay. 136.6-7 πρὸ τοῦ τικ ὑμᾶς ἐνέγκη, P. Lond. IV 1346.10 πρὸ τοῦ γένηται ἀπόβασις, 1353.10-11 πρὸ (= πρὸ) τοῦ(?) ἀποβῆ τὸ ὕδωρ; add XVI 1854 3-4 πρὸ τοῦ τὰ ὕδατα κατακρατήσων τὴν γῆν, see B. G. Mandilaras, *The Verb* 269 § 598 (20). This use of πρὸ τοῦ plus subjunctive seems to have developed out of the use of πρὸ with the articular infinitive, see Mandilaras, *op. cit.* 348-9 § 860, by analogy with ἔωσ and πρίν plus subjunctive. The superfluous nu is more probably due to phonetic uncertainty over final nasals, see F. T. Gignac, *Grammar* i 113 para. d.

72-4 Mr Parsons points out to me that the absence of the apodosis is an idiom, see E. Maysner, *Grammatik* ii. 3 pp. 8-9. It is somewhat reminiscent of the idiomatic all-purpose apodosis in English, 'If . . . , well and good! If not, (the consequence follows)'.

75-6 οὗτος is probably Alexander. It could perhaps be the freedman's son, Horus, but the specific way the affair of the freedman is mentioned in 78-9 suggests that it is there that Justus returns to his main topic.

76 ἐνά[γει]ν, cf. e.g. BGU XII 2173.4, 10, is doubtful, but an equally short infinitive offering reasonable sense has not been found.

77 φρουαρίαι. Cf. 36-7 n.

80 ἀφηνυχάδων = -άζων. Cf. 8 n.

82 ἰδιωτῶν. This means persons not of the curial class, see A. K. Bowman, *Town Councils* 21; cf. XXXIII 2664 13-14 n., A. Bianchi, *Aegyptus* 63 (1983) 192-3. Horus as the son of a freedman evidently was not included in that class.

83 τρύγη. This and ῥύσιν, 'wine-yield' (86), indicate that the letter was written at the season of the vintage, which was, roughly speaking, about August, see M. Schnebel, *Landwirtschaft* 275-7. In 72-5 Justus seems to say that he could be found in Alexandria up to the 15th, implying that he would leave on the 16th. Perhaps, therefore, he is most likely to mean 15 Thoth = 12 September, or 15 Mesore = 8 August.

84-5 δηλωσάτω. We rather expect δήλωσον, but probably the text is correct. Presumably the subject was not specified because he was clearly indicated by the nature of the instruction. Perhaps he was Dioscurides, if the vintage was part of the agricultural activities of Diogenes, cf. 17-18 n.

85 The bottom edge, evidently original, leaves very little space below the beginning of line 84, but curves downwards to the right, where 85 has been crowded in underneath. Cf. 87.

86 Cf. 3814 29-30 n.

το. [. Read either τωτ. [or τωτ[, probably to be articulated τὸ κτλ.

Restore perhaps ὡ]ς or καθὼ]ς ἐνετειλάμην σοι.

87 This short line has been crowded in under 86 in the same way as 85 under 84.

88 The design marks the spot where a binding was placed around the letter before it was sent, cf. XLVIII 3396 32 n., 3814 31 n., 3815 introd. para. 3.

ὑπομνηματογράφω πρυτανεύ(σαντι). To judge from the lists of prytaneis in A. K. Bowman, *Town Councils* 131-7, the only known Apollonius who is a candidate for identification with this one is Aurelius Apollonius alias Dionysius, who is attested by documents ranging from AD 273 to 292, see especially P. Laur. IV 155.1-4 n., cf. LI 3610 4 n. At the unknown date of P. Laur. 155 he was (ex-?)hypomnematographus of Alexandria, councillor, (ex-?)gymnasiarch, and prytanis in office of Oxyrhynchus. In I 59 of 10 February, AD 292 he appears with another Apollonius, who has no alias, and was ex-hypomnematographus and current strategus. It is not certain whether the strategus of AD 291/2 was one of the traditional type, appointed from outside the nome, or one of the new type, chosen from the curial class of the same nome, but the usual guess is that the change came later, during the municipal reforms of Diocletian, c. AD 296.

89 Clumsy spacing and paler ink show that the words καὶ Διοσκουρίδη νύϋ were added as an afterthought, cf. 3, 15, 25.

3814. THEODORUS TO APOLLONIUS

38 3B.84/J(6-8)a

12 × 25 cm

Third/fourth century

Apollonius had been worried about the possibility of dependents of his being recruited for compulsory service. Theodorus, a magistrate himself like Apollonius, assured him that their fellow magistrates, who had not made such appointments in his absence, would not dare to do so now that he was at hand. There is an unmistakable implication that Apollonius was one of those influential people able to provide protection against these claims by the state, cf. N. Lewis, *The Compulsory Services of Roman Egypt* 156-9.

It was a question of the recruitment of carpenters for work on Trajan's Canal, see 13-15 n. This had been ordered by a procurator. The names of the carpenters concerned were not available to Theodorus, so that his reassurance was not based on certain knowledge, but he promised to send a list on the following day. He had heard that Apollonius was suffering from ill-health of a kind he had known before and promised to come and visit him.

There is a postscript of two lines in the left margin, alluding briefly to two documents. On the back is an address, as well as three lines of shorthand and a very brief endorsement in Greek, neither of them yet understood.

There is a sheet-join running vertically about 4 cm from the right edge, showing that the piece was cut from a roll in the usual way and that the writing of lines 1-28 runs along the fibres of the recto.

κυρίῳ μου πατρὶ Ἀπολλωνίῳ
 Θεόδωρος χαίρειν.

 δὲ καὶ γὰρ σοι καταλήμφομαι τῆς
 ὑγίας σου ἕνεκεν. ἐρρώσθαι σε εὐχο-
 μαι.

Downwards in the left margin:

ἀπέστιλά σοι οὖν καὶ τὰ ἀποσταλέντα μοι ἀπὸ πόλεως ὑπὸ Εὐδαίμονος γράμματα,
 30 καὶ τὰ βιβλία ἃπερ ἠθέλησας κατὰ τοῦ Καρμάτου δοθῆναι δέδωκα.

Back, downwards along the fibres:

κυρίῳ μου πατρὶ Ἀπολλωνίῳ (vac.) Θεόδωρος.

Back, top left, upwards along the fibres: οὐρεξ, θf.

Back, upwards along the fibres: 3 lines of shorthand.

15 τραϊανόν 16 ἐπεδήμησαι: αἰ corr.; l. ἐπεδήμησε; ημί 17 ἔσχευα 19-20 l. ἐπιστείλα
 26 σοι: l. σε 27 ὑγίας: ν and ι corr.; l. ὑγείας 29 l. ἀπέστειλα

'To my lord father Apollonius, Theodorus, greetings. You wrote to me about the carpenters. Even in your absence carpenters were often sent for, as well as labourers and other things, and our fellow magistrates respected your absence. Surely then, while you are at home, no-one would dare to nominate any of the people belonging to us? So be confident, father, on this point. For Sarapion the procurator wanted thirty carpenters to be sent to the Trajan river upon nomination, but Dioscorus got home to us in the evening and I was not able by reason of the hour to extract their names and write to you. So tomorrow I will write you also the names of those who have been sent for. I heard indeed that you are suffering from your usual troubles, but for this reason I have stayed at home for today. With god's help I too shall visit you on account of your health. I pray that you are well.'

'I have, then, sent you also the letter sent to me from town by Eudaemon and the petition which you wanted to be delivered against Sarmates I have delivered.'

Back: 'To my lord father Apollonius, Theodorus.'

2 Theodorus should be a magistrate of Oxyrhynchus, see 7 οἱ συνάρχοντες ἡμῶν. No suitable candidate appears in the lists in A. K. Bowman, *Town Councils* 131-47, but a later publication, XLV 3255, gives one: Theodorus alias Chaeremon, ex-gymnasiarch, ex-prytanis, and former councillor of Oxyrhynchus, evidently dead by the date of the document, which is 6 November, AD 315.

3 For ὡς plus preposition see LSJ s.v. ὡς C. II.

9 οὐκ ἄν τις πολήσαι. A correction of the final syllable looks as if it gave -ει over -αι, but that seems hardly likely, unless an intention to correct -αι to -ειε, cf. F. T. Gignac, *Grammar* ii 360, was not carried out properly.

11 For πατήρ = πάτερ see F. T. Gignac, *Grammar* ii 62.

13 *Carapiών ὁ ἐπίτροπος*. This is presumably a procurator. He is unknown, unless he can be identified with the *rationalis* Aurelius Sarapion, in office c. AD 310, see A. E. Hanson, *ZPE* 8 (1971) 15; add now P. Vindob. Tandum 4.4-5 n. This seems unlikely in view of the high status of the *rationalis*, but ἐπίτροπος would be a correct, if vague, description, and the possibility remains.

13-15 Canal work took place at the season of lowest Nile, just before the flood in mid-July. Arrangements were usually made somewhat earlier, in March and April, see P. J. Sijpesteijn, *Aegyptus* 43 (1963) 77-8, and this letter must have been written during the time of preparation.

This is the first attestation of the recruitment of carpenters to work on the Trajan canal. The designation ἐργάτης, 'workman', cf. 6 above, occurs in XII 1426 (AD 332), PSI I 87, VI 689 (both AD 423), although in the last item one of the persons may have been a specialist, perhaps a *κιππουργός*. The verb ἀπεργάσασθαι in P. Cair. Isid. 81.11 (AD 297) may imply that the function there was that of ἐργάτης. Carpenters may have worked particularly on locks, or perhaps on timber cladding for the canal banks.

For Trajan's canal in general see P. J. Sijpesteijn, *Aegyptus* 43 (1963) 70-83; add now P. Wash. Univ. I 7. It ran from Babylon (near Cairo) to Heroonpolis (near Suez), linking the Nile with the Red Sea.

20 αὔριον . . . ἐπιστέλλω. For the present used colloquially for the future see B. G. Mandilaras, *The Verb* 102-7 §§ 214-21.

26 σοι. We expect σοι with καταλαμβάνω, but the sense is practically 'I shall come to you', so he may have had some verb such as ἐρχομαι in mind.

29-30 Lines in the margin like this are very frequent in letters, cf. e.g. 3913 86-7. Compare too Cic., *ad Att.* v i. 3 *nunc uenio ad transuersum illum extremae epistulae tuae uersiculum . . .*, 'I come now to the line in the margin at the end of your letter . . .' (trans. D. R. Shackleton-Bailey, *Atticus*, Vol. III p. 5). The word *transuersum* seems to indicate that the line was in a side margin and not at the head or foot: translate perhaps 'the line at right angles (in the margin)'.

31 The blank space in the address falls at about the middle of the height of the sheet and was the place for a strip of binding material to be put around the letter when it was folded, cf. XLVIII 3396 32 n., 3813 88 n., 3815 introd. para. 3. There is no design to mark the spot.

32-5 The shorthand and what appears to be a short and abbreviated Greek endorsement would have been hidden, if they were there, when the letter was folded to be sent. It is perhaps more likely that they are notes made by the recipient. The Greek is on the right and level with the second line of the shorthand; before theta, upsilon and epsilon seem the best possibilities. The first two letters were awkwardly placed and spaced. Close before these is what I take to be a shorthand symbol or combination of symbols, but it is nearly 3 cm to the right of the second line of shorthand.

3815. EUSEBIUS TO APOLLONIUS

38 3B.84/J(6-8)b

12.5 × 11.5 cm

Third/fourth century

After the prescript Eusebius plunges without compliments into the topic of the care of his 'lord son Sabinus'. He is confident that Apollonius is taking some thought for Sabinus, and trusts that a certain Epagathus, perhaps a *paedagogus*, will have orders from Apollonius to keep close to him, since he is a child and needs not to be led into undisciplined behaviour. If a group of women, 'Adora and company', persist in their

riotous behaviour, they are to be checked by his 'lady daughter' Ptolemais and by Apollonius. Another 'lady daughter' may be mentioned in the damaged sentence with which the letter breaks off, unless this refers again to Ptolemais.

See 3813-15 introd. for the contribution which 3815 makes to the family tree if we take the terms of kinship literally. The anxiety of Eusebius makes it reasonably likely that Sabinus was his son, but the other terms are as likely to denote affection and respect as relationship by blood.

There is a sheet-join running vertically very close to the right edge, which shows that the piece was cut from a roll in the normal way and that the letter is written on the recto along the fibres. Only the top, with thirteen lines of writing, survives. The address was written downwards on the back along the fibres. About half of it survives, the blank space after *Ἀπολλωνίῳ* (14) being in all probability the place where a binding was placed around the middle of the package produced by folding the letter, cf. 3814 31 n. If this is right, about half of the letter too is lost.

κυρίῳ μου υἱῷ Ἀπολλωνίῳ Εὐσέβιος

χαίρειν.

ὅτι μέλει σοι τοῦ κυρίου μου υἱοῦ Καβεῖνου

τεθάρρηκα. τὸ δὲ παιδα αὐτὸν ὄντα δέεσθαι

του πιστεύω ὅτι ἐντολὰς λήψετε παρὰ

σοῦ ὁ Ἐπάγαθος ὥστε αὐτῷ προσκαρτε-

ρῖν. εἰ δὲ καὶ αἱ [c. 10 letters] 'περὶ τὴν Ἀδωρᾶν' ἐκείναι ἐπι-

10 μένοιεν τῷ αὐτῷ στρήγι, ἀνακοπτέ-

στωσαν διὰ τῆς σῆς, τοῦ ἐμοῦ κυρίου,

ἐπιστρεφίας καὶ ὑπὸ τῆς [c. 7 letters] κυρίας

μου θυ[γ]ατρὸς Πτολεμαΐδος. τὴν γὰρ

κυρίαν μ[ου θυ]γατέρα κ[. . . .]

Back, downwards along the fibres:

κυρίῳ μου υἱῷ Ἀπολλωνίῳ (vac.) [

1 υἱῷ 3 υἱόν; 1. Καβεῖνου 5 1. ἀταξίαν 6 1. λήψεται 7-8 1. προσκαρτερεῖν 9 1. στρήγει
9-10 1. ἀνακοπτέσθωσαν 11 1. ἐπιστρεφίας 12 Πτολεμαΐδος 14 v corr. from a

'To my lord son Apollonius, Eusebius, greetings. I am confident that you are taking an interest in my lord son Sabinus. As for the fact that he is a child and should not be led into indiscipline, I believe that in this respect too Epagathus will receive instructions from you to stay by him. And if those women, Adora and company, persist in the same insolent behaviour, let them be checked by your severity, my lord, and by (that of?) my lady daughter Ptolemais. For . . . my lady daughter C . . . (?) . . .'

Back. 'To my lord son Apollonius . . .'

4 δέεσθαι. Cf. F. T. Gignac, *Grammar* ii 371.

8-9 εἰ . . . ἐπιμένοιν. This is not a vague future conditional, but merely a future one, see B. G. Mandilaras, *The Verb*, 283-5 §§649-50. Cf. F. T. Gignac, *Grammar* ii 359-61 for the revival of the optative.

The deletion in 8 has been done very thoroughly in heavy ink. Whatever was there was probably an uncomplimentary description of 'Adora and company'.

8 Ἀδωρᾶν. The declension of this name is odd in that the genitive seems to be in -ᾶ like the nominative, see P. Cair. Isid. 90.1; 95.1, cf. 6.128; 9.66, 176; 12.8; 17.9. Ἀδωρᾶν acc. also occurs in P. Giss. Univ. Bibl. 32.24. P. Mich. VI 376.4 n. refers to Coptic examples.

11 [[εῖς]]. A repetition of τῆς is perhaps also possible, but palaeographically εῖς looks more likely. It will be an accidental reminiscence from line 10.

12 The horizontal cap of the sigma of Πτολεμαῖδος was extended to fill the end of the line. Then τῆν γὰρ, if γὰρ is the correct reading of this rapid scrawl, was added below the horizontal.

13 Possibly κ[begins the name of a second 'lady daughter', but the expression may refer back to Ptolemais.

14 Cf. introd. para. 3.

νῖω. It may be that he began to write α for ἀδέλφω, see app. crit., cf. introd. para. 2.

3816. PTOLEMINUS TO SINTHONIS

95/78(a)

10 × 25 cm

Third/fourth century

This letter and the next one (3817) may be added to the list of papyri which seem to reflect epidemics of infectious diseases in Egypt. The evidence has recently been treated by G. Casanova, *Aegyptus* 64 (1984) 163-201, *Atti del XVII Congr. Int. di Papirologia* iii 949-56, *YCS* 28 (1985) 145-54. (For convincing arguments against his interpretation and dating of the gravestones of Terenuthis see J. Bingen in C. Saerens *et al.* (edd.), *Studia Varia Bruxellensia* (1987) 3-14.) The writer of this letter had been ill and in danger of death, he says. One of his friends had been ill for some time past, receiving treatment 'ever so many times' to his feet or legs, and was perhaps getting worse. The effect on the legs seems to have been characteristic of the epidemics of the period, see 6-7 n.

Unfortunately the date can only be determined roughly. The script is a rapid sloping cursive, written by a practised hand, of the late third or early fourth century. The rare name Palex (16) occurs also in XIV 1670 and 1716. In 1716 of AD 333 an Aurelius Palex son of Parammon has a wife called Aurelia Sinthonis daughter of Thonis. In 1670 Palex writes to a lady called Chinthonis, his 'sister', and sends greetings to a Ptoleminus and his wife. The greeting is repeated in the same terms (22-3, 30-1); this is probably inadvertence, though it is possible that two men of the same name were meant. Grenfell and Hunt assigned 1670 to the third century, but the clumsy hand could well be fourth. The mention of the *officium* of a *rationalis* (καθολικοῦ 10) rather suggests late third or fourth, because after one isolated case in the reign of the Philips, c. AD 246, the regular series of Egyptian *rationales* does not begin till AD 286, see P. J. Parsons, *JRS* 57 (1967) 138-9. The only other occurrence of a Palex is in XVI 2058 74, from the sixth century. It seems possible that 1670, 1716, and 3816 all come from the same circle. If so, the epidemic probably belongs in the early fourth century. There was a plague in the territory of Maximinus Daia c. AD 311/12 with which it could possibly be connected, see *Aegyptus* 64 (1984) 166.

The writing is along the fibres. A sheet-join running vertically near the right edge shows that the piece for the letter was cut from a roll in the usual way. The creases and patterns of damage show that the letter was rolled up with the right edge inside and squashed flat so as to produce five vertical creases dividing it into six panels increasing in width from right to left. The exposed left hand panel was tucked in so as to avoid damage to the edge, and the address was written on the outside of the flattened roll on the second panel from the left. A space was left in the middle of the address, at which point a thin ligature was tied round the package. Patterns were inked over the ligature on both flat sides, consisting of five parallel lines on the address side and an irregular lattice of crossing lines on the other. The interruption of the patterns shows where the ligature once ran. I do not recall seeing two patterns for one binding before, cf. XLVIII 3396 32 n. and Pl. VI there.

Back, downwards along the fibres:

ἀπόδ(ος) Cινθώνι (design) π(αρά) Πτολεμῖνου.

1 l. Πτολεμῖνος, Cινθώνι	3 l. εὐχόμεθα	5 l. πάντοι	5-6 l. νοσεί	6 l. ἐχειρίσθη
7 l. νοσεί	8 οὐκ' ἐδυνη	9 καὶ γὰρ: γ corr. from ι?	10 l. πάντοι	12-13 l. χρήζει
14 οὐκ' ἀντε	16-17 l. μητέρα	21 ἀποδ'; l. Cινθώνι; π'; l. Πτολεμῖνου		

'Ptoleminus and Chaeremon to Sinthonis their sister, greetings.'

'Before all we pray to god that we find you well. I want you to know that Achilles is very ill and has had treatment ever so many times to the feet and has been ill right up to the present and is perhaps even more so, and because of that I couldn't talk to him. I was very sick myself, at death's door even. However, I thank god I have got well.'

'Write to me about the things you need, sister. I wrote to you ever so many times and you didn't answer me.'

'Greet our brother Palex and our mother and all your household by name.'

'I pray for you health, sister.'

Address: 'Deliver to Sinthonis from Ptoleminus.'

1 'καὶ Χαίρημων'. The verbs in lines 3 and 4 have been changed to the plural to suit this addition, but the rest remain singular and the address fails to mention Chaeremon.

3 τῷ θεῷ. Cf. 11. This is not necessarily an indication of Christianity, see M. Naldini, *Cristianesimo*, 7-10.

6 ἐχειρίσθη = ἐχειρίσθη. The verb is used of treatment with medicines or instruments, see H. Stephanus, *Thesaurus*, s.v. χειρίζω.

For the colloquial use of ποσάκις, in which it is virtually equivalent to πλειονάκις, cf. line 14 below, III 528 24 ἐδοῦ, ποσάρκεις ἔπεμα ἐπὶ ἐξέ (l. ἰδοῦ, ποσάκις ἔπεμα), P. Aberd. 70. 2-3 ἔγραψά [σοι] ποσάκις (both 2nd cent.), P. Harr. II 235.3, 13 ποσάκις σοι ἐδήλωσα, ποσάκις ἐδήλωσα (3rd-4th cent.), XLVIII 3396 4-5 ποσάκις ἔγραψα ὑμῖν (4th cent.), P. Apoll. 14.4 [?]δοῦ ποσάκις ἔγραψαν αὐτῇ (c. AD 705-6).

6-7 εἰς τοὺς πόδας. An effect on the feet, or legs, for ποῦς can mean 'the foot with the leg', as χεῖρ can mean 'the hand with the arm', see LSJ s.v. ποῦς, is prominent in the references to ancient epidemics. In P. Strassb. I 73.10-15 the writer says that he, a woman (possibly his wife?), and her children have been ill; one person, probably one of the children (ὁ μικρὸς Μίμος), has died; he himself after the disease was still suffering from a skin condition of the foot or leg, κατὰ τοῦ ποδὸς μου εἰςπολιν (= ἐρυσίπelas). Thucydides wrote (II 49.7-8) that in the Athenian epidemic, which he thought came from Ethiopia by way of Egypt, the infection began by affecting the head, travelled downwards, and, if not fatal earlier, finally attacked the extremities, κατέσκηπτε γὰρ ἐς αἰδοῖα καὶ ἐς ἄκρας χεῖρας καὶ πόδας, καὶ πολλοὶ στερικκόμενοι τούτων διέφευγον. In the epidemic described by Cyprian, *De mortalitate*, 14, some people lost feet or parts of limbs. The date of it is c. AD 252-3, see *Aegyptus* 64 (1984) 175.

7-8 σχεδὸν τι προσέτι. I am not entirely sure what is meant. I have taken it to mean that the patient is ill and perhaps getting worse. The writer may possibly have left out a word; 'he is ill and perhaps he is . . . (?) as well'. The end of σχεδὸν is doubtful, but no more plausible reading has been thought of. It is not σχεδὸν.

The fact that προσέτι might be a phonetic spelling of προσαιτεῖ seems unhelpful. In a suitable context the clause might mean 'and he is almost reduced to begging for a living', but that does not fit well with what follows here, 'and for that reason I could not talk to him'. The reason ought to be severe illness.

8 ουκ'. Cf. 14. For this use of the apostrophe, not common before the third century, see E. G. Turner, *Greek Manuscripts of the Ancient World* p. 13 and n. 4 (= ed. 2, p. 11 and n. 51).

9-10 Cf. NT Joh. 11.4, αὕτη ἡ ἀσθένεια οὐκ ἔστι πρὸς θάνατον.

16 Παλέξ. See introd.

3817. PRIVATE LETTER

71/22(b)

12.5 × 7 cm

Third/fourth century

This fragment gives us nine lines little damaged from the last column of a private letter and the ends of seven lines of the preceding column, as well as a few indeterminate traces along the top and bottom edges. The writing runs along the fibres, but there is no trace of a sheet join to confirm the probability that the written side is the recto. The back is blank.

The writer mentions an epidemic disease, cf. 3816 introd. Lines 11-15 run, '. . . (they) died of the disease. For if anyone among us in the village falls ill, they do not rise (from their beds)'. The word for disease is καταστέμματι (l. καταστήματι or -στέμματι), which recalls τῷ λοιμικῷ καταστήματι in P. Thmouis I col. 104.16, referring fairly clearly to the plague associated with the Parthian expedition of Lucius Verus, see the editor's note and introduction p. 29. This passage of P. Thmouis, published in 1985, modifies G. Casanova, *Aegyptus* 64 (1984) 176, *Atti del XVII Congresso* iii 954.

It is very difficult to assign a date to the writing of 3817, a rapid uneven semi-cursive, influenced by the severe style, laterally compressed, with very noticeable long descenders. My feeling is that it is not as early as the reign of Marcus in spite of the coincidence of terminology, but rather of the third or perhaps even fourth century. There seems to be nothing to justify associating the document with any particular episode of plague.

	col. i		col. ii

] [10	.] . [.] . [.

] [.] . [. . .]		καὶ Ἑρμαῖον. ἐὰν καὶ Ἑρμαῖ-
		ον ἐ' ὕ' ρης, ποιήσων αὐτ[ὸν]
		20] . [.] . [.
		
		

3 l. ἀπρόστιλον; ἵνα 5 ημῶ 6 l. ἐπίστειλον 7 ἴδε 8 l. ἄνω? 11 l. καταστήματι
or -στέμματι 14-15 l. ἐγίρονται

11-19 '. . . (they) died of the disease. For if anyone among us in the village falls ill, they do not rise (from their sick-beds). So put off everything and write me an answer about Horion and Hermaeus and company. If you do find Hermaeus, make (him?) . . .'

2-8 In 3-4 δυνῆθῶμεν, -θῶσι, and εὐθυμῆσωμεν, -σωσι, are also conceivable. Col. ii is just over 5 cm wide; the ends of i are just over 6 cm wide, and it is clear that i was wider still, possibly much wider. The

following conjecturally restored text shows some short possibilities that have occurred to me, but has no objective value.

]. . . τὰ καινότερα καὶ οὐ
 χρήζω ἀ]πρόσπυλον, ἵνα δυναθῶ
 ζῆν κα] ἀπὸ τ' οὐ νῦν εὐθυμήσω.
 5 εἰ μὲν] ἐγράψεν σοὶ ὁ ἀδελφὸς ἡμῶ(ν),
 εὐθέως] ἐπίστῳλόν μοι τὰ γραφέν-
 τα σο]. εἰ δὲ οὐ, εὐ αὐτὸς ἴδε τὸν
 ἀνε]ρχ[θ]μενον εἰς τὰ ἀνά (l. ἄνω?) μέρη.

'. . . the newer ones, and send off what I need, so that I can live and from now on be in good spirits. If our brother (colleague?) wrote you, send me immediately what was written to you. If not, look out yourself for a person going up to the upper regions'.

At any rate there seems to be nothing here to amplify what the writer says about the epidemic in col. ii.

7 εἰ δὲ οὐ = εἰ δὲ μή. I cannot recall seeing οὐ in this collocation before, but it seems a natural development from the postclassical use of εἰ οὐ in protases, see Blass-Debrunner-Rehkopf, *Gramm. d. neutestamentlichen Griechisch*¹⁵ pp. 356-7 (§428), E. Maysner, *Grammatik* ii.2 p. 552 (§138 ii.b).

8 ἀνά (l. ἄνω?). ἀνά μέρη could conceivably be right, cf. ἀνά μέρος (*LSJ* s.v. ἀνά C.IV, s.v. μέρος II.2), but this cuts ἀνά μέρη off from the preceding εἰς τὰ in an implausible way, and it is hard to see how to go on. For εἰς τὰ ἄνω μέρη cf. P. Lond. VI 1917.18, 23 (c.AD 330-40). The translation there has 'to the Upper Country' and it is suggested in the introduction (p. 81) that the phrase refers to the Thebaid. To judge from the geographical implications of ἀνά, κατά, and cognates, for which see H. C. Youtie, *Scriptiunculae* i 493 n. 36, it could mean country districts as distinct from some nome capital, the desert hills as opposed to the Nile valley, or, most likely, southern regions, e.g. the Thebaid, as opposed to northern.

11-12 See introd.

καταστέμματι. *LSJ* tells us that κατάστημα is the basic form, with κατάστημα as a variant (LXX 3Ma.5.45), cf. C. D. Buck, W. Petersen, *A Reverse Index* 222. The doubling of the mu made no difference to the pronunciation, see F. T. Gignac, *Grammar* i 154-5, 157-8. So far κατάστημα is not attested, although *LSJ* gives καταστέφης, -στέφω, -στέφω, and G. W. H. Lampe, *Patristic Greek Lexicon*, gives *καταστέμματιζω.

14-15 οὐκ ἐγ(ε)ίρονται, 'they do not rise (from their sick-beds)'. Cf. *LSJ* s.v. ἐγείρω I. 3.

17-18 περὶ τοὺς παρὰ Ὠρίωνα καὶ Ἑρμαίων. The accusatives are odd. Probably the writer had in mind a normal phrase such as οἱ περὶ Ὠρίωνα κτλ., 'Horion and company', which induced him to write τοὺς instead of τῶν after περὶ; then, to avoid repeating περὶ, he wrote παρὰ, but continued with accusatives instead of the appropriate datives.

3818. BUSINESS LETTER

32 4B.2/F(2-3)a

12.5 × 19.5 cm

Fourth century (c.318?)

This brief note instructs the recipient to give a jar of honey on the sender's behalf to the *princeps* of a procurator, an officer not hitherto attested in the papyri, see 5-6 n.

The change of hand for lines 10-12 indicates that the body of the letter was written by a clerk, while Parit, in spite of his pure Egyptian name, wrote the farewell in a fluent hand with correct spelling.

The cursive hands belong to the fourth century. There is some possibility that the letter can be dated to the neighbourhood of AD 318 through the identification of Ammonius the *princeps* with his namesake in XII 1424, although this is not certain, see 5-6 n.

κυρ[ί]ω μου ἀδελφῶι Κολλού'θωι'
 Παρίτ χαίρειν.

τοὺς δεκατρίς ξέστας τοῦ μέ-
 λιτος ὧν ἔχεις μοι, δὸς τῶ

5 ἀδελφῶ ἡμῶν Ἀμμωνίω,
 τῶ πρίνγυπι τοῦ ἐπιτρόπου,
 κεράμιον. ἀλλ' ὄρα μὴ ἀμελή-
 σης, κύριε ἀδελφε. εὐρὲ
 οὖν αὐτῶ κάλλιστον.

10 (m. 2) ἐρρώσθαί σε
 εὐχομαι πολλοῖς
 χρόνοις.

Back, downwards along the fibres:

] κυρίω μου ἀδελφῶι (vac.) Κολλ[ού]θωι

2 παριτ' 3 l. δεκατρίς 6 l. πρίγκυπι

'To my lord brother Colluthus, Parit, greetings.'

'As for the thirteen pints of honey which you are holding for me, give a jar (from them) to our brother Ammonius, the chief of the procurator's staff. See that you don't be neglectful, my lord brother. Find a very nice one for him.' (2nd hand) 'I pray for your health for many years'.

Back. 'To my lord brother Colluthus . . .'

1 Κολλού'θωι'. The remains of the doubtful iota are faint and may be accidental ink.

2 Παρίτ. Cf. XLIV 3184b 14, 18 and nn. As there, the indeclinable Egyptian name is marked by an apostrophe after the tau, cf. E. G. Turner, *Greek Manuscripts* p. 13 (= ed. 2, p. 11).

3 ξέστας. Cf. A. H. M. Jones, *Later Roman Empire* p. xv for the approximation 1 sextarius = 1 pint = 0.57 litres.

4 The cap of the sigma of μέλιτος is extended and the following omega is written underneath it. Across the tip of the cap of sigma there is a short vertical. There is a possibility that this is intended to be an economical way of writing a rough breathing for ὧν. Alternatively, it may be an accidental mark made in turning back to the omega.

5-6 πρίνγυπι = πρίγκυπι. See F. T. Gignac, *Grammar* i 165-72, esp. 170-1 (assimilation of nasals), 77-80, esp. 79 (b. 2; κ > γ). From Gignac's index, p. 358 s.v. πρίγκυπι, it seems that this particular variant has not occurred before.

The *princeps* of a procurator has not occurred before. The prefect's *princeps officii* is mentioned in XIV 1637 10 (AD 257-9) and L 3570 6 (c.AD 285), that of the *praeses Arcadiae* in P. Haun. III 57.2-3 (c.AD 415), XVI 1880 3, 1881 3 (both AD 427), and PSI X 1114.2 (AD 454), and that of the *praeses Herculiae* or *praeses Mercuriana* in XIV 1722 1 (c.AD 314-25), see L 3574 3-4 n., which must now be modified to allow the possibility of Αἰγύπτ[ου] Μερκουριανῆς as well as Αἰγύπτ[ου] Ἡρκουλίας, see J. D. Thomas, *BASP* 21 (1984) 225-34. The *princeps* of P. Flor. III 377.25 (VI) is most likely to be the *princeps officii* of the *dux* mentioned in line 24. Outside the *militia officialis* there are the *princeps castrorum Dionysiados* in P. Flor. I 36 (= M. Chr. 64).19 (AD 312) and P. Lond. II 409 (= P. Abinn. 10).12 (c.AD 340?), on whom see P. Abinn. Introd. p. 15, the *princeps* associated with Dalmatian troops in XII 1513 16 (IV ed. pr., perhaps slightly earlier), and those associated with military officers in the building inscriptions SB I 1598 and V 7800 (Byz.).

The other references to a *princeps* without certain indication of his sphere of action, taken from S. Daris, *Lessico Latino*, are: P. Flor. II 278 v 3 (p. 262; c.AD 266/7?), P. Berl. Möller 8.7, XVII 2144 15 (both late III), XIX 2228 21 (c.AD 285; the note in ed. pr. adds 'sc. τῆς ἡγεμονίας', which is not certain), XII 1424 22, cf. 2 (c.AD 318), P. Erl. 105.51, SPP XX 85 r. i 20 (both IV), P. Flor. III 325.8 (AD 488), SPP III 168.1 (V), SB I 2253.8, 9, VIII 1108 3 (all Byz.). In the context of P. Flor. III 336 πρέγκ[εψ] (4) carries no conviction. In P. Hamb. I 9.5 the μῆχ(ανάριος) πρίνκιπος κώ(μης) Θεαδελφείας seems to fall completely outside the normal range of uses, see ed. pr. and M. San Nicolò, *Ägyptisches Vereinswesen* ii 61. The same man appears again in line 24, in a similar tax receipt for three years later, as μη]χ(ανάριος) χαρε. [...]ς κώ(μης) Θεαδελ(φείας). A photograph confirms the readings. I am inclined to seek refuge in the name Πρίγκεψ, cf. BGU IV 1046.8(?), 1172.[2], 5, 13. In that case κώ after Πρίνκιπος (5) and Χαρε. [...]ς (24) should be expanded to κω(μογραμματέως), cf. Z. Borkowski, D. Hagedorn, *Le Monde Grec. Hommages* . . . C. Préaux 781-2 n. 4. The μῆχ(ανάριος) looks like an employee who continued to work for the κομογραμματεία even when the village scribe changed.

To Daris's references add now P. Monac. III 126.8, P. Laur. I 10.3, *Tyche* I (1986) 112 line 19. The contexts of all are obscure.

There is some possibility that our Ammonius *princeps* is the same as the sender of XII 1424, an Ammonius described in the address (22) as πρίγκεψ, and in the prescript (2) as (ἐκατοντάρχης). I do not know why the usual abbreviation is doubled in that place, but the photograph shows πρ clearly. The letter is addressed to a man called Heras, whom the editors identified with the *praepositus pagi* Heras alias Dionysius of 1425, dated AD 318, because the two documents were found together. The same man also appears in XVII 2113, 2114, and 2124, without his alias in the first two. The association of 3818 with 1424-5 is obviously not certain, but it has a fair chance of being right, and so giving us a clue to the date.

At that period there was no prefect of Egypt, see LI 3619 introd., LIV 3756 introd., 7 n., 9 n., and Oxyrhynchus was in Aegyptus Herculia or in Aegyptus Mercuriana. We already have a reference to a *princeps* of the *praeses* of one of those provinces, see above on XIV 1722, but ἐπιτρόπου is very unlikely to refer to a *praeses*, properly ἡγεμών or ἡγούμενος at this date. Similarly a *rationalis* or *magister* would probably have had his proper title, καθολικός, μάγιστρος. We know that there was a *procurator Heptanomiaie* still in AD 316, after the creation of Herculia, see XVII 2114, which is, incidentally, addressed to the same *praepositus pagi* as 1425. It seems likeliest that this is the procurator whose *officium* was headed by Ammonius. See XLII 3031 introd. for the little that is known of his functions. For this period there are at present no other procurators who are certainly attested as being active, but it can hardly be that there were none. Especially there was probably still a *procurator priuatae*.

13 We expect nothing before κυρίω, and after Κολλ[ούθω] only Παρίτ or π(αρά) Παρίτ.

3819. LETTER OF CONDOLENCE

38 3B.84/J(4-5)a

15.5 × 17 cm

Early fourth century

Julius wrote the letter to his 'father' Demetrius and his 'sister' Apollonia, chiefly to comfort them on the death of his 'mother' Sarapias. The terms of blood relationship need not be taken literally, and indeed the conventionality of the language rather suggests that they should not be. Perhaps, for example, Sarapias was the wife of Demetrius and the mother of Apollonia, while Julius was just a friend of the family, cf. 3808 introd., 3812 17 n., 3813-15 introd. para. 2, 3820 1 n.

Other letters of condolence which show some resemblances to this one are I 115 (= W. Chr. 479, cf. A. Deissmann, *Licht vom Osten*⁴, 143-5), P. Princ. II 102 (= M. Naldini, *Cristianesimo*, No. 34), P. Ross.-Georg. III 2, PSI XII 1248. Add perhaps P. Rainer Cent. 70 and P. Wisc. II 84. A more elaborate example is CPR VI 81, revised in *ZPE* 62 (1986) 75-8.

The παραμυθητική was one of the standard types in the ancient collections of epistolary models, but, as usual among the real letters, this one only remotely recalls the model and at the end seems to have turned to a practical matter; see on this topic P. J. Parsons, *Didactica Classica Gandensia* 20 (1980) 8.

A point of interest is that the writer uses the rare verb δυνατεῖν, which is virtually restricted to the Epistles of St Paul, see 9-11 n. He gets the construction wrong, but the reminiscence suggests that he was a Christian.

The script is a very fluent and practised cursive, probably of the first half of the fourth century, though there is no need to place it surprisingly early in the century.

The piece of papyrus was cut from a roll in the usual fashion, as shown by a sheet-join running vertically c.8 cm from the left edge, and the letter was written along the fibres of the recto. The address is written downwards along the fibres of the verso. After the addressee's name and title is a pattern once associated with a ligature which tied up the folded letter, cf. XLVIII 3396 32 n. and Pl. VI. This pattern shows that the letter was rolled up and flattened into a spill of the same height as the letter and that a single ligature, probably a strip of papyrus, was tied round the middle of it. The address was written on one of the flat sides straddling the ligature. A series of short parallel lines, ten in all, was drawn on both sides of the spill over the binding strip, perpendicular to it and parallel with the long sides of the spill. Now that the strip has been lost, the central portions of these lines have been removed and only the ends survive. The distance from the top edge of the letter to the middle of the design is c.12.5 cm, which suggests that the original height was about 25 cm. The part lost at the foot must therefore have been about 6 cm deep, enough for six ordinary lines at the most; more probably there were three or four ordinary lines followed by a farewell formula and a lower margin.

κυρ[ί]οις μου πατρὶ Δημητρίῳ καὶ
 Ἀπολλωνίᾳ ἀδελφῇ Ἰούλιος
 χαίρειν.

 15 ἐλθὼν μετέδωκέν μοι ὡς εἴηται
 ε. . . . [.]αν[τ]εσ τὸ δελματίκιον καὶ

Back, downwards along the fibres:

ἀ]πόδος Δημητρίῳ πατρὶ (design) π(αρά) Ἰουλίῳ

2 Ἰούλιος 4 ἰ. γινόμενου; ὑμᾶς 5 ὑμᾶς 6-7 ἰ. ἔπειτα 7 ὑμᾶς 9-10 ἰ.
 δυνατεὶ οὖν ὁ κύριος θεός 11 ἰ. παρασχῖν, λυπεῖσθε 14 ἰ. εἴητε 16 π' Ἰουλίῳ

'To (his) lord father Demetrius and the lady Apollonia (his) sister, Julius, greetings.'

'Finding someone going in your direction I made haste first to greet you through this letter of mine, and then to comfort you. For when I heard about my mother Sarapias, I was greatly grieved. Well, the lord god has the power for the future to give us good health. So do not be grieved. For these things are (part of being) human. Indeed for all of us this is laid down. My colleague came and informed me that you have . . . ed the dalmatic and . . .'

'Deliver to (his) father Demetrius from Julius.'

9-11 δυνατὶ (= δυνατεῖ) . . . τῷ κυρίῳ θεῷ . . . παρασχῖν (= παρασχῖν). Apart from one passage in Philodemus, *περὶ σημείων καὶ σημειώσεων* (T. Gomperz, *Herkulianische Studien*, Heft I), p. 14 (col. 11.7-8), I have found this rare verb only in the Epistles of St Paul. It means first 'to be strong' (II Cor. 13.3 . . . Χριστοῦ, ὅς εἰς ὑμᾶς οὐκ ἀσθενεῖ, ἀλλὰ δυνατεῖ ἐν ὑμῖν); second, 'to have the power (to do something)' (Rom. 14.4 σταθῆσεται δέ. δυνατεῖ γὰρ ὁ Κύριος ἐτίθει αὐτόν.; II Cor. 9.8 δυνατεῖ δὲ ὁ θεὸς πᾶσαν χάριν περισσεύσαι εἰς ὑμᾶς). Since our passage also refers to the power of god, it looks like a reminiscence of St Paul, but the writer seems not to have recalled the construction correctly. He used it as an impersonal verb, as if he had written δύνατον (ἔστι) or ἔξεστι.

It occurred to me to wonder if this sentence were an allusion to Christian salvation, since *σωτηρία* and *ὀλοκληρία* are almost synonymous in the sense of physical health. One can find *ὀλοκληρος* used of the resurrected body, see G. W. H. Lampe, *Patristic Greek Lexicon*, s.v. 2(a), but this is hardly sufficient support for the idea.

13 κολλήγας = Lat. *collega*, cf. F. T. Gignac, *Grammar* ii 12.

14-15 ὡς εἴηται (= εἴητε) ε. . . . [.]αν[τ]εσ. Cf. 3808 6-7, 3820 12, 13-14. For the periphrastic perfect

optative see F. T. Gignac, *Grammar* ii 305-6. The traces favour an aorist rather than a perfect participle. Perhaps read ἐγκρί[ν]αν[τ]εσ (= ἐγκ-), 'that you have approved the dalmatic', but the remains are slight.

15 δελματίκιον. Cf. LI 3626 18 n. for dalmatics. For various forms and cognates of the word see F. T. Gignac, *Grammar* i 106, ii 8-9, 28.

16 After Ἰουλίῳ there would have been room for *υἱοῦ* or *φίλου* or the like.

3820. DIOSCORUS TO HIS MOTHER AND SARMATES

41 5B.79/C(3-4)a

15.5 × 25 cm

c.340?

Very interesting persons and things are mentioned in this letter—an imperial rescript, the *officium* of a *magister priuatae*, a *dux*, a eunuch who may well be an imperial *cubicularius*, a person called Philagrius who could be the known prefect of Egypt of that name. If Philagrius is the prefect, it is tempting to identify the eunuch as Arsacius (*PLRE* I 110.2), whom Constantius II sent with Philagrius when he appointed him prefect for a second term with the special task of installing Gregory the Cappadocian as Arian patriarch of Alexandria in opposition to the monophysite Athanasius. In that case the *dux* may well have been Valacius, whose judicial association with Gregory in persecuting monophysites is mentioned by Athanasius, *Hist. Arian.*, 12.3, *πόσοι τε ἄλλοι μονάζοντες ἐμαρτίζοντο καθεζομένου Γρηγορίου μετὰ Βαλακίου τοῦ λεγομένου δουκός, πόσοι ἐπίσκοποι ἐκόπτοντο, πόσοι παρθένοι ἐτύπτοντο!*

However, like most private letters, this one is allusive and ambiguous, so that we get little more than a tantalizing glimpse of the activities of the courts and the officials. Dioscorus wrote home to his unnamed mother and his 'brother' Sarmates in Oxyrhynchus. We may guess with probability that he wrote from Alexandria, where the prefect of Egypt and the *magister* would normally reside. He was concerned in judicial business on behalf of his 'brother' Eulogius, on whose account, if the interpretation is right, he submitted the imperial rescript to the prefect. Further proceedings two days later took place in the court of the *magister priuatae*, who seems to have given him a satisfactory hearing and dismissed him. Some damage to the lower left corner makes the last few lines before the farewell greeting even less comprehensible than the rest.

The piece shows no sheet-joins. On the back, besides the remains of the address written downwards along the fibres, are two blocks of rough accounts written across the fibres, one near the top consisting of a heading and three lines ending in sums in myriads of denarii, the other, near the foot, of three lines, mostly numbers of aruras and artabas. Both are damaged and have not been fully deciphered.

τῇ δεσποίνῃ μου (vac.) μητρὶ καὶ κυρίῳ ἀδελφῷ
 Καρμάτῃ (vac.) Διόσκορος χαίρειν.
 εὐπορηθὶς τοῦ κυρίου μου ἀδελφοῦ Παιανίου
 ἄπερχο[μ]ένου ἔσπευ[α] προσειπεῖν ὑμῶν τὴν διάθεσιν,
 5 ἔπειτ[α δηλῶ] καὶ σοι περὶ τοῦ πράγματος
 τοῦ κυρί[ου μ]ου ἀδελφοῦ Εὐλογίου ὅτι
 ἀπεθέτη καὶ ἤδη ἀπαντῶμεν πρὸς ὑμᾶς.
 καὶ τὴν θίαν ἀντιγραφὴν παρεθέμην—
 τὴν περὶ τῶν ὑπαρχόντων—τῷ κυρίῳ μου
 10 Φιλαγρίῳ καὶ ὑπομνήματα συνεχτάθη.
 καὶ μετὰ τὸ ἐκβῆναι τὸν ἀδελφό[ν] μου
 Σερήνον ἤμην παραδοθὶς τῇ τάξει τοῦ μαγίστρου
 καὶ μετὰ δύο ἡμέρας Εὐσεβίου ἐλθό[ν]τος—ἐπεὶ ἦν
 ἀπελθὼν καταστήσαι τὸν δούκα εἰς Ταπόσιριν—
 15 ἰσχύθημεν καὶ ὁ εὐνούχος ἀπέστειλεν
 πρὸς αὐτὸν καὶ ἀνίκεν με καὶ δεύτερα ὑπο-
 μνήματα ἔπραξεν καὶ τελίως ἀνίκεν αὐτούς.
]. παραπεμφθῆναι τοὺς περὶ Ἑρμῖαν καὶ Διδυ-
]. ὑμᾶς καταλαμβάνω. εἰς ἀκούσῃτε
 20]. [. . . μὴ π]ιστεύσῃτε. ἐρρῶσθαι ὑμᾶς
 (vac.?)] (vac.) εὐχομαι πολλοῖς
 (vac.?)] (vac.) [χρό]νοις.

Back, downwards along the fibres:

κυρι. (vac.?) [.]. (vac.) Καρμ[άτ]η
 Δ[ιό]σκ[ο]ρος.

3 I. εὐπορηθείς; μοῦ 4 ὑμων 7 I. ἀπετέθη; ὑμας 8 I. θείαν 9 ὑπαρχόντων
 12 I. παραδοθείς, τάξει 15 ἰσχυθημεν; I. εἰσχύθημεν, ἀπέστειλεν 16 ἀνίκεν; I. ἀνείκεν; ὑπο
 17 I. τελείως; ἀνίκεν; I. ἀνείκεν 19 ὑμας?

'To my lady mother and lord brother Sarmates, Dioscorus, greetings.'

'Finding an opportunity in the departure of my lord brother Paeanius I made haste to greet your affectionate selves, then to inform you in connection with the affair of my lord brother Eulogius that it was settled and we are already on our way to you. Moreover, I presented the imperial rescript—the one concerning the property—to my lord Philagrius and records of the proceedings were compiled. Also, after the departure of my lord brother Serenus I had been passed on to the department of the *magister (priuatae)* and after two days, when Eusebius arrived—for he had gone off to take the *dux* (back?) to Taposiris—we were brought into court and the eunuch sent to him and (he) let me go and had a second set of proceedings

made and let them go completely. . . . Hermias and Didym . . . and their friends to be sent . . . I arrive with you. If you hear . . ., do not believe (it?).'

'I pray for your health for many years.'

Back. 'To my lord brother(?) Sarmates, Dioscorus.'

1 ἀδελφῷ. It seems quite likely that Sarmates really is a brother by blood, since he is associated with Dioscorus' mother. Three other persons, Paeanius (3), Eulogius (6), and Serenus (11–12) receive the same appellation and it is probably a courtesy title in at least some of these cases, cf. 3808 introd., 3812 17 n., 3813–15 introd. para. 2, 3819 introd.

2 Διόσκορος. This could possibly be the ἐπίτης of AD 341–2, cf. 3821 introd., L 3575 3–4 n. The sizes of 3821 and 3820 are very close, which might suggest that they came from the same office. The hands are probably not the same, although quite similar, but there is at least one known case of letters from the same person written in different hands, see P. J. Parsons, *Didactica Classica Gandensia* 20 (1980) 4, citing P. Mich. VIII 490–1. In this certain case it means simply that they were written by two different clerks or one by the correspondent himself and one by a clerk. There is no archaeological connection here: the inventory numbers show that 3820 was excavated during the fifth season at Oxyrhynchus, 3821 during the third season.

3 μοῦ. The diaeresis here is a slip, cf. E. G. Turner, *Greek Manuscripts of the Ancient World*, p. 12 (= ed. 2, p. 10).

Παιανίου. This is a rare name, which recalls Flavius Macrobius alias Paeanius, logistes of AD 336 (X 1265 5, 1303 1), and the strategus Paeanius of XXII 2344 1, who may be the same man, cf. LIV pp. 227–8. Cf. Zephyrius son of Paeanius in XVII 2115, addressed to the logistes of AD 341 (LIV 3774 and pp. 228–9).

4 ὑμῶν τὴν διάθεσιν. Cf. H. Zilliacus, *Untersuchungen zu den abstrakten Anredeformen*, 66, 88. The operative word is mostly equated with *affectus* or *affectio* in the Latin glossaries, e.g. CGL II 271.6–7, and means 'love, affection'.

7 ἀπεθέτη = ἀπετέθη. For phonetic factors which may have contributed to this metathesis see F. T. Gignac, *Grammar* i 87. Cf. XLIX 3480 9 καθεσχέτημεν = κατεσχέθημεν.

8 For rescripts see the literature cited in LI 3611 introd., cf. W. Williams, *ZPE* 66 (1986) 181–207. Evidently this one was to be used in court proceedings.

10 There are five (or possibly only four) persons called Philagrius in PLRE I, but the name is rare and has appeared in the papyri only with reference to the prefect of Egypt Flavius Philagrius (PLRE I 694; add 3794, XLIII 3129, P. Col. VII 175). In this fourth century company of imperial rescript, *magister (priuatae)*, and *dux*, I find it too difficult to dissociate the name from the prefect, but it must be admitted that without this background the obvious translation would be, 'I presented the imperial rescript concerning the property belonging to my lord Philagrius'. However, this conflicts with the indications of the context and I find it more convincing to translate, 'I presented the imperial rescript—the one concerning the property—to my lord Philagrius'.

Two statements about Philagrius in PLRE I 694, both based on the fragmentary P. Amh. II 142, should be corrected: 'former governor over Heracleopolis' and 'He had a brother who became *praeses Augustammicae*'. The second clearly derives from the phrase ἐνέτυχα τῷ σὺν ἀδελφῷ Φιλαγρίῳ (10), which is part of the narrative background of a petition to the *praeses Augustammicae*. It means, 'I petitioned your colleague Philagrius', see LSJ s.v. ἀδελφός I. 3. The disputed property lay in the Heracleopolite nome, but 'governor over Heracleopolis' corresponds to no known post. Philagrius received the earlier petition as prefect of Egypt without a doubt.

11–17 This passage is allusive and obscure for us. It tells what happened 'after the departure of my brother Serenus'. One guess might be that Serenus was the last person to bring a letter from Dioscorus to his mother and brother and that only events subsequent to that letter needed to be reported. Dioscorus had then been handed over to the department of the *magister*, a title which in Egypt can hardly refer to anyone but the *magister priuatae Aegypti*, cf. C. Balconi, *Aegyptus* 63 (1983) 59–60; add XLIII 3125, XLIV 3192, XLV 3247, XLVIII 3416 introd., LI 3618. He had to wait, apparently for a hearing by the *magister*, and after two days Eusebius, who had been escorting the *dux Aegypti* to Taposiris, arrived, and Dioscorus and his friends were brought into court. Then, 'the eunuch sent to him and (he?) released me', etc. The most probable interpretation in my view is that Eusebius was the *magister*. The eunuch may well have been Arsacius, who was sent to Egypt with Philagrius when he was appointed prefect for the second time, see

introd., *PLRE* I 110 (2), P. Guyot, *Eunuchen als Sklaven und Freigelassene*, 149, 185. Eusebius was the name of a famous eunuch who seems to have been *praepositus sacri cubiculi* for the whole of the reign of Constantius II, see *PLRE* I 302-3 (11), Guyot, op. cit., 199-201, but there is no reason to expect his presence here, even if he was an Arian and an opponent of Athanasius, and even if he is known to have gone away from court on special missions, see K. Hopkins, *Conquerors and Slaves*, 179, Guyot, op. cit., 150, 200.

A plausible story would be that Arsacius acted as general assistant to Philagrius, as well as special advisor or imperial spy in the affair of Athanasius; Philagrius delegated the case of Eulogius (5-6) to the *magister privatae* (Eusebius); there was a delay because Eusebius (the *magister*) was escorting the *dux* to Taposiris; when the *magister* returned, the eunuch (Arsacius) took the chief part in handing over the case from Philagrius to him; the *magister* held a hearing, of which a written record was made, and released or absolved (*ἀνείκεν* 16, 17) both Dioscorus (*με* 16) and the others involved on his side (*αὐτούς* 17), who presumably included Eulogius (5-6). I take it that *ὁ εὐνοῦχος* is the subject of *ἀπέστειλεν* only; the subject of *ἀνείκεν* (16), *ἔπραξεν* (17), and *ἀνείκεν* (17) should be the *magister*, to whose department the affair, presumably a case affecting the *ratio privata* without any connection with Athanasius, had been delegated and who alone could conduct the hearing and pronounce a verdict.

12 ἤμην παραδοθῆς (= -θεῖς); cf. 13-14 ἦν ἀπελθών. For these periphrastic forms see F. T. Gignac, *Grammar* ii 305-7, esp. 306 para. d. Cf. **3808** 6-7, **3819** 14-15.

13-14 ἦν ἀπελθών. Cf. 12 n.

14 δοῦκα. On the *comes et dux Aegypti* see R. Rémondon, *CE* 40 (1965) 180-97, esp. 191-2. See introd. for the possible identity of this *dux* with Valacius (*PLRE* I 929; add CPR V 10.6 and n., **3793** 4 and n.). The *praeses Thebaidos* mentioned with Valacius in CPR V 10 is said to appear also in an unpublished text dated to AD 339, see *ZPE* 29 (1978) 271, cf. *ZPE* 47 (1982) 223 n. 71. The beginning of Valacius' term is still not well fixed, but this may encourage us to envisage the possibility that it went back to AD 339, or even further, see now also **3793** 4 n.

Ταπόσιριν. There were two places of this name, the well-known Taposiris Magna, about twenty-five miles west of Alexandria, and Taposiris Parva, on the canal running east from Alexandria. Strabo's words, ἡ τε μικρὰ Ταπόσειρις μετὰ τὴν Νικόπολιν (XVII c. 800 *ad fin.*), rather imply that it was not far beyond Nicopolis, itself only about three and a half miles east of Alexandria.

15 ὁ εὐνοῦχος. On eunuchs at court see F. G. B. Millar, *The Emperor in the Roman World*, 82-3, P. Guyot, *Eunuchen*, 69-233, K. Hopkins, *Conquerors and Slaves*, 172-96, esp. 179 on their special missions away from court. For more on eunuchs in general see T. Drew-Bear, *Epigraphica Anatolica* 4 (1984) 139-49, esp. 141-2. See introd. and above 11-17 n. for a possible identification.

16 The fact that the proceedings of this hearing are called *δεύτερα ὑπομνήματα*, cf. 10, rather than *ἄλλα ἢ ἕτερα ὑπομνήματα*, strongly suggests that the case was still the affair of Eulogius (5-6), cf. 11-17 n.

17 It is not clear who *αὐτούς* are. I take it that they are associates of Dioscorus and Eulogius, cf. 15 *ἐχθήμεν* (= *εἰς*).

18-20 For the moment I envisage restoring something like *ποιήσω* (*ποιήσω* and *ποιήσατε* do not suit the remains) and *-μον* (or *-μην*) *ἔτα*], 'Have H. and D. and their associates brought along when I arrive with you'. An attractive alternative would be something like *κελεύω*] *Δίδυ[μον*. This would give, '... released them, ordering H. and D. and their associates to be brought to court', cf. *WB* s.v. *παραπέμπειν* (3). *Δίδυ[μον* and *Διδύ[μην* are the most likely possibilities, leaving very little space for the link forward. One might try *πρί]ν ὑμᾶς καταλαμβάνω* (why not aor. subj.?), *ἕάν κτλ.*, 'Until I arrive with you, if you hear... do not believe (it?)'. This seems less attractive than a formulation with strong punctuation after *καταλαμβάνω*.

23 There appears to be a short stretch of blank papyrus after *κυρι*, and before the edge of the break. Possibly the ink has been entirely removed and we ought to read and restore the expected *κυρίω [μου ἀδελφ]ῶ*.

3821. DIOSCORUS TO HERAS

38 3B.79/K(3-4)a

15.5 × 24.5 cm

c.341-2

The name and title of the sender, Dioscorus overseer (*ἐπόπτης*) of the Oxy-rhynchite nome, enable us to date this letter roughly. The title has appeared only in connection with this man and only in the years AD 341-2, see L **3575** 3-4 n., although it may be that P. Monac. III 69, as has been suggested by its editor, Professor Hagedorn, concerns the institution of the same office in the Arsinoite area at about the same time.

Dated private letters are rare after the first century AD, so it is of some palaeographical use to have another one which is datable, see Plate VIII. There is a possibility that the Dioscorus of the previous item is the same, see **3820** introd.

The content is slight. Dioscorus wrote to Heras, who was at Heracleopolis, recommending to him a certain Heraclius who intended to go to Heracleopolis to settle business relating to a man who owed him money. Since at least two of the documents mentioning Dioscorus, L **3576** and **3578**, reveal his dealings with the court of the *praeses* of Augustamnica, Flavius Julius Ausonius, and since that *praeses* dated his official letter published as L **3577** from Heracleopolis, it is worth mentioning the possibility that Heras was there on the same sort of judicial business, cf. 1 n. Note that Heracleopolis was not the permanent residence of the *praeses*; **3576** shows his court at Pelusium.

Something is needed to explain how the letter came to be excavated at Oxyrhynchus. The usual thing would have been for Heraclius himself to carry the letter to its destination. Heraclius may not after all have gone to Heracleopolis, or the letter may have been taken there and brought back. In 11 n. I argue that it was brought back by Heras.

The farewell formula is written in the same hand as the rest, suggesting the possibility that this is a file copy written entirely by a clerk, but against that are the address on the back and the whole appearance of the letter, which was evidently found folded up for sending in the usual way. There are seven vertical creases dividing the piece into eight panels of increasing width from right to left, except that the panel on the extreme left is again narrower than its neighbours on the right. It is clear that the letter was rolled up with the right edge inside and squashed flat, and that then the exposed left edge was tucked into the resulting flat packet. The address was written on one of the flat sides, which is the third panel from the right, now that we are viewing the letter from the back. This panel and its neighbour on the right are encrusted with mud, so that it is clear that the letter lay in its folded shape until it was found.

The piece has a sheet-join running vertically c.3.5 cm from the right edge, which makes it obvious that the letter was written along the fibres of the recto.

κυρίω μου ἀδελφῷ (vac.) Ἡρᾶ
 (vac.) Διόσκορος.
 Ἡράκλειος ὁ ἡμέτερος πρὸς τὴν
 σὴν εὐγένειαν εἰς τὴν Ἡρακλέους ἀπήν-
 5 τησεν. τούτω οὖν ἀξιῶ τὴν σὴν
 εὐγένειαν συνάρασθαι. χρεώστου γὰρ
 αὐτοῦ ἔνεκον ἀπήντησεν εἰς
 τὴν Ἡρακλέους. ἀλλὰ μὴ παρείδης
 μου τὴν ἀξίωσιν, ἀδελφε. καὶ αὐτὸς
 10 οὖν κέλευέ μοι περὶ ὧν βούλει
 ἐπὶ τῆς ἡδείας ἡδέως ἔχοντι.
 ἐρρωμένον σὲ ἢ θία πρόγοια
 διαφυλάξαι εὖ πράττοντα,
 κύριε.

Back, downwards along the fibres:

15 κυρίω μου ἀδελφῷ (vac.) Ἡρᾶ
 Διόσκορος ἐπόπτης Ὁξ(υρρυχίτου).

6 l. εὐγένειαν 8 l. παρείδης 11 l. ἰδίας 12 l. θεία 13 πρατ'τοντα 16 οξ'?

'To my lord brother Heras, Dioscorus. Our man Heraclius has set out to visit your Nobility in Heracleopolis. So I beg your Nobility to assist him, for he has set out to visit Heracleopolis because of his debtor. Do not overlook my request, brother. So do command me yourself about what you want at home and I shall be pleased.'

'May the divine providence keep you well (and) in good circumstances, lord.'

Back. 'To my lord brother Heras, Dioscorus overseer of the Oxyrhynchite nome.'

1 The addressee could be Aurelius Heras son of Agathodaemon, 'doorkeeper of the public accounting-office' in Oxyrhynchus, who appears with Dioscorus in L 3576 and, presumably, in P. Harris I 65, see 3576 4 n., 18-19 n. However, the name is common and the identification therefore uncertain. That Heras was an Oxyrhynchite, although the letter is addressed to him in Heracleopolis, is indicated in lines 9-11, see 11 n.

4, 6 εὐγένειαν. Cf. H. Zilliacus, *Untersuchungen zu den abstrakten Anredeformen* 68, 88, where its use as an honorific address to women is emphasized, but see WB III Abschn. 9 s.v. (p. 188). Flavius Abinnaeus is so addressed by four of his correspondents, see P. Abinn. 9.3, 7; 12.14; 30.10; 33.6.

11 ἡδείας = ἰδίας. Cf. F. T. Gignac, *Grammar* i 237 (ι > η in the first syllable of words of this root). On ἰδία see H. Kupiszewski, *JJP* 9-10 (1955-6) 211-338, esp. 216-17 on the informal sense of it here, 'home'. Although the loss of aspiration and the progress of itacistic pronunciation (Gignac, op. cit. i 133-8, 235-42) meant that in this period ἰδίας and ἡδείας were homophones, I think no word play with ἡδύς was intended, although the imminence of ἡδέως may have affected the spelling.

The sense is probably 'at (y)our home here' rather than 'at (y)our home there', because other versions of this invitation, frequent in letters, have such wording as γράφε δὲ καὶ σύ, εἴαν τινος χρεῖαν ἔχης τῶν παρ' ἡμῶν (P. Mich. I 23.8, cf. 85.5 . . . τῶν παρ' ἡμῶν, ὡς ἡμῶν ἡδέω[ς] ποιησόντων); περὶ δὲ ἂν εἴαν χρήζης τῶν ἐνθάδε . . . (P. Corn. 49.8-9); περὶ ὧν χρήσεις παρ' ἐμοί . . . ἡδέως ποιοῦντι (PSI VIII 971.23-7); περὶ ὧν θέλεις ἐνταῦθα ἡδέως ποιοῦντι (P. Grenf. II 73.19-20). These references are culled from H. Steen, 'Les

clichés épistolaires', *Classica et Mediaevalia* 1 (1938) 128-30. The implication is that Heras is an Oxyrhynchite, which does something to support the guesses that he may have brought the letter back to Oxyrhynchus from Heracleopolis, see introd., and that he may be the same as Heras son of Agathodaemon, associated with Dioscorus in other documents, see 1 n.

12 For similar forms of farewell cf. P. Abinn. 28.27-8, M. Naldini, *Cristianesimo* No. 41.20-5 (explicitly Christian), No. 55.26-7 (as plausibly emended by Gerhard, P. Heid. I 6.24 ff. n.). 'Divine providence' is not unequivocally Christian, see Naldini, op. cit. p. 14.

13 διαφυλάξαι. The ending might be either -αι or -ει(ν), but -αι seems to be rarer, see F. T. Gignac, *Grammar* ii 360-1, C. Harsing, *De optativi in chartis Aegyptiis usu* 21. On this type of farewell and the variations of the verb ending see especially I. Gelzer, *Hermes* 74 (1939) 167-75, cf. P. Nephros 7.12-13 n.

16 Cf. introd.

INDEXES

Square brackets indicate that a word is wholly or substantially restored by conjecture or from other sources, round brackets that it is expanded from an abbreviation or a symbol. An asterisk denotes a word not recorded in *LSJ* or Suppl. The article is not indexed.

VI. PERSONAL NAMES

- Ἀβραάμιος **3804** 32, 89
Ἀβραάμιος, from Luciu **3804** 195
Ἀβραάμιος, f. of Isaac **3804** 100
Ἀβραάμιος, from Apele **3804** 84
Ἀβραάμιος, s. of Heracleides, f. of Isaac **3804** 79
Ἀβραάμιος, s. (?) of Joseph, gd.-s. (?) of Paucis, b. of Joseph **3804** 72
Ἀγαθάγγελος (αγα]θανγ- pap.) **3809** 1
Ἀγαθός Δαίμων **3808** 1, 19
Ἀγαθός Δαίμων alias Besas **3786** 32
Ἀγαθός Δαίμων, banker **3798** 17-18, 56
Ἀγαθός Δαίμων, s. of Areius **3786** 43
Ἀγήνωρ, f. of Ammon **3786** 46
Ἀδριανός see Index I s.vv. Hadrian, Antoninus Pius;
Index IV
Ἄδωρᾶ **3815** 8
Ἀείος, s. of Aphus **3803** 7
Ἀείων, f. of Apollon **3804** 71
Ἀείων, f. (?) of Isaac, s. (?) of Chōus, gd.f. (?) of Anup **3804** 82, 90
Ἀείων, s. of Pecysium **3804** 19, 20
Ἀείων, f. of Phoebammon **3804** 53
Ἀζαρ<ίας>? Jew **3805** 56 n.
Ἀθανάσιος **3804** 139, 140, 193
Ἀίλιος see Index I s.v. Antoninus Pius
Ἄϊων, f. of Papsois **3795** 15
Ἀκάκιος see Index VII (c) s.v. ἔδαφος μαρτυρίου
Ἀκακίου; Index VIII s.v. μαρτύριον Α.
Ἀκιάρ, f. of Anuthius **3804** 205
Ἀκιάρ, s. of Anuthius **3804** 80, 87
Ἀκοῦς, Aur., s. of Apis, m. Tsenthonis **3802** 6, 27
Ἀκύλιος Καπιτωλίνος, epistrategus Heptanomiæ **3782** 17
Ἀλεκᾶς **3804** 103
Ἀλεκᾶς, heirs of **3804** 110
Ἀλεξάνδρα, slave, m. of Isidora called Lamprotyche,
slave **3784** 9
Ἀλέξανδρος **3813** 68-9
Ἀλέξανδρος, f. of Thonis **3786** 84
Ἀμάτος see Index VII (c) s.v. ἔδαφος Ἐρωτος καὶ
Ἀμάτου
Ἄμμων, f. of Ammon **3786** 38
Ἄμμων, goldsmith **3791** 4, 6
Ἄμμων, s. of Agenor **3786** 46
Ἄμμων, s. of Ammon **3786** 38
Ἄμμω(v-), f. of Apollonius **3786** 45
Ἄμμω(v-), f. of Besarion **3786** 49

Ἀμμωνάς, Aur., s. of . . . ras, m. Taysiris **3800** 5, 40-1
 Ἀμμωνάς, s. of Isidorus **3786** 41
 Ἀμμώνιος alias Didymus **3786** 47
 Ἀμμώνιος, f. of Isaac **3804** 206
 Ἀμμώνιος, f. of Jacob **3804** 211
 Ἀμμώνιος, from Pecty, s. of Papnuthius **3804** 85
 Ἀμμώνιος, *princeps* (*officiū*) of a *procurator* **3818** 5
 Ἀμμώνιος, s. of Heraclius **3778** 5, 17
 Ἀμμώνιος, s. of Lucius **3804** 66
 Ἀμμώνιος, s. of Romanus **3786** 31
 Ἀμούς **3790** 11
 Ἀμούς, Apollonius alias **3786** 37, 42
 Ἀμούς, s. of Apeis **3786** 36
 Ἀμούς, s. of Apollodidymus **3786** 40
 Ἀμούς, s. of Dionysius **3787** 34
 Ἀμούς, s. of Sarapammon **3787** 27
 Ἀμύντας *see* Index VII (b) s.v. Ἐποίκιον Ἀμύντου
 Ἀμυντιανός: C. Iulius Amyntianus **3786** 54
 Ἀμυντιανός, f. of Theon **3786** 88
 Ἀναστάσιος, cashier **3804** 275, 277, 279
 Ἀνδρέας *see* Index VIII s.v. μοναστήριον
 Ἀνθέστιος alias Valerius **3786** 33
 Ἀνικήτης, κελλός **3787** 23
 Ἀνίκητος, s. of Apollonius **3786** 48
 Ἀντωνί[], f. of Demetrius **3786** 60
 Ἀνούθιος **3804** 100
 Ἀνούθιος, f. of Aciar **3804** 80, 87
 Ἀνούθιος, f. of Peter **3804** 69, 83
 Ἀνούθιος, priest **3804** 107⁸
 Ἀνούθιος, s. of Aciar **3804** 205
 Ἀνούθιος, s. of Apollon, gd.-s. of Jacob **3804** 73
 Ἀνούθιος, s. of Heraclides **3804** 108
 Ἀνούθιος, s. (?) of John, gd.-s. (?) of . . . re **3804** 79
 Ἀνούθιος, s. of Surus **3804** 100
 Ἀνούθιος, s. of Surus **3804** 108
 Ἀνούθιος, s. of Theodoros **3804** 84
 Ἀνούθιος **3803** 8, 19
 Ἀνούπ **3804** 52
 Ἀνούπ **3804** 113
 Ἀνούπ, sailor **3804** 233
 Ἀνούπ, s. of Isaac, gd.-s. (?) of Aion, gt.-gd.-s. (?) of Chōus **3804** 82
 Ἀντίοχος, ἐπικέιμενος **3805** 118
 Ἀντωνίνος *see* Index I s.vv. Antoninus Pius; Marcus Aurelius; Septimius Severus, Caracalla, and Geta; Elagabalus
 Ἀπανάκιος, riverman **3804** 221
 Ἀπέις, f. of Amois **3786** 36
 Ἀπιανός **3807** 15? (or e.g. *Cap*]απιανός)
 Ἀπις, f. of Aur. Acuis, h. of Tsenthonis **3802** 6
 Ἀπίων, f. of Demetrius and Dorus **3778** 4
 Ἀπίων, f. of Isidorus **3787** 37
 Ἀπίων, shepherd, s. of Lycomedes **3778** 31
 Ἀποσι[],ος (gen.), f. of Cyrillus **3810** 7

Ἀπολ(), toparch **3778** 37
 Ἀπολλοδίδυμος, f. of Amois **3786** 40
 Ἀπολλωνία **3819** 2
 Ἀπολλώνιος alias Amois **3786** 37, 42
 Ἀπολλώνιος, b. (?) of Hippeas **3792** 2
 Ἀπολλώ(νιος), f. of Anicetus **3786** 48
 Ἀπολλώνιος, f. of Horus **3787** 50
 Ἀπολλώνιος; Heraclius alias Apollonius, tax-farmer **3783** 5
 Ἀπολλώνιος, *hypomnematographus*, ex-prytanis **3813** 1, 88 **3814** 1, 31 **3815** 1, 14
 Ἀπολλώνιος, s. of Ammo(n . . .) **3786** 45
 Ἀπολλώνιος, s. of Demetrius **3778** 9, 23
 Ἀπολλώνιος, s. of Zoilus **3786** 35
 Ἀπολλώς **3804** 36, 38
 Ἀπολλώς **3804** 69
 Ἀπολλώς **3804** 111
 Ἀπολλώς **3804** 130
 Ἀπολλώς, ἄπα **3804** 252
 Ἀπολλώς, bishop's son **3804** 128, 164
 Ἀπολλώς, from Cynopolis, shipwright **3804** 259
 Ἀπολλώς, from Micra Parorius **3805** 72
 Ἀπολλώς, from Paciac, s. of Losis **3804** 226
 Ἀπολλώς, from Tarusebt **3804** 282
 Ἀπολλώς, *phrontistes* of Netneū **3805** 108
 Ἀπολλώς, riverman **3804** 223
 Ἀπολλώς, s. of Aion **3804** 71
 Ἀπολλώς, s. of Germanus **3804** 74, 88

IX. OFFICIAL AND MILITARY TERMS AND TITLES

άλιαδίτης **3796** 8
 άνάκρις **3784** 2, 14
 άντιγραφή **3820** 8
 άρχείον **3777** 13
 άρχισύμμαχος (**3805** 59)
 άρχοντικός **3805** 82
 άρχων (**3805** 59)
 βασιλεύειν [**3777** 1]
 βασιλεύς see Index II (AD 309)
 βασιλική γή **3800** 10
 βασιλικόν **3777** 26
 βασιλικός γραμματεύς **3782** 1 **3810** 7, 15
 βασιλίσσα **3777** 4
 βοηθός (**3805** 101)
 βουλευτής **3802** 4
 γραμματεύς (**3807** 38)
 γραμματηφόρος [**3796** 9]
 διαδεχόμενος . . . τὰ κατὰ την στρατηγίαν **3782** 1-2
 διασημότατος (perfectissimus) **3793** 4 **3794** 4
 δούξ **3793** 4 **3820** 14
 έξάκτωρ **3794** [2], 20
 έξοχώτατος (eminentissimus) **3791** 3
 έξηγη(τ-) **3802** 4
 έπάρχειος **3793** 6
 έπαρχος (auxiliary prefect) **3793** 9
 — (praef. praet.) **3791** 3 **3794** 7, [11]

επεικτής **3793** 13
 επιστράτηγος **3782** 18
 έπίτροπος (procurator) **3814** 13 **3818** 6
 έπιφανέστατος see Index I s.v. Diocletian and Maximian Augusti, Constantius and Galerius Caesars, Index II (AD 296)
 έπιφανής see Index I s.v. Berenice IV
 έπόπτης **3794** 3, 20 **3821** 16
 ζυγοστάτης (**3805** 30)
 ήγεμονία **3781** 5
 ήγεμών (praefectus Aegypti) **3782** 7 **3799** 3 **3813** 39
 ήγούμενος **3792** 25
 θεϊός see Index VIII
 ιερός see Index VIII
 ίνδικτίων (**3789** 2) **3796** [12] (**3797** 4, 8, 10) **3803** 10, [21] (**3804** 141, 143, 149, 177 (bis), 184, 187 (bis), 190 (bis), 214, 219 (bis), 222, 224, 227 (bis), 232, 234, 236, 238 (bis), 240 (bis), 243 (bis), 245, 248, 253, 256, 257, 262, 265, 266, 270-2, 276 (bis), 279, 285, 286 (bis), 288)
 ίππεύς **3777** 8, 9
 κανών [**3794** 4]
 καστρησιανός (καστρις-pap.) **3805** 73
 κάστρον **3793** 5, 7, 9
 κάτοικος **3777** 8, 9
 (centuria) **3785** [1], [6], 18, 20, 22, 27, 32

κλήρος **3777** 10, 14, 15, 25
 κλιβ(ανάριος? ογ -ανεύς?) **3805** 111
 κράτιςτος (egregius) (**3782** 17)
 λαμπρός **3782** 7 (λαμπρότατος) **3794** [6], 11 (λαμπρότατος) **3802** 5 (bis: λαμπρά και λαμπροτάτη) **3803** 1, 2 (both λαμπρότατος) **3804** 275, 277 (both λαμπρότατος) **3813** 56-7 (λαμπροτάτη)
 λαογραφεϊν **3778** 32 **3779** 20
 λειτουργείν [**3796** 4]
 λειτουργία **3796** 8
 λογιστής **3793** 2 **3794** 2, 20
 μάγιστρος **3820** 12
 μαχαιροφόρος **3777** 7-8 (**3807** 34)
 μείζων (**3805** 58, 68, 91)
 μνήμων **3777** 13
 νομικάριος νομού **3788** 2, 12
 νοτάριος (**3804** 133, 170, 230, 255)
 οξές δρόμος **3796** 9
 οσπριγίτης **3805** 100 (l. οσπρηγ-?)
 ουετρανός **3798** 4, 45, 46
 οφφικιάλιος (**3794** 1)
 παλάτιον **3788** 4
 πατρικός **3804** 187
 περιβλεπτος (spectabilis) (**3797** 2)
 πραιπόσιτος η πάγου **3788** 1
 πραιτώριον **3813** 58
 πρακτορεία (**3807** 24)

πρεσβύτερος (**3783** 7)
 πρίγκιψ **3818** 6 (πρωγιπι (dat.) pap.)
 προπολιτευόμενος **3794** 3, (20)
 πρυτανεύειν (**3813** 88)
 ρύπαριος (**3805** 11, 116)
 Cαραλανεοζάν **3797** 9
 κυγγάριος **3810** 14
 στρατηγία (**3782** 2) **3810** 12
 στρατηγός **3778** 2 [**3779** 2] (**3781** 2) **3792** 28 (**3807** 21) **3810** 11, 16
 στρατηλάτης (**3805** 73)
 συνάρχων **3813** 52-3 **3814** 7
 σύνδικος **3794** 2, 20
 cυστάτης **3787** 1 (**3789** 7) [**3796** 4]
 cχολαστικός (**3797** 2)
 τάξις **3820** 12
 τοπάρχης (**3778** 37) **3779** 23
 τοπαρχία **3807** 25
 τρακτευτής **3805** 31
 ύπατεία see Index II (AD 309, 411, 412)
 ύπατος see Index II (AD 296)
 ύπόμνημα **3820** 10, 16-17
 ύπομνηματογράφος **3813** (2), 88
 φίλος (των πρώτων φίλων) **3777** 7
 φυλή **3796** 4, 6
 χιλάρχος **3777** 7
 χρουώνης **3797** 2

X. PROFESSIONS, TRADES, AND OCCUPATIONS

άγροφύλαξ **3804** 241
 άλιαδίτης see Index IX
 άλιεντικός **3805** 116
 άμπελουργός (**3804** 34, 48, 75, 101, 135 (bis), 167, 191, 218)
 άναγνώστης see Index VIII
 βαφεύς **3806** 11
 γεούχος **3802** 17 **3803** 2
 γεωργός **3801** 1 (**3804** 31, 34, 47, 55, 60, 61, 96, 101, 104, 113, 118-20, 125, 132, 133, 135-7, 163, 169, 176, 178, 181, 183, 193, 214) (**3805** 70)
 γραμμ(ατ-) **3806** 16
 γραμματεύς see Index IX
 γραμματηφόρος see Index IX
 διάκονος see Index VIII
 διάκων see Index VIII
 έλαιουργός (**3804** 265)
 έπικείμενος (**3804** 216, 230, 255) (**3805** 34-5, 118)
 έργάτης **3814** 6
 έργοδιώκτης (**3804** 155 (ler), 156) (**3805** 113)
 ζωγράφος **3791** 2
 καθηγητής **3808** 7-8
 καμηλάριος (**3804** 238)

καμηλάτης **3788** 3, 7
 κεραμεύς **3787** 38
 κλιβ(ανεύς? ογ -άριος?) **3805** 111
 κουρεύς **3809** 1
 μηχανουργός (**3805** 102, 106)
 μυλοκόπος (**3804** 263)
 ναυπηγός **3804** 259, 260
 ναύτης **3804** 149, 233
 νομέυς **3778** 31 [**3779** 18] **3782** 11
 οικόδομος (**3804** 151, 215) **3811** 2
 ούνοπώλης (**3807** 31)
 πλυθευτής (**3804** 151)
 ποταμίτης **3804** (213), 221, 223
 πραγματευτής (**3805** 121)
 πρίστης **3804** 235, 259
 προνοητής (**3804** 154, 225, 236, 260, 277) (**3805** 65, 86, 97)
 πωμαρίτης (**3805** 89)
 ciτομέτρης **3805** 60
 cκυτεύς **3787** 10
 τέκτων **3804** 215, 258, 261 **3805** 102, (106) **3814** 3-4, 5, 14
 τελώνης (**3783** 6)

τεχνίτης **3793** 10, 12 **3794** 5
 τραπέζιτης (**3798** 56²) (**3804** 275, 277, 279)
 φρονιτικῆς (**3804** 57, 129) (**3805** 108)
 φύλαξ **3808** 16

χαρτουλάριος **3804** 239
 χοιρέμπορος **3805** 104 (χοιρεμπολ- pap.)
 χοροπαρρηλημπτης (**3804** 244, 246)
 χρυσοχόος **3791** (4), (6), 8

Fragment of ancient Greek papyrus with several lines of text. The script is a cursive hand, likely from the Hellenistic or Roman period. The text is partially obscured by damage and ink bleed-through from the reverse side.

Visible fragments of text include:

- Line 1: ...αφ' ἡμῶν ...
- Line 2: ...καὶ τῶν ...
- Line 3: ...καὶ τῶν ...
- Line 4: ...καὶ τῶν ...
- Line 5: ...καὶ τῶν ...
- Line 6: ...καὶ τῶν ...
- Line 7: ...καὶ τῶν ...
- Line 8: ...καὶ τῶν ...
